2.2.4 Describe Proposer's system for processing orders from point of customer contact through delivery and billing. [Insert response in box below]
2.2.5 Describe Proposer's ability to provide detailed electronic reporting of quarterly sales correlated with NPP member ID numbers of Participating Agency purchases as set forth in Addendum A to Vendor Administration Agreement (VAA), a copy of which is available upon request from the PPA. [Insert response in box below]
2.2.6 Describe the capacity of Proposer to meet Minority and Women Business Enterprises (MWBE) preferences, which may vary among Participating Agencies. [Insert response in box below]

3.0 DISTRIBUTION SYSTEM:

3.1 Describe distribution of products and services through Proposer's distribution system (including Alaska and Hawaii if applicable). [Insert response in box below]
3.2 Provide Proposer's shipping and delivery policy, including standard delivery time and any options and costs for expedited delivery and return policies. [Insert response in box below]
3.3 If applicable, detail the sub-contracting process (ordering, shipment, invoicing) for those products not carried in Proposer's distribution center. The process shall be transparent to the Participating Agencies. [Insert response in box below]
3.4 What is Proposer's backorder policy? Is your policy to classify as "immediate or cancel" (requiring the Participating Agency to reorder if item is backordered) or "good until cancelled"? [Insert response in box below]

4.0 MARKETING:

4.1 Outline Proposer's plan for marketing the Products and Services to the Participating Agencies on a local and national basis. Include any marketing incentives such as committed dollars for advertising, conferences/travel and custom marketing materials. [may attach marketing plan or insert response in box below]

4.2 Explain how Proposer will educate its local and national sales force about the use of the Master Price Agreement. [Insert response in box below]

5.0 Proposer point of contact (POC) who will administer, coordinate, and manage this program with NPP and the Public Procurement Authority.

Contact Person:		**Title:**	
Mailing Address:			
City:		**State & Zip:**	
Email Address:			
Phone #:		**Fax #:**	
* Attach current resume of National Account Manager that will be the POC managing this contract.			

6.0 CUSTOMER SUPPORT SERVICES:

Explain Proposer's policy regarding each of the following if applicable to product(s) and/or service(s):

6.1 Auditing for order completeness. [Insert response in box below]
6.2 Replacement policy (i.e., damaged or defective goods). [Insert response in box below]
6.3 Minimum order requirement (e.g., Individual item vs. case lot). [Insert response in box below]

6.4 Customer service hours/days of operation [Insert response in boxes below]						
Monday:	Tuesday:	Wednesday:	Thursday:	Friday:	Saturday:	Sunday:

6.5 Special Orders. [Insert response in box below]
6.6 Post sale services issues. [Insert response in box below]
6.7 Repair services, including repair warranty programs, if any. Proposer shall identify, where applicable, authorized factory repair facilities that will honor the warranty of items on contract. [Insert response in box below]
6.8 Technical support services Proposer provides. [Insert response in box below]
6.9 Product substitution policy. [Insert response in box below]
6.10 Identify trade-in program criteria (if applicable). [Insert response in box below]

6.11. After hours service (including weekends and holidays) [Insert response in boxes below]						
Monday:	Tuesday:	Wednesday:	Thursday:	Friday:	Saturday:	Sunday:

6.12 Shipment tracking. [Insert response in box below]
6.13 Back order tracking process. [Insert response in box below]

6.14 Return Item process, including any/all associated fees (e.g., restocking, shipping, turnaround time on returns). [Insert response in box below]
6.15 Electronic billing. [Insert response in box below]
6.16 Explain how Proposer will resolve complaints, issues, or challenges. [Insert response in box below]
6.17 Other services not already covered. [Insert response in box below]

7.0 DELIVERY AND FREIGHT CHARGES:

7.1 Identify delivery and/or shipping costs or provide a shipping rate schedule based on weight, item, and/or destination for all items ordered within the continental U.S. (and Hawaii/Alaska) The Proposer shall identify all exceptions to this shipping rate schedule. [Insert response in box below]
7.2 Identify policy for transfer of product ownership (delivery) and damage/issue resolution. [Insert response in box below

Declaration of Non Collusion

The undersigned does hereby declare that there has been no collusion between the undersigned, the Public Procurement Authority, and National Purchasing Partners, and in further support of said Declaration, states as follows:

The person, firm, association, co-partnership or corporation herein named has not, either directly or indirectly, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding or solicitation in the preparation and submission of a proposal to the Public Procurement Authority for consideration in the award of a contract or Master Price Agreement negotiated as a result of this Request for Proposal.

ATTACHMENT C
SPECIFICATIONS

FIRE APPARATUS

Proposers should respond with pricing for all equipment and options they wish to be considered in the evaluation for a possible award and master price agreement.

Response should include any and all fire apparatus proposer wishes to be considered for contract including but not limited to:

Pumper Fire Apparatus
Initial Attack Fire Apparatus
Mobile Water Supply Fire Apparatus
Aerial Fire Apparatus
Quint Fire Apparatus
Special Service Fire Apparatus
Mobile Foam Fire Apparatus

Apparatus must meet the general guidelines and specifications required in the latest edition of the National Fire Protection Association (NFPA) Standard for Automotive Fire Apparatus (NFPA 1901) and any standards referenced therein. All proposed apparatus must also comply with all applicable federal licensing, rules and regulations including but not limited to:

- American National Standards Institute (ANSI)
- American Society of Mechanical Engineers (ASME)
- American Society for Nondestructive Testing (ASNT)
- American Society for Testing Materials (ASTM)
- American Welding Society (AWS)
- Department of Transportation (DOT)
- Environmental Protection Agency (EPA)
- Federal Motor Vehicle Safety Standards (FMVSS)
- Institute of Electrical and Electronics Engineers (IEEE)
- National Institute for Occupational Safety and Health (NIOSH)
- Occupational Safety and Health Administration (OSHA)
- Society of Automotive Engineers (SAE)
- Underwriters Laboratory (UL)

Additionally, all proposed apparatus must meet applicable state DOT, licensing, rules and regulations in states covered by the response.

Because the specifications of this RFP are general in nature in order to meet the needs of the PPA and all members of the Government Division of National Purchasing Partners, it is incumbent upon the proposer to provide specifications and details for all apparatus and options in their response.

All responses must outline all related aspects of the vehicle sale including but not limited to sales (through authorized dealers), pre-delivery costs (including up to 3 factory visits), delivery, training, manuals, warranty, and service.

ATTACHMENT D
FIRE APPARATUS PRICING SCHEDULE

The intent is for each Proposer to submit their complete product line so that Participating Agencies may order a wide array of products and services as appropriate for their needs. Proposer is encouraged but is not required to respond to all possible categories. Proposer may subcontract items Proposer does not supply. The Proposer should not necessarily limit the proposal to the performance of the services in accordance with this document but should outline any additional services and their costs if the Proposer deems them necessary to accomplish the needs of the cooperative purchasing program.

Pricing and resulting relative discount to PPA and NPP membership shall be clearly delineated on each proposal. Contract pricing shall be based upon:

1) Fixed discount(s) off published price list(s) or catalog(s)
2) Firm fixed price with economic adjustment (contingencies for economic price adjustments must be identified in the proposal)
3) A combination of the above.

Vehicle Models

Proposers shall provide pricing on all apparatus vehicle models they wish to be considered including, but not limited to, the following categories where applicable:

- Chassis/cab builder
- Cab designs (2/4 door, tilt cab, etc.)
- Cab/body sheet metals (e.g., Stainless steel, aluminum, galvanized)
- Rear axle configuration (single/tandem/tandem front steering/triple rear)
- Fire pump capacities & mounting locations (e.g., 1250/1500/2500 GPM Pump, rear/mid-mounted)
- Body configurations (e.g., Walk-In/Non-Walk-In body)
- Aerial categories (e.g., Construction/turntable positions/aerial device functions)

Options

Proposers shall provide pricing on all options, modifications, and accessories in a format that best represents their product line and pricing structure. This may include specific pricing for some options and may also include general pricing/discounts for categories of options. Proposer may also indicate availability and pricing of all other non-specified options. The intent is to provide proposers the opportunity to present as much product as possible in the format that fits within their individual formatting needs so that the resulting award allows PPA and NPP members the greatest number of procurement options. Options which replace standard equipment on a proposed vehicle model should be priced net of any credit due for the replaced item.

The following is *one example* of how pricing could be represented in proposer's response:

FIRE APPARATUS PRICING SCHEDULE	
NOTE: Be sure to provide ALL models for each particular type of apparatus vehicle to be considered. Add/Insert additional lines as necessary. The following categories are just <u>suggested</u>; it is anticipated the name, number, and name of actual categories provided by proposer will vary significantly	Percentage (%) off List Price* (***OR*** fixed price if % off pricing is not available)
PUMPER	
Example: Ford F-550 2-Door, Pumper, Stainless Steel Body, Single Axle, 1250 GPM Pump, Mid-Mounted	**Example:** 15% off List **OR** $550,000
Options for each vehicle model or type may be listed here or as a separate options table	
INITIAL ATTACK	
Options for each vehicle model or type may be listed here or as a separate options table	
MOBILE WATER SUPPLY	
Options for each vehicle model or type may be listed here or as a separate options table	

AERIAL	
Options for each vehicle model or type may be listed here or as a separate options table	
QUINT	
Options for each vehicle model or type may be listed here or as a separate options table	
SPECIAL SERVICE	
Options for each vehicle model or type may be listed here or as a separate options table	
MOBILE FOAM	
Options for each vehicle model or type may be listed here or as a separate options table	

* Identify source of list price and publication date or expiration date.

Example FIRE APPARATUS OPTIONS TABLE	
NOTE: provide all options to be considered. Add/Insert additional lines as necessary. The following categories are just <u>suggested</u>; it is anticipated the name, number, and name of actual categories provided by proposer will vary significantly	Percentage (%) off List Price* (***OR*** fixed price if % off pricing is not available)
OPTION DESCRIPTION	**PRICING**
Example: Entire catalog of options	**Example:** 10% Off List
Example: Chrome wheel upgrade, single axle	**Example:** $8,000
The next section could be used to represent other options not specifically listed above, including manufacturer and dealer installed options. These options may be included as a general category or as option categories.	
Example: "All other non-specified options available from the manufacturer"	**Example:** 5% Off List
Example: "All other non-specified options available from the dealer"	**Example:** List Price
Example: "All other non-specified emergency lighting options"	**Example:** At least 10% Off List

* Identify source of list price and publication date or expiration date.

ATTACHMENT E
PROPOSAL EVALUATION FORM

Proposals will be evaluated using a two-step process.

The first step evaluates the responsiveness of the proposer and determines 1) if the proposer is deemed fully responsive enabling the proposal to move to the second step and 2) if the proposal will be evaluated as a local response (within the State of Oregon) or a national response (covering the entire U.S. or a large region of the U.S.).

The second step of the evaluation process will only occur with proposals deemed fully responsive from the first step. The second step fully evaluates the proposers response based on the criteria found in the proposal evaluation form.

STEP 1
Proposal Responsiveness

Component	YES	NO
Submitted on time		
Proposal signed		
Completed Proposer Workbook		
Included pricing structure		
Included references		
Deemed Fully Responsive	YES	NO
Categorized as Local or National	Local	National

Proposal Evaluation Form

STEP 2
Full Evaluation of Proposal

Point Value Definitions
5- Excellent – Substantially exceeds requirements
4-Very Good- Meet all requirements
3- Good – Meets most requirements
2- Satisfactory – Minimally meets requirements
1- Unsatisfactory – Requirements essentially not met
0- No Response provided

Component Evaluated	Weight	Possible Points (0-5)	Total Points (Weight x PP)	Evaluator's Comments
Pricing: Product price analysis and discounts proposed including favorable pricing for cooperative purchasing.	20			Comments:
Product Line: Product line offered in indicated coverage area, considering geographic distribution limitations, warranties, any sub-proposers and coordination of manufacturer and distribution in response.	25			Comments:
Conformance: Completeness of proposal and the degree to which the Proposer responds to the terms and all requirements of the RFP requirements and specifications.	10			Comments:

Marketing: The Proposer's marketing plan to promote the resulting contractual agreement and ability to incorporate use of agreement in their sales system throughout indicated coverage region.	20			Comments:
Customer Service: Support dedicated to Lead Contracting and Participating Agencies. Ability to conduct e-commerce and meet promised delivery timelines.	5			Comments
Coverage: Ability to provide products and services for indicated coverage region including distribution, retail & service facilities and staff availability. **Note Exhibit 1 from PPW*	10			Comments:
Proven Experience & References: Proposer's success in providing products and services in a timely manner including Past Performance Information (PPI) review.	10			Comments:

ATTACHMENT F

ORS CHAPTERS 279 (AS MAY BE AMENDED) REQUIREMENTS

Successful Proposer (Contractor) shall comply with the requirements of this ATTACHMENT F to the extent required by any applicable federal or state law.

(1) Contractor shall pay promptly, as due, all persons supplying labor or materials for the prosecution of the work provided for in the contract, and shall be responsible for such payment of all persons supplying such labor or material to any Subcontractor.

(2) Contractor shall promptly pay all contributions or amounts due the Industrial Accident Fund from such Contractor or Subcontractor incurred in the performance of the contract.

(3) Contractor shall not permit any lien or claim to be filed or prosecuted against the District on account of any labor or material furnished and agrees to assume responsibility for satisfaction of any such lien so filed or prosecuted.

(4) Contractor and any Subcontractor shall pay to the Department of Revenue all sums withheld from employees pursuant to ORS 316.617.

(5) If Contractor fails, neglects or refuses to make prompt payment of any claim for labor or materials furnished to the Contractor or a Subcontractor by any person in connection with the contract as such claim becomes due, the District may pay such claim to the persons furnishing the labor or material and charge the amount of payment against funds due or to become due Contractor by reason of the contract. The payment of a claim in the manner authorized hereby shall not relieve the Contractor or his surety from his or its obligation with respect to any unpaid claim. If the District is unable to determine the validity of any claim for labor or material furnished, the District may withhold from any current payment due Contractor an amount equal to said claim until its validity is determined and the claim, if valid, is paid.

(6) Contractor shall promptly, as due, make payment to any person, co-partnership, association, or corporation, furnishing medical, surgical and hospital care or other needed care and attention, incident to sickness or injury, to employees of such Contractor, of all sums which the Contractor agrees to pay for such services and all monies and sums which the Contractor collected or deducted from the wages of employees pursuant to any law, contract or agreement for the purpose of providing or paying for such service.

(7) Contractor shall pay employees for overtime work performed under the contract in accordance with ORS 653.010 to 653.261 and the Fair Labor Standards Act of 1938 (29 USC 201, *et seq.*)

(8) The Contractor must give notice to employees who work on this contract in writing, either at the time of hire or before commencement of work on the contract, or by posting a notice in a location frequented by employees, of the number of hours per day and the days per week that the employees may be required to work.

(9) All subject employers working under the contractor either employers that will comply with ORS 656.017, or employers that are exempt under ORS 656.126.

(10) All sums due the State Unemployment Compensation Fund from the Contractor or any Subcontractor in connection with the performance of the contract shall be promptly so paid.

(11) The contract may be canceled at the election of District for any willful failure on the part of Contractor to faithfully perform the contract according to its terms.

(12) Contractor certifies compliance with all applicable Oregon tax laws, in accordance with ORS 305.385.

(13) Contractor certifies that it has not discriminated against minorities, women or emerging small business enterprises in obtaining any required subcontractors.

WIPHE RESPONSE FORM

THIS FORM MUST BE RETURNED WITH SOLICITATION RESPONSE

Vendor servicing Washington State AGREES to sell items included in this solicitation to WIPHE institutions at prices offered, unless otherwise noted below:

_____ DOES NOT agree to sell to WIPHE Institutions.

_____ AGREES to sell to WIPHE Institutions at same prices and discounts, with the following exceptions: (attach additional pages as necessary)

Vendor must state geographic areas or specific institution(s) listed below within the State of Washington that are EXCLUDED from the contract(s) resulting from this solicitation:

Washington Institutions of Public Higher Education (WIPHE). See list on following page.

If Vendor agrees to sell to the WIPHE Institutions, a WIPHE Contract number will be assigned and the information will be reported to the Council of Presidents. The Council of Presidents notifies all the other schools when a WIPHE contract has been awarded and a master list will be maintained and the WIPHE website updated. WIPHE shall determine, at its absolute discretion, whether it shall accept and/or utilize the contract resulting from the Request for Proposal

PUBLIC PROCUREMENT AUTHORITY
FIRE APPARATUS Solicitation Synopsis
Solicitation No. 1420

Intent

The Public Procurement Authority (PPA) served as Lead Agency to solicit proposals for Fire Apparatus. PPA works in cooperation with National Purchasing Partners "NPP" and its Government Division dba NPPGov, dba FireRescue GPO, dba Law Enforcement GPO and dba Public Safety GPO (collectively hereinafter "NPPGov"), to service the PPA and NPPGov membership. The published Request for Proposal (RFP) contained provisions that permitted all members of PPA and NPPGov to "piggy-back" off the resulting Master Price Agreement.

Determination for issuing RFP vs. Sealed Bid

PPA has determined that it is advantageous for PPA to procure Fire Apparatus using the competitive RFP process rather than sealed bidding. Sealed bidding limits evaluation of offers solely to compliance with the requirements, provides no opportunity to compare the product and service offerings among the vendors, prohibits revision of the offers, and uses price as the predominate deciding factor. Such limitations prevent PPA from awarding the most advantageous contract(s) for PPA and its members.

Procedure

PPA issued an RFP (1420) on October 22, 2014.

The RFP was published in USA Today on October 27, 2014.

The RFP was published in the Daily Journal of Commerce on January 12, 2015.

The original RFP close date was January 26, 2015 but was extended to February 12, 2015 due to publication requirements.

The RFP was awarded on April 13, 2015.

The RFP was posted to the following web sites: www.nppgov.com, www.procurementauthority.org, and www.findrfp.com

The text of the published notice of solicitation is as follows:

Public Procurement Authority (PPA)
NOTICE OF SOLICITATION
PPA intends to enter into a master price agreement for the procurement of the following products and services to PPA members and available to all members of the national cooperative purchasing program National Purchasing Partners, LLC ("NPPGov").

Fire Apparatus #1420
Industrial and Medical Gases, Accessories and Equipment #1415
Station Alerting #1425
Responses due 5:00 pm February 12, 2015
For information or a copy of the Request for Proposal contact PPA, Heidi Arnold at 855-524-4572, questions@procurementauthority.org or download at www.procurementauthority.org

PPA received proposals from the following vendors:

1. Toyne
2. Pierce Manufacturing
3. E.J. Metals
4. Sutphen
5. HME

Proposals were evaluated by PPA based on the criteria contained in the RFP and the following successful proposers were selected:

National:

- **E.J. Metals**
- **HME**
- **Pierce Manufacturing**
- **Sutphen**
- **Toyne**

Evaluation

The evaluation was based on the following criteria as described in the RFP (weighted):

Pricing: Product price analysis and discounts proposed including favorable pricing for cooperative purchasing.	20
Product Line: Product line offered in indicated coverage area, considering geographic distribution limitations, warranties, any sub-proposers and coordination of manufacturer and distribution in response.	25
Conformance: Completeness of proposal and the degree to which the Proposer responds to the terms and all requirements of the RFP requirements and specifications.	10
Marketing: The Proposer's marketing plan to promote the resulting contractual agreement and ability to incorporate use of agreement in their sales system throughout indicated coverage region.	20

Customer Service: Support dedicated to Lead Contracting and Participating Agencies. Ability to conduct e-commerce and meet promised delivery timelines.	5
Coverage: Ability to provide products and services for indicated coverage region including distribution, retail & service facilities and staff availability. **Note Exhibit 1 from PPW*	10
Proven Experience & References: Proposer's success in providing products and services in a timely manner including Past Performance Information (PPI) review.	10
TOTAL	100

Pricing Structure

E.J. Metals: Proposer provided a discount off list. See Price List Attachment in the resulting Master Price Agreement.

HME: Proposer provided a fixed price discount. See Price List Attachment in the resulting Master Price Agreement.

Pierce Manufacturing: Proposer provided a fixed price discount. See Price List Attachment in the resulting Master Price Agreement.

Sutphen: Proposer provided a discount off list. See Price List Attachment in the resulting Master Price Agreement.

Toyne: Proposer provided a fixed price discount. See Price List Attachment in the resulting Master Price Agreement.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16070 **County Administrator's Report 10. 17.**
BCC Regular Meeting **Budget & Finance Consent**
Meeting Date: 05/16/2019
Issue: Contract Award for Motley Court Gully Improvement
From: PAUL NOBLES, Purchasing Manager
Organization: Asst County Administrator - Lovoy
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Contract Award for PD 18-19.033, Motley Court Gully Improvements - Paul Nobles, Purchasing Manager, Office of Purchasing

That the Board approve and authorize the Interim County Administrator to sign the Agreement Between Escambia County, Florida, and Chavers Construction, Inc., per the terms and conditions of PD 18-19.033, Motley Court Gully Improvements, in the amount of $565,228.78.

[Funding:
Grant (75%) - Fund 352, LOST III; Cost Center 210131, Motley Court Clear Creek; Object Code 56301, Improvements Other Than Buildings; Project Code 08EN0068; $423,921.58; and

County Match (25%) - Fund 352, LOST III; Cost Center 210107, Transportation & Drainage; Object Code 56301, Improvements Other Than Buildings; Project Code 08EN0068; $141,307.20
Total - $565,228.78]

BACKGROUND:

The Motley Court Gully Improvement project primarily involves clearing & grubbing, earthwork, and drainage improvements associated with the construction of improvements to an eroded gully. The limits of construction begin at the end north end of Motley Court and extend north approximately 1,600 feet, to approximately 120 feet south of Clear Creek near the east end of Crooked Oak Drive. The project site is approximately three acres in size. The project's overall goal is to protect Clear Creek from sediment deposition caused by the continued erosion of the gully by constructing a step-system of sediment basins, drainage

structures, conveyance piping, and ditch checks. Areas disturbed by the project will be either be sodded, covered in turf reinforcement matting, or both. The project is funded by the Emergency Watershed Protection (EWP) Program through the Natural Resources Conservation Service (NRCS) of the U.S. Department of Agriculture (USDA).

The legal advertisement for this Invitation to Bid was advertised in the Pensacola News Journal on March 18, 2019, and notices were sent to 127 registrants through Vendor Registry. A non-mandatory pre-solicitation conference was held on April 02, 2019, and was attended by eight firms. Six bids were received on April 17, 2019 and Chavers Construction, Inc. was deemed the lowest responsive bidder with a bid of $565,228.78.

This project is located in Commissioner District 5.

BUDGETARY IMPACT:

Funding:
Grant (75%) - Fund 352, LOST III; Cost Center 210131, Motley Court Clear Creek; Object Code 56301, Improvements Other Than Buildings; Project Code 08EN0068; $423,921.58
County Match (25%) - Fund 352, LOST III; Cost Center 210107, Transportation & Drainage; Object Code 56301, Improvements Other Than Buildings; Project Code 08EN0068; $141,307.20
Total - $565,228.78

LEGAL CONSIDERATIONS/SIGN-OFF:

Attorney Standard Form of Contract, Form D: Construction - Road/Drainage

PERSONNEL:

All work associated with this recommendation was done in-house and no additional staff was required.

POLICY/REQUIREMENT FOR BOARD ACTION:

This recommendation is in compliance with the Code of Ordinances of Escambia County, Florida 1999, Chapter 46, Finance, Article II, Purchases and Contracts.

IMPLEMENTATION/COORDINATION:

The Office of Purchasing will issue the Attorney Standard Form of Contract, Form D: Construction - Road/Drainage, and the Purchase Order.

Sec. 46-110.-Local Preference in Bidding

a) Legislative Intent:

The Escambia County Board of County Commissioners finds that local businesses are often at a disadvantage when competing with other non-local businesses in that the cost of doing business in Escambia County is higher than other areas of the state and giving local businesses a preference in the procurement of goods and services serves a compelling public purpose for the benefit of the taxpayer and residents of Escambia County as such preference encourages local industry, employment opportunities, and increases the County's overall tax base.

b) "Local Business" Defined:

For the purposes of this section, "Local Business" shall mean a business which meets all of the following criteria:

1. Has had a fixed office or distribution point located in and having a street address within Escambia County of Santa Rosa County for at least one (1) year immediately prior to the issuance of the request for competitive bids by the County. The fixed office or distribution point must be staffed by at least one (1) employee. Post Office boxes are not verifiable and shall not be used for the purpose of establishing a physical address, and

2. Holds any business license required by Escambia County or Santa Rosa County, and

3. Is the principal Offeror who is a single Offeror; a business which is the prime Contractor and not a Sub-Contractor, or a partner, or joint venture submitting an offer in conjunction with other businesses.

c) Certification:

Any vendor claiming to be a local business as defined above shall so certify in writing to the Escambia County Office of Purchasing. The certification shall provide all necessary information to meet the requirements provided herein. The purchasing agent shall not be required to verify the accuracy of any such certification, and shall have the sole discretion to determine if a vendor meets the definition of a "Local Business."

d) Preference in Purchase of Commodities and Services by Means of Competitive Bid:

Except where federal or state law, or any other funding source, mandates to the contrary, Escambia County may give preference to local businesses in the following manner:

Competitive Bid (Local Price Match Option): Each formal competitive bid solicitation (i.e. sealed bids) shall clearly identify how the price order of the bids received will be evaluated and determined.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000.00 and $249,999.99, and the bid submitted by one or more qualified and responsive local businesses is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000.00 and $249,999.99, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **Community Redevelopment Area (CRA)** is within **seven percent (7%)** of the price submitted by the non-local business, then the local business located in a designated CRA with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualifies and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000.00 and $999,999.99, and the bid submitted by one or more qualified and responsive local businesses is within **three percent (3%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000.00 and $999,999.99, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **CRA** is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000.00, and the bid submitted by one or more qualified and responsive local businesses is within **two percent (2%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000.00, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **CRA** is within **four percent (4%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

In such instances, staff shall first verify whether the lowest non-local bidder and the lowest local bidder are in fact qualified and responsive bidders. Next, the purchasing department shall invite the lowest local bidder in writing to submit a matching offer which shall be submitted in writing to the Escambia County Office of Purchasing within five (5) business days thereafter.

If the lowest local bidder does not respond or otherwise submits a written offer that does

not fully match the lowest bid from the lowest non-local bidder tendered previously then award shall be made to the lowest overall qualified and responsive non-local bidder.

In the event a local bidder is awarded a contract pursuant to this section, any requests for change orders increasing the cost of the project must be approved by the Escambia County Board of County Commissioners.

e) Notice:

All bid solicitation documents shall include notice to vendors of the local preference policy.

f) Waiver of the Application of Local Preference:

The application of local preference to a particular purchase or contract for which the Board of County Commissioners is the awarding authority may be waived upon approval of the Board of County Commissioners.

g) Limitations:

1. The provisions of this section shall apply only to procurements which are above the formal bid threshold as set forth in the Escambia County Purchasing Code.

2. The provisions of this section shall not apply where prohibited by federal or Florida law, or where prohibited under the conditions of any grant.

3. The provisions of this section shall not apply to any purchase exempted from the provisions of the Escambia County Purchasing Code.

4. The provisions of this section shall not apply to contracts made under the Consultants Competitive Negotiation Act (CCNA), F.S. § 287.055.

h) Penalties:

1. Misrepresentation:

A vendor who misrepresents the local preference status of its firm in a bid or proposal submitted to the County will lose the privilege to claim local preference status for a period of up to one (1) year from the date of the award of the contract or upon completion of the contract, whichever is greater.

2. Failure to Maintain Local Business Preference Qualifications:

Any vendor that does not maintain its local preference status resulted in the awarded contract shall be in breach of contract and will be subject to termination of the contract, suspension of payments under the contract, and loss of the local preference status on the contract awarded.

3. Lack of Good Faith:

The Contractor or firm may show that it attempted through reasonable and objective means and in good faith to comply with the terms of the contract relating to local businesses but was unable to comply. If the County determines that the Contractor or firm did not act in good faith, all amounts paid to the Contractor or

firm under the County contract intended for expenditure with the local business shall be forfeited and recoverable by the County. In addition, the contract may be rescinded and the County may return all or a portion of the goods received and recover all amounts paid under the contract for the goods which were returned.

Effective July 1, 2015, the County **may not** use a local preference for a "competitive solicitation for **construction services** in which **fifty percent (50%) or more** of the cost will be paid from state appropriated funds which have been appropriated at the time of the competitive solicitation." For any such solicitation, the County must disclose in the bid package that "any applicable local ordinance or regulation does not include any local preference…" See §255.0991, Florida Statutes.

ESCAMBIA COUNTY, FLORIDA
INVITATION TO BID
BIDDER'S CHECKLIST
MOTLEY COURT gully IMPROVEMENT PROJECT
SPECIFICATION PD 18-19.033

HOW TO SUBMIT YOUR BID:
Please review this document carefully. Offers that are accepted by the County are binding contracts. **Incomplete bids are not acceptable.** All documents and submittals shall be received by the Office of Purchasing on or before the date and hour specified for receipt. Late bids will be returned unopened.

* *Documents submitted with Bids are to be on the forms provided in the Invitation to Bid and photocopies of other required documents.*

THE FOLLOWING DOCUMENTS SHALL BE RETURNED WITH THE BID:
- Solicitation, Offer, and Bid Form. The Bid Form must contain an original signature in indelible ink. Bids with photocopies or scanned signatures will not be accepted.
- Bid Surety (bond, check, etc.)

THE FOLLOWING DOCUMENTS SHOULD BE RETURNED WITH THE BID:
- Sworn Statement Pursuant to Section 287.133(3)(A), Florida Statutes on Entity Crimes.
- Drug-Free Workplace Form.
- Information Sheet for Transactions and Conveyances Corporate Identification.
- Certificate of Authority to do Business from the State of Florida.
- Occupational License.
- Florida Department of Business and Professional Regulation – License(s), Certification(s), and/or Registration(s).

BEFORE YOU SUBMIT YOUR BID, HAVE YOU:
Placed your bid with all required submittal items in a sealed envelope, clearly marked for specification number, project name, name of bidder, and due date and time of bid receipt?

THE FOLLOWING DOCUMENTS ARE REQUIRED UPON NOTICE OF AWARD:
- Certificate of Insurance
- Payment and Performance Bonds

HOW TO SUBMIT A NO BID:
If you do not wish to bid at this time, please remove the Solicitation, Offer, and Bid Form from the Bid Package and enter No Bid in the "Reason for No Offer" block, your company's name, address, signature, and return the Solicitation, Offer, and Bid Form in a sealed envelope. This will ensure your company's active status in our Bidder's list.

This form is for your convenience to assist in filling out your bid.
Do not return this form with your bid.

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(A), FLORIDA STATUTES, ON ENTITY CRIMES

1. This sworn statement is submitted to _____
(Print Name of Public Entity)

By _____
(Print Individual's Name and Title)

For _____
(Print Name of Entity Submitting Sworn Statement)

Whose business address is:

_____

_____

And (if applicable) its Federal Employer Identification Number (FEIN) is:

_____

If the entity has no FEIN, include the Social Security Number of the Individual signing this sworn statement: _____

2. I understand that a "public entity crime" as defined in Paragraph 287.133(1)(g), **Florida Statutes**, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in paragraph 287.133(1)(b), **Florida Statutes**, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), **Florida Statutes**, means:

    a. A predecessor or successor of a person convicted of a public entity crime; or

    b. An entity under the control any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

c. I understand that a "person" as defined in Paragraph 287.133(1)(e), **Florida Statutes**, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into binding contract and which bids or applies to bid on contracts for the provision of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

d. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. **Indicate which statement applies.**

_____ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with a convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that is not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. **(Attach a copy of the final order.)**

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY INDENTIFIED IN PARAGRAPH ONE (1) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

Drug-Free Workplace Form

The undersigned vendor, in accordance with Florida Statue 287.087 hereby certifies that _____ does:

(Name of Business)

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business' policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in Paragraph One (1).

4. In the statement specified in Paragraph One (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or please of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in a drug assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Paragraphs 1 through 5.

SPECIAL TERMS AND CONDITIONS

The Board of County Commissioners, Escambia County, Florida, invites your company to submit a sealed offer on the item(s) as listed in this solicitation request.

All terms and conditions below are a part of this request, and no offer will be accepted unless all these conditions have been complied with. The County reserves the right to waive informalities in any offer; to reject any or all offers, in whole or in part, and/or to accept the offer(s) that in its judgement is from the lowest, most responsible, and responsive Offeror(s).

Instructions to Offerors

1. General Information

All offers to be considered shall be in the possession of the Office of Purchasing prior to the time of the solicitation closing. Offers may be mailed or delivered to the Office of Purchasing, 2nd Floor, Room 11.101, Matt Langley Bell, III Bldg., 213 Palafox Place, Pensacola, FL 32502, in a sealed envelope clearly marked:

Specification Number PD 18-19.033, "Motley Court Gully Improvement Project", Name of Submitting Firm, Time and Date due.
Note: If you are using a courier service (FedEx, Airborne, UPS, etc.) you must mark the air-bill and envelope or box with the Specification number and project name.

Regardless of the method of delivery, each Offeror shall be responsible for his offer(s) being delivered on time as the County assumes no responsibility for same. Offers offered or received after the time set for solicitation closing will be rejected and returned unopened to the Offeror(s).

The Following Policy will apply to all methods of source selection:

A. Conduct of Participants

After the issuance of any solicitation, all bidders/proposers/protestors or individuals acting on their behalf are hereby prohibited from **lobbying** as defined herein or otherwise attempting to persuade or influence any elected County officials, their agents or employees or any member of the relevant selection committee at any time during the **blackout period** as defined herein; provided, however, nothing herein shall prohibit bidders/proposers/protestors or individuals acting on their behalf from communicating with the purchasing staff concerning a pending solicitation unless otherwise provided for in the solicitation or unless otherwise directed by the Purchasing Manager.

B. Definitions

Blackout Period means the period between the time the Bids for invitations for bid or the request for proposal, or qualifications, or information, or requests for letters of interest, or the invitation to negotiate, as applicable, are received at the Escambia County Office of Purchasing and the time the Board awards the contract and any resulting bid protest is resolved or the solicitation is otherwise cancelled.

Lobbying means the attempt to influence the thinking of elected County officials, their agents or employees or any member of the relevant Selection Committee for or against a specific cause related to a pending solicitation for goods or services, in person, by mail, by facsimile, by telephone, by electronic mail, or by any other means of communication.

C. Sanctions

The Board may impose any one or more of the following sanctions on a non-employee for violations of the policy set forth herein:

1) Rejection/Disqualification of Submittal,

2) Termination of Contract; or

3) Suspension or Debarment as Provided in Sec. 46-102 of the Escambia County Code of Ordinances.

This policy is not intended to alter the procedure for Protested Solicitations and Awards as set forth in the Sec. 46-101 of the Escambia County Code of Ordinances.

2. Scope of Work

The project primarily involves clearing & grubbing, earthwork, and drainage improvements associated with the construction of improvements to an eroded gully. The limits of construction begin at the end north end of Motley Court and extends north approximately 1,600 feet, to approximately 120 feet south of Clear Creek near the east end of Crooked Oak Drive. The project site is approximately three (3) acres in size. The project's overall goal is to protect Clear Creek from sediment deposition caused by the continued erosion of the gully by constructing a step-system of sediment basins, drainage structures, conveyance piping, and ditch checks. Areas disturbed by the project will be either be sodded, covered in turf reinforcement matting, or both. The project is funded by the Emergency Watershed Protection (EWP) Program through the Natural Resources Conservation Service (NRCS) of the U.S. Department of Agriculture (USDA).

3. Bid Surety

Each offer shall be accompanied by a bid bond, cashier's check or certified check in the amount of **5%** of the total offer.

Checks or bonds are to be made payable to Escambia County, Florida. The amount of the bond or check is the amount of liquidated damages agreed upon should the offeror fail or refuse to enter into a contract with the County.

A County warrant in the amount of the bid check(s) of the successful offeror(s) will be returned immediately after the offeror and the County are mutually bound by contract as evidenced by signatures thereto by an authorized representative of both the offeror and the County, and/or the offeror accepts the purchase order by signing the Solicitation, Offer and Bid Form, and returning to the County Purchasing department. Any unsuccessful offeror(s) will have the amounts of his cashier's or certified check returned via County warrant promptly after award.

All offerors agree that any interest earned on any bid surety while in possession of the County, or its agents, shall be retained by the County.

4. Performance and Payment Bonds

The County **shall** require the successful offeror(s) to furnish **separate performance and payment bonds**, under pledge of adequate surety and covering up to **100% of the dollar value of award** on the forms provided by the County. Such bonds shall be issued by sureties authorized to act as a surety by the State of Florida. Bonds of the successful offeror(s) shall be reviewed by the Office of Purchasing to assure compliance, then recorded in the Office of the Clerk of the Circuit Court Recording Office, 1st Floor, 221 Palafox Place, Pensacola, Florida, by the successful offeror at his expense before the contract is executed. The cost of recording is $10.00 for the first page and $8.50 for each additional page.

5. Procurement Questions

Questions shall be directed to Jeffrey Lovingood, Purchasing Specialist, at JDLovingood@myescambia.com. Last day for questions will be April 11, 2019 at 5:00 p.m. CDT.

6. Bid Forms

This Solicitation contains a Solicitation, Offer, and Bid Form which shall be submitted in a sealed envelope, in duplicate with Original signatures in indelible ink signed in the proper spaces. Responses on vendor forms will not be accepted.

The Offeror's Checklist included in this Solicitation provides instructions to the Offeror on the documentation to be submitted during the procurement process.

7. Pre-Solicitation Conference

A non-mandatory Pre-Solicitation Conference will be held at the Escambia County Office of Purchasing, 213 Palafox Place, Pensacola, FL 32502 in Conference Room #11.407 on April 02, 2019 at 10:00 AM CDT.

It is strongly encouraged that all potential bidders attend this non-mandatory conference so they can ask questions and be automatically notified of any updates prior to the Bid Opening.

8. Liquidated Damages

Should the awarded vendor fail to complete the required services or make delivery of the commodities or equipment within the time(s) specified in the contract, or within such additional time(s) as may be granted by Escambia County, the County will suffer damage, the amount of which is difficult, if not impossible to ascertain therefore, the vendor shall pay to the County, as liquidated damages, the sum of $1,000.00 for each calendar day of delay that actual completion extends beyond the time limit specified until such reasonable time as may be required for final completion of the work. Such sum is mutually agreed upon as a reasonable and proper amount of damages the County will sustain per diem by failure of the vendor to complete the services or make delivery within the specified time. The costs for liquidated damages shall not be construed as a penalty on the vendor.

9. Codes and Regulations

The awarded vendor shall strictly comply with all federal, state and local building and safety codes.

10. Payment

Partial payments in the full amount for the value of items received and accepted may be requested by the submission of a properly executed **original** invoice, with supporting documents if required. Payment for accepted equipment/supplies/services will be accomplished by submission of an **original** invoice, in duplicate, to:

Clerk of the Circuit Court
Attention: Accounts Payable
221 Palafox Place
Pensacola, FL 32502

11. Warranty

The awarded vendor shall fully warrant all items furnished hereunder against defect in materials and/or workmanship for a period of Two (2) years from date of delivery/acceptance by Escambia County.

Should any defect in materials or workmanship, except ordinary wear and tear, appear during the above stated warranty period, the awarded vendor shall repair or replace same at no cost to the County, immediately upon written notice from the Purchasing Chief.

12. Measurements

The linear footage noted are only estimates. Offerors will be responsible for their own measurements and shall submit a firm price accordingly.

There will be no adjustments, for increase or decrease, of footage required for the job; therefore, the total offer shall be based on accurate measurements by offerors during inspection. Failure to do so will be at offeror's risk. Any request for unit price on the Bid form is for information only.

Award shall be based solely on "total offer", with no adjustments made for increased/decreased quantities after award.

13. Debris

Awarded vendor shall be responsible for the prompt removal of all debris, which is a result of this contractual service.

14. Protection of Property/Security

The awarded vendor shall provide all barricades and take all necessary precautions to protect buildings and personnel.

All work shall be completed in every respect and accomplished in a professional manner and awarded vendor shall provide for removal of all debris from County property.

The awarded vendor shall at all times guard against damage or loss to property of Escambia County, or of other vendors or contractors, and shall be held responsible for replacing or repairing any such loss or damage.

The County may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the awarded offeror or his agent.

The awarded vendor shall at all times guard against injury to Escambia County employees. The vendor shall properly fence and secure the construction site(s) at all times, including evenings and weekends.

The awarded vendor must, at all times, comply with State of Florida and Occupational Safety and Health Administration (OSHA) safety regulations.

15. Permits

The County and/or its contracted consultant(s) have conducted a review of required permits and fees required to be purchased by the contractor from the County permitting agencies for this specific project and they are listed on the Bid form(s) to the best of our knowledge.

16. Compliance with Governing Laws and Regulations

The offeror or contractor will be required to fully comply with all applicable federal, state, and local regulations.

17. Pricing

All items sold to the County as a result of this award are subject to post sale audit adjustment. In the event an audit indicates offeror has not honored quoted price lists and discounts, offeror will be liable for any and all overage charges.

18. Termination

A. The contract may be canceled by the contractor, for good cause, upon ninety (90) days prior written notice.

B. The County retains the right to terminate the contract, with or without good cause, upon thirty (30) days prior written notice.

C. In the event of termination by either party as provided herein, the awarded vendor shall be paid for services performed through the date of termination.

