6. <u>Review of Investment Reports for April, May, and June 2011</u>

Mrs. Sheldon reviewed the Investment Report for June 30, 2011, and advised that the total short-term portfolio equaled \$112,970,869, with a yield of .27%, as compared to Standard & Poor's (S&P) Government Investment Pool (GIP) 30-Day Index of .05%, and year-to-date earnings of \$167,485.

For Information: The CIAC:

- A. Heard comments from Steven Alexander and David Jang, PFM Asset Management, LLC, regarding the potential downgrade of the U. S. Treasury, pending the outcome of the August 2, 2011, deadline to raise the Federal debt ceiling, and was advised by Mr. Jang that the U. S. Government's debt is \$14.3 trillion and, if the debt ceiling is not raised, the Government cannot meet its obligations; and
- B. Reviewed the Escambia County Clerk of Court, Florida Investment Performance Review – Quarter Ended June 30, 2011, as prepared by PFM Asset Management, LLC, which includes an Executive Summary that reflects:
 - The County's Long Term Portfolio is of high credit quality and maintains adequate liquidity. The portfolio is invested entirely in Federal Agency, U.S. Treasury, corporate notes, commercial paper and municipal bond securities. The securities are allocated among high quality issuers rated AAA, AA, A-1+ and A-1.
 - The economic recovery continued in the second quarter, albeit at a slower pace. Many economists believe the slower pace of the recovery reflects temporary factors, including the dampening effect of higher food and energy prices on consumer purchasing power and spending, as well as, supply chain disruptions associated with the tragic events in Japan. Although these factors are being considered temporary, Federal Reserve officials lowered their growth forecasts for the second time this year. U.S. central bankers said the economy will expand 2.7% to 2.9% this year, down from forecasts ranging from 3.1% to 3.3% in April.

- B. Continued...
 - Debates over government spending and budget cuts have been at the forefront of the conversation in Europe and the United States during the second quarter. Greece was on the verge of default until Greek officials passed strict austerity measures needed to secure a bailout from the European Union. Meanwhile, in America, Congress has been unable to agree on the Federal budget and debt limit. The ongoing debate almost caused a government shutdown and prompted Standard & Poor's to put America's AAA credit rating on negative watch. Investors are concerned that cuts in government spending in the short run will slow future growth prospects.
 - During the quarter, speculation of a Greek default drove intermediate-term U.S. Treasury yields near or below November 2010 lows. The 2-year U.S. Treasury fell for eleven consecutive weeks, the longest rally since the 1980s, until the last week of June, when Greek officials eased concerns of a Greek default by passing large budget cuts. By the end of the quarter, the 2-year U.S. Treasury yield hit 0.46%, approximately 37 bps lower than it was on March 31, 2011.
 - The Federal Reserve completed its second round of quantitative easing on June 30, 2011. Although the Fed will continue its existing policy of reinvesting principal payments from its securities holdings, Fed Chairman Ben Bernanke indicated that the Fed is putting extraordinary monetary policy action on hold. However, Chairman Bernanke said the Fed will continue to monitor the economy and act as needed.
 - Over the course of the quarter, PFM executed trades to take advantage of the decrease in yields. For example, in April, before rates began to fall, PFM purchased federal agency and Treasury securities in the one to four-year maturity range to increase the portfolio's yield. After intermediate-term rates hit new lows in late June, PFM sold out of Treasury securities to capitalize on market appreciation. These trades resulted in realizing over \$57,000 in gains on sales.

- B. Continued...
 - At the beginning of the quarter, PFM targeted the portfolio's duration at 99% of the benchmark's duration in order to benefit from the yield and roll down offered by the steep yield curve. Over the quarter, as rates decreased PFM allowed the duration of the portfolio to shorten compared to the benchmark's duration. The portfolio's return of 1.56%, outperformed the benchmark's return of 1.49% by 7 basis points (0.07%). In an interest rate environment where yields remain at or near record lows, PFM will continue to position the portfolio's duration short of the benchmark's duration to reduce interest rate risk and the market value erosion that will occur if rates rise.
 - PFM will continue to follow the prudent investment strategies that have safely provided the County with favorable long-term performance during this period of historically low interest rates.
 - Intermediate-term rates remain at or near all-time lows. Further, the Fed continues to state that it plans to keep the target federal funds rates low for an extended period which is likely to keep short-term rates at their currently low levels. For the most part, the market is expecting higher rates in the future as measured by the steepness of the yield curve, or the difference in yield between the 2-year U.S. Treasury Note and the 10-Year U.S. Treasury note, which is at historically wide levels.
 - As such, PFM is currently positioning the portfolio's duration short of the benchmark's duration in order to provide additional protection from market value losses in the event of a sharp yield increase. A shorter duration will also allow for the extension of duration to capitalize on higher yields in the event they increase. PFM will closely monitor the markets to make select purchases of securities when rates move towards the upper end of their range.