19. Licenses, Certifications, Registrations

The offeror shall at any time of Bid submission meet the license, certification, registration and any other requirements of the State, County, City and/or any other agency of authority with jurisdiction in such matters as necessary to perform the contractual services requested in this solicitation.

Copies of such licenses, certifications, registrations and any other requirements should be provided with the Bid submission; and, the offeror shall provide follow-up evidence that as the contractor they maintain such credentials throughout the period of agreement.

20. Term of Offer

An offer shall constitute an irrevocable offer for a period of ninety (90) days from the solicitation opening date or until the date of award, whichever is earlier, without forfeiting bid bond or check. In the event that an award is not made by the County within ninety (90)

days from the solicitation opening date, the offeror may withdraw his offer or provide a written extension of his offer.

21. Award

Award shall be made on an "all-or-none total" basis.

22. Termination

The purchase order or contract will be subject to immediate termination if either product or service does not comply with specifications as stated herein or fails to meet the County's performance standards. In the event that any of the provisions of the contract are violated by awarded vendor, Escambia County may serve written notice upon the awarded vendor of its intention to terminate the contract. Such notice is to state the reason(s) for such intention to terminate contract. The liability of the vendor for any and all such violation(s) shall not be affected by any such termination and his surety, if any, shall be forfeited.

23. Termination (Services)

The Contract Administrator shall notify the Office of Purchasing of unsatisfactory performance and/or deficiencies in service that remain unresolved or recurring. The Office of Purchasing shall notify the contractor, in writing, of such unresolved or recurring deficiencies within five (5) working days of notification by the Contract Administrator.

Upon the third such written notification of unsatisfactory performance and/or deficiencies to the contractor by the Office of Purchasing within a four (4) month period; or the sixth such notification within any contract term, shall result in issuance of written notice of immediate contract termination to the contractor by the Office of Purchasing. Such termination may also result in suspension or debarment of the contractor.

24. Termination (Public Records Request)

If the contractor refuses to allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the contractor in conjunction with this agreement then the County may, without prejudice to any right or remedy and after giving the contractor and his surety, if any, seven (7) days written notice,

during which period contractor still fails to allow access, terminate the employment of the contractor and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon, owned by the contractor, and may finish the project by whatever method it may deem expedient. In such case, the contractor shall not be entitled to receive any further payment until the project is finished. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the contractor (excluding monies owed the contractor for subcontract work.)

Non-Contract Insurance Requirements

25. Standard Insurance Requirements and Certificates

This offer contains an extensive insurance requirement. Offerors are encouraged to review these requirements with their insurance agents before submitting offers.

It is not necessary to have this level of insurance in effect at the time of submitting the offer.

A letter from the offeror's insurance carrier will be required as evidence that the offeror will be able to obtain the levels of insurance as required by the contract and indicated on the Sample Certificate of Insurance should your firm be awarded the contract.

A. <u>County Insurance Required</u>

The contractor shall procure and maintain the following described insurance, except for coverages specifically waived by the County. Such policies shall be from insurers with a minimum financial size of VII according to the latest edition of the AM Best Rating Guide. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Such policies shall provide coverages for any or all claims which may arise out of, or result from, the services, work and operations carried out pursuant to and under the requirements of the contract documents, whether such services, work and operations be by the contractor, its employees, or by subcontractor(s), or anyone employed by or under the supervision of any of them, or for whose acts any of them may be legally liable.

The contractor shall require, and shall be responsible for assuring throughout the time the agreement is in effect, that any and all of its subcontractors obtain and maintain until the completion of that subcontractor's work, such of the insurance coverages described herein as are required by law to be provided on behalf of their employees and others.

The required insurance shall be obtained and written for not less than the limits of liability specified hereinafter, or as required by law, whichever is greater.

These insurance requirements shall not limit the liability of the contractor.

The County does not represent these types or amounts of insurance to be sufficient or adequate to protect the contractor's interests or liabilities, but are merely minimums.

Except for worker's compensation and professional liability, the contractor's insurance policies shall be endorsed to name Escambia County as an additional insured to the extent of its interests arising from this agreement, contract or lease.

The contractor waives its right of recovery against the County, to the extent permitted by its insurance policies.

The contractor's deductibles/self-insured retentions shall be disclosed to the County and may be disapproved by the County. They shall be reduced or eliminated at the option of the County. The contractor is responsible for the amount of any deductible or self-insured retention.

Insurance required of the contractor or any other insurance of the contractor shall be considered primary, and insurance of the County, if any, shall be considered excess, as may be applicable to claims obligations which arise out of this agreement, contract or lease.

B. <u>Workers Compensation Coverage</u>

The contractor shall purchase and maintain worker's compensation insurance for all worker's compensation obligations imposed by state law and with employer's liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease, or a valid certificate of exemption issued by the state of Florida, or an affidavit in accordance with the provisions of

Florida Workers Compensation law.

Contractor shall also purchase any other coverages required by law for the benefit of employees.

C. General, Automobile and Excess or Umbrella Liability Coverage

The contractor shall purchase and maintain coverage on forms no more restrictive than the latest editions of the commercial general liability and business auto policies of the insurance services office.

Minimum limits of $1,000,000.00 per occurrence for all liability must be provided, with excess or umbrella insurance making up the difference, if any, between the policy limits of underlying policies (including employer's liability required in the worker's compensation coverage section) and the total amount of coverage required.

D. General Liability Coverage - Occurrence Form Required

Coverage A shall include bodily injury and property damage liability for premises, operations, products and completed operations, independent contractors, contractual liability covering this agreement, contract or lease, broad form property damage coverages, and property damage resulting from explosion, collapse or underground (x,c,u) exposures.

Coverage B shall include personal injury.

Coverage C, medical payments, is not required.

The contractor is required to continue to purchase products and completed operations coverage, at least to satisfy this agreement, contract or lease, for a minimum of three years beyond the County's acceptance of renovation or construction projects.

E. Business Auto Liability Coverage

Business auto liability coverage is to include bodily injury and property damage arising out of ownership, maintenance or use of any auto, including owned, non-owned and hired automobiles and employee non-ownership use.

The General Liability and Business Auto Liability policies shall be endorsed to include Escambia County as an additional insured and provide for 30-day notification of cancellation.

F. Excess or Umbrella Liability Coverage (If utilized to achieve required policy limits)

Umbrella liability insurance is preferred, but an excess liability equivalent may be allowed. Whichever type of coverage is provided, it shall not be more restrictive than the underlying insurance policy coverages. Umbrella coverage shall drop down to provide coverage where the underlying limits are exhausted.

G. Evidence/Certificates of Insurance

Required insurance shall be documented in certificates of insurance. If and when required by the County, certificates of insurance shall be accompanied by documentation that is acceptable to the County establishing that the insurance

agent and/or agency issuing the certificate of insurance has been duly authorized, in writing, to do so by and on behalf of each insurance company underwriting the insurance coverage(s) indicated on each certificate of insurance.

New certificates of insurance are to be provided to the County at least 30 days prior to coverage renewals. Failure of the contractor to provide the County with such renewal certificates may be considered justification for the County to terminate this agreement, contract or lease.

Certificates should contain the following additional information:

1. Indicate that Escambia County is an additional insured on the general liability and business auto liability policies.

2. Include a reference to the project and the Office of Purchasing number.

3. Disclose any self-insured retentions in excess of $1,000.

4. Designate Escambia County as the certificate holder as follows:

   Escambia County
   Attention: Jeffrey Lovingood, Purchasing Specialist
   Office of Purchasing, Room 11.101
   P.O. Box 1591
   Pensacola, FL 32591-1591
   Fax (850) 595-4806

5. Indicate that the County shall be notified at least 30 days in advance of cancellation.

Receipt of certificates or other documentation of insurance or policies or copies of policies by the County, or by any of its representatives, which indicate less coverage than required does not constitute a waiver of the contractor's obligation to fulfill the insurance requirements herein.

If requested by the County, the contractor shall furnish complete copies of the contractor's insurance policies, forms and endorsements, and/or such additional information with respect to its insurance as may be requested.

For commercial general liability coverage, the contractor shall, at the option of the County, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage.

H. Endorsements/Additional Insurance

The County may require the following endorsements or additional types of insurance.

Termination/Adverse Change Endorsement

All of contractor's policies, except for professional liability and worker's compensation insurance are to be endorsed and the contractor's certificate(s) of insurance shall state that the County shall be notified at least 30 days in advance of cancellation, nonrenewal, or adverse change.

Owners Protective Liability Coverage

For renovation or construction contracts the contractor shall provide for the County an owners protective liability insurance policy (preferably through the contractor's insurer) in the name of the County.

This is redundant coverage if the County is named as an additional insured in the contractor's commercial general liability insurance policy. However, this separate policy may be the only source of coverage if the contractor's liability coverage limit is used up by other claims.

Fidelity/Dishonesty/Liability Coverage - for County

Fidelity/dishonesty/liability insurance is to be purchased or extended to cover dishonest acts of the contractor's employees resulting in loss to the County.

26. Indemnification

Contractor agrees to save harmless, indemnify, and defend County and Architect/Engineer and their, agents, officers and employees from any and all claims, losses, penalties, interest, demands, judgments, and costs of suit, including attorneys' fees and paralegals' fees, for any expense, damage or liability incurred by any of them, whether for personal injury, death, property damage, direct or consequential damages, or economic loss, including environmental impairment, arising directly or indirectly on account of or in connection with the Work done by Contractor under this Agreement or by any person, firm or corporation to whom any portion of the Work is subcontracted by Contractor or resulting from the use by Contractor, or by any one for whom Contractor is legally liable, of any materials, tools, machinery or other property of County. County and Contractor agree the first $100.00 of the Contract Amount paid by County to Contractor shall be given as separate consideration for this indemnification, and any other indemnification of County by Contractor provided for within the Contract Documents, the sufficiency of such separate consideration being acknowledged by Contractor by Contractor's acceptance and execution of the Agreement. The Contractor's obligation shall not be limited by, or in any way to, any insurance coverage or by any provision in or exclusion or omission from any policy of insurance. The Contractor agrees to pay on behalf of Escambia County, as well as provide a legal defense for the County, both of which will be done only if and when requested by the County, for all claims made. Such payment on the behalf of the County shall be in addition to any and all other legal remedies available to the County and shall not be considered to be the County's exclusive remedy.

To: All Known Prospective Bidders

ADDENDUM NUMBER 1:

Re: PD 18-19.033 Motley Court Gulley Improvement Project

All:

Your firm recently received an Invitation to Bid for the above-mentioned specification.

This Addendum Number 1 provides for answers to the following questions:

1. With Respect to erosion control during construction, what kind of flow rates in the CFS would the contractor be trying to control?
   a. The flow rate is dependent on storm event frequency and duration. Based on the A/E firm's stormwater design for the project, in the existing condition during a 25-year/24-hour event, a peak flow rate of approximately 42 CFS would be expected at the extreme north end of the project where all the area flows end up. This storm event consists of 7.8 inches of rainfall in a 24-hour period.

2. Can the A/E firm provide the CAD files in order to assist potential bidders with quantity takeoff?
   a. Those who wish to have the CAD file should email JDLovingood@myescambia.com as the CAD file is not supported in Vendor Registry but can be emailed as needed.

3. Are Davis-Bacon wage rates a requirement for this contract?
   a. No. According to the USDA Emergency Watershed Protection Program Florida NRCS Sponsor's EWP Guide, revised June 2018.

This Addendum Number 1 is furnished to all known prospective bidders. Please sign and return one copy of this Addendum, with original signature, with your bid as an acknowledgement of your having received same. You may photo copy this form for your records.

Sincerely,

Jeffrey Lovingood
Purchasing Specialist

PD 18-19.033 Motley Court Gulley Improvement Project
Addendum 2 Questions and Answers

1. According to the geotechnical report, two boring locations have perched groundwater present. Having done significant work within a mile of this project, we are aware of the difficulty associated with installing utilities 5'-10' deep with perched groundwater. Can a line item or allowance be included for dewatering?
   a. According to the Escambia County Technical Specifications, revised 5/17/2017, Specification 02300, Part 4, 4.2,E: "The Contractor shall include the cost of dewatering in the unit price bid for the stormwater pipe if there is not a specific line item used in the contract."

2. Can a line item be added to remove and replace unsuitable material in encountered?
   a. According to the findings of the geotechnical report, unsuitable material is expected to be a low overall percentage of earthwork. Additionally, the earthwork balance indicates an export, so the unsuitable material can be part of the export and therefore included in the cost of earthwork.

3. How long is the mowing/maintenance period for bid item #27? This was mentioned at the pre-bid meeting to be during the construction period only?
   a. Mowing/maintenance shall be according to the Escambia County Technical Specifications, revised 5/17/2017, Specification 02900, Part 3, 3.3, E. The period of time is from the commencement of construction until final acceptance.

4. Bid tab line item 18: Armormax, from 985.4.1.2 there are three potential categories of turf reinforcement mat (E1, E2, & E3). Which is the requirement for this project?
   a. It is assumed that the questioner intended to state "E3, E4, & E5" or "Type1, Type 2, & Type 3" in lieu of "E1, E2, & E3 as stated in the question per the FDOT specification reference. Since the referenced product meets FDOT approval for E3, E4, & E5, the strictest requirement, E5 shall be the requirement for this project. There is additional information for the referenced product located in the project specifications package and from the manufacturer.

ADDENDUM NUMBER 3:

Re: PD 18-19.033 Motley Court Gully Improvement Project

All:

Your firm recently received an Invitation to Bid for the above-mentioned specification. This Addendum Number 3 provides for an alternative vendor to the Armormax 75 HPTRM product shown in the solicitation. The Engineering firm for this project has approved the use of "HPTRM (PP5-Xtreme) with anchors" only if on-site support and customer service is equal or exceeds that to be provided by Armormax.

Given that all bidders are being issued this information at the same time, there are no plans at this time to change the bid opening date.

This Addendum Number 3 is furnished to all known prospective bidders. Please sign and return one copy of this Addendum, with original signature, with your bid as an acknowledgement of your having received same. You may photo copy this form for your records.

Sincerely,

Jeffrey Lovingood
Purchasing Specialist

High Performance Turf Reinforcement Mat (HP-TRM)
The Next Generation of High Modulus Turf Reinforcement

PP5-XtremeTM represents the next generation of HP-TRMs. By providing high performance faster, yielding greater performance, and meeting or exceeding all requirements for an HP-TRM, PP5-XtremeTM is extending the capabilities and reliability of vegetated armor systems.

PP5-XtremeTM is a fully synthetic, UV stable, High Performance Turf Reinforcement Mat (HP-TRM) manufactured by weaving continuous, synthetic thread elements by way of a proprietary (patent pending) process to form a lofty, three-dimensional pattern. The product is a woven, homogeneous, single layer HP-TRM that contains no lamination or stitching. The proprietary manufacturing process yields a material that provides outstanding strength at low strain, meaning more strength faster. Finally, PP5-XtremeTM is resistant to environmental and climatic conditions. Physical properties of PP5-Xtreme™ are presented in Table 1. Table 2 presents a summary of the material performance properties (mechanical). Table 3 presents hydraulic performance properties of the product.

The industry leading strength of PP5-XtremeTM is demonstrated by the ultimate tensile strength, tensile strength at 15% strain and the initial tangent modulus. By providing higher strength at a lower strain, the HP-TRM strength is mobilized faster to resist anticipated high loading/maintenance conditions. PP5-XtremeTM meets the definition of an HP-TRM at 15% strain, faster than any other HP-TRM. The high initial tangent modulus shows PP5-XtremeTM ideal for resisting the forces of wheel loading, the abrasion of debris loading and high-strength anchoring for Anchor Reinforced Vegetated Systems (ARVS). Additionally, the hydraulic performance envelope, quantified in Table 3, shows extraordinary thresholds for resisting the forces of flowing water. The unique blend of material physical properties (Table 1) yields a mulching layer well-suited for the establishment of vegetation from seed or sod, as evidenced by the Vegetation Establishment values shown in Table 2. Finally, the UV stability of the material provides confidence in long-lasting field performance.

Each roll of PP5-XtremeTM is manufactured under Western Excelsior's Quality Assurance Program to ensure consistent coverage, mass and strength. Quality control testing is performed at a GAI-LAP accredited facility in compliance with ASTM D4354. The material is made in the USA.

Slope Installation
Instructions PP5-Xtreme™

Step 1 - Site Preparation

Prepare site to design profile and grade. Remove debris, rocks, clods, etc.. Ground surface should be smooth prior to installation to ensure blanket remains in contact with slope.

Step 2 - Seeding

Seeding of site should be conducted to design requirements or to follow local or state seeding requirements as necessary.

Stap 3 - Staple Selection

At a minimum, 6 in. long by 1 in. crown, 11 gauge staples are to be used to secure the blanket to the ground surface. Installation in rocky, sandy or other loose soil may require longer staples.

Step 4 - Excavate Anchor Trench and Secure Blanket

Excavate a trench along the top of the channel side slopes and the upstream terminal end of the channel to secure the edges of the blanket. The trench should run along the length and width of the installation, be 6 in. wide and 6 in. deep. Staple blanket along bottom of trench, fill with compacted soil, overlap blanket towards toe of slope and secure with row of staples (shown in Figures A, E and F).

Step 5 - Secure Body of Blanket

Roll blanket down slope from anchor trench. Staple body of blanket following the pattern shown in Figure D. Leave end of blanket unstapled to allow for overlap shown in Figure B. Place downstream blanket underneath upstream blanket to form shingle pattern. Staple seam as shown in Figure E. Secure downstream blanket with stapling pattern shown in Figure D. Stapling pattern shown in Figure D reflects minimum staples to be used. More staples may be required to ensure blanket is sufficiently secured to resist mowers and foot traffic and to ensure blanket is in contact with soil surface over the entire area of blanket. Further, critical points require additional staples. Critical points are identified in Figure G.

Step 6 - Continue Along Slope - Complete Installation

Overlap adjacent blankets as shown in Figure C and repeat Step 5. Secure toe of slope using stapling pattern shown in Figure E. Secure edges of installation by stapling at 1.0' intervals along the terminal edge, as shown in Figure E.

Product Application/Equivalency Specifications

PP5-Xtreme is produced by Western Excelsior and consists of a permanent Rolled Erosion Control Product (RECP) comprised of UV stable synthetic yarns continuously woven into a three-dimensional profile. PP5-Xtreme is designed and manufactured to provide immediate erosion control and permanent turf reinforcement and is comprised of physical properties sufficient to provide the intended longevity and performance. Additionally, PP5-Xtreme is constructed to yield a high tensile strength, high durability material. Product specifications may be found on document WE_EXCEL_PPXT_SPEC and performance information may be found on document WE_EXCEL_PPXT_PERF. All documents are available from Western Excelsior Technical Support or www.westernexcelsior.com. Additional to above, equivalent products to PP5-Xtreme must meet identical criteria as PP5-Xtreme as follows:

1. Consist of woven synthetic yarns to form a high strength, interlocking three-dimensional matrix.
2. Sufficient tensile strength, thickness and coverage to maintain integrity during installation and ensure material performance. Provide permanent turf reinforcement with longevity greater than three years, immune from moisture damage or chemical conditions within the soil.
3. Listing within AASHTO NTPEP database.
4. Meet ECTC specification for category 5C product.

QUALITY ASSURANCE PLAN
Emergency Watershed Protection Program
Motley Court Gully Improvements Project
Escambia County, Florida

The Quality Assurance Plan (QAP) outlines the responsibilities of the Escambia County to ensure that the works of improvement are installed in accordance with the plans and specifications. Escambia County will designate a person to fulfill the inspection responsibilities.

I. ITEMS OF WORK TO BE INSPECTED

The work to be accomplished under this contract consists of clearing and grubbing, excavation, earth-fill, installing drainage inlets and outlets, structure removal, placing concrete, installing sand cement bag riprap, and vegetative measures.

The intensity of the inspection of these items will vary from periodic to continuous. The intensity of the inspection will depend on the complexity of the work item and what the damaging results would be should that portion of the installation fail.

The timing and intensity of the required inspection is shown in Table 1. Support personnel should be provided as needed to assist the assigned inspector.

Other type work items may be encountered during construction. The intensity of the inspection will be determined by the Inspector or Engineer.

A. Clearing and Grubbing

Very limited inspection will be required on clearing and grubbing. The inspector will check the site to verify that the item was completed in accordance with the plan and specifications.

B. Excavating and/or Backfilling

Excavating and/or backfilling operations will require periodic inspection. The inspector shall be on-site in situations where the excavation or backfill is set to a grade that is critical for the installation of structural measures. The inspector shall be on-site to ensure that unsuitable foundation material is removed prior to installation of pipes and inlets. The inspector shall be on-site to ensure the earth-fill is of suitable material and to make sure the earth-fill has sufficient moisture content and is compacted in accordance with the plans and specifications.

Compaction tests shall be performed for those items where the Class “A” compaction is suspect. However, compaction tests will be required for each stilling basin concrete apron (minimum of one per basin). The test shall be performed by a testing lab approved by the engineer.

The inspector shall ensure final earth-fill elevations in the asphalt removal area does not divert storm runoff from its present route.

The quantity of earth-fill material will not be measured.

C. Pipe

The inspector shall check the quality of pipe materials prior to installation to

ensure it meets the plans and specifications. Special care should be used in checking the material, length of pipe, pipe gage, coating, and diameter.

Continuous inspection will be required when the pipe inverts are set so that the system will function properly. Continuous inspection will be required while laying the pipe, installing connecting bands and gaskets, and backfilling around the pipe. It is critical the pipe is bedded properly and backfill operations are performed in a manner to not lift the pipe off its bedding.

D. Concrete Inlets

The inspector shall obtain shop drawings for each inlet, check the drawings, and then forward a checked copy to the engineer for review and approval prior to its installation.

The inspection effort will be to verify the inlet is the correct size, grate material, and the pipe opening and slot is located at the correct elevation and orientation.

The inspector shall check that the pipe is properly grouted into the inlet such that leakage will not occur.

The inspector shall check that, if a skimmer is required, it is installed according to the plans.

Inspect and check the elevation of the subbase of the inlets before they are installed.

E. Concrete

The inspector shall inspect all necessary forms prior to placement of concrete to ensure planned grades are met. Continuous inspection will be required during placement of all concrete to ensure allowed delivery times are not exceeded and concrete slump meets specifications.

The quantity of concrete will be computed to the neat lines and grades as planned.

F. Geotextiles

This item includes filter fabrics, high performance turf management systems, and geotextile fabric as specified in the contract documents. The inspection effort for this item will be to ensure proper material and installation of the geotextile. The inspector will need to check the geotextile to ensure that the type specified is installed. The inspector will record the type, weight, and manufacturer of the geotextile. The inspector will determine and stake the area to be covered by the geotextile.

The quantity of geotextile will not be measured.

G. Structure Removal

Inspection effort required will be to verify the inlets, pipe, and concrete are removed from the designated areas. Inspection will also be required to verify the existing fish cleaning table and appurtenances within the work area is removed and re-installed according to the specification. The engineer will consult with the

landowner on where it will be installed.

H. Rip-Rap Installation

Periodic inspection will be required to ensure that rip rap placement is completed in the prescribed locations in reasonable conformance to design line and grade. Inspection will be necessary to verify depths of rip rap and that underlying geotextile fabric is in place.

The inspector shall check that the rip-rap is installed according to the details in the plans.

I. Vegetative Measures

Periodic inspection will be required on all areas to be vegetated. The inspector will need to stake all areas to be vegetated and the type of vegetative requirement at each area. Inspection will require that the sod be checked as to the quality and type specified. The quantity and type of seed, fertilizer and lime will be verified by the inspector. Vegetated areas will be measured and the inspector will need to compute quantities.

Table 1

Item	Inspector	Engineer
Clearing and Grubbing	P/F	-
Earth-fill / Excavation	P	P/F
Pipe Installation	C	-
Concrete Inlets	C	P/F
Concrete	C	P/F
Geotextile	C	P
Structure Removal	P	P/F
Rip-Rap Installation	C	F
Vegetative Measures	C	F

Legend: C - Continuous
P - Periodic
F - Final

II. INSPECTOR SKILLS NEEDED TO PERFORM THE REQUIRED INSPECTIONS

A. Ability to manage an inspection program effectively.

B. Must understand the design concepts of the job to ensure that it is installed properly and functions properly.

C. Must be familiar with quality assurance and inspection needed for installation of earth-fill, concrete inlets, pipes, geotextiles and other materials used in the work.

D. Ability to establish and maintain effective working relationships and clear communications with the contractor and others involved or affected by the project.

E. Thorough understanding of all contract provisions.

F. Ability to recognize potential safety hazards and take the necessary actions to avoid them to the extent possible.

G. Ability to anticipate potential conflicts of work activities with existing utilities and fixed improvements and to take the necessary actions to resolve them in the most efficient manner.

H. Ability to administer contract to include preparation of contract modifications and pay estimates on a timely basis.

III. STAFF NEEDED TO PERFORM REQUIRED INSPECTIONS

One Inspector shall be available to inspect the construction progress at critical points during construction as shown in Table 1. The Inspector will ensure overall compliance with plans and specifications and recommend needed modifications

The Inspector will be needed for the duration of the contract. In addition, one additional person will be needed to be on call to fill in if the Inspector is absent from work.

The Escambia County Engineer will periodically check on construction and review all requested modifications.

IV. TESTING EQUIPMENT AND FACILITIES NEEDED

No testing equipment nor facilities will be needed by the Inspector. Concrete slump tests, concrete temperature, and required compaction tests will be performed by the contractor.

Compaction test will be performed by a testing lab approved by the engineer.

The inspector will need equipment such as a survey level, rod, and measuring tape to check the contractors work.

V. NAMES OF QUALIFIED PERSONNEL

Escambia County will be responsible for assigning a qualified person to inspect the construction of the works of improvement

Escambia County will provide a project engineer to make reviews by visiting the work site and/or by verbal communications with the Inspector to assist on problems that may develop requiring changes in the design and to gain familiarity in case of contractual problems with the contractor. DRMP will represent Escambia County.

VI. DOCUMENTATION AND REPORTS TO BE PREPARED

A daily job diary shall be kept by the Inspector and entries shall be made daily for the duration of the contract.

Survey notes documenting the installation and measurements shall be recorded in a bound field book. Quantity computations for all materials shall be recorded including measurements. The computations shall be checked and initialed by a second person.

Photos and/or slides shall be taken throughout the term of the contract. Photos shall be a size of 3" x 5".

Color slides are the preferred documentation. The photos and/or slides retained shall be logged clearly identifying the job and what the picture is about. The log and photos and/or slides shall be submitted along with the as-builts.

At the completion of the job, the Inspector shall furnish to the Escambia County Engineer a certification that the job was installed as planned and meets all specifications. The engineer shall also furnish a set of record drawings and a list of the items installed along with the final installed quantity of each. The engineering drawings shall be kept up to date during construction and the final record drawings shall be checked by the Escambia County project engineer.

The above listed documentation shall be completed and mailed to the Escambia County Engineer within 10 work days of the completion of the work.

28	Orange Safety Fence	200	LF
29	Waterproof Jobsite Storage Board Container/Tube for project information, permits, SWPPP plans, etc.	1	EA

ITEM 1:
IT IS THE CONTRACTOR'S RESPONSIBILITY TO SELECT AND GAIN PERMISSION TO USE OTHER SITES/PARCELS FOR LAY DOWN OR TEMPORARY EARTHWORK DISPOSAL (INCLUDING SEDIMENT CONTROL). THE CONTRACTOR SHALL RETURN ALL SITES USED FOR THESE PURPOSES TO ORIGINAL CONDITION OR BETTER. EXISTING SIGNAGE SHALL BE PROTECTED AND STOCKPILED IF NECESSARY. ANY COSTS ASSOCIATED WITH THE ABOVE SHALL BE INCLUDED IN THE COST OF MOBILIZATION/DEMOBILIZATION.

ITEM 2:
ALL PIPES TO BE REMOVED, ASSOCIATED DRAINAGE STRUCTURES, REMNANT SITE IMPROVEMENTS, AND ALL TREES WITH DIAMETER OF 12" OR LESS LOCATED IN THE LIMITS OF CONSTRUCTION WHICH NEED TO BE REMOVED SHALL BE INCLUDED IN THE COST OF CLEARING AND GRUBBING. THE CONTRACTOR SHALL FAMILIARIZE HIMSELF WITH THE AMOUNT, LOCATION, AND SIZE OF TREES BEFORE BIDDING. PROTECTION BARRICADE SHALL BE INCLUDED IN THIS ITEM WHERE TREES ARE TO REMAIN ADJACENT TO CONSTRUCTION.

ITEM 3:
ITEM INTENDED TO COVER REMOVAL OF TREES GREATER THAN 12" IN DIAMETER WITHIN THE LIMITS OF CONSTRUCTION. QUANTITY AS FOLLOWS:

TREES WITH DIAMETER OF 13" TO 24" = 129
TREES WITH DIAMETER OF 25" TO 48" = 3

ITEM 4:
EARTHWORK IS A LUMP SUM PAY ITEM. EARTHWORK IS THE IN-PLACE QUANTITY FOR SEDIMENT BASINS, DITCHES, AND ASSOCIATED IMPROVEMENTS INDICATED TO FINISHED GRADE WITHIN THE LIMITS OF CONSTRUCTION. SAND FILTER FILL IS QUANTIFIED IN ITEM 5. OTHER TEMPORARY AND PERMANENT EARTHWORK REQUIRED DURING CONSTRUCTION INCLUDING BUT NOT LIMITED TO SHORING, TRENCH EXCAVATION, TEMPORARY SLOPES, TRENCH BOXES, AND OTHER ITEMS ASSOCIATED WITH CONTRACTOR'S MEANS AND METHODS SHALL BE INCLUDED IN THE LUMP SUM COST OF EARTHWORK. ANY DAMAGE TO ROADWAY OR ADJACENT PROPERTIES CAUSED BY CONTRACTOR'S OPERATIONS SHALL BE REPAIRED BY THE CONTRACTOR AT THE CONTRACTOR'S COST AND EXPENSE. EARTHWORK TOTALS:

EARTHWORK TOTALS
CUT: 9,421 CY, FILL: 5,585 CY
SAND FILTER - CUT ONLY: 135 CY

ITEM 5:
THE LAB SAMPLE REQUIREMENT OF THE FILTER SAND IN PLACE (SAND FILTER BACKFILL) SHALL BE INCLUDED IN THE COST OF THE SAND FILTER MEDIA. THE BACKFILL SHOULD BE PERFORMED WITH A MEDIUM CLEAN SAND SOIL WITH A MINIMUM PERMEABILITY OF 30 FEET/DAY AT A MINIMUM OF 100% OF THE STANDARD PROCTOR TEST (ASTM D 698) ENERGY.

THIS ITEM DOES NOT INCLUDE FILTER SAND ASSOCIATED WITH THE FDOT TYPE III UNDERDRAIN

ITEM 6:
8" STABILIZED SUBGRADE IS TO BE USED ON ALL MAINTENANCE ACCESS AREAS. SEE PLANS.

ITEM 10:
SEE DRAINAGE DETAILS SHEET

ITEM 14:
THE FOLLOWING OPTIONAL PIPE MATERIALS ARE ALLOWED FOR THIS PROJECT AT LOCATIONS WHERE PIPE IS NOT LOCATED UNDER ROADWAYS OR EXPOSED TO UV LIGHT: RCP, HDPE, AND PP. HDPE AND PP PIPE OPTIONS SHALL BE CLASS II (100-YEAR DESIGN SERVICE LIFE) AND MEET THE REQUIREMENTS OF FDOT SPEC 948. DISSIMILAR PIPE CONNECTIONS (COLLARS) SHALL BE INCLUDED IN THE COST OF PIPE AND ARE ONLY ALLOWED AT MES LOCATIONS WHERE MATERIAL CHANGE TO CONCRETE MAY OCCUR. DISSIMILAR PIPE CONNECTIONS SHALL BE PER FDOT INDEX 430-001.

ITEM 15:
FDOT TYPE III UNDERDRAIN (PER FDOT INDEX 440-001) SHALL INCLUDE THE COST OF 451 LF OF 8" PDW HDPE SOCK WRAP UNDERDRAIN, FILTER FABRIC, 75 CY FILTER SAND, AND 41 CY OF NO. 57 COARSE AGGREGATE REQUIRED TO CONSTRUCT THE UNDERDRAIN. CLEANOUTS SHALL BE PLACED PER COUNTY SPEC 2320 AND INCLUDED IN THE TOTAL COST FOR THIS ITEM.

ITEM 18:
THIS ITEM OR APPROVED EQUAL. PRODUCT MUST BE ON THE FDOT APPROVED PRODUCTS LIST. PERMANENT ANCHORING SYSTEM PER MANUFACTURERS RECOMMENDATIONS SHALL BE INCLUDED IN THE COST OF THIS ITEM. SUPPLEMENTAL INFORMATION FOR THIS ITEM, INCLUDING ANCHORING DETAILS, IS INCLUDED IN THE PROJECT SPECIFICATIONS PACKAGE. THE PRODUCT IS INTENDED TO BE COVERED WITH SOD FOR SHORT-TERM VEGETATION ESTABLISHMENT. THE COST OF PREPARING THE PRODUCT FOR SOD PLACEMENT, SUCH AS SOIL PRIMING, IF NECESSARY, IS INCLUDED IN THIS ITEM WITH THE GOAL BEING SUCCESSFUL VEGETATION ESTABLISHMENT. THE COST OF SOD IS INCLUDED IN ITEM 21. AN ADDITIONAL 10% QUANTITY OF MATERIAL IS INCLUDED BUT ONLY SHALL BE USED UPON PRIOR APPROVAL.

ITEM 19:
ADDITIONAL PLACEMENT AND SHAPING DETAILS INCLUDED IN THE PLANS.

ITEMS 20, 21, 22, AND 23
THE QUANTITIES SHOWN REPRESENT THE TEMPORARY EROSION CONTROL FEATURES SHOWN IN THIS PLAN SET. ULTIMATELY THE CONTRACTOR IS RESPONSIBLE FOR ALL SEDIMENT AND EROSION CONTROL FOR THIS PROJECT INCLUDING ASSOCIATED ITEMS, QUANTITES, INSPECTION, AND ASSOCIATED WORK PER THE NPDES PERMIT.

ITEM 24:
THE CONTRACTOR MUST CONSTRUCT A STABILIZED GRAVEL CONSTRUCTION ENTRANCE AT ALL CONSTRUCTION ENTRANCES. IT IS ASSUMED THE CONTRACTOR WILL HAVE ONE ENTRANCE ON THE NORTH SIDE OF THE PROJECT AND ONE ENTRANCE ON THE SOUTH SIDE OF THE PROJECT. THE QUANTITY ASSUMES TWO 100 SY CONSTRUCTION ENTRANCES.

ITEM 26:
RIPRAP RUBBLE AT THE FAR SOUTH END OF THE PROJECT MAY BE USED IN PROPOSED RIPRAP RUBBLE LOCATIONS ON SITE IF THE MATERIAL MEETS COUNTY SPECIFICATIONS.

GENERAL NOTES:

1. THE CONTRACTORS SHALL NOTIFY THE COUNTY DESIGN ENGINEER OR DESIGNEE 48 HOURS PRIOR TO CONSTRUCTION.

2. ALL CONDITIONS AND STIPULATIONS OF THE CONSTRUCTION PERMITS AND THE APPROVALS ISSUED BY THE ESCAMBIA COUNTY ENGINEER SHALL BE COMPLIED WITH IN EVERY DETAIL.

3. ALL ROADS DAMAGED BY CONSTRUCTION OPERATIONS ARE TO BE PATCHED OR RECONSTRUCTED AS DIRECTED BY THE COUNTY ENGINEER OR DESIGNEE.

4. THE CONTRACTOR SHALL TAKE STEPS NECESSARY TO PREVENT EROSION AND ANY OFF SITE SEDIMENT TRANSPORT RESULTING FROM INCREASED RUNOFF DURING CONSTRUCTION BY PROVIDING SILT FENCE AND/OR STAKED HAY BALES AS REQUIRED BY THE FLORIDA STORMWATER, EROSION, AND SEDIMENT CONTROL INSPECTOR'S MANUAL, JULY 2018 EDITION, OR AS INDICATED ON THE PLANS. ALL EROSION CONTROL MEASURES SHALL REMAIN IN PLACE UNTIL ASSOCIATED DISTURBED AREAS ARE STABILIZED AS TO REDUCE SEDIMENT RUNOFF, UNLESS OTHERWISE DIRECTED BY THE ENGINEER OR DESIGNEE.

5. ANY NECESSARY PERMITS WILL BE THE RESPONSIBILITY OF THE CONTRACTOR. ESCAMBIA COUNTY OR ITS DESIGNEE WILL ASSIST CONTRACTOR WITH REQUIRED PERMITS.

6. THE CONTRACTOR IS CAUTIONED TO VISIT THE SITE AND FAMILIARIZE HIMSELF WITH THE PROJECT PRIOR TO BIDDING AND/OR CONSTRUCTION.

7. IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO PRESERVE OR RELOCATE ALL BENCHMARKS (VERTICAL CONTROL) AS NEEDED DURING CONSTRUCTION. ALL PUBLIC OR PRIVATE CORNER MONUMENTATION SHALL BE PROTECTED. IF A PUBLIC OR PRIVATE CORNER MONUMENTATION IS IN DANGER OF BEING DESTROYED AND HAS NOT BEEN PROPERLY REFERENCED, THE CONTRACTOR SHALL NOTIFY THE ENGINEER OR DESIGNEE IMMEDIATELY. ANY ESCAMBIA COUNTY HARN/GPS NETWORK MONUMENTS OR BUREAU OF SURVEY AND MAPPING GPS NETWORK MONUMENTS WITHIN THE LIMITS OF CONSTRUCTION SHALL BE PROTECTED. IF A HARN/GPS NETWORK MONUMENTS OR BUREAU OF SURVEY AND MAPPING GPS NETWORK MONUMENTS ARE DISTURBED OR DESTROYED THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELACEMENT REPLACEMENT OF THE MONUMENTS AND HAVE THE MONUMENTS POSITION DETERMINED BY A FLORIDA LICENSED PROFESSIONAL SURVEYOR AND MAPPER USING GUIDELINES AS ESTABLISHED BY NATIONAL GEODETIC SURVEY FOR BLUE BOOKING AND APPROVAL.

8. EXISTING DRAINAGE FEATURES WITHIN CONSTRUCTION LIMITS SHALL REMAIN UNLESS OTHERWISE NOTED.

9. THE CONTRACTOR SHALL MATCH EXISTING CONDITIONS AT THE BEGINNING AND END OF CONSTRUCTION AS DIRECTED BY THE COUNTY ENGINEER OR DESIGNEE.

10 EXISTING STREETS AND DRIVES SHALL BE MAINTAINED TO LOCAL TRAFFIC AND PROPERTY OWNERS.

11. ALL MATERIALS, TESTING, AND CONSTRUCTION METHODS SHALL CONFORM TO THE ESCAMBIA COUNTY TECHNICAL SPECIFICATIONS, LATEST EDITION.

12. ANY REFERENCE TO FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, LATEST EDITION, DIVISION 1, GENERAL REQUIREMENTS AND COVENANTS, SHALL BE EXCLUDED AND NOT APPLICABLE TO ANY SPECIFICATION REFERRED HEREIN OR OTHERWISE LISTED IN THESE PLANS OR RELATED DOCUMENTS OR THE ESCAMBIA COUNTY TECHNICAL SPECIFICATIONS.

13. CONTRACTOR SHALL COMPLY WITH ALL F.D.E.P. AND ARMY CORP. OF ENGINEERS REQUIREMENTS. THE PROJECT IS PERMITTED BY NWFWMD (GEN-033-284800-1)

14. ONLY ACCESS TO THE EASEMENTS AS SHOWN ARE GUARANTEED BY THE COUNTY. PRIVATE R/W REQUIRED BY THE CONTRACTOR TO FACILITATE CONSTRUCTION SHALL BE ACQUIRED BY THE CONTRACTOR WITH NO ADDITIONAL COMPENSATION OR ASSISTANCE FROM THE COUNTY.

15. IN THE EVENT THAT SURVEY MONUMENTATION OR REFERENCE POINTS ARE MISSING OR HAVE BEEN DESTROYED, PLEASE CONTACT:

    ERIC STUART, PSM
    NOBLES CONSULTING GROUP, INC.
    600 UNIVERSITY PLAZA DRIVE
    PENSACOLA, FLORIDA 32504 PH (850) 678-9932

16. DIRECT SPECIAL ATTENTION TO THE PROTECTION OF ALL GEODETIC MONUMENTS, HORIZONTAL OR VERTICAL, AND PUBLIC LAND SURVEY CORNERS LOCATED WITHIN THE PROJECT. IF ANY GEODETIC MONUMENT OR PUBLIC LAND SURVEY CORNER, LOCATED WITHIN THE PROJECT, IS AT RISK OF BEING DAMAGEDOR DESTROYED, IMMEDIATELY NOTIFY THE COUNTY ENGINEER OR DESIGNEE. IN ADDITION, CONTACT JOE BARRETT, ESCAMBIA COUNTY SURVEYOR, TO OBTAIN APPROVAL TO LOCATE AND REPLACE ANY DAMAGED OR DESTROYED GEODETIC MONUMENTS OR PUBLIC LAND SURVEY CORNERS UNDER THE DIRECTION OF A PROFESSIONAL SURVEYOR AND MAPPER REGISTERED IN THE STATE OF FLORIDA.

17. VEGETATION ON R/W AND EASEMENTS SHALL BE RESTORED TO ORIGINAL CONDITION UNLESS OTHERWISE NOTED ON THE PLAN SHEETS. COST OF SAID RESTORATION SHALL BE CONSIDERED INCIDENTAL TO OTHER PAY ITEMS.

18. ALL TREES WITHIN LIMITS OF CONSTRUCTION SHALL BE REMOVED UNLESS OTHERWISE NOTED IN PLANS.

19. ALL COMPACTED FILL SHALL BE PLACED IN 4" LIFTS FOR HAND POWERED TAMPERS AND 8" LIFTS FOR HEAVY EQUIPMENT OPERATED TAMPERS.

20. PIPE LENGTHS SHOWN IN THE PLANS DO NOT INCLUDE THE LENGTH OF PIPE THAT MUST BE INSTALLED WITH THE MITERED END SECTION. THEREFORE, ALL PIPES LENGTHS ASSOCIATED WITH MITERED END SECTIONS SHALL BE PAID FOR IN THE UNIT COST OF THE MITERED END SECTION.

21. IF ARCHAEOLOGICAL MATERIAL/PREHISTORIC ARTIFACTS SUCH AS POTTERY OR CERAMICS, STONE TOOLS OR METAL IMPLEMENTS, OR ANY OTHER PHYSICAL REMAINS THAT COULD BE ASSOCIATED WITH NATIVE AMERICAN CULTURES, OR EARLY COLONIAL OR AMERICAN SETTLEMENT ARE ENCOUNTERED AT ANY TIME, THE PROJECT SHOULD CEASE ALL ACTIVITIES INVOLVING SUBSURFACE DISTURBANCE IN THE IMMEDIATE VICINITY OF SUCH DISCOVERIES. THE APPLICANT/RECIPIENT, OR OTHER DESIGNEE, SHOULD CONTACT THE FLORIDA DEPARTMENT OF STATE, DIVISION OF HISTORICAL RESOURCES, THE STATE HISTORIC PRESERVATION OFFICER (SHPO) AND THE DSH/FEMA REGION IV ENVIRONMENTAL OFFICER AND FDEM STATE ENVIRONMENTAL LIAISON OFFICER FOR FURTHER GUIDANCE. PROJECT ACTIVITIES SHOULD NOT RESUME WITHOUT VERBAL AND/OR WRITTEN AUTHORIZATION FROM THE DIVISION OF HISTORICAL RESOURCES.

22. IN THE EVENT THAT UNMARKED HUMAN REMAINS ARE ENCOUNTERED DURING PERMITTED ACTIVITIES, ALL WORK MUST STOP IMMEDIATELY AND THE PROPER AUTHORITIES NOTIFIED IN ACCORDANCE WITH F.S. 872.05.

UTILITY NOTES:

1. THE LOCATION SHOWN FOR EXISTING UNDERGROUND UTILITIES IS APPROXIMATE. THE CONTRACTOR SHALL DETERMINE THE EXACT LOCATION OF ALL EXISTING UTILITIES BEFORE COMMENCING WORK IN EACH AREA. THE CONTRACTOR AGREES TO BE COMPLETELY RESPONSIBLE FOR ALL DAMAGES WHICH MIGHT OCCUR BY HIS FAILURE TO EXACTLY LOCATE AND PRESERVE ALL UTILITIES.

2. UTILITY OWNERS SHALL BE NOTIFIED AT LEAST 48 HOURS PRIOR TO ANY CONSTRUCTION SO THAT THE UTILITY OWNER CAN SPOT VERIFY AND/OR EXPOSE THEIR UTILITIES. KNOWN UTILITIES OWNERS ACCORDING TO THE SUNSHINE ONE CALL INCLUDE:

    WATER/SEWER – EMERALD COAST UTILITY AUTHORITY
    MR. BRANDON KNIGHT
    P.O. BOX 15311
    PENSACOLA, FL. 32514 PH: (850) 969-3310

SITE-SPECIFIC EROSION AND SEDIMENT CONTROL PLAN

THE CONTRACTOR'S PROFESSIONAL ENGINEER (PE), OR CERTIFIED PROFESSIONAL IN EROSION AND SEDIMENT CONTROL (CPESC) WILL PREPARE AND SUBMIT A SITE-SPECIFIC EROSION AND SEDIMENT CONTROL PLAN TO ESCAMBIA COUNTY FOR REVIEW AND APPROVAL PRIOR TO ANY WORK BEING PERFORMED. THE EROSION AND SEDIMENT CONTROL PLAN SHALL FOLLOW GUIDELINES DOCUMENTED IN THE STATE OF FLORIDA, EROSION AND SEDIMENT CONTROL – DESIGNER AND REVIEWER MANUAL, DATED JUNE 2007, UPDATED 2013 (http://www.fdot.govroadway/drainage/files/Erosion-Sediment-Control.pdf).

AT A MINIMUM, THE EROSION AND SEDIMENT CONTROL PLANS FOR THIS PROJECT REQUIRE SEDIMENT BARRIER TO BE PLACED WHERE THERE IS POTENTIAL FOR TURBID STORMWATER RUNOFF TO DISCHARGE OFF-SITE. INLET PROTECTION IS REQUIRED FOR ALL INLETS THAT COULD RECEIVE RUNOFF FROM DISTURBED AREAS. ARTIFICIAL COVERINGS AND TEMPORARY SLOPE DRAINS ARE REQUIRED IN AREAS WITH HIGH SLOPES. RUNOFF CONTROL STRUCTURES WILL BE REQUIRED WITHIN ALL CHANNELS. A SOIL TRACKING PREVENTION DEVICE SHALL BE INSTALLED AT POINTS OF EGRESS FROM UN-STABLIZED AREAS OF THE PROJECT TO PUBLIC ROADS WHERE OFF-SITE TRACKING OF MUD COULD OCCUR.

PAY PARTICULAR ATTENTION TO THE PROTECTION OF UPLAND BUFFERS, NON-IMPACTED WETLANDS, AND SURFACE WATERS ADJACENT TO THE LIMITS OF WORK TO PREVENT TURBID DISCHARGES TO THESE AREAS.

THE MEASURES LISTED ABOVE AND SHOWN ON THE PLANS ARE THE MINIMUM REQUIREMENTS WITH ADDITIONAL CONTROLS TO BE UTILIZED AS NEEDED, DEPENDENT UPON ACTUAL SITE CONDITIONS AND CONSTRUCTION OPERATIONS AND PHASING.

1. SITE DESCRIPTION:

CONSTRUCTION ACTIVITY INCLUDES NEW CONSTRUCTION, STORM SEWER, DITCH GRADING, AND SEDIMENT BASIN GRADING.

PROJECT LIMITS:
NORTH END OF MOTLEY CT. FROM APPROX 180 FEET NORTH OF VALLEY RIDGE CIR. TO APPROX 1,640 FEET NORTH OF VALLEY RIDGE CIR. (APPROX 0.28 MILES)

PROJECT DESCRIPTION:
CONSTRUCTION OF ACCESS ROADS, SEDIMENT BASINS, AND DRAINAGE CHANNELS NORTH OF MOTLEY CT.

THE MAJOR SOIL DISTURBING ACTIVITIES INCLUDE DITCH EXCAVATION AND SEDIMENT BASIN EXCAVATION.

TOTAL AREA TO BE DISTURBED:

RUNOFF COEFFICIENTS:
C= 0.15 (BEFORE)
C= 0.50 (DURING)
C= 0.20 (AFTER)

(2) ESTIMATES OF SIZE OF PROJECT AREA FOR EACH OUTFALL:
CLEAR CREEK – TOTAL AREA 2.98 ACRES

(3) LOCATIONS OF OUTFALLS:
NORTH POND OUTFALL: LAT N30° 33' 30", LONG. W87° 15' 11" (CLEAR CREEK)

(4) DESCRIPTION OF SOIL OR QUALITY OF DISCHARGE:
SOILS ARE PRIMARILY TROUP SANDS AND TROUP-POARCH SANDY LOAM.

THE CONSTRUCTION PLANS ARE BEING USED FOR THE SITE MAP.

2. CONTROLS:

TEMPORARY EROSION CONTROL MEASURES ARE SHOWN ON THE EROSION CONTROL PLANS AND PERMANENT EROSION CONTROL MEASURES ARE SHOWN IN THE CONSTRUCTION PLANS.

a. EROSION AND SEDIMENT CONTROLS:
(1) STABILIZATION PRACTICES:

X TEMPORARY SODDING	X ARTIFICIAL COVERING
___ TEMPORARY GRASSING	X BUFFER ZONES
X PERMANENT PLANTING, SODDING, OR SEEDING	___ PRESERVATION OF NATURAL RESOURCES
___ TEMPORARY MULCHING	

-LOCATION OF ARTIFICIAL COVERING IS TO BE DETERMINED BASED ON SITE CONDITIONS
-THIS LIST MAY NOT INCLUDE ALL MEASURES BASED ON ACTUAL SITE CONDITIONS

STABILIZATION MEASURES SHALL BE INITIATED AS SOON AS PRACTICAL, BUT IN NO CASE MORE THAN 14 DAYS, IN PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITIES HAVE TEMPORARILY OR PERMANENTLY CEASED.

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(2) STRUCTURAL PRACTICES:

___ SAND BAGGING	___ SEDIMENT TRAPS
X SEDIMENT BARRIER	X SEDIMENT BASINS
___ SYNTHETIC BALES	___ STORM INLET SEDIMENT TRAP
X BERMS	___ STONE OUTLET STRUCTURES
___ DIVERSION, INTERCEPTOR, OR PERIMETER DITCHES	___ CURBS AND GUTTERS
X PIPE SLOPE DRAINS	X STORM SEWERS
___ FLUMES	___ VELOCITY CONTROL DEVICES
X ROCK BEDDING AT CONSTRUCTION EXIT	___ FLOATING TURBIDITY BARRIER
___ TIMBER BEDDING AT CONSTRUCTION EXIT	X RIPRAP
X RUNOFF CONTROL STRUCTURE	X WATTLES
X INLET PROTECTION	

LOCATIONS OF SEDIMENT BASINS, STORM DRAINS, AND RIP RAP ARE SHOWN ON THE CONSTRUCTION PLANS. THIS LIST MAY NOT INCLUDE ALL CONTROL MEASURES. ACTUAL SITE CONDITIONS MAY REQUIRE ADDITIONAL CONTROL MEASURES.

SEDIMENT BARRIER WILL BE USED TO PROTECT ALL UNDISTURBED WETLANDS.

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

b. DESCRIPTION OF SEDIMENT BASINS:
THERE ARE 3 SEDIMENT BASIN FACILITIES TO BE CONSTRUCTED WITH THIS PROJECT.

c. OTHER CONTROLS
(1) WASTE DISPOSAL:
THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(2) OFFSITE VEHICLE TRACKING:
X HAUL ROADS DAMPENED FOR DUST CONTROL
X LOADED HAUL TRUCKS TO BE COVERED WITH TARPAULIN
X EXCESS DIRT ON ROAD REMOVED DAILY
X STABILIZED CONSTRUCTION ENTRANCES

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(3) SANITARY WASTE:
THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(4) FERTILIZERS AND PESTICIDES:
FERTILIZER WILL BE APPLIED ACCORDING TO APPLICABLE SUBSECTIONS OF THE ESCAMBIA COUNTY GENERAL PAVING & DRAINAGE TECHNICAL SPECICATIONS. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THE USE OF PESTICIDES IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(5) TOXIC SUBSTANCES (INCLUDING SPILL REPORTING):
THE CONTRACTOR IS RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY. IF CONTAMINATED SOIL OR GROUNDWATER IS ENCOUNTERED, CONTACT THE COUNTY PROJECT MANAGER IMMEDIATELY.

d. FEDERAL, STATE, AND LOCAL PLANS, AND PERMITS:
- NORTHWEST FLORIDA WATER MANAGEMENT DISTRICT,1½ GENERAL PERMIT (403.814 (12) F.S)
- FDEP NPDES GENERIC PERMIT FOR STORMWATER DISCHARGE FROM CONSTRUCTION SITE, (CH 62-621 FAC) TO BE OBTAINED BY THE CONTRACTOR
- THERE ARE NO WETLANDS IN THE PROJECT LIMITS

3. MAINTENANCE:

MAINTENANCE OF PERMANENT AND TEMPORARY FEATURES SHALL BE DONE IN ACCORDANCE WITH THE ESCAMBIA COUNTY GENERAL PAVING & DRAINAGE TECHNICAL SPECIFICATIONS.

THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

4. INSPECTION:

THE CONTRACTOR IS SOLELY RESPONSIBLE FOR INSPECTIONS OF EROSION CONTROL FEATURES. QUALIFIED PERSONNEL SHALL INSPECT THE FOLLOWING ITEMS AT LEAST ONCE EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A STORM THAT IS 0.25 INCHES OR GREATER. WHERE SITES HAVE BEEN FINALLY STABILIZED, INSPECTIONS SHALL BE CONDUCTED AT LEAST ONCE EVERY MONTH.
-POINTS OF DISCHARGE FROM THE PROJECT SITE
-DISTURBED AREAS OF THE SITE THAT HAVE NOT BEEN FINALLY STABILIZED
-AREAS USED FOR STORAGE OF MATERIALS THAT ARE EXPOSED TO PRECIPITATION
-STRUCTURAL CONTROLS
-SEDIMENT BASINS
-LOCATIONS WHERE VEHICLES ENTER OR EXIT THE SITE

5. NON-STORMWATER ACTIVITIES:

THE CONTRACTOR IS RESPONSIBLE FOR OBTAINING ALL DEWATERING PERMITS AND IDENTIFYING ALL ANTICIPATED NON-STORMWATER DISCHARGES.

THE OFFICIAL RECORD OF THIS SHEET IS THE ELECTRONIC FILE DIGITALLY SIGNED AND SEALED UNDER RULE 61G15-23.004, F.A.C.

Appendix E: NRCS-EWP Grant Requirements

I. ESCAMBIA COUNTY TECHNICAL SPECIFICATIONS, EFFECTIVE 2/1/2015, REVISED 5/17/2017

PUBLIC WORKS DEPARTMENT
Engineering Division

Escambia County
Technical Specifications

GENERAL EXCEPTIONS*: Any reference to FDOT *Standard Specifications for Road and Bridge Construction, Latest Edition, Division I General Requirements & Covenants* shall be excluded and not applicable to any specification referred herein or otherwise listed in this document.

Work shall comply with requirements of FDOT *Standard Specifications for Road and Bridge Construction*, latest edition, as modified herein.

**Note: The General Exception above does not apply when utilizing Federal Highway Administration (FHWA) funding.*

County Engineer
Joy D. Blackmon, P.E.

Effective Date: February 01, 2015
Revised : May 17, 2017

SECTION 01000 – DEFINITIONS

PART 1 - GENERAL

The following terms, when used in the Contract Documents, have the meaning described

Advertisement
The public announcement, as required by law, inviting bids for work to be performed or materials to be furnished, usually issued as “Notice to Contractors,” or “Notice to Bidders.”

Bidder
An individual, firm, or corporation submitting a proposal for the proposed work.

Bridge
A structure, including supports, erected over a depression or over an obstruction such as water, highway or railway, or for elevated roadway, for carrying traffic or other moving loads, and having a length, measured along the center of the roadway, of more than 20 feet between the inside faces of end supports. A multiple-span box culvert is considered a bridge, where the length between the extreme ends of the openings exceeds 20 feet.

Calendar day
Every day shown on the calendar, ending and beginning at midnight.

Contract
The term “Contract” means the entire and integrated agreement between the parties there under and supersedes all prior negotiations, representations, or agreements, either written or oral. The Contract Documents form the Contract between the County and the Contractor setting forth the obligations of the parties thereunder, including, but not limited to, the performance of the Work and the basis of payment.

Contract Documents
The term “Contract Documents” includes: Advertisement for Proposal, Proposal, Certification as to Publication and Notice of Advertisement for Proposal, Appointment of Agent by Nonresident Contractors, Noncollusion Affidavit, Warranty Concerning Solicitation of the Contract by Others, Resolution of Award of Contract, Executed Form of Contract, Performance Bond and Payment Bond, Specifications, plans (including revisions thereto issued during construction), Addenda, or other information mailed or otherwise transmitted to the prospective bidders prior to the receipt of bids, work orders and supplemental agreements, all of which are to be treated as one instrument whether or not set forth at length in the form of contract.

Contract Bond
The security furnished by the Contractor and the surety as a guaranty that the Contractor shall fulfill the terms of the Contract and pay all legal debts pertaining to the construction of the project.

Contract Letting
The date that the County opened the bid proposals.

Contract Time
The number of calendar days allowed for completion of the Contract work, including authorized time extensions.

Contractor
The individual, firm, joint venture, or company contracting with the County to perform the work.

Contractor's Engineer of Record
A Professional Engineer registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, who undertakes the design and drawing of components of the permanent structure as part of a redesign or Cost Savings Initiative Proposal, or for repair designs and details of the permanent work. The Contractor's Engineer of Record may also serve as the Specialty Engineer. The Contractor's Engineer of Record must be an employee of a pre-qualified firm. Any Corporation or Partnership offering engineering services must hold a Certificate of Authorization from the Florida Department of Business and Professional Regulation.

As an alternate to being an employee of a pre-qualified firm, the Contractor's Engineer of Record may be a pre-qualified Specialty Engineer. For items of the permanent work declared by the State Construction Office to be "major" or "structural", the work performed by a prequalified Specialty Engineer must be checked by another pre-qualified Specialty Engineer. An individual Engineer may become pre-qualified in the work groups listed in the Rules of the Department of Transportation, Chapter 14-75, if the requirements for the Professional Engineer are met for the individual work groups. Pre-qualified Specialty Engineers are listed on the State Construction Website. Pre-qualified Specialty Engineers will not be authorized to perform redesigns or Cost Savings Initiative Proposal designs of items fully detailed in the plans.

Controlling Work Items
The activity or work item on the critical path having the least amount of total float. The controlling item of work will also be referred to as a Critical Activity.

County
Escambia County Public Works Department

Culverts
Any structure not classified as a bridge that provides an opening under the roadway.

Delay
Any unanticipated event, action, force or factor which extends the Contractor's time of performance of any controlling work item under the Contract. The term "delay" is intended to cover all such events, actions, forces or factors, whether styled "delay", "disruption", "interference", "impedance", "hindrance", or otherwise, which are beyond the control of and not caused by the Contractor, or the Contractor's subcontractors, materialmen, suppliers or other agents. This term does not include "extra work".

Department
Escambia County.

Developmental Specification See definition for Specifications.

Engineer
The Professional Engineer, registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, acting as the project's Construction Engineering Inspection Manager. The Engineer may be County in-house staff or a consultant retained by the County

Engineer of Record
The Professional Engineer or Engineering Firm registered in the State of Florida that develops the criteria and concept for the project, performs the analysis, and is responsible for the preparation of the Plans and Specifications. The Engineer of Record may be County in-house staff or a consultant retained by the County.

The Contractor shall not employ the Engineer of Record as the Contractor’s Engineer of Record or as a Specialty Engineer.

Equipment
The machinery and equipment, together with the necessary supplies for upkeep and maintenance thereof, and all other tools and apparatus necessary for the construction and acceptable completion of the work.

Extra Work
Any “work” which is required by the Engineer to be performed and which is not otherwise covered or included in the project by the existing Contract Documents, whether it be in the nature of additional work, altered work, deleted work, work due to differing site conditions, or otherwise. This term does not include a “delay”.

Highway, Street, or Road
A general term denoting a public way for purposes of vehicular travel, including the entire area within the right-of-way.

Holidays
Days designated by the Board of County Commissioners as holidays, which include, but are not limited to, New Year’s Day, Martin Luther King’s Birthday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and the following Friday, and Christmas Day.

Inspector
An authorized representative of the County, assigned to make official inspections of the materials furnished and of the work performed by the Contractor.

Laboratory
The testing laboratory used by the Contractor.

Major Item of Work

Any item of work having an original Contract value in excess of 5% of the original Contract amount.

Materials
Any substances to be incorporated in the work under the Contract.

Median
The portion of a divided highway or street separating the traveled ways for traffic moving in opposite directions.

Plans
The approved plans, including reproductions thereof, showing the location, character, dimensions, and details of the work.

Proposal (Bid, Bid Proposal)
The offer of a bidder, on the prescribed form, to perform the work and to furnish the labor and materials at the prices quoted.

Proposal Form
The official form or the expedite program generated bid item sheets on which the County requires formal bids to be prepared and submitted for the work.

Proposal Guaranty
The security furnished by the bidder as guaranty that the bidder will enter into the Contract for the work if the County accepts the proposal.

Right-of-Way
The land that the County has title to, or right of use, for the road and its structures and appurtenances, and for material pits furnished by the County.

Roadbed
The portion of the roadway occupied by the subgrade and shoulders.

Roadway
The portion of a highway within the limits of construction.

Section
A numbered prime division of these Specifications.

Special Provisions
See definition for Specifications.

Specialty Engineer
A Professional Engineer registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, who undertakes the design and drawing preparation of components, systems, or installation methods and equipment for specific temporary portions of the project work or for special items of the permanent works not fully detailed in the plans and required to be furnished by the Contractor such as but not limited to pot bearing designs, nonstandard expansion joints, MSE wall designs and

other specialty items. The Specialty Engineer may also provide designs and details for items of the permanent work declared by the State Construction Office to be “minor” or “non-structural”. The Specialty Engineer may be an employee or officer of the Contractor or a fabricator, an employee or officer of an entity providing components to a fabricator, or an independent consultant. For items of work not specifically covered by the Rules of the Department of Transportation, a Specialty Engineer is qualified if he has the following qualifications:

Registration as a Professional Engineer in the State of Florida.
The education and experience necessary to perform the submitted design as required by the Florida Department of Business and Professional Regulation.

Specifications
The directions, provisions, and requirements contained herein, together with all stipulations contained in the Contract Documents, setting out or relating to the method and manner of performing the work, or to the quantities and qualities of materials and labor to be furnished under the Contract.

Standard Specifications: “Standard Specifications for Road and Bridge Construction” a bound book, applicable to all FDOT Contracts containing adopted requirements, setting out or relating to the method or manner of performing work, or to the quantities and qualities of materials and labor.

Supplemental Specifications: Approved additions and revisions to the Standard Specifications, applicable to all Department Contracts.

Special Provisions: Specific clauses adopted by the Department that add to or revise the Standard Specifications or supplemental specifications, setting forth conditions varying from or additional to the Standard Specifications applicable to a specific project.

Technical Special Provisions: Specifications, of a technical nature, prepared, signed, and sealed by an Engineer registered in the State of Florida other than the State Specifications Engineer or his designee, that are made part of the Contract as an attachment to the Contract Documents.

Developmental Specification: A specification developed around a new process, procedure, or material.

Standard Specifications
See definition for Specifications.

State
State of Florida.

Subarticle
A headed and numbered subdivision of an Article of a Section of these Specifications.

Subgrade
The portion of the roadbed immediately below the base course or pavement, including

below the curb and gutter, valley gutter, shoulder and driveway pavement. The subgrade limits ordinarily include those portions of the roadbed shown in the plans to be constructed to a design bearing value or to be otherwise specially treated. Where no limits are shown in the plans, the subgrade section extends to a depth of 12 inches below the bottom of the base or pavement and outward to 6 inches beyond the base, pavement, or curb and gutter.

Substructure
All of that part of a bridge structure below the bridge seats, including the parapets, backwalls, and wingwalls of abutments.

Superintendent
The Contractor's authorized representative in responsible charge of the work.

Superstructure
The entire bridge structure above the substructure, including anchorage and anchor bolts, but excluding the parapets, backwalls, and wingwalls of abutments.

Supplemental Agreement
A written agreement between the Contractor and theCounty, and signed by the surety, modifying the Contract within the limitations set forth in these Specifications.

Supplemental Specifications See definition for Specifications.

Surety
The corporate body that is bound by the Contract Bond with and for the Contractor and responsible for the performance of the Contract and for payment of all legal debts pertaining thereto.

Technical Special Provisions See definition for Specifications.

Traveled Way
The portion of the roadway providing for the movement of vehicles, exclusive of shoulders and auxiliary lanes.

Unilateral Payment
A payment of money made to the Contractor by the Department pursuant to Section 337.11(12), Florida Statutes (2009), for sums the Department determines to be due to the Contractor for work performed on the project, and whereby the Contractor by acceptance of such payment does not waive any rights the Contractor may otherwise have against the Department for payment of any additional sums the Contractor claims are due for the work.

Work
All labor, materials and incidentals required to execute and complete the requirements of the Contract including superintendence, use of equipment and tools, and all services and responsibilities prescribed or implied.

Work Order
A written agreement between the Contractor and the County modifying the Contract within the limitations set forth in these Specifications. Funds for this agreement are drawn against the Initial Contingency Pay Item or a Contingency Supplemental Agreement.

Working Day
Any calendar day on which the Contractor works or is expected to work in accordance with the approved work progress schedule.

END OF SECTION 01000

SECTION 01300 - SUBMITTALS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

Drawings and General and Supplemental Provisions of the Contract, apply to this Section.

1.2 SUMMARY

A. This Section includes administrative and procedural requirements for submittals required for performance of the Work, including, but not limited to the following:

1. Submittal Procedures
2. Contractor's Construction Schedule
3. Daily Construction Reports
4. Shop Drawings
5. Product Data
6. Samples
7. Quality Assurance Submittals
8. Licenses
9. Pictures, Video of Pre-Construction Conditions

B. Administrative Submittals: Refer to other Sections and other Contract Documents for requirements for administrative submittals. Such submittals include, but are not limited to, the following:

1. Permits
2. Applications for Payment
3. Performance and Payment Bonds
4. Insurance Certificates
5. List of Subcontractors
6. Licenses

1.3 SUBMITTAL PROCEDURES

A. Coordination: Coordinate preparation and processing of submittals with performance of construction activities. Transmit each submittal sufficiently in advance of performance of related construction activities to avoid delay.

1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, inspections, and related activities that require sequential activity.

2. Coordinate transmittal of different types of submittals for related elements of the Work so processing will not be delayed by the need

to review submittals concurrently for coordination. The County reserves the right to withhold action on a submittal requiring coordination with other submittals until all related submittals are received.

3. Processing: To avoid the need to delay construction as a result of the time required to process submittals, allow sufficient time for submittal review, including time for re-submittals. Allow 2 weeks for initial review. Allow additional time if the County must delay processing to permit coordination with subsequent submittals.

    a. If an intermediate submittal is necessary, process the same as the initial submittal.
    b. Allow 2 weeks for reprocessing each submittal.
    c. No extension of Contract Time will be authorized because of failure to transmit submittals to the County sufficiently in advance of the Work to permit processing.

B. Submittal Preparation: Place a permanent label or title block on each submittal for identification. Indicate the name of the entity that prepared each submittal on the label or title block.

1. Provide a space approximately 4 by 5 inches on the label or beside the title block on Shop Drawings to record the Contractor's review and approval markings and the action taken.

2. Include the following information on the label for processing and recording action taken.

    a. Project Name.
    b. Date.
    c. Name and Address of the Engineer.
    d. Name and Address of the Contractor.

C. Submittal Transmittal: Package each submittal appropriately for transmittal and handling. Four copies of each submittal (three hard copy and one digital) shall be transmitted. Transmit each submittal from the Contractor to the County, (copy Engineer) using a transmittal form. The County will not accept submittals received from sources other than the Contractor. Submittals must be approved by Contractor prior to review by County. On the transmittal, record relevant information and requests for data. On the form or on a separate sheet, record deviations from Contract Document requirements, including variations and limitations. Include Contractor's certification that the information complies with Contract Document requirements on each submittal.

1.4 CONSTRUCTION SCHEDULE/DOCUMENTATION

A. Bar-Chart Schedule: Prepare a fully developed, horizontal bar-chart-type, contractor's construction schedule. Submit within 10 days of the issuance of the Notice to Proceed. The contractor shall submit an updated schedule at least once per month, showing any schedule changes. This may be requested up to three times per month by the County. Include dates of shop drawing submittals.

B. Cost Correlation: At the head of the schedule, provide a cost correlation line, indicating planned and actual costs. On the line, show dollar volume of Work performed as of the dates used for preparation of payment requests.

C. Pre-Construction Site Conditions Photos/Video: Contractor shall submit a DVD of photos and video of the site conditions prior to the performance of any work.

D. Licenses: All required licenses to perform work shall be submitted prior to the commencement of construction.

1.5 DAILY CONSTRUCTION REPORTS

Prepare a daily construction report recording the following information concerning events at the site, and submit duplicate copies to the County at weekly intervals including, but not limited to:

1. Work performed.
2. Approximate count of personnel at the site.
3. Count and type of major equipment at the site.
4. High and low temperatures, general weather conditions, including daily rainfall amount from gauge installed on site jointly recorded by contractor and county representative.
5. Accidents and unusual events.
6. Meetings and significant decisions.
7. Stoppages, delays, shortages, and losses.
8. Emergency procedures.
9. Orders and requests of governing authorities.
10. Change Orders received, implemented.
11. Material Expenditures.

1.6 SHOP DRAWINGS

A. Submit shop drawings for structures unless FDOT approved structures are used.

B. Shop Drawings – Including, but not limited to the following information:

1. Dimensions.
2. Identification of products and materials included by sheet and detail number.
3. Compliance with specified standards.

1.7 PRODUCT DATA

Product Data - Include the following information:

1. Manufacturer's printed recommendations.
2. Compliance with trade association standards.
3. Compliance with recognized testing agency standards.
4. Application of testing agency labels and seals.

1.8 SAMPLES

Submit samples as specified in the technical specifications.

1.9 QUALITY CONTROL (QC) / QUALITY ASSURANCE (QA) SUBMITTALS

A. Submit the QC Plan to the County for approval within 21 calendar days after the Notice to Proceed. The County will review the QC Plan and respond to the Contractor within 21 calendar days of receipt.

If at any time the Contractor is not in compliance with the approved QC Plan, or a part thereof, affected portions of the plan will be disapproved. The contractor shall cease work in the affected operation(s) and submit a revision to the County. If the QC Plan, or a part thereof, must be revised, submit the revision to the County. The County will review the revision and respond within seven calendar days of receipt.

Continue to work on operations that are still in compliance with the approved sections of the QC Plan.

B. Certifications: Where other Sections of the Specifications require certification that a product, material, or installation complies with specified requirements, submit to the County a certification from the manufacturer certifying compliance with specified requirements.

C. Inspection and Test Reports: Requirements for specific testing are included in the technical specifications.

1. Submit to the County: Two (2) copies (one hard copy and one digital) of the inspection and test reports from a qualified, independent, geotechnical engineering testing agency, under the direction of a Professional Engineer, licensed in the State of Florida.

2. All testing required by the specifications or the County shall be at the contractors expense.

3. No additional work within/upon the tested area shall proceed until submitted test results confirm compliance with specification requirements.

4. Areas where submitted test results indicate non-compliance shall be removed, replaced, and retested. Extents of area out of compliance shall be determined by testing at 25’ increments, in each direction within the construction area, until passing results are achieved.

5. Variations from testing requirements and frequency of testing may be authorized by the County and will be documented in writing.

1.10 ENGINEER'S ACTION

Except for submittals for the record or information, where action and return is required, the County will review each submittal, mark to indicate action taken, return to contractor within the timeframe allotted herein. Compliance with specified characteristics is the Contractor's responsibility.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION (Not Applicable)

END OF SECTION 01300

SECTION 02230 - CLEARING & GRUBBING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions shall apply to this Section.

B. Florida Department of Transportation*, Standard Specifications for Road and Bridge Construction, Section 110, Latest Edition.*

C. Emerald Coast Utility Authority (ECUA) *Engineering Manual*, *Latest Edition.*

1.2 SUMMARY

A. This Section includes, but is not limited to, the following:

1. Protection of existing trees indicated to remain.
2. Removal of trees and other vegetation.
3. Clearing and grubbing.
4. Removing above-grade improvements.
5. Removing below-grade improvements.

B. Extent of clearing & grubbing shall remain in County right-of-way, easements (temporary or permanent), or approved written work agreement areas, unless otherwise noted or instructed.

1.3 PROJECT CONDITIONS

Provide protection for all public land corners and monuments within the limits of construction. Any Monuments disturbed while performing the work will be replaced at the contractor's expense.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION

3.1 SITE CLEARING

A. General: Remove trees, shrubs, grass, and other vegetation, improvements, or obstructions, as required, to permit installation of new construction. Remove similar items elsewhere on site or premises as specifically indicated. Removal includes digging out and off-site disposal of stumps and roots.

Carefully and cleanly cut minor roots and branches of trees indicated to

remain in a manner where such roots and branches obstruct installation of new construction.

B. Clearing and Grubbing: Clear site of trees, shrubs, and other vegetation, except for those indicated to remain.

1. Completely remove all stumps within the roadway. Remove roots and other debris to a depth of 12” below the ground surface or finished grade, whichever is lower.

2. Use only hand methods for grubbing inside drip line of trees Indicated to remain.

3. Fill depressions caused by clearing and grubbing operations with satisfactory soil material, unless further excavation or earthwork is indicated in accordance with Section 2300.

C. Removal of Improvements: Remove existing above grade and below grade improvements as indicated and as necessary to facilitate new construction, and other work as indicated.

3.2 DISPOSAL OF WASTE MATERIALS

A. Burning: Burning is not permitted on County property. Requests to burn will be considered on a case by case basis. If approved, Contractor is to acquire permits and provide copies to the County.

B. Removal from County Property: Remove waste materials and unsuitable or excess topsoil from County property, and dispose of off site in a legal manner.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Lump Sum Payment: When direct payment is provided in the Contract for the quantity to be paid for as the lump sum quantity cleared and grubbed, no additional measurements will be made.

B. Payment By The Acre/Square Yard: For areas of Clearing and Grubbing that are designated to be paid for separately by the acre or square yard, the quantity to be paid for will be determined by measurement of the areas shown on the plans or authorized by the County to be cleared and grubbed, and acceptably completed.

4.2 BASIS OF PAYMENT

A. General: Price and payment will be full compensation for all Clearing and Grubbing required for the roadway right-of-way and for lateral ditches, channel changes, or other outfall areas, and any other Clearing and Grubbing indicated, or required for the construction of the entire project, except for any areas designated to be paid for separately or to be specifically included in the costs of other work under the contract. Price and payment, either lump sum or by the acre/square yard will be full compensation for all the work specified in this Section, including all necessary hauling, furnishing equipment, equipment operation, furnishing any areas required for disposal of debris, leveling of terrain and the landscaping work of trimming, etc., as specified herein.

B. Lump Sum Payment: Payment shall be made at the lump sum contract price for Clearing and Grubbing, lump sum.

C. Payment: Payment shall be made at the per unit contract price for Clearing and Grubbing, per acre or square yard.

END OF SECTION 02230

SECTION 02300 - EARTHWORK

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions, apply to this Section.

B. Florida Department of Transportation*, Standard Specifications for Road and Bridge Construction, Latest Edition*.

1.2 SUMMARY

A. This Section includes preparing and grading for pavement, curb, subgrades, drainage features, and general site work.

B. Related Sections: The following Sections contain requirements that relate to this Section.

1. Section 2230 "Clearing & Grubbing" for clearing, grubbing, and tree protection.

2. Section 2600 “Stormwater System” for installation of stormwater systems.

1.3 DEFINITIONS

A. Excavation consists of the removal of material encountered to subgrade elevations and the reuse or disposal of materials removed.

B. Subgrade: The uppermost surface of an excavation or the top surface of a fill or backfill immediately below subbase, base, drainage fill, or topsoil materials.

C. Borrow: Soil material obtained off-site when sufficient approved soil material is not available from on-site excavations.

D. Subbase Course: The layer placed between the subgrade and base course in a paving system.

E. Base Course: The layer placed immediately beneath the surface pavement in a paving system.

F. Unauthorized excavation consists of removing materials beyond indicated subgrade elevations or dimensions without direction by the County. Unauthorized excavation, as well as remedial work directed by the Engineer, shall be at the Contractor's expense.

G. Structures: Buildings, footings, foundations, retaining walls, slabs, tanks, curbs, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below ground surface.

H. Utilities include on-site above ground utilities, overhead utilities and underground utilities including: pipes, conduits, ducts, and cables, as well as related appurtenances and underground services within building lines.

I. Unsuitable Material: Any material such as muck, wood, rock, peat, garbage, non-compactable soils in dry condition, and any other material that is considered by the County Engineer to be unsuitable.

J. Topsoil: Topsoil is defined as the surface layer of soil found normally to a depth of at least 4 to 8 inches that typically contains organic materials. Satisfactory topsoil is reasonably free of roots, clay lumps, stones, other objects over 2 inches in diameter, and any other objectionable or deleterious material.

1.4 SUBMITTALS

A. General: Submit the following in accordance with Section 1300, "Submittals."

B. Product Data and Samples of the following:

1. 1-lb representative samples of each proposed fill and backfill soil material from borrow sources as selected by the County.

2. 12-by-12-inch sample of filter fabric.

3. Representative samples of the proposed base and sub-base materials.

C. Test Reports: In addition to test reports required under field quality control, submit the original directly to the County from the testing services, with a copy to the Contractor:

1. Laboratory analysis as specified in 1.1 (Related Documents) of each soil material proposed for fill and backfill from borrow sources.

2. One optimum moisture-maximum density curve for each soil material.

3. Report of actual unconfined compressive strength and/or results of bearing tests of each stratum tested.

1.5 QUALITY CONTROL / QUALITY ASSURANCE

A. Codes and Standards: Perform earthwork complying with all requirements of authorities having jurisdiction.

B. Testing and Inspection Service: A qualified independent geotechnical engineering testing agency, under the direction of a Professional Engineer, licensed in the State of Florida to classify, perform soil tests, and provide inspection services for quality control. All proposed borrow soils will require the testing agency to verify that soils comply with specified requirements and to perform required field and laboratory testing. Contractor shall replace materials removed for testing purposes. Should any work or materials fail to meet the requirements set forth in the plans and specifications, contractor shall reimburse for additional and re-testing.

1.6 PROJECT CONDITIONS

A. Site Information: Data in the subsurface investigation Report, if available, is used for the basis of the design and is available to the contractor for information only. Conditions are not intended as representations or warranties of accuracy or continuity between soil borings. The County will not be responsible for interpretations or conclusions drawn from this data by the Contractor.

B. Existing Utilities: After location of utilities by the appropriate utility company, it is the Contractor's responsibility to protect all such utility lines, including service lines and appurtenances, and to replace at his own expense any that may be damaged by the Contractor's equipment or forces during construction of the Project.

1. Provide a minimum of 48-hours notice to the County and receive written notice to proceed before interrupting any utility.

2. The contractor is responsible for contacting all utility companies to verify locations of all existing utilities, utility-related obstructions, or utility relocations that he may encounter during construction.

3. Adequate provision shall be made for the flow of existing sewers, drains, and water courses encountered during construction, and structures which may be disturbed shall be satisfactorily restored by the Contractor at his expense.

C. Should uncharted, or incorrectly charted, piping or other utilities be encountered during the course of the work, consult the County immediately for directions. Cooperate with the County and utility companies in keeping respective services and facilities in operation.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. General: Soils used as fill shall be clean sands, similar to existing site soil, with less than 5% passing the number 200 sieve when existing subgrade conditions are considered wet as per the County. Soils as described above with less than 15% passing the number 200 sieve and meeting the requirements of Section 902-6 of the FDOT Specifications may be used when existing subgrade conditions are considered dry as per the County. The sand shall have a maximum dry density of at least 100 pounds per cubic foot, according to the Standard Proctor compaction test, AASHTO T-99, ASTM D698. Provide approved borrow soil materials from off-site when sufficient satisfactory soil materials are not available from on-site excavations.

If the Contractor elects to import any materials, then he will do so only with the approval of the County and at his own expense, unless separate payments for such items are called for in these specifications. Provide laboratory certification that soils meet requirements of specifications.

B. Sub-Base Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, or sand. The material shall be stabilized in accordance with FDOT Standard Specification Section 160-5.4. ASTM D 2940, with at least 95 percent passing a 1-1/2-inch sieve, and not more than 8 percent passing a No. 200 sieve.

PART 3 - EXECUTION

3.1 DEWATERING

A. Prevent surface water and subsurface or groundwater from entering excavations, from ponding on sub-grades in work areas, and from flooding project site and surrounding area.

B. Protect subgrades and foundation soils from softening and damage by rain or water accumulation.

C. The Contractor shall prevent the accumulation of water in excavated areas, and shall remove, by pumping or other means, any water that accumulates in the excavation. The Contractor shall prevent the accumulation of water in both structural and trench excavations and shall remove, by well point system or by other means, water which accumulates. The Contractor shall provide, install and operate a suitable and satisfactory dewatering system, when needed to dry sub-grades or other work areas. The Contractor shall comply with the latest testing requirements as set forth by the applicable regulatory agency. At a minimum, the contractor shall test once prior to dewatering, once within

the first week of dewatering, and once every thirty (30) days while dewatering.

D. Establish and maintain temporary drainage ditches and other diversions outside excavation limits to convey rainwater and water removed from excavations to collection or runoff areas. Do not use trench excavations as temporary drainage ditches. Discharged water shall be clean, not silt or sediment laden, prior to discharge to untreated system and/or waters of the State.

3.2 EXCAVATION

A. Explosives: Not permitted.

B. Strip topsoil and significant root systems to whatever depths encountered in a manner to prevent intermingling with underlying subsoil or other objectionable material. Remove heavy growths of grass from areas before stripping. Where existing trees are indicated to remain, leave existing topsoil in place within drip lines to prevent damage to root systems.