- B. Continued...
 - In the coming quarter, PFM will continue to look for opportunities to purchase commercial paper, which has provided a yield advantage over comparably maturing short-term securities. Additionally, utilizing commercial paper will allow PFM to barbell the portfolio by offsetting the duration of longer-term securities.
 - Agency spreads to Treasuries remain narrow. In the case that spreads widen, Treasuries could outperform agencies. At that point, PFM will restructure the portfolio, allocating a larger portion of agency securities.

7. Escambia County, Florida, Investment Policy Amendments

Motion made by Mr. Beargie, seconded by Ms Lovoy, and carried 4-0, with Mr. Adams absent, approving to recommend that the Board of County Commissioners amend the Escambia County, Florida, Investment Policy, Section XIV.B., Page 15, as follows, to allow for market driven options to the benchmarks used for the long-term portfolio:

XIV. PERFORMANCE MEASUREMENTS

B. The long-term investment portfolio shall be designed with the annual objective of achieving a comparable return to the Merrill Lynch 1-3 Year Treasury Index or an appropriate index. The appropriate index will have a duration and asset mix that approximates the portfolio and will be utilized as a benchmark to be compared to the portfolio's total rate of return. The Merrill Lynch 1-3 Year Treasury Index represents all U.S. Treasury securities maturing over one year, but less than three years. This maturity range is an appropriate benchmark based on the objectives of the County.

Motion made by Mrs. Sheldon, seconded by Mr. Beargie, and carried 4-0, with Mr. Adams absent, approving to recommend that the Board of County Commissioners amend the Escambia County, Florida, Investment Policy, Section XII.G.1., Page 12, as follows, as requested by Steven Alexander, PFM Asset Management, LLC, during the Meeting:

XII. AUTHORIZED INVESTMENTS AND PORTFOLIO COMPOSITION

- G. Corporate Notes
 - 1. Purchase Authorization

Corporate notes issued by corporations organized and operating within the United States or by depository institutions licensed by the United States that have a long term debt rating, at the time or purchase, at a minimum <u>"Aa" "A"</u> by Moody's and a minimum long term debt rating of <u>"AA" "A"</u> by Standard & Poor's. In addition, corporate obligations allowed are corporate obligations issued by financial institutions that participate in the FDIC's Temporary Liquidity Guarantee Program and are fully insured by the FDIC and are guaranteed by the full faith and credit of the United States Government.

8. <u>Adjourn</u>

Mr. Alft adjourned the CIAC Meeting at 10:32 a.m.

MEMORANDUM

TO: Honorable Board of County Commissioners

FROM: Ernie Lee Magaha Clerk of the Circuit Court & Comptroller

> By: Vatricia L. Sheldon Patricia L. Sheldon, CPA, CGFO, CPFO, CPFIM Administrator for Financial Services Clerk of the Circuit Court & Comptroller

DATE: August 9, 2011

SUBJECT: July 2011 Investment Report

RECOMMENDATION:

That the Board accepts, for filing with the Board's Minutes, the Investment Report for the month ended July 31, 2011 as required by Ordinance 95-13.

The total portfolio earnings for the month of July equaled \$138,194. The short term portfolio achieved an average yield of <u>.27%</u>. This yield should be compared to the benchmark of the Standard & Poor's Government Investment Pool 30 Day index yielding <u>.04%</u>. The core portfolio achieved an average Yield to Maturity at Cost of <u>1.16%</u> and should be compared to the benchmark of the Merrill Lynch 1 – 3 Yr. Treasury Index yielding <u>.28%</u>.

All investments included in the County's portfolio are in compliance with the County's Investment Policy.