3.3 STABILITY OF EXCAVATIONS

A. Comply with local codes, ordinances, and requirements of authorities having jurisdiction to maintain stable excavations.

B. All excavation work shall conform to all applicable OSHA Publications, Latest Editions. The Contractor's method of providing protective support to prevent cave-ins shall conform to OSHA requirements. Slope excavations, shoring, and trench box usage in the field must be based on tabulated data and designed by the Contractor. The contractor is solely responsible for job site safety and shall not be compensated for required safety equipment/devices.

3.4 EXCAVATION FOR STRUCTURES

Excavate to indicated elevations and dimensions within a tolerance of plus or minus 0.10 foot. Extend excavations a sufficient distance from structures for placing and removing concrete formwork, maintaining a safe slope, installing services and other construction, and for inspections.

A. Footings and Foundations: Excavate by hand to final grade just before placing concrete reinforcement. Trim bottoms to required lines and grades to leave solid base to receive other work.

B. Pile Foundations: After piles have been installed, remove loose and displaced material. Excavate to final grade, leaving solid base to receive concrete pile caps.

C. Excavation for Underground Tanks, Basins, and Mechanical or Electrical Appurtenances: Excavate to elevations and dimensions indicated within a tolerance of plus or minus 0.10 foot.

3.5 EXCAVATION FOR WALKS AND PAVEMENTS

Excavate surfaces under walks and pavements to indicated cross sections, elevations, and grades. Consider Dewatering and other sections as applicable.

3.6 EXCAVATION FOR STORMWATER SYSTEMS

Excavate and compact the backfill of trenches to the densities specified for embankment or subgrade, as applicable, and in accordance with the requirements of Section 2600. Consider Dewatering and other sections as applicable.

3.7 STORAGE OF SOIL MATERIALS

Stockpile excavated materials acceptable for backfill, fill soil, and topsoil materials, including acceptable borrow materials. Stockpile soil materials without intermixing. Stockpiles shall be placed, graded, and shaped to drain surface water and prevent erosion. Cover to prevent wind-blown dust and/or erosion. Stockpile soil materials away from edge of excavations. Do not store within drip line of remaining trees.

3.8 BACKFILL

A. Backfill excavations promptly, but not before completing the following:

1. Acceptance of construction below finish grade including, where applicable, filter fabric installation and gravel bedding.

2. Surveying locations of underground utilities for record documents.

3. Testing, inspecting, and approval of underground utilities.

4. Removal of trash and debris from excavation.

5. Removal of temporary shoring, bracing, and sheeting unless specified to remain.

B. No backfill material shall be placed, spread or rolled during unfavorable weather conditions. When the work is interrupted by heavy rain, backfill operations shall not be resumed until the moisture content of the fill is as previously specified to achieve proper compaction.

3.9 FILL

A. Preparation: Remove vegetation, topsoil, debris, wet and unsatisfactory soil materials, obstructions, and deleterious materials from ground surface prior to placing fills. Plow strip, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing surface. In order to insure proper bond and prevent slipping between the original ground and fill, the surface of the original ground shall be scarified to a depth of at least three inches. Each layer of fill material shall be compacted until the required density is achieved, and the density achieved should be verified in accordance with specifications using in-place density testing.

B. When subgrade or existing ground surface is to receive fill and has a density less than that required for fill, break up ground surface to depth required, pulverize, moisture condition or aerate soil and re-compact to required density.

C. Place fill material in layers to required elevations for each location listed below.

1. Under grass, subbase or base material, use satisfactory excavated or borrow soil material.

2. Under walks and pavements, curbs, steps, ramps, building slabs, footings and foundations use subbase and/or base material.

3.10 MOISTURE CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill layer before compaction to within 2 percent of optimum moisture content.

B. Do not place backfill or fill material on surfaces that contain excessive moisture.

C. Remove and replace, or scarify and air-dry satisfactory soil material that is too wet to compact to specified density. Stockpile or spread and dry removed wet satisfactory soil material.

3.11 COMPACTION

A. Place backfill and fill materials in layers or lifts not more than 12 inches in loose depth for material compacted by heavy compaction equipment, and not more than 8 inches in loose depth for material compacted by hand-operated tampers.

B. Place backfill and fill materials evenly on all sides of structures to required elevations. Place backfill and fill uniformly along the full length of each structure.

C. Percentage of Maximum Dry Density Requirements: Compact soil to not less than the following percentages of maximum dry density according to ASTM Modified Proctor):

1. Under structures, building slabs, steps, and pavements, compact each layer of backfill or fill material at a minimum of 98% Modified Proctor of the material's maximum dry density.

2. Under lawn or unpaved areas, compact each layer of backfill or fill material at 95% Modified Proctor maximum dry density.

3.12 GRADING

A. General: Uniformly grade areas to a smooth surface, free from irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.

1. Provide a smooth transition between existing adjacent grades and new grades.

2. Cut out soft spots, fill low spots, and trim high spots to conform to required surface tolerances.

B. Site Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish subgrades to required elevations within the following tolerances:

1. Lawn or Unpaved Areas: Plus or minus 0.10 foot.

2. Walks: Plus or minus 0.10 foot.

3. Pavements: Plus or minus ½ inch.

3.13 STABILIZED SUBGRADE

A. For stabilized subgrade the type of materials, commercial or local, is at the Contractor's option and no separate payment for stabilizing materials will be made (other than as may be paid for as borrow).

B. When stabilizing is designated as Type B, compliance with the bearing value requirements will be determined by the Limerock Bearing Ratio Method. Minimum LBR shall be 40.

C. It is the Contractor's responsibility that the finished roadbed section meets the bearing value requirements, regardless of the quantity of stabilizing materials necessary to be added. Also, full payment will be made for any areas where the existing subgrade materials meet the design bearing value requirements without the addition of stabilizing additives, as well as areas where the Contractor may elect to place select high-bearing

materials from other sources, within the limits of the stabilizing.

D. After the roadbed grading operations have been substantially completed, the Contractor shall make his own determination as to the quantity (if any) of stabilizing material, of the type selected by him, necessary for compliance with the bearing value requirements. The contractor shall notify the Engineer of the approximate quantity to be added, and the spreading and mixing-in of such quantity of materials shall meet the approval of the County as to uniformity and effectiveness.

3.14 FIELD QUALITY CONTROL

A. Testing Agency Services: Allow testing agency to inspect and test each subgrade and each fill or backfill layer. Do not proceed until test results for previously completed work verify compliance with requirements.

1. Perform field in-place density tests according to ASTM D 1556 (sand cone method), ASTM D 2167 (rubber balloon method), ASTM D 293 (drive cylinder method), or ASTM D 2922 (nuclear method), as applicable.

a. Field in-place density tests may also be performed by the nuclear method according to ASTM D 2922, provided that calibration curves are periodically checked and adjusted to correlate to tests performed using ASTM D 1556. With each density calibration check, check the calibration curves furnished with the speedy moisture meter according to ASTM D 3017.

b. When field in-place density tests are performed using nuclear methods, make calibration checks of both density and speedy moisture meter at beginning of work, on each different type of material encountered, and at intervals as directed by the Engineer.

2. Paved Areas: Make at least one field density test of subgrade, base, and each compacted fill layer for every 300 linear feet of roadway or equivalent area, but in no case less than two tests. Tests shall be staggered to ensure representative sampling.

3. Unpaved Areas: Make at least one field density test of each compacted fill layer or subgrade for every 1000 square yards of area, but in no case less than two tests.

4. Other tests may be required at County’s discretion.

B. If, in the opinion of the County, based on testing service reports and

inspection or the Engineer's observations, subgrades, fills, or backfills are below specified density, scarify and moisten or aerate as needed, or remove and replace soil to the depth required, re-compact, and re-test until required density is obtained at no additional expense.

3.15 REPAIR & CORRECTIONS

A. Protecting Graded Areas: Protect newly graded areas from traffic and erosion. Keep free of trash and debris. Repair and re-establish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or lose compaction due to subsequent construction operations or weather conditions. Scarify or remove and replace material to depth directed by the Engineer; reshape and re-compact at optimum moisture content to the required density.

B. Settling: Where settling occurs, remove finished surfacing, backfill with additional approved material, compact, and reconstruct surfacing. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to the greatest extent possible.

C. When traffic must cross open trenches, the contractor shall provide suitable bridge of graded aggregate base or temporary asphalt paving as directed by County at no additional expense. (See Section 4060 for additional requirements.)

D. Erosion Control: The Contractor shall be responsible for the prevention of erosion from the site and for maintaining filled and graded surfaces for the duration of the project. This includes, but is not limited to, the erection of a silt fence and hay bale barricade as per Florida Stormwater Erosion and Sedimentation Control Inspector's Manual and/or as shown in the construction plans. The Contractor shall take whatever steps necessary to prevent erosion and sedimentation, and will be responsible for any damages which might occur to down-land properties as a result of run-off from the site during sitework construction at no additional cost. Provide erosion control measures to prevent erosion or displacement of soils and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways.

3.16 DISPOSAL OF SURPLUS AND WASTE MATERIALS

Surplus excavated material becomes the property of the Contractor unless otherwise noted. Waste materials, including unsatisfactory soils, trash and debris shall be removed and legally disposed of, off the Owner's property.

3.17 CLEAN-UP AND FINAL INSPECTION

Before final inspection and acceptance the Contractor shall clean ditches, shape

shoulders and restore all disturbed areas, including street crossings, grass plots, re-grassing if necessary, to as good a condition as existed before work started.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Excavation: When payment for excavation is on a volumetric basis, the quantity to be paid for will be the volume, in cubic yards, calculated by the method of average end areas according to the survey and plans. If actual quantities vary in field, contractor shall communicate with Engineer and/or County to request additional payment. The measurement will include the net volume of material between the original ground surface and the surface of completed earthwork according to the survey and plans. If actual quantities vary in field, contractor shall communicate with the County to request additional payment. Excavation for swales and channels will be included in the total quantity for Excavation. Subsoil Excavation will be measured to the lines and grades indicated on the plans or as approved by the County. Backfill material shall either include normal excavation material from within project limits or borrow material supplied by the Contractor.

B. Embankment: Quantities for Embankment will be calculated by the method of average end or square yard areas, and will include material placed above the original ground line, within the lines and grades indicated on the plans or as directed by the County.

C. Calcium Chloride for Dust Control: The quantity to be paid for will be the weight, in tons, of calcium chloride authorized and acceptably spread on the road, within the limits specified by the County. The quantity will be determined from scales, certified freight bills, or other sources, the accuracy of which can be authenticated.

4.2 BASIS OF PAYMENT

A. General: Prices and payments for the various work items included in this section will be full compensation for all work described herein, including excavating, dewatering, dredging, hauling, placing, and compacting. Separate pay items will be provided for all devices required to maintain control of erosion according to plans and NPDES permit. Additional devices shall be no additional cost.

B. Excavation: Unit prices will be established for required cubic yard volumes of Regular Excavation, Subsoil Excavation, and Borrow Excavation as necessary. When subsoil excavation is required to a depth greater than plans and specifications require, and additional excavation is not due to unsuitable, a change order will be required to establish a new quantity utilizing the current unit price.

C. Embankment: Payment shall be made at the unit contract price for Embankment, cubic yard or square yard, in place, according to plans.

D. Calcium Chloride for Dust Control: Price and payment will be full compensation for all work and materials specified for this item, including specifically all required shaping and maintenance of the treated area and all water furnished and applied to the area.

E. Dewatering: The contractor shall include the cost of dewatering in the unit price bid for the stormwater pipe if there is not a specific line item used in the contract.

END OF SECTION 02300

SECTION 02320 - UNDERDRAIN AND EXFILTRATION TRENCH

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawing and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 440, and Design Standards, Latest Edition*.

1.2 DESCRIPTION OF WORK

This section shall cover the work of furnishing pipe for underdrain and exfiltration trenches, the type and size shown on the plans or in the proposal in accordance with the requirements of these specifications, and installing such pipe at the locations shown on the plans or designed by the County in substantial conformity with the established lines, trench widths, filter media, and grades. The work shall include furnishing and construction of such joints and connections to other pipes as may be required to complete the work, as shown on the plans or directed, together with the specified trench, filter media, and filter fabric materials. Filter media may be sand, gravel, gravel pack, and/or a combination thereof.

PART 2 - PRODUCTS

A. Underdrain Pipe: Underdrain pipe shall conform to the requirements of Florida Department of Transportation Standard Specification 948-2, Latest Edition. The perforations shall meet the requirements for perforations as specified in AASHTO M294. Pipe shall be perforated polyethylene ADS N-12 or approved equal.

B. Filter Aggregate shall be clean, washed gravel free of organic material and fines with minimum 33% percent voids. Aggregate shall be at least FDOT stone or equivalent.

C. Filter Fabric shall be Terratex EP (Woven) or approved equal meeting the requirements of FDOT Specification Section 985.

D. Filter sand shall be clean sand, free of organic materials and fines, with an effective grains size of 0.20 to 0.55 mm, uniformity coefficient of 1.5 to 4.0, a K value (recommended design permeability) not to exceed 2.5 ft/hr, and the contractor shall provide a grain-size analysis to the County for the project.

PART 3 - EXECUTION

3.1 STANDARD INSTALLATION:

A. Trenches shall be excavated to the dimensions shown on the plans or as directed. A bedding layer of filter aggregate or filter sand of the size shown on the plans shall be placed in the bottom of the filter fabric lined trench for its full width and length and compacted as directed.

B. Subdrainage pipe of the type and size specified shall be embedded firmly in the bedding material. All pipe sections shall be securely joined with the appropriate coupling fittings or bands as per manufacturer's specifications.

C. After the pipe installation has been inspected and approved, the specified filter aggregate, gravel pack, and/or filter sand shall be placed as shown on the drawings and filter fabric wrapped around the filter media with a minimum overlap (as required) on top. Install wire mesh at opening/outfall. Care shall be taken not to displace the pipe.

D. The Contractor shall take every precaution to prevent the entrance of soil and sediments into the filter bed during construction, which would sacrifice the integrity of the filter fabric and aggregate installed. Stormwater runoff and sedimentation controls to be provided so as to protect the underdrain or exfiltration trench system.

E. Installation of the corrugated polyethylene pipe shall be in accordance with the ASTM D-2321 Latest Revision.

F. Gravel packs shall be installed around the filter-drain underdrain pipe an average thickness of at least six inches from the underdrain pipe for all underdrain systems located within pond bottoms and pond banks. The minimum separation between the gravel pack and the top of the filter bed shall be two feet. A permeable filter fabric shall be wrapped around the gravel pack.

G. Cleanouts or inspection boxes shall be installed, at minimum, every 400 feet or as specified by plan, at every directional change or bend, and at the beginning (upstream) and at the terminus (downstream) of the underdrain pipes or exfiltration trench systems.

H. Cleanouts shall have vertical portions non-perforated, include water-tight caps, and shall incorporate fittings (wye fittings or elbow bends) that have an angle no less than 45 degrees.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the length, in feet, of underdrain, which include trench filter fabric, measured in place, along the centerline and gradient of the underdrain, completed and accepted. The quantities to be paid for will be the length, in feet, of outlet pipe measured in place, along the centerline and gradient of the outlet pipe, completed and accepted. The quantity of underdrain inspection boxes and cleanouts to be paid for will be the number completed and accepted. When payment for gravel or sand filter media is on a volumetric basis, the quantity to be paid for will be the volume, in cubic yards, calculated based upon the length, width, and depth of the underdrain or exfiltration trench dimensions, minus the pipe volume, as shown on the plans, unless the filter media is specified as a bid item included in the costs of the underdrain or exfiltration system.

4.2 BASIS OF PAYMENT

Prices and payment for this item shall include all labor, equipment and materials necessary to complete the work in accordance with the plans and specifications. Materials covered under this pay item include but are not limited to: pipe including fittings, filter fabric, filter media, filter sand, filter aggregate, cleanout structures and inspections boxes. Payment shall be made for the underdrain or exfiltration pipe based upon the length of pipe. Unit prices will be established for the number of cleanouts structures and inspection boxes, unless otherwise specified as a bid item included in the under underdrain or exfiltration trench system. Unit prices will also be established for required cubic yard volume of gravel or sand filter media based upon the length, width, and depth of the underdrain or exfiltration trench, minus the pipe volume, as shown on the plans, unless otherwise specified as a lump sum bid item included in the costs of the underdrain or exfiltration trench system. No additional payment will be made for filter media overages larger than the specified plan volume. No additional payment will be made for excavation of the trench or lining the trench with filter fabric. No additional payment will be made for underdrain pipe with a sock filter fabric.

END OF SECTION 02320

SECTION 02340 - RIPRAP

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 530*, and *Design Standards 281*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

This section shall cover the work of furnishing and constructing the Riprap which shall consist of a protective course of stone or other approved materials on embankment slopes, in channels, or other work as shown on the plans or directed, with or without a Filter Blanket, all in accordance with these Specifications and in conformity with the lines and grades noted in the plan details.

PART 2 - PRODUCTS

2.1 MATERIALS

Rubble\Stone Riprap shall comply with Florida Department of Transportation *Standard Specification 530-2.2*

A. Banks and shore protection shall comply with Florida Department of Transportation *Standard Specification 530-2.2.1*.

B. Ditch lining shall comply with Florida Department of Transportation *Standard Specification 530-2.2.2*.

C. Broken stone and broken concrete shall comply with Florida Department of Transportation *Standard Specification 530-2.2.3*.

D. Geotextile fabric shall comply with Florida Department of Transportation *Standard Specification 514* and Florida Department of Transportation *Design Standards 104* according to its application.

E. Bedding stone shall comply with Florida Department of Transportation *Standard Specification 530-2.3*.

F. Sand/Cement Riprap: Materials and placement shall comply with Florida Department of Transportation *Standard Specification 530-2.1*.

PART 3 - EXECUTION

3.1 EXECUTION

A. Construction Requirements:

General: All slopes to be treated with riprap shall be trimmed to the lines and grades indicated by the plans or directed, such that the plan grades are the top of the placed riprap, unless otherwise noted. Loose material shall be compacted by methods approved by the Engineer or removed.

Slopes which require a filter blanket under the riprap shall, in addition to the above, be prepared as noted below.

1. Placement of any riprap on a filter blanket shall be by such means that will not damage or destroy the blanket. Any damage to the blanket shall be repaired without additional compensation.

2. Unless directed otherwise by the Engineer or shown by plan details, all outer edges and the top of riprap where the riprap terminates shall be formed so that the surface of the riprap will be embedded and even with the surface of the ground and/or slope.

3. All riprap construction shall begin at the bottom of the slope and progress upward.

4. Filter Blanket: Unless otherwise specified by the plans or ordered in writing, a fabric blanket will not be allowed for soils with 85% by weight passing the No. 200 sieve (U.S. Std.)

5. The bedding stone shall be constructed in accordance with Florida Department of Transportation Specification 530-3.3.

6. Foundation Preparation: Areas on which filter fabrics are to be placed shall be uniformly trimmed and dressed to conform to cross-sections shown by the plans.

B. Plastic Filter Fabric (Geotextile):

Plastic filter fabric shall be placed in the manner and at the locations shown in the plans or as directed by the Engineer. At the time of installation, fabric shall be rejected if it has defects, rips, holes, flaws, deterioration or damage incurred during manufacturer, transportation or storage. The fabric shall be placed with the long dimension parallel to the centerline of the channel or shoreline unless otherwise directed by the Engineer, and shall be laid smooth and free of tension, stress, folds, wrinkles or creases. The strips shall be placed to provide a minimum

width of 24 inches of overlap for each joint with the upstream strip of fabric overlapping the downstream strip. Overlap joints and seams shall be measured as a single layer of cloth. Securing pins with washers shall be inserted through both strips of overlapped cloth as recommended by the manufacturer, but no greater than the following intervals along a line through the midpoint of the overlap.

Pin Spacing	Slope
2 ft.	Steeper than 3:1
3 ft.	3:1 to 4:1
5 ft.	Flatter than 4:1

The fabric shall be turned down and buried two feet at all exterior limits except where a stone-filled key is provided below natural ground.

Additional pins regardless of location shall be installed as necessary to prevent any slippage of the filter fabric. Overlaps in the fabric shall be placed so that any upstream strip of fabric will overlap the downstream strip. Should the Engineer direct that the fabric be placed with the long dimension perpendicular to the centerline of the channel or shoreline, the lower strip of fabric shall underlap the next higher strip. Each securing pin shall be pushed through the fabric until the washer bears against the fabric and secures it firmly to the foundation. The fabric shall be protected at all times during construction from contamination by surface runoff and any fabric so contaminated shall be removed and replaced with uncontaminated fabric. Any damage to the fabric during its installation or during placement of riprap shall be replaced by the Contractor. The work shall be scheduled so that the manufacturer's recommendation for UV exposure is not exceeded or 5 days does not expire between placement of the fabric and the covering of the fabric with riprap, whichever is less.

3.2 STONE AND CONCRETE RUBBLE RIPRAP

General: Unless otherwise shown by plan details or directed, stone or concrete shall not be placed on slopes steeper than the natural angle of repose of the riprap material.

Placement of stone or concrete may, unless otherwise noted hereinafter, be placed by methods and equipment suitable for the purpose of placing the riprap in accordance with the requirements for the class riprap involved without damaging any existing facility or construction material.

The stone or concrete shall be placed in such a manner as to produce a reasonably well graded mass of rock with the minimum practical percentage of voids. Stone or concrete shall be laid with close broken joints and resting on the embankment slope. The top of the riprap shall be constructed to the lines, grades and thickness shown by the plans or as directed. Riprap shall be placed

to its full course thickness in one operation and in such a manner as to avoid displacing or damaging the filter blanket material. The larger stone or concrete shall be well distributed and the entire mass of stone or concrete, in their final position, shall conform to a reasonable uniform gradation. The finished riprap shall be free from objectionable pockets of small stone or concrete and clusters of larger stone or concrete. Open joints shall be filled with spalls, or small stone or concrete in such manner that all stone or concrete are tightly wedged or keyed. Placing riprap by dumping into chutes or by other methods likely to cause segregation of sizes will not be permitted. The desired distribution of the various sizes of stone or concrete throughout the mass shall be obtained by selective loading of the material at the source, by controlled dumping of successive loads during final placing, or by other methods of placement which will produce the specified results. The individual pieces of stone or concrete in each horizontal course shall be laid so that they will not break away from embankment. Rearranging of individual stone or concrete by mechanical equipment, or by hand, will be required to the extent necessary to obtain a reasonably well graded distribution of stone or concrete as specified above.

3.3 SAND/CEMENT RIPRAP

A. Placing: Immediately following mixing, the mixture shall be placed in the bags, tied (so that when laid in position, they will flatten out and give a thickness of not less than six inches) and placed flat on the area designed. Use only one type of bag per structure. Bags shall be layered and wedged against each other to form closed joints, with tied ends of sacks all laid in the same direction. Sacks ripped or torn in placing shall be removed and replaced with sound, unbroken sacks. When required to be placed under water, special care shall be taken to see that bags are closely jointed to give the same tight joints as required on dry slopes. After the riprap is placed, it shall be sprinkled with water as directed and kept damp for not less than three days. No sand/cement riprap shall be mixed in freezing weather.

B. Grouting: Immediately after watering, all openings between sacks shall be filled with dry grout composed of one part Portland cement and five parts sand.

C. Pinned/Staked Bags: Bags shall be pinned/staked when called for on drawings.

3.4 CLEAN UP

Before final inspection and acceptance, the Contractor shall remove all excess material from site and restore all disturbed areas to as good a condition as existed before work started.

3.5 MAINTENANCE

The Contractor shall maintain all riprap until the contract work is accepted, and shall replace, without additional compensation, any damaged or missing riprap.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Sand-Cement: The quantity to be paid for will be the volume, in cubic yards, of sand actually used in the sand cement mixture and grout, satisfactorily placed and accepted. If sand is proportioned by volume, the sand will be measured loose in an approved measure prior to mixing with cement. If sand cement is proportioned by weight, approved scales will be used for this purpose and the volume will be calculated using a standard conversion factor for sand of 85lbs. /cubic feet. No adjustment of batch weights to allow for varying moisture content of the sand will be made.

B. Stone/Concrete Rubble and Bedding Stone: The quantities to be paid for will be, as per plans/bid schedule, and either by the weight in tons in surface dry natural state; by railroad scales, truck scales, or barge displacement, or by square yards (according to plan thickness.) The Contractor shall determine the weights as follows:

1. Railroad Weights: The Contractor shall weight railroad cars on railroad scales, before and after loading or before and after unloading. If weighed by other than the Engineer, a certified statement of weights will be required. Certificates of weight, furnished by the railroad company, will be accepted without further certification.

2. Truck Weights: The Contractor shall weigh trucks on certified scales, loaded and empty, as prescribed above for railroad weights. The Contractor shall weigh trucks in presence of the Engineer, or furnish certificates of weights.

3. Barge Displacement: The Engineer will measure each barge. The Contractor shall fit each barge with gauges graduated in tenths of a foot increment. The Contractor shall locate a gauge at each corner of the barge near the lower end of the rake. The Contractor shall furnish additional gauges amidships, if the Engineer deems necessary. The Engineer will review and check all computed weights. Weight certificates may be submitted.

4. In Place Measurement: The Contractor shall measure surface area (in square yards) of area riprap has been placed.

4.2 BASIS OF PAYMENT

A. Sand-Cement: Price and payment will be full compensation for all work specified in this Section, including all materials, labor, hauling, excavation, and backfill. The Contractor shall include the cost of dressing and shaping the existing fills (or subgrade) for placing riprap in the Contract unit price for Riprap (Sand-Cement.)

B. Stone/Rubble: Price and payment will be full compensation for all work specified in this Section, including all materials, hauling, excavation, and backfill. The Contractor shall include the cost of dressing and shaping the existing fill (or subgrade) for placing riprap in the Contract unit price for Riprap (Stone/Rubble). As an exception to the above, concrete that is shown to be removed from the project site and subsequently disposed of by being crushed and used in the embankment as riprap will not be paid for under this section. Include the cost of such work order under Removal of Existing Structures.

C. Bedding Stone: Price and payment will be full compensation for all work specified in this Section, including all materials and hauling. The Contractor shall include the cost of dressing and shaping the existing fills (or subgrade) for placing bedding stone in the Contract unit price for Riprap (Stone/Rubble).

END OF SECTION 02340

SECTION 02400 - GRADED AGGREGATE BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of contract, including General and Supplementary Conditions and other Specification Sections, apply to the work of this section.

1.2 DESCRIPTION OF WORK

This item shall consist of a base course of graded aggregate constructed on a subgrade prepared in accordance with the specifications and in conformity with the line, grades and typical cross-section as shown on the drawings.

PART 2 - PRODUCTS

2.1 MATERIALS

Use graded aggregate material which yields a satisfactory mixture meeting all the requirements of these Specifications after it has been crushed and processed as a part of the mining operations.

The Contractor may furnish the material in two sizes of such gradation that, when combined in a central mix plant pugmill, the resultant mixture meets the required specifications.

Use graded aggregate base material of uniform quality throughout, substantially free f rom organic matter, shale, lumps and clay balls, and having a Limerock Bearing Ratio value of not less than 98. Use material retained on the No.10 sieve composed of aggregate meeting the following requirements:

Soundness Loss, Sodium, Sulfate: AASHTO T 104.....15%
Percent Wear: AASHTO T 96 (Grading A)
Group 1 Aggregates..... 45%
Group 2 Aggregates..... 65%
Group 1 : This group of aggregates is composed of limestone, marble, or dolomite.
Group 2: This group of aggregates is composed of granite, gneiss, or quartzite.
Use graded aggregate base material meeting the following gradation:

Sieve Size	Percent by Weight Passing
2 inch	100
1 1/2 inch	95 to 100
3/4 inch	65 to 90
3/8 inch	45 to 75
No. 4	35 to 60

No. 10	25 to 45
No. 50	5 to 25
No. 200	0 to 10

For Group 1 aggregates, ensure that the fraction passing the No. 40 sieve has a Plasticity I ndex (AASHTO T 90) of not more than 4.0 and a Liquid Limit (AASHTO T 89) of not more than 25, and contains not more than 67% of the weight passing the No. 200 sieve.

For Group 2 aggregates, ensure that the material passing the No. 10 sieve has a sand equivalent (AASHTO T 176) value of not less than 28.

The Contractor may use graded aggregate of either Group 1 or Group 2, but only use one group on any Contract. (Graded aggregate may be referred to hereinafter as “aggregate”.)

2.2 EQUIPMENT

The aggregate shall be spread by mechanical rock spreaders, equipped with a device which strikes off the aggregate uniformly to laying thickness, and capable of producing an even distribution of the aggregate. For crossovers, intersections and ramp areas; for roadway widths of 20 feet or less; for the main roadway area when forms are used and for any other areas where the use of a mechanical spreader is not practicable; spreading may be done by bulldozers or blade graders. All equipment for proper construction of this project shall be in first-class working condition.

PART 3 - EXECUTION

3.1 TRANSPORTING GRADED AGGREGATE

The graded aggregate shall be transported to the point where it is to be used, over aggregate previously placed if practical, and dumped on the end of the preceding spread. Hauling over the subgrade and dumping on the subgrade will be permitted when, in the County’s opinion, these operations will not be detrimental to the subgrade.

3.2 SPREADING GRADED AGGREGATE

A. Method of Spreading: The graded aggregate shall be spread uniformly. All segregated areas of fine or coarse aggregate shall be removed and replaced with properly graded aggregate.

B. Number of Courses: When the specified compacted thickness of the base is greater than six inches, the base shall be constructed in two courses. The thickness of the first course shall be a pproximately one-half the total thickness of the finished base, or enough addi tional material added to bear the weight of the construction equipment without disturbing the

subgrade. When compacted thickness is six inches or less, graded aggregate shall be placed in one lift.

3.3 COMPACTING AND FINISHING BASE

A. Single-Course Base: For single-course base, after the spreading is completed, the entire surface shall be scarified and then shaped so as to produce the required grade and cross-section, free of scabs and laminations, after compaction.

B. Multiple-Course Base: For multiple-course base, the first course shall be cleaned of foreign material and bladed and brought to a surface cross-section approximately parallel to that of the finished base. Prior to the spreading of any material for the upper course, the density tests for the lower course shall be made, and the County shall have proof that the required compaction has been obtained. After the spreading of the material for the second course is completed, its surface shall be finished and shaped so as to produce the required grade and cross-section after compaction, and free of scabs and laminations.

C. Moisture Content: When the material does not have the proper moisture content to ensure the required density, wetting or drying will be required. When water is added, it shall be uniformly mixed-in by disking to the full depth of the course which is being compacted. Water shall be added before beginning compaction operations. Wetting or drying operations shall involve manipulation, as a unit, of the entire width and depth of the course which is being compacted. This shall be performed utilizing the speedy moisture meter.

3.4 DENSITY REQUIREMENTS

As soon as proper conditions of moisture are attained, the material shall be compacted to a density of not less than 98% of the modified proctor maximum density as determined by AASHTO T-180 (Modified Proctor.)

3.5.1 TESTING SURFACE, PROTECTION, AND MAINTENANCE

A. Density Tests: A minimum of at least one field density test on each course of compacted base shall be performed for every 500 square yards, or every 300 linear feet of road pavement, or as directed by the Engineer. Additional tests may be made if deemed necessary by the Engineer and/or County/CEI.

B. During final compacting operations, if blading of any areas is necessary to obtain the true grade and cross-section, the compacting operations for such areas shall be completed prior to making the density tests on the finished base.

C. Correction of Defects: Contamination of Base Material: If, at any time, the subgrade material should become mixed with the base course materials, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the subgrade and replace the materials removed with clean base material, which shall be shaped and compacted as specified above.

D. Cracks and Checks: If cracks or checks appear in the base, either before or after priming, which in the opinion of the County, would impair the structural efficiency of the base, the Contractor shall remove the cracks or checks by re-scarifying, reshaping, adding base material where necessary, and re-compacting, without additional compensation.

E. Compaction of Widening Strips: Where base construction consists of widening strips and the trench width is not sufficient to permit use of standard base compaction equipment, compaction shall be accomplished by use of vibratory compactors, trench rollers, mechanical plate tampers, or other special equipment which will achieve the density requirements specified herein. When multiple-course base construction is required by the plans or specifications, the required compaction shall be achieved in each course prior to spreading material for the overlaying course.

F. Testing Surface: The finished surface of the base course shall be checked from the required crown and ensure longitudinally a smooth, consistent surface for the placement of the asphalt course(s). All irregularities, greater than 1/4 inch per 15' straight edge test, shall be corrected, after which the entire area shall be re-compacted and tested as specified herein before. In the testing of the surface, the measurements will not be taken in small holes caused by individual pieces of rock having been pulled out by the grader.

G. Priming and Maintaining:

Priming: The prime coat shall be applied only when the base meets the specified density requirements and the moisture content in the top half of the base does not exceed 90% of the optimum moisture of the base material. At the time of priming, the base shall be firm, unyielding and in such condition that no undue distortion will occur. See FDOT Prime Coat Specification.

Maintaining: The Contractor will be responsible for assuring that the true crown and template are maintained, with no rutting or other distortions, and that the base meets all the requirements, at the time the surface course is applied.

H. Thickness Requirements:

Measurements: Thickness of the base shall be measured at intervals in

such a manner that each test represents 500 square yards, or every 300 linear feet of road pavement, or as otherwise directed by the County. Measurements shall be taken at various points on the cross-section, through holes not less than three inches in diameter.

Areas Requiring Correction: Where the compacted base is deficient by more than ½ inch from the thickness called for in the plans, the Contractor shall correct such areas. The affected areas shall then be brought to the required state of compaction and to the required thickness and cross-section.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT:

The quantity to be paid for will be the area, in square yards, completed and accepted.

4.2 BASIS OF PAYMENT:

Price and payment will be full compensation for all work specified in this section, including dust abatement, correcting all defective surfaces and deficient thickness, removing cracks and checks, the additional aggregate required for such crack elimination, and the prime coat.

END OF SECTION 02400

SECTION 02410 – RECYCLED CONCRETE AGGREGATE BASE
(CRUSHED CONCRETE)

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of contract, including General and Supplementary Conditions and other Specification Sections, apply to the work of this section.

1.2 The County recognizes the beneficial reuse of construction materials where said materials can be used in a manner that provides a construction product meeting specifications adopted by state and/or federal agencies. As such, the County shall allow, as noted below, the use of Recycled Concrete Aggregate (RCA) for the purpose of constructing an aggregate base course for the placement of an asphaltic concrete surface course in accordance with this section.

1.3 This section shall conform to section 2400 G.A.B. except as noted.

1.4 SPECIFIC CONSENT REQUIRED

Recycled Concrete Aggregate may only be used on projects with specific written consent of the County Engineer, or designee, subject to the conditions outlined herein. No such permission shall be given until the requirements of Items 2.1 through 3.1.A-D have been affirmatively addressed by the Engineer of Record for the project. Additionally, construction may not proceed until the requirements of Item 3.2.B have been addressed. Should construction commence more than six months after the date of the geotechnical report and/or roadway locations and/or elevations change, a geotechnical addendum shall be submitted confirming groundwater elevations. Should County staff observe differing construction or material conditions after approval; additional testing or re-evaluation of existing conditions for use may be required. RCA installations not in compliance with these specifications shall be subject to removal and replacement.

PART 2 - PRODUCTS

2.1 MATERIALS

The material requirements of Recycled Concrete Aggregate shall be in accordance with the Florida Department of Transportation Special Provisions Specification Section 204, “Graded Aggregate Base.”

A. Recycled Concrete Aggregate used shall not be required to comply with FDEP source approval requirements specified in FAC 62-701.730 or be qualified as a clean debris source under FDEP rules, as outlined in Florida Department of Transportation Special Provisions Specification Section 204-2.2, “ Graded Aggregate Base.” The aggregate supplied shall be

capable of meeting the requirements outlined in this item. NO material shall be used that has been obtained from potentially contaminated sources that may contain asbestos or other hazardous materials.

PART 3 - EXECUTION

3.1 SPECIFIC USE & LOCATION REQUIREMENTS

A. The use of Recycled Concrete Aggregate shall be in accordance with the Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."* It should be noted RCA may not be used on FHWA funded projects.

B. Unless the Engineer of Record can demonstrate that the grading plan provides a minimum vertical separation of 18 inches between the bottom of the base and the seasonal high water table provided in the geotechnical report, permanent groundwater control measures shall be incorporated in the roadway design (i.e. under drains with positive out falls, etc.). If the subsurface conditions encountered in the geotechnical study indicate the presence of, or the potential for, perched groundwater, the geotechnical engineer shall address the appropriate measures to remedy perched groundwater in the geotechnical report or addendum.

C. The Engineer of Record shall as part of the original construction plans approved by the County or by addendum approved by the County provide construction details and specifications for the road section(s) to be used with RCA. The section shall include material types, thickness requirements, and compaction requirements for all materials required for the flexible pavement section. The plan and profiles shall detail groundwater levels (apparent or perched) and the use of under drains with positive out falls, where applicable/appropriate. Where under drains are required, they shall be detailed in cross section relative to the road section. The Engineer of Record shall also provide calculations which detail the calculated capacity of all components of the underdrain section, transmission pipes and receiving system.

D. If, during the time period of construction, water is observed bleeding thru the pavement, new or additional permanent groundwater control measures to a positive, approved, out fall shall be installed. Such measures shall be submitted to the County for review and approval per Item C above.

3.2 TESTING & CERTIFICATION REQUIREMENTS

A. The installation of Recycled Concrete Aggregae shall be in accordance with the Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."*

B. Upon delivery of RCA to the project site, the contractor, NOT the supplier, shall provide to the County a report from an independent FDOT certified testing laboratory certifying that the material meets the gradation and Limerock Bearing Ratio requirements of Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."*

C. During the course of construction, quality control samples of RCA delivered to the project site shall be selected under the supervision of the County, or its representative, for gradation testing. Sampling shall be at a minimum frequency of one sample for every 3,600 square yards of in-place base material.

D. All testing shall be in accordance with Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base,"* and/or the County requirements, whichever is more stringent.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT:

The quantity to be paid for will be the area, in square yards, completed and accepted.

4.2 BASIS OF PAYMENT:

Price and payment will be full compensation for all work specified in this section, including dust abatement, correcting all defective surfaces and deficient thickness, removing cracks and checks, the additional aggregate required for such crack elimination, and the prime coat.

END OF SECTION 02410

SECTION 02440 – SUPERPAVE ASPHALT BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of Contract, including General and Supplementary Conditions and other Specifications sections, apply to work of this section.

1.2 SUBMITTALS

Submit certification of compliance with applicable specifications in accordance with *Section 01300, "Submittals".*

1.3 ENVIRONMENTAL CONDITIONS

Construct bituminous courses when underlying course is dry, and when atmospheric temperature is 40°F and rising for courses 1½" or greater, and 45°F and rising for courses less than 1½".

1.4 CONSTRUCTION EQUIPMENT

A. Spreading Equipment: Self-propelled electronically controlled type, unless other equipment is authorized. Spreading equipment shall be capable of spreading hot bituminous mixtures without tearing, shoving, or gouging and to produce a finished surface of specified grade and smoothness. The use of a spreader that leaves indented areas or other objectionable irregularities in the fresh laid mix during operations will not be permitted.

B. Rolling Equipment: Self-propelled pneumatic-tired rollers supplemented by three-wheel and tandem type steel wheel rollers. The number, type and weight of rollers shall be sufficient to compact the mixture to the required density without detrimentally affecting the compacted material. All rollers shall be suitable for rolling hot-mix bituminous pavements and capable of reversing without backlash. Pneumatic-tired rollers shall be capable of being operated both forward and backward without turning on the mat, and without loosening the surface being rolled. Equip rollers with suitable devices and apparatus to keep the rolling surfaces wet and prevent adherence of bituminous mixture.

At the Contractor's option, vibratory rollers especially designed for bituminous concrete compaction may be used, provided rollers do not impair stability of pavement structure and any underlying layers. Repair depressions in pavement surfaces resulting from use of vibratory rollers at no cost to the Owner. Rollers shall be self-propelled, single or dual vibrating drums, and steel drive wheels, as applicable; equipped with variable amplitude and separate controls for energy and propulsion.

C. Hand Tampers: Hand tampers shall weigh not less than 25 pounds and have a tamping face of not more than 50 square inches.

D. Mechanical Hand Tampers: Commercial type, operated by pneumatic pressure or by internal combustion.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall conform to the requirements of these Specifications for the pavement sections as shown on the drawings.

PART 3 - EXECUTION

3.1 TRANSPORTATION OF BITUMINOUS MIXTURES

Deliver mixture to the area to be paved in such a manner that the temperature, at the time of dumping into the spreader, shall be not less than 285°F or greater than 34 5°F or that temperature required to obtain the specified compaction. Reject any load that has become wet prior to placing or falls outside of the above temperature ranges.

3.2 PLACING

Provide line and grade stakes as necessary for control. Place grade stakes in lanes parallel to centerline of area to be paved, and suitably space for string lines. Place and compact bituminous courses in such thicknesses as to achieve density and smoothness requirements. Maximum lift of bituminous base course shall not exceed 3 inches. Prior to laying the base course, clean underlying course of foreign and objectionable matter with power blowers, power brooms, or hand brooms in places inaccessible to power equipment, and inspect for compaction and smoothness requirements. The range of temperatures of the mixtures at the time of spreading shall be between 285°F and 345°F. Reject bituminous mixture having a temperature outside these limits when dumped into the hopper of the spreader. Adjust mechanical spreader and regulate speed so that the surface of the course is smooth, and when compacted conforms to depth, cross sections, grades and contours indicated. When irregularities of surface or deficiency in depth is more than specified tolerances, remove defective work and replace with new material. Whenever possible, place the mixture in strips not less than 10 feet wide. Overlap rolling to previously placed strip and extend to overlap first strip. Place mixture as continuously as possible. Shovelers and rakers shall follow spreading equipment, adding hot mixture and raking as required to produce a course that, when completed, shall conform to requirements specified. In areas where the use of machine spreading is impractical, mixture may be spread by hand. Distribute mixture into place from dump boards by means of hot shovels and spread with hot rakes in a uniformly

loose layer of such thickness that, when completed, it conforms to required grade and thickness. Do not dump loads any faster than they can be handled by shovelers and rakers. Paint contact surfaces of previously constructed curbs, manholes, and similar structures with a thin coat of emulsion or other approved bituminous material prior to placing the bituminous mixture.

3.3 COMPACTION OF MIXTURE

A. Affect compaction by rolling. Begin rolling as soon after placing as the mixture will bear the roller without undue displacement. Delays in rolling freshly spread mixture will not be tolerated. Start rolling longitudinally at extreme sides of lanes and proceed toward center of pavement, overlapping on successive strips by at least one-half the width of rear wheel of roller. Alternate trips of roller shall be slightly different lengths. Affect initial longitudinal rolling by the use of steel roller. Make tests for conformity with specified crown, grade and smoothness immediately after initial compression. Before continuing rolling, correct any variations by removing or adding materials, then roll course using pneumatic-tired rollers or tandem rollers, while mixture is hot and in condition suitable for proper compaction. Speed of rollers shall not exceed 3 miles per hour and at all times be slow enough to avoid displacement of hot mixture. Correct any displacement of mixture at once by use of rakes and apply fresh mixture or remove mixture as required. Continue rolling until all roller marks are eliminated. During rolling, moisten rollers to prevent adhesion of mixture to rolling surfaces, but do not permit an excess of water. Provide sufficient rollers for each spreading machine in operation on the job and to handle plant output. In places not accessible to rollers, compact mixture with hot pneumatic or manual hand tampers. Skin patching of an area that has been rolled is not permitted. Remove any mixture that becomes mixed with foreign material or is defective, replace with fresh mixture, and compact to density of surrounding area. Roller shall not pass over unprotected edge until asphalt has cooled to at least 120°F. Contractor shall provide workmen who are capable of performing work incidental to correction of pavement irregularities. After final rolling, permit no traffic of any kind on the pavement until the surface temperature has cooled to at least 120°F. Surface temperature shall be measured with surface thermometers or other satisfactory methods.

B. Testing Base Course:

1. Density: Within the entire limits of the width and depth of the base, obtain a minimum density in all areas of the roadway of 98% of modified Proctor maximum density as determined by AASHTO FM 1-T 180, Method D. Compact the base of any LOT of shoulder pavement to not less than 95% of the modified Proctor maximum density as determined by FM 1-T 180, Method D. Additional tests and cores may be required at the County's discretion.

2. Thickness: Measure thickness throughout the placement of any and all courses. In addition, perform periodic check on the yield during the placement of any and all courses. The maximum allowable deficiency at any point shall not be more than 1/4 inch less than the indicated thickness for the course. The average thickness of the course shall not be less than the indicated thickness. Where he deficiency is more than the specified tolerances, the contractor shall correct each such representative area or areas by removing the pavement in question and replacing with new pavement.

3. Smoothness: Straightedge the compacted surface of the course, utilizing a 15' rolling straightedge, as deemed necessary by the County. Apply a rolling straightedge parallel with the centerline of the road and a non-rolling straightedge at right angles to the centerline of the road after final rolling. Unevenness of the course shall not vary more than plus or minus 3/16 inch in 15 feet. Correct any portion of the pavement showing irregularities greater than that specified.

4. Thicknesses and Density Requirements: The thickness and density shall e checked at intervals not to exceed one per 300 linear feet of roadway, but in any case, should not be less than three tests. Tests shall be staggered to ensure representative sampling.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

ASPHALT BASE COURSE:
The uantity to be paid for will be the area, in square yards, of asphalt base course after adjustment to the equivalent area of specified thickness.

4.2 BASIS OF PAYMENT

ASPHALT BASE COURSE:
Prices and payments will be full compensation for all work specified in this Section.

END OF SECTION 02440

SECTION 02460 - SAND-CLAY BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction* (FDOT 2000 Specs), *Sections 240 and 912*, *Latest Edition.*

1.2 DESCRIPTION OF WORK

This item shall consist of a base course composed of sand-clay mixtures constructed on a subgrade prepared in accordance with the specifications and in conformity with the line and grades shown on the drawings.

1.3 USE

Sand-clay base may only be ued on projects with specific written consent from the County Engineer, or designee, subject to the conditions outlined herein.

Graded aggregate base shall be utilized in unsuitable soils, moisture sensitive areas, where g oundwater fluctuates to within two feet of average grade, adjacent to wetlands/surface waters where the subgrade soils have a low permeability, and for roadways that will be dedicated to the County for maintenance.

PART 2 - PRODUCTS

2.1 MATERIALS

A. All materials shall be secured from sources approved by the County and shall be furnished by the Contractor.

B. Sand-Clay shall consist of natural or artificial mixtures of clay or soil binder and gravel, sand or other aggregates. The materials shall be free from organic matter and trash and shall not contain any aggregate particles that will not pass a one-inch (1") sieve. It shall be uniform and shall not contain lumps or aggregate in sufficient quantity to prevent securing a smooth surface free from pits or pockets.

C. The material passing the 10-mesh sieve shall meet the following requirements:

1. Clay (material smaller than 0.005mm) 8-21%

2. Silt (material from 0.05 to 0.005mm) 0-10%

3. Combined Clay and Silt 8-25%

D. It shall have a plasticity index of not more than 6 and have a liquid limit of not more than 25. The material shall have the minimum limerock bearing ratio (LBR) of 75.

PART 3 - EXECUTION

3.1 PLACING AND MIXING MATERIALS

A. Sand-Clay Base; minimum 6-inch compacted thickness. At least 98 percent of the modified proctor maximum dry density must be achieved throughout the full material thickness. The proposed sand-clay base material must be checked by a registered geotechnical engineer or by using hydrometer testing to determine clay content.

B. The material may be dumped directly on the subgrade, but shall be uniformly distributed. The loose thickness will be checked continuously by the Contractor to insure that the finished base course will have the thickness and shape required by the typical section.

3.2 COMPACTING AND FINISHING SAND-CLAY BASE

A. General: After spreading is completed, the base shall be compacted with water being added as required, until the required density has been obtained.

B. Density Requirements: As soon as the proper condition of moisture is attained, the material shall be compacted to a density not less than 98 percent of maximum density as determined by modified proctor test ASTM 1557.

C. Finishing: Upon completion of the initial compaction, the entire surface shall be scarified and then shaped to exact crown and cross-section. The base shall be re-watered, if needed, before final compaction. Final compaction shall be done with any type compacting equipment, in conjunction with traffic rollers, which will obtain the required density. Compaction shall continue until the required density has been obtained and until free water disappears from the surface.

D. Correction of Defects: If at any time, the sub-grade material should become mixed with the base course material, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the sub-grade and replace the materials removed with base material, which shall be watered, if needed, and rolled until the

required density is obtained.

E. Priming: Allow base to cure until moisture does not exceed 90 percent of optimum moisture content for the base course material. Priming shall meet the requirements of Section 300 of FDOT *Standard Specifications, Latest Edition.*

3.3 TESTING SURFACE, PROTECTION AND MAINTENANCE

A. Testing Surfaces: The finished surface of the base course shall be true to the grades shown on drawings. All i regularities greater than 3/ 8-inch shall be corrected by scarifying and removing or adding base material as may be required, after which the entire area shall be re-compacted to meet the specified density requirements.

B. Thickness of Base: A three-eighths inch (3/8") under tolerance in the base will be allowed. All areas where the thickness of the completed base is less than the thickness required after such tolerance shall be corrected by scarifying, adding base material and re-compacting.

C. Protection, Priming and Maintaining: The base shall be kept well drained at all times. Wherever ruts or low spots are found, the areas affected shall be brought to grade and, if necessary, shall be kept moist until the prime coat is applied, so as to prevent dusting and raveling.

D. Thicknesses and Density Requirements: The thickness and density shall be checked at intervals not to exceed one per 300 linear feet of roadway. In no case shall less than three t sts be performed. Tests shall be staggered to ensure representative sampling.

E. Paved Areas: Make at least one field density test of each compacted fill layer (subgrade, base, etcetera) for every 300 l inear feet of roadway or equivalent area, but in no case less than three tests. Tests shall be staggered to ensure representative sampling.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

Sand-clay Base to be paid for will be the plan quantity, in square yards.

4.2 BASIS OF PAYMENT

Price and Payment will be full compensation for all work specified in this Section, including all materials; all clearing and grubbing of material pits; all stripping of overburden from the pits, if required; all hauling of material, application of prime and all incidentals necessary to complete the work.

END OF SECTION 02460

SECTION 02500 – SUPERPAVE ASPHALT CONCRETE

PART 1 - GENERAL

1.1 GENERAL

A. Construct a Type SP Asphalt pavement for local agencies using the type of mixture specified in the Contract, or when offered as alternates, as approved.

B. For this Section only, all references to the Department shall mean the County. All references to the Engineer shall mean the Engineer of Record, designated Engineer of Escambia County and/or CEI.

C. The County will accept the work based on one of the following methods as described in Part 5: 1) Certification, 2) Certification and process control testing by the Contractor, 3) acceptance testing by the County, or 4) other method(s) as determined by the Contract.

1.2 LAYER THICKNESSES

A. Use only fine graded Type SP asphalt mixes. Fine graded mixes are defined as having a gradation that passes above the restricted zone when plotted on an FHWA 0.45 Power Gradation Chart.

B. FINE MIXES: The allowable structural layer thicknesses for fine Type SP Asphalt Concrete mixtures are as follows:

Type SP 9.5	1-1 ½ inches
Type SP 12.5	1 ½ - 2 ½ inches
Type SP 19.0	2-3 inches

In addition to the minimum and maximum thickness requirements, the following restrictions are placed on fine mixes when used as a structural course:

Type SP 9.5 - Limited to the final (top) structural layer, one layer only

Type SP 12.5 - May not be used in the first layer of courses over 3 1/ 2 inches thick, nor in the first layer of courses over 2 3/4 inches thick on limited access facilities.

The thickness of the new pavement may be checked by core samples, as determined by the Engineer. The Contractor shall be required to correct any deficiency either by replacing the full thickness; or overlaying the area as directed by the Engineer. County inspection shall be performed and all base failures shall be corrected prior to asphalt installation.

Type SP 19.0 - May not be used in the final (top) structural layer.

C. ADDITIONAL REQUIREMENTS: The following requirements also apply to fine Type SP Asphalt Concrete mixtures:

1. A minimum 1 1/2 inch initial lift is required over an Asphalt Rubber Membrane Interlayer (ARMI).

2. When construction includes the paving of adjacent shoulders (5 feet wide or less), the layer thickness for the upper pavement layer and shoulder shall be the same and paved in a single pass, unless shown differently in the plans.

3. Use the minimum and maximum layer thicknesses as specified in 1.2 B above unless shown differently in the plans. On variable thickness overbuild layers, the minimum allowable thickness may be reduced by 1/2 inch, and the maximum allowable thickness may be increased 1/2 inch, unless shown differently in the plans.

PART 2 - PRODUCTS

2.1 GENERAL REQUIREMENTS

Meet the material requirements specified in F DOT Standard Specifications Division III. Specific references are as follows:

Superpave PG Asphalt Binder or Recycling Agent – Sections 916-1, 916-2
Coarse Aggregate, Stone, Slag or Crushed Gravel – Section 901
Fine Aggregate – Section 902

Aggregates utilized on Escambia County projects must be in accordance with FDOT Qualified Products List

2.2 GRADATION REQUIREMENTS

Combine the coarse and fine aggregate in proportions that will produce an asphalt mixture meeting all of the requirements defined in this Specification and conform to the gradation requirements at d sign as defined in Table 1 bel ow. Aggregates from various sources may be combined.

Table 1
Aggregate Gradation Control Points

For additional information, refer to AASHTO M-323-04, Table 4						

2.4 AGGREGATE CONSENSUS PROPERTIES

A. Meet the following consensus properties at design for the aggregate blend:

1. Coarse A ggregate A ngularity: When tested in accordance with ASTM D 5821, meet the coarse aggregate angularity requirement defined in Table 3 below.

Table 3
Coarse Aggregate Angularity Criteria
(Minimum Percent Fractured Faces)

	Depth of Top of Pavement Layer From Surface			
	≤4 inches		>4 inches

	85	80	60	-
For additional information, refer to AASHTO M-323-04, Table 5				

2. Fine Aggregate Angularity: When tested in accordance with AASHTO T-304, meet the fine aggregate angularity requirement defined in Table 4 below.

Table 4 Fine Aggregate Angularity Criteria		
	Depth of Top of Pavement Layer From Surface	
	≤4 inches	>4 inches
	Minimum Uncompacted Void Content (%)	Minimum Uncompacted Void Content (%)
	45	40
For additional information, refer to AASHTO M-323-04, Table 5		

3. Flat and Elongated Particles: When tested in accordance with ASTM D 4791, use a ratio of maximum to minimum dimensions of 5:1 and do not exceed 10% as the maximum amount of flat and elongated particles.

2.5 USE OF RECLAIMED (MILLED) ASPHALT PAVEMENT

A. General Requirements: Reclaimed Asphalt Pavement (RAP) may be used as a component material of the asphalt mixture subject to the following:

1. The Contractor assumes responsibility for the design of asphalt mixes which incorporate RAP as a component material.

2. For design purposes, the Contractor assumes responsibility for establishing accurate specific gravity values for the RAP material. This may be accomplished by one of the following methods:

   a. Calculation of the bulk specific gravity value based upon the effective specific gravity of the RAP, determined on the basis of the asphalt binder content and maximum specific gravity. The Engineer and/or Engineer of Record will approve the estimated asphalt binder absorption value used in the calculation.

   b. Testing of the extracted aggregate obtained through a vacuum extraction or ignition oven extraction.

3. The amount of RAP material used in the mix is not to exceed 50% by weight of total aggregate.

4. Use a grizzly or grid over the RAP cold bin, in-line roller crusher, screen, or other suitable means to prevent oversized RAP material from showing up in the completed recycled mixture.

If oversized RAP material appears in the completed recycled mix, take the appropriate corrective action immediately. If the appropriate corrective actions are not taken immediately, plant operations should be stopped.

5. Provide stockpiled RAP material that is reasonably consistent in characteristics and contains no aggregate particles that are soft or conglomerates of fines.

6. Provide RAP, having minimum average asphalt content of 4.0% by weight of total mix. The Engineer may sample the stockpile to verify that this requirement is met.

B. Binder for Mixes with RAP: Select the appropriate binder based on the table below. The Engineer and/or Engineer of Record reserves the right to change binder type and grade at design based on the characteristics of the RAP binder, and reserves the right to make changes during production. Maintain the viscosity of the recycled mixture within the range of 4,000 to 12,000 poises. Obtain a sample of the mixture for the Engineer within the first 1,000 tons and at a frequency of approximately one per 4,000 tons of mix.

Binder Grade for Mixes Containing RAP	
% RAP	Asphalt Binder Grade
<20	PG 67-22
20-29	PG 64-22
≥ 30	Recycling Agent
Note: When a PG 76-22 Asphalt Binder is called for in the Contract, limit the amount of RAP material used in the mix to a maximum of 15%.	

PART 3 - GENERAL COMPOSITION OF MIXTURE

3.1 GENERAL

Compose the asphalt mixture using a combination of aggregate (coarse, fine or mixtures thereof), mineral filler, if required, and asphalt binder material. Size, grade and combine the aggregate fractions to meet the grading and physical properties of the approved mix design. Aggregates from various sources may be combined.

3.2 MIX DESIGN

A. Design the Type SP asphalt mixture in accordance with AASHTO PP-28, except as noted herein, to meet the requirements of this Specification. Use only previously approved designs. Prior to the production of any Type SP asphalt mixture, submit the proposed mix design with supporting

test data indicating compliance with all Type SP asphalt mix design criteria.

The Engineer and/or Engineer of Record will consider any marked variations from original test data for a mix design or any evidence of inadequate field performance of a mix design as sufficient evidence that the properties of the mix design have changed, and the Engineer and/or Engineer of Record will no longer allow the use of the mix design.

1. Grading Requirements: Meet Gradation Design Ranges in PART 2.

2. Gyratory Compaction: Compact the design mixture in accordance with AASHTO TP-4. Use the number of gyrations as defined in the table below.

Type SP Design Gyratory Compactive Effort			
	$N_{initial}$	N_{design}	$N_{maximum}$
SP Mixes	7	75	115

3. Volumetric Criteria: Use an air void content of the mixture at design of 4.0% at the design number of gyrations (N_{design}). Meet the requirements of the table below.

Mixture Densification Criteria			
	% G_{mm}		
	$N_{initial}$	N_{design}	$N_{maximum}$
SP Mixes	$\geq$ 89.0	96.0	$\leq$ 98.0

4. VMA Criteria: Meet the requirements of the table below for Voids in the Mineral Aggregate (VMA) of the mixture at the design number of gyrations.

VMA Criteria	
Type Mix	Minimum VMA (%)
SP 9.5	15.0
SP 12.5	14.0
SP 19.0	13.0

5. VFA Criteria: Meet the requirements of the table below for voids filled with asphalt (VFA) of the mixture at the design number of gyrations.

VFA Criteria	
	Design VFA (%)
SP Mixes	65 - 75

6. Dust Proportion: Use an effective dust-to-binder ratio as efined in FDOT Section 334-3.2.5.

7. Moisture Susceptibility: Provide a mixture (4 inch s pecimens) having a retained tensile strength ratio of at least 0. 80 and a minimum tensile strength (dry and unconditioned) of 100 psi.

8. Additional Information: In addition to the requirements listed above, provide t he following information with each proposed mix design submitted for use:

    a. The design number of gyrations (N_{design}).

    b. The source and description of the materials to be used.

    c. The FDOT source number product code of the aggregate components furnished from an FDOT approved source.

    d. The gradation and proportions of the raw materials as intended to be combined in the paving mixture. The gradation of the component materials shall be representative of the material at the time of use. Compensate for any change in aggregate gradation in handling and processing as necessary.

    e. A single percentage of the combined mineral aggregate passing each specified sieve. Degradation of the aggregate due to processing (particularly -No. 200 [-75 µm]) should be accounted for and identified for the applicable sieves.

    f. The bulk specific gravity value for each individual aggregate (and RAP) component as identified in the FDOT aggregate control program.

    g. A single percentage of asphalt binder by weight of total mix intended to be incorporated in the completed mixture, shown to the nearest 0.1%.

    h. A target temperature at which the mixture is to be discharged from the plant and a target roadway temperature (per 30 -6.3). Do not exceed a target temperature of 340°F for modified asphalts and 315°F for unmodified asphalts.

    i. Evidence that the completed mixture conforms to all specified physical requirements.

    j. The name, seal, and/or certification of the Mix Designer.

3.3 REVISION OF MIX DESIGN

During production, the Contractor may request a t arget value revision to a mix design, subject to: (1) the target change falls within the limits defined in the table below, (2) ap propriate data exists demonstrating that the mix complies with production air voids specification criteria, and (3) the mixture gradation meets the basic gradation requirements defined in 2.2 and 2.3.

Limits for Potential Adjustments to Mix Design Target Values	
Characteristic	Limit from Original Mix Design
No. 8 sieve and Coarser	± 5.0%
No. 16 sieve	± 4.0%
No. 30 sieve	± 4.0%
No. 50 sieve	± 3.0%
No. 100 sieve	± 3.0%
No. 200 sieve	± 1.0%
Asphalt Binder Content (1)	± 0.3%
(1) R eductions to t he as phalt bi nder c ontent w ill not be permitted i f the VMA during production is lower than 1.0% below the design criteria.	

Submit all requests for revisions to mix designs, along with supporting documentation, to the Engineer. In order to expedite the revision process, the request for revision or discussions on the possibility of a revision may be made verbally, but must be followed up by a written request. The initial mix design will remain in effect until a change is authorized by the Engineer and/or Engineer of Record. In no case may the effective date of the revision be established earlier than the date of the first communication between the Contractor and the Engineer regarding the revision.

A new design mix will be required for any substitution of an aggregate product with a different aggregate code, unless approved by the Engineer and/or Engineer of Record.

3.4 PAVING EQUIPMENT

A. Mechanical Spreading and Screeding Equipment:

1. General: Provide mechanical spreading and screeding equipment of an approved type that is self-propelled and can be steered. Equip it with a receiving and distribution hopper and a mechanical screed. Use a mechanical screed capable of adjustment to regulate the depth of material spread and to produce the desired cross-section.

2. Automatic Screed Control: For all asphalt courses, placed with mechanical spreading and finishing equipment, equip the paving

machine with automatic longitudinal screed controls of either the skid type, traveling stringline type, or non-contact averaging ski type. Ensure that the length of the skid, traveling stringline, or non-contact averaging ski is at least 25 feet. On the final layer of base, overbuild, structural, and friction courses, use the joint matcher in lieu of the skid, traveling stringline, or non-contact averaging ski on all passes after the initial pass. Furnish a paving machine equipped with electronic transverse screed controls when required by the Contract Documents.

3. Inflation of Tires: When using paving machines equipped with pneumatic tires, the Engineer may require that the tires be ballasted.

4. Screed Width: Provide paving machines on full width lanes that have a screed width greater than 8 feet. Does not use extendable screed strike-off devices that do not provide preliminary compaction of the mat in place of fixed screed extensions. The Contractor may use a strike-off device on irregular areas that would normally be done by hand and on shoulders 4 feet or less in width. When using the strike-off device on shoulders in lieu of an adjustable screed extension, the Contractor must demonstrate the ability to obtain an acceptable texture, density, and thickness. When using an extendable screed device to extend the screed's width on the full width lane or shoulder by 24 inches or greater, an auger extension, paddle, or kicker device is required unless the Contractor provides written documentation from the manufacturer that these are not necessary.

5. Motor Graders: Provide two motor graders for spreading widening courses with prior approval from the Engineer only. Use motor graders that are rated at not less than 6 tons and are self-propelled and power-controlled. Mount them on smooth tread or rib-type tires (no lug types allowed) with a wheel base of at least 15 feet. Equip the front motor grader with a spreader box capable of spreading the mix at the required rate.

6. Rollers:

   a. Steel-Wheeled Rollers: Provide compaction equipment capable of meeting the density requirements described in these Specifications. Provide a tandem steel-wheeled roller weighing a minimum of 8 tons for seal rolling, and for the final rolling, use a separate roller with a minimum weight of 8 tons. Variations from these equirements shall be approved by the Engineer.

b. Traffic Rollers: Provide compaction equipment capable of meeting the density requirements described in these specifications. Provide a self-propelled, pneumatic-tired traffic roller equipped with at least seven smooth-tread, low pressure tires, equipped with pads or scrapers on each tire. Maintain the tire pressure between 50 and 55 psi or as specified by the manufacturer. Use rollers with a minimum weight of 6 tons. Do not use wobble-wheeled rollers. Variations from these requirements shall be approved by the Engineer.

c. Prevention of Adhesion: Do not allow the mixture to adhere to the wheels of any rollers. Do not use fuel oil or other petroleum distillates to prevent adhesion. Do not use any method which results in water being sprinkled directly onto the mixture.

7. Trucks: Transport the mix in trucks of tight construction, which prevents the loss of material and the excessive loss of heat. Provide each truck with a tarpaulin or other waterproof cover mounted in such a manner that it can cover the entire load when required. When in place, overlap the waterproof cover on all sides so that it can be tied down.

8. Coring Equipment: Furnish a suitable saw or drill for obtaining the required density cores.

9. Hand Tools: Provide the necessary hand tools such as rakes, shovels, etc., and a suitable means for keeping them clean.

PART 4 - CONTRACTOR'S PROCESS CONTROL

4.1 GENERAL

A. Personnel: Provide qualified personnel (certified technician) for sampling, testing (by certified lab), and/or sign-off by P.E., and inspection of materials and construction activities. Ensure that qualifications are maintained during the course of sampling, testing and inspection.

Construction operations that require a qualified technician must not begin until the Department verifies that the technician is on the CTQP (Construction Training Qualification Program) list of qualified technicians. The CTQP lists are subject to satisfactory results from periodic Independent Assurance evaluations.

B. Calibration of the Gyratory Compactor: Calibrate the Gyratory Compactor in accordance with the manufacturer's recommendations prior to

producing the mixture for any project. Check the height calibration, the speed of rotation; ram pressure and angle of gyration.

C. Plant Testing Requirements: During the initial production of a mix design, test mix to ensure proper performance and provide results to the department.

D. Roadway Testing Requirements: Areas that demonstrate concerns of the mix design quality or poor/improper compaction efforts may be subject to additional coring and testing as seen fit by the Engineer.

E. Extraction Gradation Analysis: Sample the asphalt mixture at the plant and perform extraction test prior to asphalt being delivered to project. The percent asphalt binder content of the mixture will be determined in accordance with FM 5-563 (ignition oven). The gradation of the extracted mixture will be determined in accordance with FM 1-T 030. All test results will be shown to the nearest 0.01. All calculations will be carried to the nearest 0.001 and rounded to the nearest 0.01. All results shall be provided to the department prior to placement of asphalt on any project.

Run an extraction gradation analysis on the mixture at a minimum frequency of once per 1,000 tons or a maximum of four consecutive days of paving, which ever comes first.

The target gradation and asphalt content will be as shown on the mix design. Any changes in target will require a change in the mix design.

If the percentage of asphalt binder deviates from the optimum asphalt binder content by more than 0.55%, or the percentage passing any sieve falls outside the limits in the table below, immediately resample the mix and test to validate the previous test result, and if needed, make the necessary correction. If the results for two consecutive tests deviate from the optimum asphalt binder content by more than 0.55%, or exceed the limits in the table for any sieve, notify the Engineer and take immediate steps to identify and correct the problem, then resample the mix. If the results from this test deviate from the optimum asphalt binder content by more than 0.55%, or exceed the limits in the table for any sieve, stop plant operations until the problem has been corrected.

Tolerances for Quality Control Tests (Extraction Gradation Analysis)	
Size	Percent Passing
1 inch	7.0
3/4 inch	7.0
1/2 inch	7.0
3/8 inch	7.0
No. 4	7.0
No. 8	5.5
No. 16	5.0
No. 30	4.5
No. 50	4.5
No. 100	3.0
No. 200	2.0

F. Volumetric Control: During poduction of the mix, monitor the volumetric properties of the Type SP asphalt mix with a Type SP Gyratory Compactor to determine the air voids, VMA, VFA, and dust-to-effective asphalt binder ratio (dust proportion) at N_{design}.

Take appropriate corrective actions in order to maintain an air void content at N_{design} between 3.0 and 5.0% during production. When the air void content at N_{design} drops below 2.5 or exceeds 5.5%, stop plant operations until the appropriate corrective actions are made and the problem is resolved to the satisfaction of the Engineer and/or Engineer of Record. Evaluate any failing material in accordance with Part 6.

Determine the volumetric properties of the mixture at a minimum frequency of once per production day when the daily production is less than 1,000 tons. If the daily production exceeds 1,000 tons, monitor the volumetric properties two times per production day.

During normal production, volumetric properties of the mixture will not be required on days when mix production is less than 100 tons. However, when mix production is less than 100 tons per day on successive days, run the test when the accumulative tonnage on such days exceeds 100 tons.

Testing required for volumetric property determination includes AASHTO TP-4, FM 1-T 209, FM 5-563 and FM 1-T 030. Prior to testing samples in accordance with AASHTO TP-4 and FM 1-T 209, condition the test-sized sample for one hour at the compaction temperature in a covered container.

G. Plant Calibration: At or before the start of mix production, perform an extraction gradation analysis of the mix to verify calibration of the plant.

The sample t sted at the start of any project may be utilized for this requirement.

H. Process Control of In-Place Compaction: Develop and implement a method to control the compaction of the pavement and ensure its compliance with the minimum specified density requirements. The department may require the use of a nuclear gauge to test areas suspected of not having proper compaction. Other density measuring devices may be used in lieu of the nuclear density gauge, provided that it is demonstrated to the satisfaction of the Engineer and/or Engineer of Record that the device can accurately measure the relative level of density in the pavement on a consistent basis.

PART 5 - ACCEPTANCE OF THE MIXTURE

5.1 GENERAL

The asphalt mixture will be ac cepted based on one of the following methods as determined by the Engineer and/or Contract Documents:

1. Certification by the Contractor
2. Certification and Process Control Testing by the Contractor
3. Acceptance testing by the Engineer
4. Other method(s) as determined by the Contract

5.2 CERTIFICATION BY THE CONTRACTOR

Submit a Notarized Certification of pecification Compliance letter on company letterhead to the Engineer that all material produced and placed on the project was in substantial compliance with these specifications.

5.3 CERTIFICATION AND PROCESS CONTROL TESTING BY THE CONTRACTOR

Submit a N tarized Certification of Specification Compliance letter on company letterhead to the ngineer that all material produced and placed on the project was in substantial compliance with these specifications, along with supporting test data documenting all process control testing. Utilize an Independent Laboratory as approved by the Engineer for the Process Control testing.

5.4 ACCEPTANCE TESTING BY THE ENGINEER

A. Acceptance at the Plant:

1. The asphalt mixture will be accepted, with respect to gradation and asphalt binder content, based on the results from the start up test. However, any load or loads of mixture which, in the opinion of the Engineer and/or Engineer of Record, are unacceptable for reasons of excessive segregation, aggregates improperly coated, or of excessively high or low temperature will be rejected for use in the work.

2. Acceptance Procedures: Control all operations in the handling, preparation, and production of the asphalt mix so that the percent asphalt binder content and the percents passing the No. 8 and No. 200 sieves will meet the targets from the mix design within the tolerances shown in the table below.

Tolerances for Acceptance Tests	
Characteristic	Tolerance*
Asphalt Binder Content	±0.55%
Passing No. 8 Sieve	±5.50%
Passing No. 200 Sieve	±2.00%
*Tolerances for sample size of n=1.	

Calculations for the acceptance test results for asphalt binder content and gradation (percentages passing the No. 8 and No. 200 sieves) will be shown to the nearest 0.01. Calculations for arithmetic averages will be carried to the 0.001 and rounded to the nearest 0.01.

Payment will be based on the acceptance of the project by the Engineer.

B. Acceptance of the Roadway:

1. Density Control: The in-place density of any questionable section of a course of asphalt mix will be ev aluated by the use of a nuclear gauge and/or by the testing of 6 inch diameter roadway cores.

The Engineer will not perform dnsity testing on leveling courses, open-graded friction courses, or any course which does not show signs of poor /improper compaction efforts. In addition, density testing will not be per formed on t he following areas when they are less than 1 ,000 feet in length: crossovers, intersections, turning lanes, acceleration lanes or deceleration lanes. Compact these courses (with the exception of open-graded friction courses) in accordance w ith t he appropriate rolling pr ocedure a s specified i n these specifications or as approved by the Engineer.

2. Acceptance**:** The completed pavement will be accepted with respect to overall ride, overall appearance, and overall yield as determined by the Engineer or Engineer of Record.

   Areas of question may be tested with a nuclear gauge or by the testing of the density of the cores, as determined by the engineer.

3. Additional Density Requirement: On shoulders with a width of 5 feet or less, compact the pavement in accordance with the rolling procedure (equipment and pattern) as specified herein or as approved by the Engineer. Stop the production of the mix if the rolling procedure deviates from the approved procedure.

4. Surface Tolerance: The asphalt mixture will be accepted on the roadway with respect to surface tolerance by the use of a 15 ft rolling straight edge. The department will determine if the use of a straight edge test is warranted. Unevenness of the course shall not vary more than plus or minus 3/16 inch in 15 feet.

5.5 ADDITIONAL TESTS

The Department reserves the right to run any test at any time for informational purposes and for determining the effectiveness of the Contractor's quality control.

PART 6 - DISPOSITION OF FAILING MATERIAL

Any material that is represented by failing test results will be evaluated to determine if removal and replacement is necessary. Remove and replace any material, if required, at no cost to the Department. The evaluation will be conducted by the Engineer and/or Engineer of Record. If so directed, obtain an engineering analysis, as directed by the Engineer, by the independent laboratory (as approved by the Engineer) to determine if the material can (a) remain in place, for this case the appropriate pay factor will be applied, or (b) be removed and replaced at no cost to the Department. The analysis will be a signed and sealed report by a Professional Engineer licensed in the State of Florida.

PART 7 – MEASUREMENT/PAYMENT

7.1 METHOD OF MEASUREMENT

For the work specified under this Section the quantity to be paid for will be the in-place measurement of the area in square yards unless otherwise stated in the project plan details.

The bid price for the asphalt mix will include the cost of the liquid asphalt or the asphalt recycling agent. There will be no separate payment or unit price adjustment for the asphalt binder material in the asphalt mix.

7.2 BASIS OF PAYMENT

Price and payment will be full compensation for all the work specified under this section.

END OF SECTION 02500

SECTION 02510 – ASPHALT RUBBER MEMBRANE INTERLAYER
(ARMI) CRACK RELIEF

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawing and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 440, and Design Standards, Latest Edition*.

1.2 DESCRIPTION OF WORK

A. Construct an asphalt rubber membrane interlayer composed of a separate application of asphalt rubber binder covered with a single application of aggregate.

PART 2 - MATERIALS

A. Asphalt Rubber Binder: Use ARB-20, or approved equal, meeting the **r**equirements of FDOT *Standard Specification Section 336*.

B. Cover Material: Use Size No. 6 stone, slag, or gravel meeting the requirements of FDOT *Standard Specification Section 901*.

PART 3 - EQUIPMENT

A. Power Broom: Provide a power broom, for cleaning the existing pavement, capable of removing all loose material from the surface.

B. Spreading Equipment: Provide a self-propelled aggregate spreader that can be adjusted to accurately apply the cover material at the specified rate and that spreads the material uniformly.

C. Rollers: Provide self-propelled, pneumatic-tired traffic type rollers equipped with at least 7 smooth tread, low-pressure tires, and capable of carrying a gross load of at least 8 tons. Maintain a minimum tire inflation pressure of 90 psi, or as specified by the manufacturer, such that the air pressure in no two tires varies more than 5 psi. Load the traffic roller as directed by the Engineer.

D. Mixing Equipment: Use mixing equipment for asphalt rubber binder designed for that purpose and capable of producing and maintaining a

homogeneous mixture of rubber and asphalt cement at the specified temperature.

E. Pressure Distributor: Use a pressure type distributor to apply asphalt rubber binder capable of maintaining a homogeneous mixture of rubber and asphalt cement at the specified temperature and consistently apply the material in a uniform manner.

PART 4 - CONTRACTOR'S QUALITY CONTROL (QC) PLAN

Provide the necessary quality control of the asphalt rubber binder and construction in accordance with the Contract requirements. Provide in the QC Plan procedures for monitoring and controlling of rate of application. If the rate of application varies by more than 5% from the rate set by the County, in accordance with 4.6 herein, immediately make all corrections necessary to bring the spread rate into the acceptable range. The County may take additional measurements at any time. The County will randomly check the Contractor's measurement to verify the spread rate.

PART 5 - PREPARATION OF ASPHALT RUBBER BINDER

Combine the materials as rapidly as possible for such a time and at such a temperature that the consistency of the binder approaches that of a semi-fluid material. Use the time and temperature for blending of the asphalt rubber binder as specified in FDOT Standard Specifications Table 336-1. The manufacturer must ensure the material has reached application consistency. If not, the manufacturer will determine if an extender oil or diluents is needed. After reaching the proper consistency, proceed with application immediately. Never hold the mixture at temperatures over 350ºF for more than six hours after reaching that temperature.

PART 6 - CONSTRUCTION PROCEDURE

A. Preparation of Surface: Prior to application of the asphalt rubber binder, clean the existing pavement as specified in FDOT Standard Specifications 300-5.

B. Application of Asphalt Rubber Binder: Apply the asphalt rubber binder only under the following conditions:

1. The air temperature is above 50ºF and rising.

2. The pavement is absolutely dry.

3. The wind conditions are such that cooling of the asphalt rubber binder will not be so rapid as to prevent good bonding of the aggregate.

Uniformly apply the asphalt rubber binder, at the rate of 0.6 to 0.8 gal/yd^2 or as directed by the manufacturer. Use an application rate based on the unit weight as shown in FDOT Standard Specifications, Table 336-1. For conversions to standard 60ºF, refer to FDOT Standard Specifications 300-9. Determine the rate of application after each application operation.

C. Application of Cover Material: Immediately after application of the asphalt rubber binder, uniformly spread the cover material at a rate of 0.26 and 0.33 ft^3/yd^2 or as directed by the County. Determine the application rate at the beginning of each day's production, and as needed to control the operation, a minimum of twice per day. Maintain an application rate such that the pavement is covered uniformly with aggregate, and is one aggregate layer thick. For the cover material, use aggregate that is reasonably free of any adherent coatings and that does not contain excessive moisture. Immediately after the application of cover material, check the surface to ensure a uniform distribution of cover material and a smooth surface.

Do not separate the application of the asphalt rubber binder and the application of the cover material by more than 300 feet, unless approved by the County.

D. Rolling: In order to ensure maximum embedment of the aggregate, cover the entire width of the mat immediately by traffic rollers. For the first coverage, provide a minimum of three traffic rollers in order to accomplish simultaneous rolling in echelon of the entire width of the spread.

After initial rolling, immediately correct all portions of the completed surface that the County deem are defective (not properly covered by aggregates, fat spots, excessive free aggregate, etc.)

Following the first coverage, make additional coverages with traffic rollers as directed by the County.

E. Traffic Control: For the normal sequence of construction operations, place the first course of asphalt concrete overlay over the membrane prior to opening to traffic.

PART 7 - UNACCEPTABLE ASPHALT RUBBER MEMBRANE INTERLAYER

If the asphalt rubber membrane interlayer is unacceptable due to incorrect blending, application rate, or not meeting the requirements of this Section, or damaged prior to placement of the asphalt concrete layer, remove and replace it as directed by the County, at no additional cost to the County. Do not apply excessive amounts of asphalt rubber binder.

PART 8 - PLACEMENT OF ASPHALT CONCRETE OVERLAY

Ensure that the thickness and temperature of the initial layer of asphalt concrete placed on top of the asphalt rubber membrane interlayer are such that the overlay bonds to the interlayer and the underlying layer without voids or excessive binder. Core the asphalt overlay as directed by the County to evaluate the binder and aggregate spread rates, as well as the effectiveness of the asphalt concrete overlay in producing a well-bonded interlayer.

PART 9 – MEASUREMENT/PAYMENT

9.1 METHOD OF MEASUREMENT

A. Asphalt Rubber Membrane Interlayer: The quantity to be paid for will be plan quantity, in square yards, completed and accepted.

B. Bituminous Material (Asphalt Rubber Binder-Interlayer): The quantity will be the volume, in gallons, determined as provided in FDOT Standard Specifications 300-8.

9.2 BASIS OF PAYMENT

A. Asphalt Rubber Membrane Interlayer: Price and payment will be full compensation for all work specified in this Section, including furnishing cover materials, handling, spreading, rolling, bituminous material, and other incidental work necessary to complete this item.

B. Bituminous Material (Asphalt Rubber Binder-Interlayer): Payment will be included in the price of the asphalt rubber membrane interlayer and will be full compensation for furnishing asphalt cement, ground tire rubber, blending and handling.

C. Payment Items: Payment will be made determined by the square yards of in-place product accepted.

END OF SECTION 02510

SECTION 02580 – HOT IN-PLACE RECLAIMED ASPHALT AND RESURFACING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the contract, including general and supplementary conditions ad other specification sections, apply to work of this section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction Section 327*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

This work consists of rehabilitating the surface layer of the existing asphalt roadway to a depth of one inch and placing a layer of new Hot Mix Asphalt Concrete (HMAC) material over the rehabilitated surface. This will be accomplished with a specially designed machine in a simultaneous process of heating, scarifying, applying an asphalt rejuvenating agent (emulsifier), thoroughly re-mixing and reshaping the existing surface, and application of the final overlay. The overlay of the new HMAC placed over the rejuvenated layer of existing asphalt, shall be in compliance with the lines, grades, thickness and typical cross section established by the County.

The machine that heats, scarifies, rejuvenates, and remixes must also lay the recycled asphalt material, as well as lay the new HMAC material. The County will provide the list of streets and surface selected for this application. Additional pre-heaters may be required to achieve the specified depth, as directed by the County.

PART 2 - MATERIALS

A. Asphalt Recycling Agent (Emulsifier): The County will appove the asphalt-recycling agent. The recycling agent used to restore the plasticity of the existing asphaltic pavement shall be an emulsified agent. The recycling agent shall meet the requirements of ECR 1 or equal. A manufacturer's certification shall be submitted to the County for the recycling agent.

B. Hot Mix Aphaltic Concrete (HMAC): The delivery of the new HMAC will be coordinated with the HMAC supplier by the selected recycling contractor.

PART 3 - JOB CONDITIONS

A. Weather limitation for this work shall be a minimum of 50° F and rising.

B. Prior to the repaving operation, the pavement shall be cleaned so as to be reasonably free from sand, dirt and other deleterious substances that would affect the quality of the recycled mix. No separate payment shall be made for this requirement.

C. Existing manholes, water valves boxes, junction boxes, etc. that do not conform to the finished pavement grades shall be adjusted to finish grade.

D. The Contractor shall be responsible for protecting the areas adjacent to the work from damage. (Heat, etc.)

PART 4 - EQUIPMENT

A. All tools, equipment, and machinery shall be maintained in satisfactory working condition and shall be subject to the approval of the County Engineer.

B. Repaving Machine: The machine shall be an approved, self-contained, self propelled, automated unit that heats, scarifies (or mills), automatically applies recycling agent at a uniform rate, thoroughly mixes, redistributes and levels the existing asphalt to the specified depth, and lays the new HMAC material overlay. The new HMAC must be laid within 30 seconds after the scarification begins to ensure a hot monolithic bond with the recycled asphalt pavement. The machine shall also be capable of reworking the material around manholes and other obstacles; the machine shall be capable of adding and mixing the recycling agent evenly and shall be equipped with a leveling blade and screed for re-grading of the existing asphaltic concrete surface.

C. Pre-heater: This unit shall be hooded to prevent damage to adjacent property, including trees shrubs and landscaping. The heating hood shall be capable of heating the pavement surface to a minimum temperature of 225 degrees F, not to exceed 325 degrees F. This will allow for scarification to the required depth without breaking the aggregate particles or charring the pavement surface.

D. Scarifying and Milling units shall be automatically controlled units in order to control the depth of penetration and to clear utility manholes and other obstructions. The depth of scarification shall be directed by the County. Note: Scarifying depth may vary in range form 3/4 of one inch to 1 ½ inches.

E. Recycling Agent Applicator: This system shall be automatically controlled; the recycling agent must be applied to the scarified material at a uniform rate. The application rate shall be synchronized with the machine's forward speed to maintain a tolerance within ± *5%* of the specified rate.

F. Receiving hopper and Conveying System: The machine shall consist of a

hopper and conveyor system to collect and transport the new HMAC to the finishing unit without segregation of the new material.

G. Recycling Unit: The machine shall consist of a system that mixes and redistributes and levels the scarified material over the width being processed to produce a uniform cross-section of recycled material. The recycling screed shall be heated and have crown control, and be capable of redistributing the recycled material to the desired longitudinal grade and transverse cross section.

H. Finishing unit: The machine shall have an automatic controlled screed to produce a surface conforming to the surface thickness as required by the County. The thickness of the surface course lift shall not exceed 2 inches. This unit shall be capable of a plying the new HMAC to a uniform longitudinal profile and cross slope of 1/4 inch per foot. The finishing screed must be heated and capable of electronically controlling the cross slope, and applying he n ew HMAC to produce a uniform surface and texture.

I. Rollers: Rolling equipment shall be of sufficient type and weight to compact the new HMAC and the recycled material to the required density as specified in Section 2500. Sufficient numbers of rollers (2 minimum) shall be furnished to keep up with the operation. All rolling should be completed before the temperature of the new HMAC drops below 190 F.

PART 5 - TRAFFIC CONTROL

A. Pavement markings shall conform to the requirements of *Section 04040*.

B. Maintenance of Traffic: Suitable methods shall be used by the contractor to protect the new asphalt surface from all types of vehicular traffic without damage. Opening to traffic does not constitute acceptance of work. Conform to requirements of *Section 04060*.

C. The Contractor will maintain at least one-way traffic and shall provide effective Traffic Control at all times. Two-Lane traffic shall be maintained wherever possible.

D. No interruption of access to property shall be made unless prior arrangements acceptable to the occupant or owner of the affected property have been made and approved by the County.

E. Submit a Traffic Control Plan forapproval in accordance with *Section 04060.*

PART 6 - EXECUTION

A. Notify the County at least 48 hours prior to commencement of any paving operation.

B. The heating unit shall produce sufficient heat to soften the pavement uniformly without burning or charring the existing asphalt pavement.

C. The process shall produce a welded, longitudinal joint, the standing edge of the ajoining asphalt pavement shall be fully heated to a width of t least 2 inches beyond the width to be scarified and recycled.

D. Immediately following heating of the pavement, the existing surface shall be scarified (milled) to the specified depth. The machine shall have the capability of maintaining a recycled mat with a minimum temperature of 190°F and a maximum temperature of 2 25°F throughout the repaving operation.

E. Due to the varying locations and properties of the existing asphalt pavement, the following adjustments may be made, if directed by the County.

1. Depth of scarification may be varied to correct existing cross slopes and grades.

2. Application rate for the recycling agent may be adjusted as necessary to maintain a uniform mixture.

3. Spot leveling may be necessary.

4. Variable Message Boards may be required. No additional compensation will be made for these traffic control devices after contract is awarded.

F. CLEANUP

The Contractor will keep the work site free from accumulations of waste material, rubbish and debris from the Contractor's performance of the scope of work resulting from the use of all tools, construction equipment, and machinery, and surplus materials, and will leave the site clean and ready for use. The Contractor will restore to their original condition those portions of the work site, such as staging and stockpile areas, not designed for alteration as contained in the Contract Documents. This will include returning the area to the proper grade and slope, as well as replacing sod, if so required by the County.

PART 7 - QUALITY CONTROL

The County has the option of testing to ensure the surface is in compliance with thickness, smoothness, etc. and meets requirements of the specifications as directed by the County and as outlined in *Section 2500*.

Contractor will assign a Quality Control (QC) Supervisor to the project. The QC Supervisor will work in conjunction with the County.

PART 8 - MEASUREMENT/PAYMENT

8.1 METHOD OF MEASUREMENT

A. The accepted quantities of asphalt pavement surface recycled will be measured and paid by the square yard. Pay item, Hot In-Place Recycling, Square Yard.

B. Asphalt recycling agent will be measured by the gallon, used in place, as determined by the County and the Contractor Supervisor. Pay item, Emulsifier, Gallon.

C. New HMAC will be measured by the tons used in place. Pay item, HMAC, Tons.

8.2 BASIS OF PAYMENT

A. Price and payment will be full compensation for all work specified in this Section.

B. No separate payment for traffic control will be made.

C. Spot leveling will be paid for by the measured square yards under the unit price for Hot-In-Place Recycling.

END OF SECTION 02580

SECTION 02600 - STORMWATER SYSTEM

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, specifically 2300, 3300, and Florida Department of Transportation *Design Standards*, apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction, Sections 425, 430 and 530*, *Latest Edition*.

1.2 SUMMARY

This Section includes stormwater system piping and appurtenances. All labor, material, equipment, appurtenances, services, and other work or costs necessary to construct the facilities and place them into operation shall be furnished by the Contractor.

1.3 SUBMITTALS

A. General: Submit the following in accordance with Conditions of Contract.

B. Shop drawings for drainage pipe, pre-cast concrete storm drainage manholes and catch basins, including frames, covers, and grates.

C. Shop drawings for cast-in-place concrete or field-erected masonry storm drainage manholes and catch basins, including frames and covers.

1.4 QUALITY ASSURANCE

A. Environmental Compliance: Comply with applicable portions of local, state, and federal environmental agency regulations pertaining to stormwater systems impacts.

B. Utility Compliance: Comply with local utility regulations and standards pertaining to relocation, clearances, etc. related to installation of stormwater systems.

C. Quality control to adhere to QA/QL Plan.

1.5 PROJECT CONDITIONS

Site Information: Perform site inspection, research public utility records, and verify existing utility locations. Verify that stormwater system piping may be installed in compliance with design plans and referenced standards. Locate existing stormwater system piping and structures that are out of service and

closed as per 3.8 this section.

1.6 SEQUENCING AND SCHEDULING

A. Notify the County Inspector assigned to the subdivision or Project Coordinator assigned to project prior to pouring backfilling or form work.

B. Coordinate connection to existing private and public drainage system with Owner and/or County.

C. Coordinate with adjacent utilities work.

PART 2 - PRODUCTS

2.1 MATERIALS

2.1.1 PIPE

Meet the following requirements of *FDOT Specifications*, *Latest Edition*:

Reinforced Concrete Pipe	Section 449
Round Rubber Gaskets	Section 942
Corrugated Steel Pipe & Pipe Arch	Section 943
Corrugated Aluminum Pipe & Pipe Arch	Section 945
Corrugated Polyethylene Pipe	Section 948
Polyvinyl Chloride (PVC)	Section 948

2.1.2 MANHOLES

A. Precast Concrete Manholes: Per FDOT Standard Specification 425-5 and ASTM C 478, precast reinforced concrete, of depth indicated with provision for rubber gasket joints.

B. Cast-in-Place Manholes: Per FDOT Standard Specification 425 Cast reinforced concrete of dimensions and with appurtenances indicated.

C. Manhole Frames and Covers: Construct Per FDOT Standard Specification 42 5-3.2 and FDOT Design Standards. All units shall bear the lettering "STORM SEWER" cast into cover. All proposed substitutes must have equal or greater opening sizes and weights.

2.1.3 INLETS

A. Precast Concrete Catch Basins Inlets: Construct per FDOT Standard Specification 425-5.

B. Cast-in-Place Inlets: Construct per FDOT Standard Specification 425 to dimensions and with appurtenances indicated.

1. Bottom, Walls, and Top: Reinforced concrete.
2. Channel and Bench: Concrete.

C. Inlet Frames and Grates: Per FDOT Standard Specification 425-3.2 & FDOT Design Standards. All units shall bear the lettering "STORM SEWER" cast into cover.

2.1.4 END TREATMENT

General: Head wall, apron, and mitered ends, per FDOT Standard Specification 430-4.6.

2.2 CONCRETE AND REINFORCEMENT

A. Concrete: Portland cement mix, 3,000 psi; shall be in accordance with Section 03300.

1. Cement: ASTM C 150, Type II.
2. Fine Aggregate: ASTM C 33, sand.
3. Coarse Aggregate: ASTM C 33, crushed gravel.
4. Water: Potable.

B. Reinforcement: Steel conforming to the following:

1. Fabric: ASTM A 185, welded wire fabric, plain.
2. Reinforcement Bars: ASTM A 615, Grade 60, deformed.

C. Forms:

1. Form Materials: Plywood, metal, metal-framed plywood, or other acceptable panel-type materials to provide full-depth, continuous, straight, smooth exposed surfaces without distortion or defects. Material shall be of size and strength to resist movement during concrete placement and to retain horizontal and vertical alignment until removal.

2. Form Release Agent: Provide commercial formulation form-release agent with a maximum of 350 mg/l volatile organic compounds (VOCs) that will not bond with, stain, or adversely affect concrete surfaces and will not impair subsequent treatments of concrete surfaces. Release agent to be within allowable volatile limits according to applicable local, state and federal codes.

2.3 MASONRY

Materials for accessories shall be per FDOT Standard Specification 949. Mortar shall be one part Portland cement and three parts masonry sand to which shall

be added lime putty in the amount of 50% of the volume of cement. Special commercial mortar mixes may be used if approved by the Engineer. All masonry materials shall conform to the latest applicable ASTM specifications. Set all masonry units in full beds of mortar, with full joints and strike all joints flush. Masonry reinforcements shall be galvanized Dur-O-Wal, or approved equal, and shall be installed at every other bed joint. Hollow block shall be poured solid with re-bar as designed.

2.4 CURING MATERIALS

Conform to FDOT Standard Specification 520-8.

2.5 BEDDING STONE

Subbase or base materials shall meet requirements of FDOT Standard Specification 530-2.3.

PART 3 - EXECUTION

3.1 EXCAVATIONS FOR MANHOLES, INLETS, AND PIPE

Excavation shall be sufficient enough to leave at least 12 inches in the clear between their outer surfaces and the embankment. Excavation for all structures shall be made to the dimensions and elevations indicated on the drawings. Where the excavation is made below the indicated elevations, the excavation shall be restored to the proper elevation with compacted suitable material without extra compensation.

3.2 PREPARATION OF FOUNDATION FOR BURIED STORMWATER SYSTEMS

A. Grade trench bottom to provide a smooth, firm, stable, and rock-free foundation, throughout the length of the pipe.

B. Remove unstable, soft, and unsuitable materials at the surface upon which pipes are to be laid, and backfill with bedding stone per FDOT Standard Specification 530-2.3 to indicated level.

C. Shape bottom of trench to fit bottom of pipe. Fill unevenness with tamped sand backfill. Dig bell holes at each pipe joint to relieve the bells of all loads and to ensure continuous bearing of the pipe barrel on the foundation.

3.3 PIPE INSTALLATION

A. Drawings (plans and details) indicate the general location and arrangement of the underground stormwater system piping. Location and arrangement of piping layout takes into account many design considerations. Install the piping as indicated, to the extent practical.

Deviations shall be approved by the County.

B. Install piping beginning at low point of systems, true to grades and alignment indicated with unbroken continuity of invert. Place bell ends of piping facing upstream. When installing gaskets, seals, sleeves, and couplings, follow manufacturer's recommendations for use of lubricants, cements, and other installation requirements. Maintain swab or drag in line and pull past each joint as it is completed.

The pipe shall be carefully examined for defects and the inside cleaned. After placing pipe in the ditch, the ends shall be wiped free from all dirt, sand and foreign material. All pipe and joints shall be made, handled, and installed in strict accordance with the manufacturer's recommendations and instructions. Install pipe in accordance with FDOT Standard Specification 430.

C. Install piping pitched down in direction of flow, at minimum slope per plans and in accordance with manufacturer's recommendations, specifications, and design plans.

D. Boring: Install pipe under streets or other obstructions that cannot be disturbed, by boring, jacking, or a combination of both. These methods of installation are not allowed for newly paved roadways. Utility conduit should be installed prior to paving.

E. All RCP joints shall be sock/filter wrapped prior to backfilling unless a manufacturer recommended coupling is used.

F. Field repairs of pipeline shall be in strict accordance with manufacturer's recommendations and specifications.

G. Only conventional concrete pipe shall be allowed under dedicated County roads.

H. Pipe Cover: Cover shall be a minimum of 12", unless approved by the County.

I. Pipe Size: Minimum Pipe size shall be 18" diameter or equivalent, unless approved by the County.

3.4 MANHOLES

A. General: Install manholes complete with accessories as indicated. Form continuous concrete or split pipe section channel and benches between inlets and outlet. Set tops of frames and covers flush with finish surface where manholes occur in pavements. Elsewhere, set tops 3 inches above finished grade, unless otherwise indicated.

B. Place precast concrete manhole sections as indicated, and install in accordance with ASTM C 891.

C. Construct cast-in-place manholes as indicated.

D. Provide rubber joint gasket complying with ASTM C443 at joints of sections; or apply bituminous mastic coating at joints of sections.

3.5 INLETS

A. Construct inlets to sizes and shapes indicated per FDOT Standard Specification 425-6, or as modified in the plans.

B. Set frames and grates to elevations indicated.

C. Inlet throat openings larger than 7" in height must be equipped with horizontal trash bar(s). Trash bar(s) shall be 1” diameter galvanized rod installed in the center of the opening, or evenly spaced if more than one is used.

3.6 OUTFALL STRUCTURES

A. Pipe systems shall be utilized for primary out fall of retention/detention areas.

B. Weirs and flumes will not be acceptable for use as primary pond outfall structures or to primarily route stormwater to retention/detention areas at the end of down-gradient roadways.

3.7 END TREATMENT

Construct End Treatment per FDOT Standard Specification 430-4.6.

3.8 STORMWATER SYSTEM BACKFILL

Place and compact backfill material in accordance with Section 02300 and FDOT Specification 125-8.

3.9 CLOSING OUT-OF-SERVICE STORMWATER SYSTEMS

A. Out-of-Service Piping: Close open ends of out of service underground piping that is indicated to remain in place. Provide sufficiently strong closures to withstand hydrostatic or earth pressure that may result after pipe ends have been closed and grout filled with non-shrink grout.

1. Close open ends of concrete pipe or structures with not less than 8-inch-thick brick masonry bulkheads and grout fill.

2. Close open ends of other piping with plastic plugs, or other acceptable methods suitable for size and type of material being closed. Wood plugs are not acceptable.

B. Out-of-Service Structures: Remove structure and close open ends of the remaining piping or remove top of structure down to not less than 3 feet below final grade; fill structure with stone, rubble, gravel, compacted dirt, or flowable fill to within 1 foot of top of structure remaining, and fill with concrete.

3.10 FIELD QUALITY CONTROL

A. Refer to Section 03300 for Concrete Testing and 02300 for Earthwork Testing.

B. Cleaning: Interior of piping and structures shall be cleared of dirt and other superfluous material as work progresses. Maintain swab or drag in piping and pull past each joint as it is completed.

1. In large, accessible piping, brushes and brooms may be used for cleaning.

2. Place plugs in ends of uncompleted pipe at end of day or whenever work stops.

3. Flush piping between manholes, to remove collected debris.

C. Interior Inspection: Inspect piping to determine whether line displacement or other damage has occurred.

1. Make inspections after pipe between manholes has been installed, cleaned and approximately 2 feet of backfill is in place, and again at completion of project. Each section of pipe between structures is to show from either end on examination, a full circle of light. Each appurtenance to the system shall be of the specified size and form, to be neatly and substantially constructed, with the top set permanently to exact position and grade.

2. If inspection indicates poor alignment, debris, displaced pipe, infiltration, or other defects, correct such defects and re-inspect. All repairs shown necessary by the inspections are to be made, broken, cracked, or punctured pipe replaced, all deposits removed and the pipe left true to line and grade as herein specified, or shown on the plans, entirely clean and free from abnormalities and ready for use at no additional expense to the County.

3. All stormwater pipes will be subject to video camera inspection by County staff.

D. Trench Backfill Around and Above Pipe:

1. In each compacted backfill layer, perform density test as specified in Section 02300.

2. Other tests may be required at County's discretion.

E. Clean Up: Before final inspection and acceptance, the Contractor shall clean ditches, shape shoulders and restore all disturbed areas, including street crossings, grass plots, to as good as condition as existed before work started. All trenches shall be leveled and loose material removed from pavement gutters, sidewalks, pipelines, and inlet sediment traps, employing hand labor, if necessary.

F. Pipe Inspection: The County may elect for the contractor to perform pipe inspection according to the following.

For pipes installed under the roadway, inspection is to be conducted when backfill reaches 3 feet above the pipe crown or upon completion of placement of the stabilized subgrade. For pipe installed within fills, including embankments confined by walls, inspection is to be conducted when compacted embankment reaches 3 feet above the pipe crown or the finished earthwork grade as specified in the Plans. Prior to conducting the inspection, submit to the Engineer a video recording schedule for videoing, dewater installed pipe, and remove all silt, debris and obstructions. Submit pipe videoing and reports to the County for review prior to the continuation of paving.

For pipe 48 inches or less in diameter, submit to the Engineer a video DVD. For all pipe types, provide a Pipe Observation Summary Report for each pipe run that includes:

1. Actual recorded length and width measurements of all cracks within the pipe.
2. Actual recorded separation measurement of all rigid pipe joints.
3. Detailed written observations of leaks, debris, or other damage or defects.

For flexible pipe types, submit a Pipe Quality Report for each pipe run that includes:

1. Representative diameter of the pipe.
2. Pipe deformation/deflections measurements with the 5% deflection limit clearly delineated.

Reports submitted in electronic media are preferred. The Engineer may waive this requirement for side drains and cross drains which are short enough to inspect from each end of the pipe.

G. Video Report: Provide a high-quality DVD in a MPEG2 format video with a standard resolution of 720 x 480. Use a camera with lighting suitable to allow a clear picture of the entire periphery of the pipe. Center the camera in the pipe both vertically and horizontally and be able to pan and tilt to a 90 degree angle with the axis of the pipe and rotating 360 degrees. Use equipment to move the camera through the pipe that will not obstruct the camera's view or interfere with proper documentation of the pipe's condition.

The video image shall be clear, focused, and relatively free from roll, static, or other image distortion qualities that would prevent the reviewer from evaluating the condition of the pipe. The video will include identification before each section of pipe filmed. The identification will include the project number, the structure number corresponding to the structure number in the Plans for the project, size of pipe, the date and time, and indicate which pipe is being filmed if multiple pipes are connected to the structure. Notes should be taken during the video recording process. Submit these notes along with the video.

Move the camera through the pipe at a speed not greater than 30 feet per minute. Mark the video with the distance down the pipe. The distance shall have an accuracy of one foot per 100 feet. Film the entire circumference at each joint. Stop the camera and pan when necessary to document and measure defects. Position the camera head perpendicular to all defects requiring measurement by the video micrometer.

H. Reinspection: At any time after reviewing the submitted pipe inspection reports, the Engineer may direct additional inspections. If no defects are observed during the reinspection, the County will pay for the cost of the reinspections. If defects are observed, the reinspection and all work performed to correct the defects will be done at no cost to the County. Acceptance of all replacements or repairs will be based on video documentation of the completed work prior to Final Completion.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be (1) the number of inlets, manholes, end walls, mitered end sections, flared end sections, junction boxes, and yard drains, including fittings and appurtenances, completed and accepted; (2) length of pipe to the nearest foot of type specified; and (3) the number of structures of these types (including also valve boxes and monument boxes) satisfactorily adjusted.

4.2 BASIS OF PAYMENT

Price and payment will be full compensation for finishing all materials and completing all work described herein or shown in the plans, including all clearing and grubbing outside the limits of clearing and grubbing as shown in the plans, all excavation except the volume included in the measurement designated to be paid for under the items for the grading work on the project, all backfilling around the structures, the disposal of surplus material, and the furnishing and placing of all the gratings, frames, covers, and any other necessary fittings.

If the County elects for the contractor to perform pipe inspection, payment shall be made under a separate line item and be based upon linear foot of pipe videoing. No additional payment will be made for cleaning new stormwater pipe systems.

END OF SECTION 02600

SECTION 02800 - FENCING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions, apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 550 and* Florida Department of Transportation *Design Standards Index 800, Latest Editions*

1.2 SUMMARY

A. This Section includes, but is not limited to, the following:

1. Chain link fence

2. Farm Fence

3. Wood privacy fence

B. Where existing fences are to be relocated, but existing materials are deteriorated or damaged, fencing shall be replaced in kind or as specified by the County.

1.3 PROJECT CONDITIONS

A. Traffic: Conduct fencing operations to ensure minimum interference with roads, streets, walks, and other adjacent occupied or used facilities and to minimize disturbance of the activities of adjacent property owners. Do not close or obstruct streets, walks, or other occupied or used facilities without prior approval.

B. Security: Do not leave any fence unfinished or incomplete which might allow the escape of livestock or household pets, access to a private/public pool or pond, etc without temporary measures in place during construction.

1.4 PRODUCT DELIVERY, STORAGE AND HANDLING

A. Deliver material in manufacturer's original packaging with all tags and labels intact and legible.

B. Handle and store material in such a manner as to avoid damage.

PART 2 - PRODUCTS

2.1 CHAIN LINK FENCING:

Chain link fence shall meet the requirements of FDOT *Design Standards Index 802*.

2.2 GATES

A. Swing Gates: Per FDOT Design Standards Index 802, as modified herein, construct of 1.625" o.d. steel pipe galvanized in accord with ASTM A-53 and weighing 2.27 pounds per lineal foot. Provide gates more than 8 feet wide with either intermediate members or diagonal truss rods. Provide gates less than 8 feet wide with truss rods or intermediate braces. Arrange latches for padlocking to provide accessibility from both sides of the gate. Where a double swing gate is called out, Construct Concrete Anchor rod Base 8” in diameter a nd 4” deep flush with top of ground. Opening in base for rod shall accommodate standard size in accordance with manufacturer and shall be PVC or galvanized steel pipe.

B. Slide Gates: shall be constructed per FDOT Design Standards Index 803.

2.3 ACCESSORIES

Post Tops: pressed steel, or malleable iron. Where top rail is used, provide post tops to permit passage of top rail.

2.4 FARM FENCING

Farm Fencing shall meet the requirements of FDOT Design Standards Index 801.

2.5 WOOD PRIVACY FENCE

A. Where existing fences are to be relocated, but existing materials are deteriorated or damaged, fencing shall be replaced in kind or as specified by the County.

B. Shall be constructed as per industry standard with proper clearance below fence so as not to impede stormwater flow.

PART 3 - EXECUTION

3.1 CHAIN LINK FENCING

Chain link fence shall meet the requirements of FDOT Design Standards Index 802.

A. Drill holes for post footings in firm, undisturbed or compacted soil.

B. Place concrete around posts in a continuous pour, tamp for

consolidation. Check each post for vertical and top alignment.

C. Set Keepers, stops, sleeves and other accessories into concrete as required.

D. Topping of the fence with barbed wire shall not be included unless specifically shown on the plans.

3.2 INSTALLATION

A. Brace Assemblies: install braces so posts are plumb when diagonal rod is under proper tension.

B. Tension Wire: install tension wires before stretching fabric and tie to each post with ties or clips.

C. Fabric: pull fabric taut 2 inches above grade level and tie to posts, rails, and tension wires. Attach fabric to terminal or gateposts by a stretcher bar and clip to other framework so that fabric remains in tension after pulling force is released.

D. Hinge gates to swing through 180 degrees from closed to open.

3.3 FARM FENCING

A. General installation shall be in accordance with FDOT Design Standards Index 801, as modified herein.

B. Fence shall be installed with wire side to the private property side.

C. Topping of the fence with barbed wire shall not be included unless existing farm fence includes barbed wire topping.

3.4 WOOD PRIVACY FENCING:

Shall be constructed as per industry standard with proper clearance below fence so as not to impede stormwater flow.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. GENERAL

The quantities to be paid for will be either the number of gates, the length of each type of fence, the number of corner post assemblies, constructed and accepted for the length of each type of fence with all other items necessary for construction as incidental. In addition, extra payment will be

made, for additional lengths of post approved by the County.

B. MEASUREMENT OF FENCE LENGTH

The length of fence to be paid for will be measured along the bottom of the fabric, out-to-out of end posts, in the completed and accepted fence. Measurement for Resetting Fence will be the actual length of existing fence reset, including gates when applicable.

C. CORNER POST ASSEMBLIES, PULL, AND END POST ASSEMBLIES

The number of corner post assemblies and of pull and end post assemblies to be paid for will be the number of such post as semblies constructed and accepted.

4.2 BASIS OF PAYMENT

A. BASIC ITEMS OF FENCING

The contract unit price will be full compensation for all work and materials necessary for the complete installation, including line posts, but not including the corner, end, and pull posts and the assemblies thereof.

B. ITEMS OF POST ASSEMBLIES

The Contract unit prices for the items of Corner Post Assemblies and Pull and End Post Assemblies will include the posts and the complete assemblies therewith for each such item. Approach posts and brace posts will be considered as part of the assembly of the corner, end, or pull post serves as a brace in more than one horizontal line.

C. PAYMENT RATES FOR EXTRA-LENGTH POSTS

For any length of posts in excess of the standard length for each particular type of post, approved by the Engineer as provided above, payment will be made for each foot in excess of the standard length at the percentage of the Contract unit price per foot for the item of Fencing, as shown in the following schedule:

Total Post Length	Steel and Aluminum Posts	Recycled Plastic & Timber Posts
Standard up to 14’	50%	60%
Between 14’ – 20’	60%	80%
Over 20’ *	*	*

*When the length of post exceeds 20 feet, the work of finishing and installing such posts and the costs incidental thereto will be paid for as unforeseeable through a change order.

The standard length of steel, recycled plastic and aluminum posts will be the required length as indicated in the plans for each type and case. The above provisions for extra length payment will apply to end, corner and pull posts.

The payment for additional length of post will include the cost of additional concrete to extend concrete bases, as applicable.

D. GATE PAYMENT

The quantities to be paid for will be full compensation for all labor, materials, posts and associated hardware for the complete installation of the type gate specified in the plans, and accepted by the County.

END OF SECTION 02800

SECTION 02900 - GRASSING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specifications Sections apply to this Section.

B. Florida Department o f Transportation*, Standard Specifications for Road and Bridge Construction,* Section 570 and Section 981, *Latest Edition*

1.2 SUMMARY

Extent of grassing work is as specified or shown on the construction plans. Sodded areas disturbed during construction shall be re-sodded to match existing. Areas disturbed beyond specified construction area shall be sodded, at no additional expense, either to match existing or as per County direction.

1.3 SUBMITTALS

See par agraph 1. 9 A *Quality Control/Quality Assurance Submittals*, Section 1300.

1.4 DELIVERY AND STORAGE

A. General: Seed, fertilizer, sod and other grassing materials shall be stored under cover and protected from damaged which would make them unacceptable for use.

B. Seed: All seed shall be labeled in accordance with U.S. Department of Agriculture Rules and Regulations under the Federal Seed Act in effect on the date of invitation for bids. All seed shall be furnished in sealed standard containers, unless exception is granted in writing. Seed, which has become wet, moldy, or otherwise damaged in transit or in storage, shall not be used.

C. Fertilizer: Fertilizer shall be delivered to the site in the original, unopened containers, each b earing the manufacturer's guaranteed analysis. Any fertilizer, which becomes caked or otherwise damaged, making it unsuitable for use, shall not be used.

D. Sod: Do not use sod which has been cut (stripped) for more than 48 hours. Stack all sod that is not planted 24 hours after cutting and maintain proper moist condition.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Lime: Lime shall be ground limestone (Dolomite) containing not less than 85 percent of total carbonates, and shall be ground to such a fineness that 50-percent will pass a 100-mesh sieve and 90-percent will pass a 20-mesh sieve.

B. Fertilizer: Apply fertilizer at the following rates:
10-10-10 1000 lbs/acre=0.2 lbs/sq yd
13-13-13 770 lbs/acre=0.16 lbs/sq yd

C. Seed: Apply seed at the rate as specified:

GRASS SEEDING RATES (Lbs/Ac)

TYPE OF SEED	**ZONE I**				**ZONE II**			
	COASTAL*		**INLAND**		**COASTAL***		**INLAND**	
	Mar.-Nov.	Nov.-Mar.	Mar.-Nov.	Nov.-Mar.	Mar.-Nov.	Nov.-Mar	Mar.-Nov.	Nov.-Mar.
PERMANENT GRASSES								
Unhulled Bermuda**		90		20		90		20
Hulled Bermuda**	60		15		60		15	
Bahia (Argentine or Pensacola)			180	180			180	180
QUICK GROWING GRASS								
Annual Rye Grass		90		90		90		90
TOTAL POUNDS PER ACRE	60	180	195	290	60	180	195	290

* Locations where salt sensitive plants may be adversely affected by high concentrations of salt in soils, water, or air. This may include seaside locations, low-lying areas subjected to periodic saltwater inundation from storms or high tides, or where salt intrusion into groundwater supply has occurred.

** Bermuda shall not be used in areas adjacent to existing or proposed landscaping.

NOTE: All seeding shall be performed meeting the requirements of Section 570 of the Standard Specifications

Activities such as clearing, grading, and excavating that will disturb one or more acres of land require coverage under the Generic Permit for Stormwater Discharge from Large and Small Construction Activities from the Florida Department of Environmental Protection, and implementation

of appropriate pollution prevention measures to minimize erosion and sedimentation. Please refer to the National Pollutant Discharge Elimination System (NPDES) Permit.

E. Mulch: The mulch material shall be dry straw or hay, consisting of oat, rye, or wheat straw, or of pangola, peanut, coastal Bermuda or Bahia grass, hay or compost; and shall be free from noxious weeds and plants. Any plant officially listed, as being noxious or undesirable by any Federal Agency, any agency of the State of Florida or any local jurisdiction in which the project is being constructed shall not be used. Furnish to the engineer, prior to incorporation onto the project, a certification from the Florida Department of Agriculture and Consumer Services, Division of Plant Industry, stating that the Mulch materials are free of noxious weeds. Any such noxious plant or plant part found to be delivered shall be removed by the Contractor at his expense. Only undeteriorated mulch, which can readily be cut into the soil, shall be used. The “air-dry” weight (as defined by the Technical Association of the Pulp and Paper Industry, for wood cellulose) shall be marked on each package by the producer. Apply mulch at a rate of 2 ton/acre or 1 lb/sq yd.

E. Sod: All sod shall be healthy Centipede Sod unless otherwise required. Sod shall be strongly rooted, free of weeds and undesirable grasses and capable of providing vigorous growth and development when planted. Sod shall match existing species where restoration is required as a result of the Contractor's work.

PART 3 - EXECUTION

3.1 REQUIREMENTS

All areas disturbed by the Contractor's operations, shall be grassed, unless otherwise noted.

3.2 PLANTING SEED

A. Grading: Areas to be grassed shall be graded to remove depressions, undulations, and irregularities in the surface before grassing. Adhere to grades as shown on plans.

B. Tillage: The area to be grassed shall be thoroughly tilled to a depth of four inches using a plow and disc harrow or rotary tilling machinery until a suitable bed has been prepared and no clods or clumps remain larger than 1½ inches in diameter. Remove sticks, roots, and rubbish.

C. Applying Lime: The pH of the soil shall be determined. If the pH is below 5.0, sufficient lime shall be added to provide a pH between 5.5 and 6.5. The lime shall be thoroughly incorporated into the top three to four inches

of the soil. Lime and fertilizer may be applied in one operation.

D. Applying Fertilizer: Fertilizer shall be applied in accordance with the rates specified in Part 2, and shall be thoroughly incorporated into the top three to four inches of soil before sod is installed. FDOT Section 982.

E. Seed and Mulch: Apply in accordance with the rates specified in Part 2.

F. Maintenance: Maintenance shall begin immediately following the last operation of grassing and continue until final acceptance. Maintenance shall include watering, mowing, replanting, and all other work necessary to produce a uniform stand of grass, all at the contractor's expense.

3.3 PLACING SOD

A. Use Centipede sod (Eremochloa ophiuroides) unless otherwise required. The sod shall have a thick mat of roots (minimum 2") with enough adhering soil to assure growth. Apply sod within 48 hours of stripping. Protect sod against drying and breaking of rolled strips.

B. Placement: Prepare the g ound by loosening the soil. Place sod perpendicular to the slope. Place sod on the prepared soil to form a solid mass with tightly fitted joints. Ensure the butt ends and sides of sod strips do not overlap. The seam should have a flush tight transition from new to existing sod with no overlap. Stagger strips to avoid a continuous downhill seam. Tamp or roll lightly to ensure contact with subgrade. Tamp the outer edges of the sodded area to produce a s mooth contour. Work sifted soil into minor cracks between pieces of sod; remove excess to avoid smothering o f adjacent g rass. Water sod thoroughly with a fine spray immediately after planting.

C. Pinning: All sod placed on a slope steeper than 3:1 shall be pinned, at the top of the sod, at a rate listed in the table below:

Sod Size	Pins Required
Square Sod	2 pins per sod square
Mini Roll	3 pins per roll
Standard Rolls	1 pin per linear foot

C. Watering: Keep sod continuously moist to a depth below the root zone for three weeks after placement. If there is no water available to the site, the Contractor shall provide the water. Do not water in excess of 1" (one inch) per square yard per week for establishment.

D. Clean-Up: All excess soil, excess grass materials, stones, pallets and other waste shall be removed from the site daily and not allowed to accumulate. All paved areas shall be kept clean at all times.

E. Maintenance: Maintain sod by watering, fertilizing, weeding, mowing, trimming and other operations such as rolling, re-grading, and re-planting as required to establish a lawn free of eroded or bare areas and acceptable to the County. Where inspected work and materials do not comply with requirements, replace rejected work and continue maintenance until re-inspected by County and found to be acceptable. Remove rejected materials promptly from the project site. FDOT Section 570-4.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be for the following items, completed and accepted: square yards of seeding, square yards of seeding and mulching, and square yards of sodding.

4.2 BASIS OF PAYMENT

Prices and payments will be full compensation for all work and materials specified in this Section.

END OF SECTION 02900

SECTION 03300 – PORTLAND CEMENT CONCRETE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specification Sections, apply to this Section.

B. Florida Department of Transportation (FDOT), *FDOT Material's Manual, Chapter 9.2, Volume II, FDOT Standard Specifications for Road and Bridge Construction, Section 346, 347, 350, 400, 522, & 925, Latest Edition.*

1.2 SUMMARY

This Section includes concrete work for the following:

1. Roadways
2. Parking lots
3. Curbs and gutters
4. Walkways
5. Pads
6. Flumes
7. Curb Ramps
8. Cast in Place Structures

1.3 SUBMITTALS

A. Product data for proprietary materials and items, including reinforcement and forming accessories, admixtures, joint systems, curing compounds, dry-shake finish materials, and others if requested by the County.

B. Design mixes for each class of concrete. Include revised mix proportions when characteristics of materials, project conditions, weather, test results, or other circumstances warrant adjustments.

C. Material certificates in lieu of material laboratory test reports when permitted by the County. Material certificates shall be signed by manufacturer and Contractor certifying that each material item complies with or exceeds requirements. Provide certification from admixture manufacturers that chloride content complies with requirements.

1.4 PROJECT CONDITIONS

A. Traffic Control: Comply with requirements of Escambia County Specification, Section 04060, "Maintenance of Traffic."

B. Utilize flagmen, barricades, warning signs and warning lights as required, as shown on plans, or as directed by the County.

PART 2 - PRODUCTS

2.1 GENERAL REQUIREMENTS

A. Concrete shall conform to requirements of FDOT Standard Specification, Sections 346, 347, & 522 for curbs, gutters, sidewalks, structures and miscellaneous concrete.

B. Concrete for pavement shall conform to requirements of FDOT Standard Specification, Section 350.

C. Curb Ramps shall conform to FDOT Design Standards Index 304.

2.2 REINFORCING MATERIALS

A. Reinforcing Bars and Tie Bars: ASTM A 615, Grade 60, deformed.

B. Welded Steel Wire Fabric: ASTM A 185.

1. Furnish in flat sheets, not rolls.

C. Deformed-Steel Welded Wire Fabric: ASTM A 497.

D. Fabricated Bar Mats: Welded or clip-assembled steel bar mats, ASTM A184. Use ASTM A615, Grade 60 steel bars, unless otherwise indicated.

E. Joint Dowel Bars: Plain steel bars, ASTM A615, Grade 60. Cut bars true to length with ends square and free of burrs.

F. Hook Bolts: ASTM A307, Grade A bolts, internally and externally threaded. Design hook bolt joint assembly to hold coupling against pavement form and in position during concreting operations, and to permit removal without damage to concrete or hook bolt.

G. Supports for Reinforcement: Chairs, spacers, dowel bar supports and other devices for spacing, supporting, and fastening reinforcing bars, welded wire fabric, and dowels in place. Use wire bar-type supports complying with CRSI specifications. Use supports with sand plates or horizontal runners where base material will not support chair legs.

2.3 CONCRETE MATERIALS

A. Portland Cement: Type I, Type IP, Type IS, Type IP (MS), Type II, or Type III.

1. Use one brand of cement throughout Project.

2. All concrete shall develop a 28-day compressive strength of 3000 psi for non -structural (NS). If any concrete should fail to meet the strength requirement the structure shall be removed as necessary to remove the defective concrete and shall then be rebuilt at the Contractor's expense.

B. Fly Ash: ASTM C618, Class C or Class F.

C. Normal-Weight Aggregates: ASTM C33, Class 4, and as follows. Provide aggregates from a single source.

1. Maximum Aggregate Size: 1-1/2 inches.

2. Do not use fine or coarse aggregates that contain substances that cause spalling.

3. Local aggregates not complying with ASTM C33 that have been shown to produce concrete of adequate strength and durability by special tests or actual service may be used when acceptable to Engineer.

D. Water: Potable.

E. Fiber Reinforcement: Synthetic fibers engineered and designed for secondary reinforcement of concrete slabs, complying with ASTM C1116, Type III.

2.4 ADMIXTURES

A. Provide concrete admixtures that contain not more than 0. 01 percent chloride ions.

B. Air-Entraining Admixture: ASTM C260, certified by manufacturer to be compatible with other required admixtures.

C. Water-Reducing Admixture: ASTM C494, Type A.

D. High-Range Water-Reducing Admixture: ASTM C494, Type F or Type G.

E. Water-Reducing and Accelerating Admixture: ASTM C494, Type E.

F. Water-Reducing and Retarding Admixture: ASTM C494, Type D.

2.5 CONCRETE MIX

A. Prepare design mixes for each type and strength of normal-weight concrete

per FDOT Standard Specification, Section 346-6.2 and FDOT Material's Manual, Chapter 9. 2, Volume II. Use a qualified independent testing laboratory for preparing and reporting proposed mix designs. Do not use the Owner's field quality-control testing laboratory as the independent testing laboratory.

B. Fiber Reinforcement: Add to mix at rate of 1. 5 l b per cu. yd., unless manufacturer recommends otherwise.

C. Adjustment to Concrete Mixes: Mix design adjustments may be requested by Contractor when characteristics of materials, project conditions, weather, test results, or other circumstances warrant.

2.6 CONCRETE MIXING

Ready-Mixed Concrete: Comply with requirements of FDOT Standard Specification, Section 346-7 and FDOT Material's Manual, Chapter 9.2, Volume II.

PART 3 - EXECUTION

3.1 SURFACE PREPARATION FOR CONCRETE PAVEMENT

A. Proof-roll prepared base or subgrade surface to check for unstable areas and verify need for additional compaction. Do not begin concrete work until such conditions have been corrected and are ready to receive paving.

B. Remove loose material from compacted subbase surface immediately before placing concrete.

3.2 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides to required lines, grades, and elevations. Install sufficient forms to allow continuous progress of work and so that forms can remain in place at least 24 hours after concrete placement.

B. Check completed formwork and screeds for grade and alignment to following tolerances:

1. Top of Forms: Not more than 1/8 inch in 10 feet.

2. Vertical Face on Longitudinal Axis: Not more than 1/4 inch in 10 feet.

C. Clean forms after each use and coat with form release agent as required ensuring separation from concrete without damage.

3.3 PLACING REINFORCEMENT

A. General: Comply with Concrete Reinforcing Steel Institute's recommended practice for " Placing Reinforcing Bars" for placing and supporting reinforcement. Comply with FDOT Standard Specification, Section 350-7.

B. Clean reinforcement of loose rust and mill scale, earth, ice, or other bond-reducing materials.

C. Arrange, space, and securely tie bars and bar supports to hold reinforcement in position during concrete placement. Secure reinforcemen einforcement against displacement by formwork, construction, or concrete placement operations. Locate and support reinforcing by metal chairs, runners, bolsters, spacers and hangers, as required. Set wire ties so ends are directed into concrete, not toward exposed concrete surfaces. Maintain minimum cover to reinforcement.

D. Install welded wire fabric in lengths as long as practicable. Lap adjoining pieces at least one full mesh and lace splices with wire. Offset laps of adjoining widths to prevent continuous laps in either direction. Use of chairs is required. Welded wire fabric shall not be “pulled” to center of slab.

E. Install fabricated bar mats in lengths as long as practicable. Handle units to keep them flat and free of distortions. Straighten bends, kinks, and other irregularities or replace units as required before placement. Set mats for a minimum 2-inch overlap to adjacent mats.

3.4 JOINTS

A. General: Construct control (contraction) joints, construction, and isolation joints true to line with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to the centerline, unless indicated otherwise. When joining existing paving, place transverse joints to align with previously placed joints, unless indicated otherwise.

B. Control (Contraction) Joints: Control joints are grooved, formed, or sawed into sidewalks, driveways and concrete pavements so that cracking will occur in these joints randomly. If not specified on drawings, intervals shall be not greater than 10 feet or less than 5 feet. Construct control joints for a depth equal to at least 1/4 of the concrete thickness, as follows:

1. Tooled Joints: Form contraction joints in fresh concrete by grooving and finishing each edge of joint with a radiused jointer tool.

2. Sawed Joints: Form contraction joints with power saws equipped with shatterproof abrasive or diamond-rimmed blades. Cut 1/8-inch-wide joints into hardened concrete when cutting action will not tear, abrade, spawl or ot herwise dam age s urface and before development of

random contraction cracks.

3. Inserts: Form contraction joints by inserting premolded plastic, hardboard, or fiberboard strips into fresh concrete until top surface of strip is flush with paving surface. Radius each joint edge with a jointer tool. Carefully remove strips or caps of two-piece assemblies after concrete has hardened. Clean groove of loose debris.

C. Construction Joints: Set construction joints at side and end terminations of paving and at locations where paving operations are stopped for more than ½ hour, unless paving terminates at isolation joints.

1. Provide preformed galvanized steel or plastic keyway-section forms or bulkhead forms with keys, unless indicated otherwise. Embed keys at least 1-1/2 inches into concrete.

2. Continue reinforcement across construction joints unless indicated otherwise.

D. Expansion Joints: Form expansion joints of preformed joint filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, walks, other fixed objects, and where indicated.

1. Locate expansion joints at intervals of 30 feet, unless indicated otherwise or directed by County.

2. Extend joint fillers full width and depth of joint, not less than ½ inch or more than 1 inch below finished surface where joint sealant is indicated. Place top of joint filler flush with finished concrete surface when no joint sealant is required.

3. Furnish joint fillers in one-piece lengths for full width being placed wherever possible. Where more than one length is required, lace or clip joint filler sections together.

4. Protect top edge of joint filler during concrete placement with a metal, plastic, or other temporary preformed cap. Remove protective cap after concrete has been placed on both sides of joint.

E. Filler and Sealants: Submit specifications to Engineer for approval.

F. Install dowel bars and support assemblies at joints where indicated. Lubricate or asphalt-coat one half of dowel length to prevent concrete bonding to one side of joint.

3.5 CONCRETE PLACEMENT

A. Comply with requirements of FDOT Standard Specification, Sections 350-8

and 400-7 for placing concrete.

B. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place. No concrete will be placed on concrete which has hardened sufficiently to cause the formation of seams or planes of weakness. Deposit concrete as nearly as practical to its final location to avoid segregation. When concrete placing is interrupted for more than ½ hour, place a construction joint.

C. Use a bonding agent at locations where fresh concrete is placed against hardened or partially hardened concrete surfaces.

D. Consolidate concrete by mechanical vibrating equipment supplemented by hand-spading, rodding, floating, or tamping. Use equipment and procedures to consolidate concrete complying with FDOT Standard Specification, Section 350-9.

E. Screed paved surfaces with a straightedge and strike off. Use bull floats or darbies to form a smooth surface plane before excess moisture or bleed water appears on the surface. Do not further disturb concrete surfaces prior to beginning finishing operations.

F. Place concrete in two operations; strike off initial pour for entire width of placement and to the required depth below finish surface. Lay welded wire fabric or fabricated bar mats immediately in final position. Place top layer of concrete, strike off, and screed. Remove and replace portions of bottom layer of concrete that have been placed more than 15 minutes without being covered by top layer or use bonding agent if acceptable to County.

G. Curbs and Gutters: Shall be constructed in accordance with FDOT Specs. When automatic machine placement is used for curb and gutter placement, submit revised mix design and laboratory test results that meet or exceed requirements. Produce curbs and gutters to required cross section, lines, grades, finish, and jointing as specified for formed concrete. If results are not acceptable, remove and replace with formed concrete.

H. Slip-Form Pavers: When automatic machine placement is used for paving, submit revised mix design and laboratory test results that meet or exceed requirements. Produce paving to required thickness, lines, grades, finish, and jointing as required for formed paving. Compact subgrade of sufficient width to prevent displacement of paver machine during operations.

I. When adjoining pavement lanes are placed in separate pours, do not operate equipment on concrete until pavement has attained 85 percent of its 28-day compressive strength, or sufficient strength to carry loads without damage or injury. Maturity Method Testing, as outlined in FDOT Standard Specification, Section 353-10.2, should be used to determine

concrete strength.

J. Cold-Weather Placement: Comply with provisions of FDOT Standard Specification, Sections 346-7.4 and 400-7.1.1. Protect concrete work from physical damage or reduced strength that could be caused by frost, freezing actions, or low temperatures.

K. Hot-Weather Placement: Place concrete complying with FDOT Standard Specification, Sections 346-7.5 and 400-7.1.2, and as specified when hot weather conditions exist.

3.6 CONCRETE FINISHING

A. Float Finish: Begin floating when bleed-water sheen has disappeared and the concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats or by hand -floating if area is small or inaccessible to power units. Finish surfaces to true planes within a tolerance of 1/8 inch in 10 feet as determined by a 10-foot-long straight-edge placed anywhere on the surface in any direction. Cut down high spots and fill low spots. Refloat surface immediately to a uniform granular texture.

1. Medium-to-Fine-Textured Broom Finish: Draw a soft bristle broom across concrete surface perpendicular to line of traffic to provide a uniform fine line texture finish.

2. Tine Finishes: Apply to curb cut ramps and other areas as noted on the drawings. Finish shall be applied by an approved hand method and shall consist of transverse grooves which are 0.03 to 0.12 inch in width and 0.10 to 0.15 inch in depth, spaced at approximately ½ inch center to center.

B. Final Tooling: Tool edges of paving, gutters, curbs, and joints formed in fresh concrete with a jointing tool to the following radius. Repeat tooling of edges and joints after applying surface finishes. Eliminate tool marks on concrete surfaces. Radius: ½ inch.

3.7 CONCRETE PROTECTION AND CURING

General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures. Comply with the recommendations of FDOT Standard Specification, Sections 350-11 and 925.

3.8 QUALITY CONTROL TESTING

A. A qualified, accredited testing and inspection laboratory, under the direction of a Professional Engineer, licensed in the State of Florida, shall sample materials, perform tests, and submit test reports during concrete placement as follows:

1. Sampling Fresh Concrete: ASTM C172, except modified for slump to comply with ASTM C94. All concrete should be sampled by ACI certified technicians.

    a. Slump: ASTM C143; one test at point of placement for each compressive-strength test but no less than one test for each day's pour of each type of concrete. Additional tests will be required when concrete consistency changes.

    b. Air Content: ASTM C231, pressure method; one test for each compressive-strength test but no less than one test for each day's pour of each type of air-entrained concrete.

    c. Concrete Temperature: ASTM C1064; one test hourly when air temperature is 40 deg F (4 deg C) and below and when 80 deg F (27 deg C) and above, and one test for each set of compressive-strength specimens.

    d. Compression Test Specimens: ASTM C31; one set of four standard cylinders for each compressive- strength test, unless directed otherwise. Mold and store cylinders for laboratory-cured test specimens except when field-cured test specimens are required.

    e. Compressive-Strength Tests: ASTM C39; one set for each day's pour of each concrete class, plus one set for each additional 50 cu. yd. Test one specimen at 7 days, two specimens at 28 days, and retain one specimen in reserve for earlier or later testing if required. Class I Concrete NS compression test specimens cylinders are not required, except as directed by County.

    f. Contractor shall repair the area to the satisfaction of the Engineer where material was removed for testing purposes. Should any work or materials fail to meet the requirements set forth in the plans and specifications, contractor shall pay for retesting of same.

2. Basis for acceptance of concrete will be per FDOT Standard Specification, Sections 346-8 through 346-11.

B. Test results will be reported in writing to the County, within 24 hours of testing. Reports of compressive strength tests shall contain the Project identification name and number, date and location of concrete placement, name of concrete testing laboratory, concrete type and class, design compressive strength at 28 days, concrete mix proportions and materials, compressive breaking strength, and type of break for both 7-day and 28-day tests.

C. Nondestructive Testing: Non-destructive test methods may be used with approval of the Engineer, but shall not be used as the sole basis for acceptance or rejection.

D. Additional Tests: The testing laboratory will make additional tests of the concrete when test results indicate slump, air entrainment, concrete strengths, or other requirements have not been met, as directed by Engineer. Testing laboratory may conduct tests to determine adequacy of concrete by cored cylinders complying with ASTM C 42, or by other methods as directed.

3.9 REPAIRS AND PROTECTION

A. Remove and replace concrete work that is broken, damaged, or defective, or does not meet the requirements of this Section.

B. Drill test cores where directed by the County when necessary to determine magnitude of cracks or defective areas. Fill drilled core holes in satisfactory concrete areas with Portland cement concrete bonded to paving with epoxy adhesive.

C. Protect concrete from damage. Exclude traffic from concrete pavement for at least 14 days after placement. When construction traffic is permitted, maintain concrete as clean as possible by removing surface stains and spillage of materials as they occur.

D. Maintain concrete work free of stains, discoloration, dirt, and other foreign material. Sweep concrete paving not more than 2 days prior to date scheduled for Substantial Completion inspections.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the plan quantity, in square yards, of Plain Cement Concrete Pavement, Reinforced Cement Concrete Pavement, square yards of sidewalk, and linear feet of curb and/or gutter.

4.2 JOINTS AND CRACKS

The Contractor shall include the cost for Cleaning and Sealing Joints in the cost of the newly constructed pavement for: (1) transverse and longitudinal joint construction for new pavement; and (2) abutting joints between existing pavement and new pavement.

For replacing joint seals and sealing random cracks in existing Portland cement concrete pavement, the quantity to be paid for will be as specified below:

A. The length of pavement joint that has been satisfactorily cleaned and sealed in existing Portland cement concrete pav ement, as determined by field measurement along the joints, will be paid for at the Contract unit price per foot for Cleaning and Resealing Joints.

B. The length of random cracks in existing Portland cement concrete pavement that have been satisfactorily cut, cleaned, and sealed, as determined by field measurement along the joints, will be paid for at the Contract unit price per foot for Cleaning and Sealing Random Cracks.

4.3 BASIS OF PAYMENT

Prices and payment will be full compensation for all work specified in this Section, including any preparation of the subgrade not included in the work to be paid for under another Contract item; all transverse and longitudinal joint construction, including tie-bars and dowel bars; the furnishing of test specimens; repair of core holes; and all incidentals necessary to complete the work.

END OF SECTION 03300

SECTION 03310 – TIED CONCRETE BLOCK

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specification Sections, apply to this Section.

1.2 SCOPE OF WORK

A. Scope of Work The Contractor shall furnish all labor, materials, equipment, and incidentals required and perform all operations in connection with the installation of tied concrete erosion control mats in accordance with the lines, grades, design and di mensions shown on the Contract Drawings and as specified herein.

1.3 SUBMITTALS

A. The Contractor shall submit to the Engineer all manufacturer's performance research results and calculations in support of the tied concrete block mat system. Calculations and shop drawings shall be provided by the manufacturer for the means and methods necessary to place the mats in accordance with PART 2.A and in accordance with the plans. The shop drawings shall indicate the size and location of mats and placement along with providing the details and how the mats are tied together and are to be moved.

B. The Contractor shall furnish to the Engineer all manufacturers' specifications, literature, shop drawings for the installation of the mats, and any recommendations, if applicable, that are specifically related to this project.

PART 2 – PRODUCTS

2.1 PROJECTS

A. General Tied concrete block mats shall be manufactured or field fabricated from individual concrete blocks tied together with a high strength geogrid.

Each block shall be tapered, beveled and interlocked. Each block shall incorporate interlocking surfaces or connections that prevent lateral displacement of the blocks within the mats when they are lifted for placement.

B. Tied Concrete Block Mat

1. Scope: This specification covers concrete blocks for erosion control

mats used for stabilizing channels.

2. Materials Cementitious Materials - Materials shall conform to the following applicable ASTM specifications:

   a. Portland Cements -Specification C 150, for Portland Cement.
   b. Blended Cements -Specification C 595, for Blended Hydraulic Cements.
   c. Hydrated Lime Types -Specification C 207, for Hydrated Lime Types.
   d. Pozzolans -Specification C 618, for Fly Ash and Raw or Calcined Natural Pozzolans for use in Portland Cement Concrete.

   Aggregates shall conform to the following ASTM specifications, except that grading requirements shall not necessarily apply: Normal Weight -Specification C 33, for Concrete Aggregates.

3. Physical Requirements Durability. The manufacturer shall satisfy the purchaser by proven field performance that the concrete units have adequate durability even if they are to be subjected to a freeze-thaw environment.

TABLE 1. PHYSICAL REQUIREMENTS			
Compressive Strength Net Area Min. psi (mPa)		Water Absorption Max., lb/ft3 (kg/m3)	
Avg. of 3 units	Individual Unit	Avg. of 3 units	Individual Unit
4,000 (27.6)	3,500 (24.)	10 (160)	12 (192)

4. Visual Inspection: All units shall be sound and free of defects that would interfere with the proper placing of the unit or impair the strength or permanence of the construction. Surface cracks incidental to the usual methods of manufacture, or surface chipping resulting from customary methods of handling in shipment and delivery, shall not be deemed grounds for rejection.

5. Sampling and Testing: The purchaser or his authorized representative shall inspect the units upon delivery. Units missing more than 4 blocks per 80 square feet section shall be deemed grounds for rejection.

6. The tied concrete block mats shall have one or more of the following nominal characteristics: Minimum open area of 10%

   The tied concrete block mat shall exhibit resistance to mild concentrations of acids, alkalis, and solvents.

   Polypropylene Geogrid Revetment mat shall be constructed of high tenacity, low elongating, and continuous filament polypropylene fibers.

Interlocking geogrid shall have the following physical characteristics:
Mass/Unit Area: ASTM D-5261 7.0 oz/yd2 240 g/m2
Aperture Size: Measured 1.6 x 1.6 inch 40 x 40 mm
Wide Width Tensile Strength:
Machine Direction (MD) ASTM D-6637 2,055 lb/ft 30 kN/m Cross
Machine Direction (CMD) ASTM D-6637 2,055 lb/ft 30 kN/m
Elongation at Break: ASTM D-6637 6% 6%
Tensile Strength @ 2% :
Machine Direction (MD) ASTM D-6637 822 lb/ft 12 kN/m
Cross Machine Direction (CMD) ASTM D-6637 822 lb/ft 12 kN/m
Tensile Strength @ 5% :
Machine Direction (MD) ASTM D-6637 1,640 lb/ft 24 kN/m Cross
Machine Direction (CMD) ASTM D-6637 1,640 lb/ft 24 kN/m
Tensile Modulus @ 2%:
Machine Direction (MD) ASTM D-6637 41,100 lb/ft 600 kN/m Cross
Machine Direction (CMD) ASTM D-6637 41,100 lb/ft 600 kN/m
Tensile Modulus @ 5%:
Machine Direction (MD) ASTM D-6637 32,900 lb/ft 480 kN/m Cross
Machine Direction (CMD) ASTM D-6637 32,900 lb/ft 480 kN/m

NOTE: Polypropylene geogrid shall be determined by the manufacturer.

Tied concrete block mats are packaged in rolls. These are packaged with high strength lifting straps for moving material into place with an excavator.

PART 3 – CONSTRUCTION

A. Prior to placing the tied concrete block mats, prepare the sub grade as detailed on the plans. All subgrade surfaces prepared for placement of mats shall be smooth and free of all rocks, stones, sticks, roots, other protrusions, or debris of any kind.

B. The prepared surface shall provide a firm unyielding foundation for the mats with no sharp or abrupt changes or breaks in the grade.

C. Apply seed directly to the prepared soil prior to installation of the Tied Concrete Block Mat. Use seed per project specifications.

D. Install mats to the line and grade shown on the plans and according to the manufacturer's installation guidelines.

E. The manufacturer will provide technical assistance during the slope preparation and installation of the tied concrete block mats as needed.

C. Clean forms after each use and coat with form release agent as required ensuring separation from concrete without damage.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The completed work as described shall be measured and paid for at the contract unit price per square yard.

4.2 BASIS OF PAYMENT

Prices and payment for Tied Concrete Block Material will be full compensation for all work (including but not limited to labor, equipment, and materials) specified in this Section, including any preparation of the Subgrade not included in the work to be paid for under another Contract item, and all incidentals necessary to complete the work.

END OF SECTION 03310

SECTION 03350 – PERVIOUS CONCRETE PAVING

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. The work to be completed under this contract includes the furnishing of all labor, materials and equipment necessary for the construction of the dual-use system in accordance with the plans and these specifications.

1.2 REFERENCES

A. Environmental Protection Agency (EPA)
   1. Green Infrastructure - Statement of Intent

B. National Institute of Building Sciences (NIBS)

   6. ASTM D3385 "Test Method for Infiltration Rate of Soils Using Double-Ring Infiltrometer"

E. National Ready Mixed Concrete Association (NRMCA)
   1. Pervious Concrete Contractor Certification Manual

1.3 QUALITY ASSURANCE

A. Prior to the award of contract, the proposed contractor must submit evidence of having the appropriate tools, and experience, to accomplish the work. Experience will be based on at least one person, in charge of the crew, being NRMCA Certified as a Pervious Concrete "Craftsman",

plus two crew members being Certified by the NRMCA as Pervious Concrete Technicians.

1.4 SPECIAL EQUIPMENT

A. Contractor must show evidence of having the specialized equipment required for the installation of Pervious Concrete Pavements. Pervious Concrete is finished and jointed using three classes of specialized rollers. These rollers consist of form-to-form, steel-pipe rollers which are 8-inches to 12-inches in diameter, and smaller cross-rollers, with tapered edges. A special flanged-roller is used to place control joints in the pervious concrete before the pavement is covered to moist-cure.

B. Project may require the use of vibratory screeds. These screeds must provide an adjustment for the frequency of vibration.

C. Project may require the use of a power-sprayer with a "fogging-nozzle" attachment.

1.5 SUBMITTALS

A. All submittals shall be approved prior to construction.

B. Plans shall be submitted to the County Engineer's Representative, by the Contractor indicating:

1. Proposed Start Date, sequence of construction, and time of completion, for the scope of work.

2. Proposed locations for all construction-joints, and control joints, in the pavement.

3. Sections and Details showing depths, and types of materials, for all locations in the scope of work.

C. A one-square-foot section of the proposed filter fabric shall be submitted to the County Engineer's Representative. Information regarding the properties of the material, manufacturer, suggested method of placement and guarantees shall also be submitted with the fabric.

D. A one-quarter-cubic-foot sample of the proposed washed, crushed-stone/gravel-fill for the infiltration basin (pavement base) shall be submitted to the County Engineer's Representative.

E. A Mix-Design, showing the weights of all materials, for the proposed pervious concrete pavement shall be submitted to the County Engineer's Representative. It shall be the Contractor's responsibility to become familiar with the properties, and workability, of the proposed mix-design.

F. Evidence of qualifications of the Contractor, as per the "Quality Assurance" section shall be submitted to the County Engineer's Representative.

1.6 TEST PANELS

A test panel shall be constructed by the Contractor, and approved by the County Engineer's Representative. The test panel shall become the "standard" by which the Contractor's work is judged for completion of work and payment schedules.

A. The test panel shall be constructed in accordance with the plans and specifications, and shall be a minimum of 225 square-feet. Construction of the test panel shall be accomplished by the same crew, equipment and materials as submitted for approval. The depth of all materials shall be the same as shown on the plans.

B. The cost of constructing, and removing (if necessary), the test panel shall be included in the contract bid.

PART 2 - MATERIALS

2.1 Filter Fabric: The filter fabric shall be a non-woven geotextile fabric suitable for the application, and installed as per the manufacturer's directions.

2.2 Infiltration Basin Gravel-Fill: The Infiltration Basin shall be filled with clean (washed) gravel or crushed stone. The stone material shall be a single-size, and have a diameter of from 3/4-inch to 2-inches, and shall comply with ASTM C33. The total depth of the gravel-fill shall be indicated on the plans.

2.3 Pervious Concrete: The permeable pavement section shall consist of portland-cement based pervious concrete. Pervious concrete has no ACI or ASTM Specifications. It is therefore recommended that the guidelines for Ready-Mixed Concrete, ASTM C94, be used as a general guideline for the manufacturing and delivery of the pervious concrete. It is the responsibility of the Contractor to work with the local Ready-Mix suppliers to finalize a mix-design that will be acceptable for this project. If the mix-design is new to the local supplier, then at least three trial-batches shall be made before the decision is made to use that particular mix design. Both the Contractor, and the Supplier, must agree on any particular mix design before it is submitted to the County Engineer's Representative.

PART 3 - EXECUTION

3.1 Subgrade: The subgrade is defined as the native soil, or finished grade, of any cut-and-fill operation that may be required to bring the soil elevation to proper grade. The top of subgrade is also the bottom of the clean-gravel. The final grade of the top of subgrade shall be <u>flat</u> (no slope), and at the proper elevation to allow for the thickness of the layer of gravel and the pervious concrete pavement. Final compaction of the subgrade shall take into effect the type of soil and permeability requirements, and requirements for pavement support. Compaction should be uniform, and not greater than 95%

3.2 Filter Fabric: The filter fabric shall be placed on top of the final grade by the Contractor following the Manufacturer's directions.

3.3 Infiltration Basin Gravel-Fill: The placement of the gravel should be done to

minimize destruction of the filter fabric, and over-compaction of the subgrade. Compaction of the gravel is unnecessary.

3.4 Pervious Concrete: The Pervious Concrete, including any formwork requirements, placement, jointing and curing, shall be done in accordance with the NRMCA "Pervious Concrete Contractor Certification" guidelines. It is the responsibility of the Contractor to become familiar with the NRMCA document to gain the knowledge required to properly place and finish pervious concrete pavements. The inclusion of the requirements, as set forth in the NRMCA document, becomes an integral part of these specifications.

3.5 Testing: The testing requirements for pervious concrete are generally for permeability and durability. Testing of the fresh pervious concrete is a visual test. The Contractor must have the basic knowledge of what constitutes a proper mix by a visual inspection when the material arrives on the jobsite. Traditional tests for fresh concrete, such as slump and air content, and making cylinders & beams for strength tests are not required for pervious concrete.

3.6 Maintenance: Maintenance of the paving during construction is the Contractor's responsibility. The pervious concrete pavement should be checked periodically for buildup of trash and debris. Trash and debris should be removed from the pavement by hard-vacuum systems as required. The pavement should be pressure-washed with the residue being removed by wet-vacuuming within seven (7) days of requesting final acceptance by the County Engineer.

END OF SECTION 03350

SECTION 04000 - TRAFFIC CONTROL SIGNS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the work orders, plan sheets, or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document:

1. USDOT, Federal Highway Administration, *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration, *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition.*

3. Florida Department of Transportation, *Design Standards for Design, Construction, Maintenance and Utility Operations on the State Highway System*, *Latest Edition*.

4. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, section 700, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication and installation of standard and special traffic control signs (warning, regulatory, and guide). The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the plans and in these specifications.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County for prior approval.

PART 3 - EXECUTION

3.1 UTILITY SPOTS

All street name signs shall be fabricated and installed in accordance with the plans and related documents. Contractor shall contact Sunshine State One Call of Florida (811 or 800-432-4770) at least 48 hours prior to digging or driving posts.

3.2 SIGN INSTALLATION

A. Signs shall be placed at the locations illustrated and/or specified in the plans or related documents. The soil around the post shall be solidly tamped so that the sign will stand vertically.

B. If a sign cannot be placed where indicated due to a conflict, the Contractor shall immediately notify the County for an alternate location.

C. The date when each sign is installed shall be marked in permanent ink on the rear side of each sign.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantity to be paid for will be plan quantity, unless otherwise provided.

4.2 BASIS OF PAYMENT

Price and payment will constitute full compensation for all work specified in this section. Payment for all items relating to traffic control signs will be included in the lump sum Maintenance of Traffic pay item.

END OF SECTION 04000

SECTION 04020 - POST MOUNTED STREET NAME SIGNS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document:

1. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition*.

3. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction, Section 700*, *Latest Edition*.

4. FDOT *Design Standards for design, Construction, Maintenance, and utility operations on the State Highway System*, *Latest Edition*.

5. Escambia County *Standard Details for Street Name Signs, Latest Edition.*

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication and installation of post mounted street name signs as shown or noted on plans. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the work order and in these specifications.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense, shall, if requested by the County, furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County Contract Administrator for prior approval.

Sign-blades reflective sheeting and posts shall conform to the details for street name signs.

PART 3 - EXECUTION

3.1 UTILITY SPOTS

All street name signs shall be fabricated and installed in accordance with the plans and related documents. Contractor shall contact Sunshine State One Call of Florida (811 or 800-432-4770) at least 48 hours prior to digging or driving posts.

3.2 SIGN LAYOUT AND LEGEND

Letter shape and width of stroke shall comply with FHWA & MUTCD standards. For street name signs, lettering, border and blade dimensions shall be consistent with the County's standard detail for street name signs.

3.3 SIGN INSTALLATION

A. Signs shall be placed at the typical locations shown in the plans. The soil around the post shall be solidly tamped so that the sign will stand vertically.

B. If a sign cannot be placed where indicated due to a conflict, the Contractor shall immediately notify the County for an alternate location.

C. The Contractor shall submit a *Fabricate, Install, and Removal Daily Report Sheet* (Exhibit D) of each sign installation placed for inspection by the County. Contractor shall repair or replace signs deemed unacceptable by the County, at no expense to the County.

3.4 REMOVAL OF SIGNS AND MARKERS

A. Existing metal street name signs and painted concrete street name markers specified for removal shall be removed from the site, delivered, and unloaded, as directed by the County.

B. Holes created by the removal of the signs and markers shall be filled with clean soil, which shall be firmly hand tamped to match the level of the surrounding ground.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be:

1. The num ber and type of street name sign assemblies plus the number and type of auxiliary signs of each designated class complete.

2. The number of existing metal street name signs and concrete markers removed, relocated, modified, and placed on specified supports, of each designated class of assembly complete.

3. The number of each existing sign panel removed, complete.

4.2 BASIS OF PAYMENT

Price and payment will be f ull compensation for furnishing and i nstallation of all materials necessary to complete the signs in accordance with the details shown in the plans; including sign panels complete with sheeting, painting, and message; sign posts and supports, footings, excavation, etc.; and all other work specified in this Section, including all incidentals necessary for the complete item.

END OF SECTION 04020

SECTION 04030 – SPAN MOUNTED STREET NAME SIGNS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document.

1. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition*.

3. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 700, Latest Edition*.

4. FDOT *Design Standards for Design, Construction, Maintenance, and Utility Operations on the State Highway System*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication of span mounted signs. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the work order and in these specifications.

PART 2 – PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County Contract, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements except as defined herein. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County for prior approval.

2.2 SIGN BLADES

1. 0.125 gauge, 5052-H38 domestic aluminum alloy, 18" in height by various lengths.

2. 0.50' radius rounded corners free of sharp edges.

3. Color and corrosion resistance per Alodine 1200 F treatment or approved equivalent.

2.3 SIGN FACING

The sign facing and legend may be fabricated by any of the following methods and materials:

A. Green retro-reflectivity ink silk-screened onto white Diamond grade material.

B. Green electronic cuttable prismatic sheeting film over white Diamond grade material.

PART 3 – EXECUTION

3.1 GENERAL

All street name signs shall be fabricated in accordance with the plans and related documents.

3.2 SIGN LAYOUT & LEGEND

Letter shape and width of stroke shall comply with FHWA & MUTCD standards except as modified below for street names:

A. SIGN LAYOUT

1. Left and right margins shall be at least 2 inches.

2. Border width shall be 1" with 2" radius at all corners.

3. Arrows shall be 4" in height and 8" in length and placed 2" above the lower border.

4. Prefixes and suffixes shall be placed 3" below the upper border.

5. Sign lengths shall be in 6” increments as determined by the legend. Minimum length shall be 48 inches.

B. LETTERS

1. Letters shall be FHWA Series “C”, upper and lower case. However, Clearview font should be available upon request.

2. Street Names: Initial letters shall be 12” upper case and subsequent letters shall be 9” lower case. Names shall be centered between the upper and lower borders.

3. Prefixes and suffixes: Initial letters shall be 4” upper case and subsequent letters shall be 3” lower case.

4. Suffixes “nd”,"rd”. “st”, and “th” associated with numbered street names shall be 4” in height and positioned in the upper portion of the primary street name field.

3.3 SIGN INSTALLATION

A. Signs shall be placed at the typical locations shown in the plans.

B. If a sign cannot be placed where indicated on the plans due to a conflict, the Contractor shall immediately notify the County for an alternate location.

3.4 REMOVAL OF SIGNS

Existing metal street name signs specified for removal shall be removed from the site, delivered, and unloaded, as directed by the Engineer.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the number of square- feet of overhead signs span wire mounted, complete.

4.2 BASIS OF PAYMENT

Price and payment will be full compensation for furnishing and installation of all materials necessary to complete the signs in accordance with the details shown in the plans; including sign panels complete with sheeting, painting, and message; and all other work specified in this Section, including all incidentals necessary for the complete item.

END OF SECTION 04030

SECTION 04040 – PAVEMENT MARKINGS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following documents:

1. Florida Department of Transportation *Roadway and Traffic Design Standards*, Indices 17344 through 17359, *Latest Edition*.

2. Florida Department of Transportation *Standard Specifications for Road and Bridge Construction*, Sections 701, 705, 706, 710, 711, 970, 971, and 993, *Latest Edition*.

3. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the installation and removal of temporary and permanent pavement markings, textured pavement, reflective markers, galvanized posts, flex posts, delineators, wheel stops, and audible and vibratory pavement markings. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the plans and in these specifications. Pavement marking notes on plan sheets shall take precedence over and modify conflicting Technical Specifications.

PART 2 – PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

2.2 TEMPORARY PAVEMENT MARKINGS

Materials for temporary pavement marking shall meet all requirements of FDOT Specs, Section 710, *Latest Edition.*

2.3 PERMANENT PAVEMENT MARKINGS

Materials for permanent pavement markings shall meet all requirements of FDOT Specs, Section 711, *Latest Edition*.

2.4 REFLECTIVE PAVEMENT MARKERS

Materials for reflective pavement markers shall meet all requirements of FDOT Specifications, Sections 706, *Latest Edition*.

2.5 OBJECT MARKERS AND DELINEATORS

Materials for object markers shall meet all requirements of FDOT Specifications, Sections 705, *Latest Edition*.

2.6 AUDIBLE AND VIBRATORY PAVEMENT MARKINGS

Materials for audible and vibratory pavement markings shall meet all requirements of FDOT Specifications, Sections 701, *Latest Edition*.

PART 3 – EXECUTION

3.1 GENERAL

All pavement markings shall be applied in accordance with FDOT requirements.

3.2 TEMPORARY PAVEMENT MARKINGS

Temporary pavement markings shall be installed at the end of each day on new pavement surfaces and shall be maintained until permanent markings are installed.

3.3 PERMANENT PAVEMENT MARKINGS

Permanent pavement markings, including painted stripes, thermoplastic stripes, and reflective pavement markers, shall be installed as shown in the plans. Materials and installation shall conform to applicable standards in the documents referenced in Section 1.1. Installation of permanent markings on all final asphaltic concrete surfaces shall not be accomplished prior to 14 calendar days, nor later than 30 calendar days, after placement of the final surfaces.

3.4 RETROREFLECTIVITY

The Contractor shall, within thirty days of completion, furnish retroreflectivity

readings certifying the materials meet all FDOT requirements as per Part I, 1.1.B.2, Sections 710 and 711.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The engineer or project manager may specify a lump sum or measurement of quantities.

The quantities to be paid for under this Section will be the length in feet or gross mile of Skip Traffic Stripes, the length in feet or gross mile of Solid Traffic Stripes, the number of directional arrows and pavement messages, painted, the area in square feet or of Reflective Paint (Island Nose), and the area in square feet or the length in feet to Remove Existing Markings. Measurement will be taken as the distance from the beginning of the first painted stripe to the end of the last painted stripe with proper deductions made for unpainted intervals will not be included in pay quantity.

4.2 BASIS OF PAYMENT

Prices and payment will be full compensation for all work specified in this Section, including, all cleaning and preparing of surfaces, furnishing all materials, application, curing and protection of all items, protection of traffic, furnishing of all tools, machines and equipment, and all incidentals necessary to complete the work. Final payment will be withheld until all deficiencies are corrected.

END OF SECTION - 04040

SECTION 04060 - MAINTENANCE OF TRAFFIC

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of the specifications, all materials and work shall conform to the applicable requirements in the following documents:

1. *Florida Department of Transportation Design Standards*, *Latest Edition*.

2. *Florida Department of Transportation Standard Specifications for Road and Bridge Construction*, Section 102, *Latest Edition*.

3. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*, Part 6 Temporary Traffic Controls.

4. *FDOT Minimum Specifications for Traffic control and Devices*, *Latest Edition*.

1.2 SUMMARY OF WORK

The work under this section includes the maintenance of traffic within the limits of the project for the duration of construction.

PART 2 – PRODUCTS - Not Used.

PART 3 - EXECUTION

3.1 RESPONSIBILITIES OF CONTRACTOR

A. Control and maintain traffic and provide for the safety of the work area in accordance with Maintenance of Traffic (MOT) Plan included in the contract documents. Contractor shall comply with all aspects of said plan. Conduct operations in a manner that will not interrupt pedestrian and vehicle traffic except as approved by the County Engineer/Traffic Division. Confine the work area to the smallest area practical to allow the maximum use of the street and sidewalk and to reduce any hazard to vehicles and pedestrians to a minimum.

B. Maintain access to properties that adjoin the work. Contact property owners

and assure that access is coordinated prior to commencing work that may block access.

C. Furnish all labor, materials, tools, supplies, equipment, and machinery needed to fully comply with the specifications described on the plan sheets and in this Section. At all times, the Contractor shall use workers and traffic control devices necessary to comply with all applicable provisions contained in the reference documents listed in Section 1.1.

D. The Contractor shall notify the agencies and media listed below in writing, 48 hours in advance, of any work within the road right-of-way that may interfere with vehicle and/or pedestrian traffic.

1. WCOA Radio – Tel: 478-6011; Fax: 478-3971

2. Pensacola News Journal Tel: 435-8500; Fax: 435-8633; Email: news@pensacolanewsjournal.com

3. Escambia County Emergency Management Tel: 471-6315; Fax: 471-6322; Email: bob_boschen@co.escambia.fl.us

4. Escambia County Engineering Tel: 595-3440

5. Escambia County Sheriff Tel: 436-9630; Fax: 436-9128; Email: traffic@escambiaso.com

6. Florida Highway Patrol Tel: 484-5000; Fax: 393-3405; Email: stevepreston@flhsmv.gov

7. Escambia County School District Tel: 469-5591; Fax: 469-5661; Email: transportation@escambia.k12.fl.us and rdoss@escambia.k12.fl.us

8. Escambia County Administration Tel: 595-4900; Fax: 595-4908; Email: Cheryl_Lively@co.escambia.fl.us

9. Escambia County Area Transit Tel: 595-3228; Fax: 595-3222; Email: Ted_Woolcock@co.escambia.fl.us

3.2 PENALTIES AND SUSPENSION OF WORK

The County may verbally direct the Contractor to immediately suspend work if appearance of violation of safety regulations is found. In such an event, Contractor shall immediately stop work and secure any potential hazards from the public until the potential violation is confirmed and/or corrected to satisfaction of the County. Law enforcement officers may be called to assist the County in suspending work if the Contractor is not responsive. Suspension of work for violation of safety

or additional payment.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Maintenance of Traffic: Where the plans require the use of trucks and truck mounted impact attenuators, these items will not be paid for separately but shall be included in the cost of Maintenance of Traffic. Only use those attenuators that have been tested by a facility approved by the Engineer and certified as meeting the requirements as specified in NCHRP 350 and that have been properly maintained.

B. Law Enforcement Services: The quantity to be paid for will be at the Contract unit price per hour for the actual number of officers on the project site. Payment will be made only for those off-duty law enforcement officers specified in the MOT and authorized by the County.

C. When the plans show more than one detour facility is included in the proposal, payment will be made under Maintenance of Traffic.

D. Materials for Driveway Maintenance: The quantity to be paid for will be, in square yards, of all materials authorized by the County, acceptably placed and maintained for driveway maintenance. The quantity will be determined by in place measurement.

4.2 BASIS OF PAYMENT

A. MAINTENANCE OF TRAFFIC (GENERAL WORK): Price and payment will be full compensation for all work and costs specified under this Section except as may be specifically covered for payment under other items.

B. LAW ENFORECEMENT: Prices and payment will be considered full compensation for the services of the off-duty law enforcement officer, including a marked law enforcement vehicle and all other direct and indirect costs.

C. SPECIAL DETOURS: Price and payment will be full compensation for providing all detour facilities shown on the plans and all costs incurred in carrying our all requirements of this Section for general maintenance of traffic within the limits of the detour, as shown on the plans.

END OF SECTION 04060

SECTION 04090 – CONSTRUCTION OF TRAFFIC SIGNALS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Unless otherwise specified by the County, or in other sections of this specification, all work shall conform with the applicable requirements in the following documents:

1. Florida Department of Transportation, *Design Standards for Design, Construction,* Maintenance and Utility Operations on the State Highway System, *Latest Edition*.

2. FDOT, *Standard Specifications for Road and Bridge Construction*, *Latest Edition*.

3. FDOT, *Minimum Specifications for Traffic Control Signals and Devices, Latest Edition.*

4. United States Department of Transportation (USDOT), Federal Highway Administration, *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Millennium Edition*.

5. *National Electric Code*, including latest revisions.

1.2 DESCRIPTION OF WORK

The work under this section involves the installation and modification of traffic signal equipment. Work will be initiated through the issuance of Work Orders that will identify a specific scope and location.

PART 2 - PRODUCTS

2.1 CONTRACTOR-FURNISHED PARTS AND EQUIPMENT

A. The Contractor shall furnish all transportation, plant, labor, materials, safety signs, supplies, equipment, and other facilities and things necessary to fully complete the work described in this specification.

B. The requirements and procedure described in Sections 603-2, 603-3, 603-5, 603-6, 603-7, and 603-8 of the FDOT *Standard Specifications for Road and Bridge Construction, Latest Edition* shall apply.

2.2 COUNTY-FURNISHED EQUIPMENT INSTALLED BY CONTRACTOR

Where the plans include installation of County-furnished equipment, the County will turn over such equipment to the Contractor when the construction progress allows or as designated in the plans. The County will bear the costs of correcting any defects in the equipment found by the Contractor. The Contractor will maintain the equipment in proper operational condition after pick-up at no cost to the County until either final acceptance or the equipment is returned to the County.

2.3 REMOVED PARTS AND EQUIPMENT

A. Equipment that is removed and suitable for reuse shall be delivered to the County as indicated on the construction plans. Such equipment shall be tagged as to the location from which it was removed.

B. Parts and equipment that are removed and not suitable for reuse, but have salvage value, shall be delivered to the Road Department facility, 601 North Hwy 297A, Cantonment.

C. Parts and equipment that are removed, not suitable for reuse, and without salvage value, shall be properly disposed by the Contractor, at his expense.

PART 3 - EXECUTION

3.1 QUALIFICATIONS

A. The Contractor shall have a sufficient amount of prior satisfactory experience in the construction of all traffic signal components including closed-loop systems and video detection systems.

B. All persons operating and maintaining signal equipment shall be fully trained and qualified. The Contractor shall have all work performed under the direct, on-site, supervision of a person certified at the “Traffic Signal, Level II” level, or higher, by the International Municipal Signal Association (I.M.S.A.). The Contractor shall furnish a copy of the certificate issued by the I.M.S.A. for each technician to the Contract Manager before execution of the contract.

3.2 OPERATIONS

A. The Contractor shall replace entire sidewalk slabs and driveway slabs, at the Contractor’s expense, if they are damaged.

B. All public land corners and monuments encountered shall be protected by the Contractor. Corners and monuments which conflict with the work and in danger of disturbance shall be properly referenced by a Florida registered surveyor prior to beginning work at the site. The Contractor

shall assume all costs associated with restoration of corners and monuments.

C. The Contractor shall coordinate and perform service transfers and adjustments with Gulf Power Company.

D. The Contractor shall remove all surplus materials from the right-of-way within 24 hours.

3.3 REPORTS

A. The Contractor shall test each new ground rod and ground rod assembly in accordance with FDOT standards. Record test results and certify accuracy on a Traffic Signal Resistance Data Sheet (re: Appendix "A"). Furnish the original certified data sheet to the Contract Manager.

B. Contractor shall test each new loop assembly in accordance with FDOT standards. Record test results and certify accuracy on a Traffic Signal Resistance Data Sheet (re: Appendix "A"). Furnish the original certified data sheet to the Contract Manager.

3.4 COMPLETION TIME

The Contractor shall complete work according to the schedule specified in the Work Order. Typically, completion time will be specified according to the representative schedule provided below.

A. Construct school zone flashing beacon assembly (pedestal-mount): complete within 60 days.

B. Construct new multi-phase traffic signal: Order equipment from vendors within 10 business days from date of Work Order. Complete installation within 30 days upon receipt of all equipment from vendors.

C. Install signal head and/or cable to create a left-turn phase: complete within 30 days.

D. Install new controller assembly: Order equipment from vendor within 5 business days from date of Work Order. Complete installation within 30 days upon receipt from vendor.

E. Install pedestrian detector station with or without signals: complete within 30 days.

F. Install new loop assembly: complete within 10 business days.

3.5 INSPECTION AND ACCEPTANCE OF WORK

Acceptance procedures described in Sections 611-2, 611-3, and 611-4 of the FDOT *Standard Specifications for Road and Bridge Construction, Latest Edition*, shall apply unless otherwise specified in the Work Order.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

Measurement and payment of all items will be made in accordance with the current Construction and Response Maintenance Contract on file with the Escambia County Office of Purchasing.

RE: Notice of Final Agency Action – Determination of Qualification
General Environmental Resource Permit
Project Number: GEN-033-284800-1
Permit Name: Motley Court Gully Improvements

Dear D. Joy Jones:

The District has received your notice of intent to use a General Environmental Resource Permit. Based upon the submitted information, the proposed activity qualifies for a General Environmental Resource Permit pursuant to Chapter 62-330, Florida Administrative Code (F.A.C.). The proposed activity is subject to the general conditions in Rule 62-330.405, F.A.C. (see attached Exhibit A) and the specific conditions (see attached Exhibit B) if any. Deviations from these conditions may subject you to enforcement action and possible penalties. You are responsible for conducting construction in a manner that satisfies all criteria.

Please be advised that the District has not published a notice in the newspaper advising the public that this activity has qualified for the use of a General Environmental Resource Permit. Publication, using the District form, notifies the public of their right to challenge the issuance of this permit. If proper notice is given by publication, third parties have a 21-day time limit to file a petition opposing the issuance of the permit. If you do not publish, a party's right to challenge the issuance of the permit extends for an indefinite period of time. If you wish to have certainty that the period for filing such a challenge is closed, then you may publish, at your own expense, such a notice in a newspaper of general circulation. A copy of the form of the notice and a list of newspapers of general circulation is attached for your information. If you do publish a notice, please submit a copy of the published notice to the District for our records.

This verification of qualification to use a General Environmental Resource Permit does not eliminate the need for obtaining all necessary permits or approvals from other agencies.

NORTHWEST FLORIDA WATER MANAGEMENT DISTRICT
GENERAL ENVIRONMENTAL RESOURCE PERMIT

PERMIT NO: GEN-033-284800-1 **DATE ISSUED:** December 11, 2018
PROJECT NAME: Motley Court Gully Improvements

A PERMIT AUTHORIZING:
The use of Section 62-330.451, F.A.C. – General Permit to Counties, Municipalities, and other Agencies to Conduct Stormwater Retrofit Activities. The retrofit improvements will serve an existing outfall that is experiencing severe erosion beginning at the north end of Motley Court extending north approximately 1,700 feet towards Clear Creek in Escambia County. The retrofit activities will include the construction, operation, and maintenance of three dry detention with filtration (bottom sand filters) ponds and associated conveyance pipes. The improvements appear to provide a net benefit to the overall project site by preserving the natural runoff patterns for the project area while providing a permanent erosion control solution for the receiving waters. The proposed project appears to meet the criteria for the requested General Permit. The proposed improvements are in accordance with the approved plans prepared by Escambia County Public Works.

Escambia County

ISSUED TO:
Escambia County
3363 W. Park Place
Pensacola, FL 32505

Permittee agrees to hold and save the Northwest Florida Water Management District and its successors harmless from any and all damages, claims, or liabilities which may arise from permit issuance. Said application, including all plans and specifications attached thereto, is by reference made a part hereof.

The use of a General Environmental Resource permit does not convey to permittee any property rights or any rights or privileges other than those specified herein, nor relieve the permittee from complying with any law, regulation or requirement affecting the rights of other bodies or agencies. All structures and works installed by permittee hereunder shall remain the property of the permittee.

This permit may be revoked, modified or transferred at any time pursuant to the appropriate provisions of Chapter 373, Florida Statutes:

Activities conducted under this permit are subject to the following conditions:

See conditions on attached “Exhibit A”, dated December 11, 2018

AUTHORIZED BY: Northwest Florida Water Management District
Division of Resource Regulation

By: _____
Andrew Joslyn
ERP Bureau Chief

"EXHIBIT A"
CONDITIONS FOR ISSUANCE OF PERMIT NUMBER GEN-033-284800-1
Motley Court Gully Improvements
DATED December 11, 2018

1. The general permit is valid only for the specific activity indicated. Any deviation from the specified activity and the conditions for undertaking that activity shall constitute a violation of the permit and may subject the permittee to enforcement action and revocation of the permit under Chapter 373, F.S.

2. This general permit does not eliminate the necessity to obtain any required federal, state, local and special district authorizations prior to the start of any construction, alteration, operation, maintenance, removal or abandonment authorized by this permit.

3. This general permit does not convey to the permittee or create in the permittee any property right, or any interest in real property, nor does it authorize any entrance upon or activities on property which is not owned or controlled by the permittee, or convey any rights or privileges other than those specified in the general permit.

4. The general permit does not relieve the permittee from liability and penalties when the permitted activity causes harm or injury to: human health or welfare; animal, plant or aquatic life; or property. It does not allow the permittee to cause pollution that violates state water quality standards.

5. Section 253.77, F.S., provides that a person may not commence any excavation, construction, or other activity involving the use of state-owned or other lands of the state, the title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund without obtaining the required consent, lease, easement, or other form of authorization authorizing the proposed use. Therefore, the permittee is responsible for obtaining any necessary authorizations from the Board of Trustees prior to commencing activity on state-owned lands.

6. The authorization to conduct activities under a general permit may be modified, suspended or revoked in accordance with Chapter 120, F.S., and Section 373.429, F.S.

7. This permit shall not be transferred to a third party except pursuant to Rule 62-330.340, F.A.C. The permittee transferring the general permit shall remain liable for any corrective actions that may be required as a result of any permit violations prior to sale, conveyance, or other transfer of ownership or control of the permitted project, activity, or the real property at which the permitted project or activity is located.

8. Upon reasonable notice to the permittee, Agency staff with proper identification shall have permission to enter, inspect, sample and test the permitted system to ensure conformity with the plans and specifications approved by the permit.

9. The permittee shall maintain any permitted project or activity in accordance with the plans submitted to the Agency and authorized in this general permit.

10. A permitee's right to conduct a specific activity under this general permit is authorized for a duration of five years.

11. Activities shall be conducted in a manner that does not cause or contribute to violations of state water quality standards. Performance-based erosion and sediment control best management practices shall be implemented and maintained immediately prior to, during, and after construction as needed to stabilize all disturbed areas, including other measures

specified in the permit to prevent adverse impacts to the water resources and adjacent lands. Erosion and sediment control measures shall be installed and maintained in accordance with the *State of Florida Erosion and Sediment Control Designer and Reviewer Manual (Florida Department of Environmental Protection and Florida Department of Transportation June 2007)*, available at www.dep.state.fl.us/water/wetlands/docs/erp/FLErosionSedimentManual_6_07.pdf, and the *Florida Stormwater Erosion and Sedimentation Control Inspector's Manual (Florida Department of Environmental Protection, Nonpoint Source Management Section, Tallahassee, Florida, July 2008)*, available at www.dep.state.fl.us/water/nonpoint/docs/erosion/erosion-inspectors-manual.pdf.

12. Unless otherwise specified in the general permit, temporary vehicular access within wetlands during construction shall be performed using vehicles generating minimum ground pressure to minimize rutting and other environmental impacts. Within forested wetlands, the permittee shall choose alignments that minimize the destruction of mature wetland trees to the greatest extent practicable. When needed to prevent rutting or soil compaction, access vehicles shall be operated on wooden, composite, metal, or other non-earthen construction mats. In all cases, access in wetlands shall comply with the following:
    a. Access within forested wetlands shall not include the cutting or clearing of any native wetland tree having a diameter 4 inches or greater at breast height;
    b. The maximum width of the construction access area shall be limited to 15 feet;
    c. All mats shall be removed within 72 hours after the work commences; and
    d. Areas disturbed for access shall be restored to natural grades immediately after the maintenance or repair is completed.

13. Barges or other work vessels used to conduct in-water activities shall be operated in a manner that prevents unauthorized dredging, water quality violations, and damage to submerged aquatic communities.

14. The construction, alteration, or use of the authorized project shall not adversely impede navigation or create a navigational hazard in the water body.

15. Except where specifically authorized in a general permit, activities must not:
    a. Impound or obstruct existing water flow, cause adverse impacts to existing surface water storage and conveyance capabilities, or otherwise cause adverse water quantity or flooding impacts to receiving water and adjacent lands;
    b. Cause an adverse impact to the maintenance of surface or ground water levels or surface water flows established pursuant to Section 373.042, F.S., or a Works of the District established pursuant to Section 373.086, F.S.; or

16. If any prehistoric or historic artifacts, such as pottery or ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial or American settlement are encountered at any time within the project site area, work involving subsurface disturbance in the immediate vicinity of such discoveries shall cease. The permittee or other designee shall contact the Florida Department of State, Division of Historical Resources, Compliance and Review Section, at (850) 245-6333 or (800) 847-7278, as well as the appropriate permitting agency office. Such subsurface work shall not resume without verbal or written authorization from the Division of Historical Resources. If unmarked human remains are encountered, all work shall stop immediately and notification shall be provided in accordance with Section 872.05, F.S.

17. The activity must be capable, based on generally accepted engineering and scientific principles, of being performed and of functioning as proposed, and must comply with any applicable District special basin and geographic area criteria.

18. The permittee shall comply with the following when performing work within waters accessible to federally- or state-listed aquatic species, such as manatees, marine turtles, smalltooth sawfish, and Gulf sturgeon:
    a. All vessels associated with the project shall operate at “Idle Speed/No Wake” at all times while in the work area and where the draft of the vessels provides less than a four-foot clearance from the bottom. All vessels will follow routes of deep water whenever possible.
    b. All deployed siltation or turbidity barriers shall be properly secured, monitored, and maintained to prevent entanglement or entrapment of listed species.
    c. All in-water activities, including vessel operation, must be shutdown if a listed species comes within 50 feet of the work area. Activities shall not resume until the animal(s) has moved beyond a 50-foot radius of the in-water work, or until 30 minutes elapses since the last sighting within 50 feet. Animals must not be herded away or harassed into leaving. All on-site project personnel are responsible for observing water-related activities for the presence of listed species.
    d. Any listed species that is killed or injured by work associated with activities performed shall be reported immediately to the Florida Fish and Wildlife Conservation Commission (FWC) Hotline at 1(888)404-3922 and ImperiledSpecies@myFWC.com.
    e. Whenever there is a spill or frac-out of drilling fluid into waters accessible to the above species during a directional drilling operation, the FWC shall be notified at imperiledspecies@myfwc.com with details of the event within 24 hours following detection of the spill or frac-out.

19. The permittee shall hold and save the Agency harmless from any and all damages, claims, or liabilities which may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment or use of any activity authorized by the general permit.

20. The permittee shall immediately notify the Agency in writing of any submitted information that is discovered to be inaccurate.

NOTICE OF RIGHTS

Northwest Florida Water Management District
152 Water Management Drive, Havana, FL 32333-4712
(850) 539-5999 Fax (850) 539-2693
www.nwfwater.com

The following information addresses procedures to be followed if you desire an administrative hearing or other review of agency action.

PETITION FOR FORMAL ADMINISTRATIVE PROCEEDINGS

Any person whose substantial interests are or may be affected by the action described in the enclosed Notice of Agency Action, may petition for an administrative hearing in accordance with the requirements of section 28-106.201, Florida Administrative Code, or may choose to pursue mediation as an alternative remedy under section 120.573, Florida Statutes, before the deadline for filing a petition. Pursuit of mediation will not adversely affect the right to administrative proceedings in the event mediation does not result in a settlement. Petitions for an administrative hearing must be filed with the Agency Clerk of the Northwest Florida Water Management District, 81 Water Management Drive, Havana, Florida 32333-9700 by the deadline specified in the attached cover letter. Failure to file a petition within this time period shall constitute a waiver of any rights such person may have to request an administrative determination (hearing) under section 120.57, Florida Statutes, concerning the subject permit application. Petitions which are not filed in accordance with the above provisions are subject to dismissal.

DISTRICT COURT OF APPEAL

A party who is adversely affected by final agency action on the permit application and who has exhausted available administrative remedies is entitled to judicial review in the District Court of Appeal pursuant to section 120.68, Florida Statutes. Review under section 120.68, Florida Statutes, is initiated by filing a Notice of Appeal in the appropriate District Court of Appeal in accordance with Florida Rule of Appellate Procedure 9.110.

SECTION 28-106.201, FLORIDA ADMINISTRATIVE CODE, INITIATION OF PROCEEDINGS

(1) Unless otherwise provided by statute, and except for agency enforcement and disciplinary actions that shall be initiated under Rule 28-106.2015, F.A.C., initiation of proceedings shall be made by written petition to the agency responsible for rendering final agency action. The term "petition" includes any document that requests an evidentiary proceeding and asserts the existence of a disputed issue of material fact. Each petition shall be legible and on 8 1/2 by 11 inch white paper. Unless printed, the impression shall be on one side of the paper only and lines shall be double-spaced.

(2) All petitions filed under these rules shall contain:

(a) The name and address of each agency affected and each agency's file or identification number, if known;

(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;

(c) A statement of when and how the petitioner received notice of the agency decision;

(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;

(e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

(3) Upon receipt of a petition involving disputed issues of material fact, the agency shall grant or deny the petition, and if granted shall, unless otherwise provided by law, refer the matter to the Division of Administrative Hearings with a request that an administrative law judge be assigned to conduct the hearing. The request shall be accompanied by a copy of the petition and a copy of the notice of agency action.

Rulemaking Authority 14.202, 120.54(3), (5) FS. Law Implemented 120.54(3) FS. History–New 4-1-97, Amended 9-17-98, 1-15-07, 2-5-13.

NOTICING PUBLICATION INFORMATION

The District's action regarding the issuance or denial of a permit, a petition or qualification for an exemption only becomes closed to future legal challenges from members of the public ("third parties"), if 1) "third parties" have been properly notified of the District's action regarding the permit or exemption, and 2) no "third party" objects to the District's action within a specific period of time following the notification.

Notification of "third parties" is provided through publication of certain information in a newspaper of general circulation in the county where the proposed activities are to occur. Publication of notice informs "third parties" of their right to have a 21-day time limit in which to file a petition opposing the District's action. However, if no notice to "third parties" is published, there is no time limit to a party's right to challenge the District's action. The District has not published a notice to "third parties" that it has taken final action on your application. If you want to ensure that the period of time in which a petition opposing the District's action regarding your application is limited to the time frame state above, you may publish, at your own expense, a notice in a newspaper of general circulation. A copy of the Notice of Agency Action the District uses for publication is attached. You may use this format or create your own, as long as the essential information is included.

If you do decide to publish a Notice of Final Agency Action, please provide the District a copy of the Proof of Publication when you receive it. That will provide us notice that action on this permit application is closed after the 21 days following publication.

Notice of Final Agency Action Taken by the
Northwest Florida Water Management District

Notice is given that Environmental Resource permit number GEN-033-284800-1 was issued on December 11, 2018 to D. Joy Jones
Escambia County for the construction of a new surface water management system designed as a retrofit improvement to provide additional treatment to Motley Court with an emphasis to reduce gully erosion in central Escambia County. The retrofit activities will consist of the construction, operation, and maintenance of three dry detention with filtration (bottom sand filters) ponds with the assistance of underdrains and associated conveyance pipes. The existing drainage flows northward from the Motley Court Subdivision eventually to an eroded gully and discharges to Clear Creek. The improvements will provide a net benefit to the surrounding area by preserving the natural runoff patterns for the project area while providing a permanent erosion control solution for the receiving waters of Clear Creek. The retrofit activities appear to meet or exceed the requirements of Section 62-330.451, F.A.C. General Permit to Counties, Municipalities, and other Agencies to Conduct Stormwater Retrofit Activities. The project is located at Northernmost end of Motley Court extending northward towards 921 Crooked Oaks Drive, Escambia County.

The file containing the application for this permit is available for inspection Monday through Friday (except for legal holidays), 8:00 a.m. to 5:00 p.m. at the Northwest Florida Water Management District's ERP Office, 180 E. Redstone Avenue, Crestview, FL 32539

A person whose substantial interests are affected by the District permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57 F.S., or may choose to pursue mediation as an alternative remedy under Section 120.573, Florida Statutes, and Rules 28-106.111 and 28-106.401-404, Florida Administrative Code. Petitions must comply with the requirements of Florida Administrative Code, Chapter 28-106 and be filed with (received by) the District Clerk located at District Headquarters, 81 Water Management Drive, Havana, FL 32333-4712. Petitions for administrative hearing on the above application must be filed within twenty-one (21) days of publication of this notice or within twenty-six (26) days of the District depositing notice of this intent in the mail for those persons to whom the District mails actual notice. Failure to file a petition within this time period shall constitute a waiver of any right(s) such person(s) may have to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., concerning the subject permit. Petitions which are not filed in accordance with the above provisions are subject to dismissal.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the District's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the District on the application have the right to petition to become a party to the proceedings, in accordance with the requirements set forth above.

BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA

EASEMENT

Easement Number 33235

THIS EASEMENT, made and entered into this _____ day of _____ 20__, between the **BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA**, acting pursuant to its authority set forth in Section 253.03, Florida Statutes, hereinafter referred to as "GRANTOR", and **ESCAMBIA COUNTY, FLORIDA**, a political subdivision of the State of Florida, acting by and through its duly authorized Board of County Commissioners, hereinafter referred to as "GRANTEE".

WHEREAS, GRANTOR is the owner of the hereinafter described real property, which is managed by the University of West Florida under Lease Number 2722 (“managing agency”); and

WHEREAS, GRANTEE desires an easement across the hereinafter described real property for erosion control and stormwater improvements; and

WHEREAS, the managing agency has agreed to the proposed use of the land subject to this easement.

NOW THEREFORE, GRANTOR, for and in consideration of mutual covenants and agreements hereinafter contained, has granted, and by these presents does grant unto GRANTEE, a non-exclusive easement across the following described real property in Escambia County, Florida, to-wit:

(See Exhibit "A" Attached)(the “Easement Area”)

subject to the following terms and conditions:

1. **DELEGATIONS OF AUTHORITY**: GRANTOR'S responsibilities and obligations herein shall be exercised by the Division of State Lands, State of Florida Department of Environmental Protection.

2. **TERM**: The term of this easement shall be for a period of fifty (50) years commencing on _____ and ending on _____, unless sooner terminated pursuant to the provisions of this easement.

3. **USE OF PROPERTY AND UNDUE WASTE**: This easement shall be limited to erosion control and stormwater improvements, upon and across the Easement Area during the term of this easement. This easement shall be non-exclusive. GRANTOR retains the right to engage in any activities on, over, below or across the Easement Area which do not unreasonably interfere with GRANTEE'S exercise of this easement and further retains the right to grant compatible uses to third parties during the term of this easement.

GRANTEE shall dispose of, to the satisfaction of GRANTOR, all brush and refuse resulting from the clearing of the Easement Area for the uses authorized hereunder. If timber is removed in connection with clearing this easement, the net proceeds derived from the sale of such timber shall accrue to GRANTOR. GRANTEE shall take all reasonable precautions to control soil erosion and to prevent any other degradation of the Easement Area and adjacent land during the term of this easement. GRANTEE shall not remove water from any source on this easement including, but not limited to, a water course, reservoir, spring, or well, without the prior written approval of GRANTOR. GRANTEE shall clear, remove and pick up all debris including, but not limited to, containers, papers, discarded tools and trash foreign to the work locations and dispose of the same in a satisfactory manner as to leave the work locations clean and free of any such debris. GRANTEE, its agents, successors, or assigns, shall not dispose of any contaminants including, but not limited to, hazardous or toxic substances, chemicals or other agents produced or used in GRANTEE'S operations on this easement or on any adjacent state land or in any manner not permitted by law. GRANTEE shall be liable for all costs associated with any cleanup of the Easement Area and adjacent land which is a result of GRANTEE'S operations and use of the Easement Area.

Upon termination or expiration of this easement GRANTEE shall restore the Easement Area to substantially the same condition it was upon the Effective Date. GRANTEE agrees that upon termination or expiration of this easement all authorization granted hereunder shall cease and terminate. If the Easement Area is under lease to another agency, GRANTEE shall obtain the consent of such agency prior to engaging in any use of the Easement Area.

4. **ASSIGNMENT**: This easement shall not be assigned in whole or in part without the prior written consent of GRANTOR. Any assignment made either in whole or in part without the prior written consent of GRANTOR shall be void and without legal effect.

5. **RIGHT OF INSPECTION**: GRANTOR or its duly authorized agents, representatives or employees shall have the right at any and all times to inspect this easement and the works of GRANTEE in any matter pertaining to this easement.

6. **NON-DISCRIMINATION**: GRANTEE shall not discriminate against any individual because of that individual's race, color, religion, sex, national origin, age, handicaps, or marital status with respect to any activity occurring within this easement or upon lands adjacent to and used as an adjunct of this easement.

7. **LIABILITY**: GRANTOR does not warrant or represent that Easement Area is safe or suitable for the purpose for which GRANTEE is permitted to use it, and GRANTEE and its agents, representatives, employees, and independent contractors assume all risks in its use. GRANTEE hereby covenants and agrees to investigate all claims of every nature at its own expense and to indemnify, protect, defend, save and hold harmless GRANTOR and the State of Florida, its officers, agents and employees from any and all damages, claims, costs, expense, including attorney's fees, demands, lawsuits, causes of action or liability of any kind or nature arising out of all personal injury or damages attributable to the negligent acts or omissions of GRANTEE and its agents, officers, and employees. GRANTEE shall contact GRANTOR regarding the legal action deemed appropriate to remedy such damage or claims. The GRANTEE shall maintain a program of insurance covering its liabilities as prescribed by Section 768.28, F.S. Nothing herein shall be construed as a waiver of sovereign immunity enjoyed by any party hereto, as provided in Section 768.28, Florida Statutes, as amended from time to time, or any other law providing limitations on claims, nor shall it be construed as a waiver of any defense the parties may have under such statute, nor as consent to be sued by third parties. In the event GRANTEE subcontracts any part or all of the work performed in the Easement Area, the GRANTEE shall require each and every subcontractor to identify the GRANTOR as an additional insured on all insurance policies required by the GRANTEE. Any contract awarded by GRANTEE for work in the Easement Area shall include a provision whereby the GRANTEE's subcontractor agrees to indemnify, pay on behalf, and hold the GRANTOR harmless for all injuries and damages arising in connection with the GRANTEE's subcontract.

8. **COMPLIANCE WITH LAWS**: GRANTEE agrees that this easement is contingent upon and subject to GRANTEE obtaining all applicable permits and complying with all applicable permits, regulations, ordinances, rules, and laws of the State of Florida or the United States or of any political subdivision or agency of either.

9. **ARCHAEOLOGICAL AND HISTORIC SITES**: Execution of this easement in no way affects any of the parties' obligations pursuant to Chapter 267, Florida Statutes. The collection of artifacts or the disturbance of archaeological and historic sites on state-owned lands is prohibited unless prior authorization has been obtained from the State of Florida Department of State, Division of Historical Resources.

10. **PROHIBITIONS AGAINST LIENS OR OTHER ENCUMBRANCES**: Fee title to the lands underlying this easement is held by GRANTOR. GRANTEE shall not do or permit anything to be done which purports to create a lien or encumbrance of any nature against the real property of GRANTOR including, but not limited to, mortgages or construction liens against the real property described in Exhibit "A" or against any interest of GRANTOR therein.

11. **PARTIAL INVALIDITY**: If any term, covenant, condition or provision of this easement shall be ruled by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

12. **SOVEREIGNTY SUBMERGED LANDS**: This easement does not authorize the use of any lands located waterward of the mean or ordinary high water line of any lake, river, stream, creek, bay, estuary, or other water body or the waters or the air space there above.

13. **ENTIRE UNDERSTANDING**: This easement sets forth the entire understanding between the parties and shall only be amended with the prior written approval of GRANTOR.

14. **TIME**: Time is expressly declared to be of the essence of this easement.

15. **RIGHT OF AUDIT**: GRANTEE shall make available to GRANTOR all financial and other records relating to this easement and GRANTOR shall have the right to audit such records at any reasonable time during the term of this easement. This right shall be continuous until this easement expires or is terminated. This easement may be terminated by GRANTOR should GRANTEE fail to allow public access to all documents, papers, letters or other materials made or received in conjunction with this easement, pursuant to Chapter 119, Florida Statutes.

16. **PAYMENT OF TAXES AND ASSESSMENTS**: GRANTEE shall assume full responsibility for and shall pay all liabilities that accrue to the Easement Area or to the improvements thereon including any and all drainage and special assessments or taxes of every kind and all mechanic's or materialman's liens which may be hereafter lawfully assessed and levied against this easement.

17. **AUTOMATIC REVERSION**: This easement is subject to an automatic termination and reversion to GRANTOR when, in the opinion of GRANTOR, this easement is not used for the purposes outlined herein, and any costs or expenses arising out of the implementation of this clause shall be borne completely, wholly and entirely by GRANTEE, including attorneys' fees.

18. **RECORDING OF EASEMENT**: GRANTEE, at its own expense, shall record this fully executed easement in its entirety in the public records of the county within which the easement site is located within fourteen days after receipt, and shall provide to the GRANTOR within ten days following the recordation a copy of the recorded easement in its entirety which

contains the O.R. Book and Pages at which the easement is recorded. Failure to comply with this paragraph shall constitute grounds for immediate termination of this easement agreement at the option of the GRANTOR.

19. **GOVERNING LAW**: This easement shall be governed by and interpreted according to the laws of the State of Florida.

20. **SECTION CAPTIONS**: Articles, subsections and other captions contained in this easement are for reference purposes only and are in no way intended to describe, interpret, define or limit the scope, extent or intent of this easement or any provisions thereof.

LEGAL DESCRIPTION (AS WRITTEN)

A PORTION OF THOSE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4558, PAGE 1460 OF THE PUBLIC RECORDS OF ESCAMBIA COUNTY, FLORIDA, LYING IN SECTION 23, TOWNSHIP 1 NORTH, RANGE 30 WEST, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHEAST CORNER OF LOT 32, BLOCK C, BOULDER CREEK FIRST ADDITION AS RECORDED IN PLAT BOOK 14, PAGE 6 OF THE PUBLIC RECORDS OF ESCAMBIA COUNTY, FLORIDA, MARKED BY A 4 INCH SQUARE CONCRETE MONUMENT.

FROM SAID POINT OF COMMENCEMENT, RUN ALONG A SOUTHERLY EXTENSION OF THE EAST LINE OF SAID LOT 32, SOUTH 03 DEGREES 53 MINUTES 37 SECONDS WEST, A DISTANCE OF 30.00 FEET TO THE NORTH LINE OF THE SOUTH HALF OF SAID SECTION;

THENCE LEAVING SAID SOUTHERLY EXTENSION, ALONG SAID NORTH LINE, RUN SOUTH 87 DEGREES 08 MINUTES 21 SECONDS EAST, A DISTANCE OF 45.01 FEET TO THE EAST LINE OF A 30 FOOT RIGHT OF WAY (UNOPENED AND UNMAINTAINED) AND THE POINT OF BEGINNING;

FROM SAID POINT OF BEGINNING, LEAVING SAID NORTH LINE, ALONG SAID EAST LINE, RUN NORTH 03 DEGREES 53 MINUTES 37 SECONDS EAST, A DISTANCE OF 1,308.58 FEET TO THE SOUTHWEST CORNER OF LOT 35, ACCORDING THE SUBDIVISION PLAT THEREOF RECORDED IN DEED BOOK 102, PAGE 111 OF SAID PUBLIC RECORDS AND THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 23;

THENCE LEAVING SAID EAST LINE, ALONG SAID NORTH LINE, RUN SOUTH 87 DEGREES 07 MINUTES 38 SECONDS EAST, A DISTANCE OF 135.02 FEET;

THENCE LEAVING SAID NORTH LINE, RUN SOUTH 03 DEGREES 53 MINUTES 37 SECONDS WEST, A DISTANCE OF 1,308.55 FEET TO THE NORTH LINE OF THE SOUTH 1/2 OF SAID SECTION;

THENCE ALONG SAID NORTH LINE, RUN NORTH 87 DEGREES 08 MINUTES 21 SECONDS WEST, A DISTANCE OF 135.02 FEET TO THE POINT OF BEGINNING, CONTAINING 4.055 ACRES, MORE OR LESS.

SUBJECT: Report of Geotechnical Exploration
Motley Court Gully Restoration
Escambia County, Florida
LMJ File #: 18-271

Dear Allen:

This letter forwards the results of our Geotechnical Exploration for the proposed **Motley Court Gully Restoration** project in Escambia County, Florida. The purpose of this exploration was to determine the general subsurface conditions at the boring locations and use this information to provide discussion and recommendations for the proposed gully restoration project. Our exploration consisted of five hand auger/probe borings, classification of the soil samples, laboratory testing of selected soil samples and analysis by our engineering staff.

Project and Site Description

The site is the existing gully beginning at the north end of Motley Court extending north approximately 1,700 feet towards the existing creek bed. The gully is washed out, heavily wooded, and overgrown with vegetation. Reportedly, the project is planned to include rebuilding the area the length of the gully to include stepped down sediment basins with control structures consisting of drawdown inlets and piping between the basins. Should this information change or be incorrect, the geotechnical engineer should be notified and changes to our recommendations may be needed.

Subsurface Exploration

To examine the subsurface conditions at the site, LMJ drilled five hand auger/probe borings to a depth of 10 feet below existing grades along the side of the gully. Each sample was removed from the auger sampler, classified in the field by the driller, and packaged for visual classification and laboratory testing by our engineering staff. A probe rod was used to roughly estimate the density of the soil at each boring location.

Subsurface Conditions

The boring locations are shown in the attached **Figure #1** and should be considered approximate. The borings were located in the field by measuring from existing survey markers along the edge of the existing gully. The subsurface conditions encountered in the borings are shown in the attached **Figure #2**. Boundaries between soil layers and soil depths should be considered approximate as the actual transition between soil layers may be gradual. A generalized summary of the conditions encountered in the borings is included below. For a detailed description of the conditions encountered in the borings, the reader is directed to **Figure #2**.

The borings generally encountered surficial brown silty sand underlain by layers of tan, brown, gray, orange, and white silty sand with layers of slightly silty sand, sand, clay, and some iron rock to the final boring depth of 10 feet. Boring A-3 was terminated at 7 feet due to iron rock. The soils were generally loose at the surface becoming medium dense and dense to the final boring depth. Borings A-1 and A-3 encountered very loose conditions beginning at 1-2 feet.

Groundwater was not encountered in most of the borings at the time of drilling. Boring A-3 encountered a perched groundwater level at 7 feet and boring A-5 encountered a possible perched groundwater level at 2.5 feet. Groundwater levels will vary with the amount of local rainfall, changes in site drainage characteristics, and may be different at other times.

Basis of Recommendations

Recommendations rendered herein are based on assumed and/or design information available at the time of this report, the subsurface conditions encountered in the test borings, commonly accepted Geotechnical Engineering principles and practices, and our experience with similar soil and groundwater conditions. Should final project design information differ from the design information used in this report, or should any soil conditions not discussed in this report be encountered during construction, our office should be notified and retained so that this report can be modified as needed.

Regardless of the care exercised in performing a Geotechnical Exploration, the possibility always exists that soil and/or groundwater conditions will differ from those encountered at the specific boring locations. In addition, construction operations may alter the soil conditions. Therefore, it is recommended that a representative from Larry M. Jacobs & Associates, Inc. (LMJ) be involved during the construction of this project.

General Comments

The soil conditions encountered in the borings are suitable for excavation and construction of the sediment basins if the recommendations in this report are followed. The borings generally encountered layers of silty sand with interbedded layers of clay, sand, slightly silty sand and iron rock. The main geotechnical concerns for this project are generally the moisture sensitive and wet soils with respect to compaction requirements, and the layers of iron rock and sand which could be a source of perched groundwater. The contractor should anticipate encountering areas of wet uncompactable soils, unsuitable layers of iron rock or clay, as well as perched groundwater conditions which could flow into excavations. Proposed pipes and inlet structures should be properly bedded on firm undisturbed suitable soils or compacted backfill material. Erosion control measures to protect exposed soils during and after construction should be implemented. The following sections provide recommendations and discussion of groundwater, existing moisture sensitive soil conditions, fill placement, and pipe and inlet bedding and backfill, and sediment basin berm construction.

Groundwater Discussion

Perched groundwater was encountered in two of the borings (A-3 and A-5) and should be anticipated throughout the project area. Perched groundwater could be present and flowing in sand seams, root holes, and on top of confining layers such as iron rock or hard pan type soils. Some ditching/drainage may be needed if perched water conditions are present at the time of construction.

Existing Moisture Sensitive Soil Conditions Discussion

The borings encountered silty sand and slightly clayey soils which are moisture sensitive and difficult to compact when wet. Laboratory tests showed some of the soil layers in the borings were wet or moist and likely above optimum moisture content. Existing soils planned for reuse on the project may require onsite or offsite drying in order to be reused as compacted fill or backfill. Construction traffic should be avoided where practical on wet subgrades as this can make pumping areas spread and worsen. We recommend obtaining unit rates for removal and replacement of uncompactable soils using imported fill and another rate for using onsite materials as backfill, and we recommend establishing a contingency budget for this purpose.

Fill Recommendations

Any imported fill for sediment basin berms and backfill for pipes and inlets should be silty sand (SM) free of significant organic content, debris or other deleterious materials. Suitable and compactible native soils that are free of significant organic content, roots, debris, and iron rock are also suitable as fill. Fill should be compacted to a minimum soil density of 95% of the Modified Proctor Test (ASTM D1557). Density tests are recommended for each 12-inch increment of fill or fraction thereof. Note that layers of iron rock and clay were encountered in the borings and were exposed along the existing gully. Iron rock and clay should not be reused as fill or backfill materials. Small layers of clay or gravel sized pieces of iron rock that is mixed into the existing silty sand is acceptable.

Pipe and Inlet Bedding and Backfill

The proposed inlets and piping can be placed on firm undisturbed soils where encountered or on compacted subgrade or gravel in loose or disturbed areas. We recommend that a representative from our office evaluate the pipe and inlet undisturbed subgrade areas by probing. Borings A-1 and A-3 encountered very loose conditions which may require compaction of the subgrade. Compaction of any loose or disturbed areas should be verified using in-place density testing. Where loose conditions are encountered, we recommend compacting the bottom of the excavation for a minimum depth of 12 inches to a minimum of 95% of the Modified Proctor Test (ASTM D1557) density using a jumping jack tamper. Root mass, stumps, or unsuitable soils and materials should be removed from below all pipes and structures.

If the soils at the bottom of pipe and inlet excavations and trenches are too wet to be compacted in place, they should be undercut for a minimum depth of 12 inches and backfilled with compactable fill as described in the previous section of this report. If seepage is present or if moisture is a concern, we recommend bedding pipes with 12 inches of crushed stone compacted until firm and non-yielding. Backfill along the sides and above pipes and inlets should be placed, compacted, and compaction verified as previously described. Backfill should be compacted to a minimum of 95% of the Modified Proctor Test (ASTM D1557) density in maximum 6-inch lifts using hand operated equipment under and around the proposed inlets, and piping and above the piping to final subgrade. We recommend installing utilities in sections that can be backfilled in a timely manner if inclement weather is anticipated, and utility trenches should not be left exposed to rainfall.

Earthwork Quality Control Testing

Compaction of general fill material should be tested at a minimum frequency of one test per 2,000 square feet on every 12-inch increment of fill placed. Compaction of backfill should be tested on every 12-inch increment at a minimum frequency of 1 test per 75 linear feet along the proposed pipes and every other lift for backfill around inlets. Compaction testing for pipes should be verified at the bottom of the utility excavation, at the springline of the pipe, and on each 12-inch increment of backfill over the pipe.

Sediment Basin Berm Construction Recommendations

Sediment basin berms can be constructed with suitable on-site soils consisting of slightly silty sand and silty sand. Basin berms should be constructed in benched lifts compacted to a minimum soil density of 95% of the Modified Proctor Test (ASTM D1557). Existing sand, if encountered, could be used in the berms if buried deep in the berm or mixed with a higher fines content silty sand. Large pieces of iron rock should not be used in the berm construction. Clean sand layers and/or iron rock placed in a berm could create a flowpath for water and cause the berm to fail.

Erosion of the berms is a concern and we recommend sodding the berm slopes with deeply rooted sod. Higher fines soils which are properly compacted have less erosion potential and should be used on the top of any berms to reduce the chance of berm failure if overtopped. We recommend typical design slopes for the berm construction for the soil types encountered in the borings to be a minimum of 3H:1V. Steeper slopes near 2H:1V, if required, could be allowed in areas that are not susceptible to erosion and can be well maintained with erosion control/sodding. Note that seepage through a slope could cause the slope to become unstable and cause failure of the slope. We do not recommend steeper slopes (2H:1V) for slopes into existing soils due to the possibility of seepage.

We hope that this letter provides sufficient information for your current requirements. If you have any questions or comments, please do not hesitate to call.

Sincerely,

LARRY M. JACOBS & ASSOCIATES, INC.

APPENDIX D

Armormax 75 HPTRM - Project-specific Details

January 16, 2019

RE: **Motley Court Gully Restoration**
High Performance Turf Reinforcement Mat (HPTRM)
And Geotextile

To Whom It May Concern,

We want to thank you for considering the use of Propex products and solutions for stabilization and erosion control on the above referenced project. We understand the project to include erosion protection of the canal banks. It is also understood that the canal banks have proposed side slopes at a gradient of approximately 4 Horizontal : 1 Vertical (4H:1V) or flatter.

We would like to submit the following information in order to utilize the *ARMORMAX® Engineered Earth Armoring Solutions™* to mitigate surficial erosion. *ARMORMAX 75* consists of *PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM)* secured permanently with *ARMORMAX Engineered Earth Anchors™ (EEA™). ARMORMAX Engineered Earth Anchors™ (EEA™)* are pre-assembled, which reduces installation time and costs.

We are suggesting the installation of *ARMORMAX 75* with 3 ft. long type B1 anchors at a horizontal spacing of 4 ft. and a vertical spacing of 5 ft. along with 2.0 ft. long securing pins at a horizontal spacing of 2 ft. and a vertical spacing of 2.5 ft. We also suggest using GEOTEX® 601 nonwoven geotextile to underlay the ARMORMAX 75 from the lower termination trench at the toe of the slope up to 1 ft. above the Normal Water Level (NWL). The nonwoven geotextile will assist with sediment control in areas where vegetation performance may be affected by fluctuating water levels.

ANTIOXIDANT PERFORMANCE

HPTRMs are very stable materials, but their susceptibility to UV degradation is dependent upon the type, quality, and amount of the Ultraviolet (UV) inhibitor utilized during manufacturing. HPTRMs are typically composed of polymer resin and an additive package. The additive package, such as Carbon Black or Hindered Amine Light Stabilizers (HALS), can be a combination of colorant and antioxidant that work in concert to protect the polymer against degradation. While UV radiation is the main source of degradation to the polymer, visible light and infrared (IR) light can degrade the colorant or antioxidant, causing the additive package to be ineffective and the polymer to degrade prematurely. The rate of degradation must be fully understood in order to have confidence in long term performance.

ASTM D-4355

The durability and long term performance of the HPTRM is tested per ASTM D-4355 in order to quantify the rate of degradation after an established amount of exposure. D-4355 utilizes a xenon arc in order to reproduce the entire spectrum of sunlight, from 250 nm to 800 nm including UV light, visible light, and IR light. Other test methods, such as ASTM D-7238, only reproduce UV light, from 295 to 400 nm. This results in the total radiation exposure for each test to be very different, with D-7238 only producing 68.3 W/m2 and D-4355 producing 517.8 W/m2. While D-7238 focuses the radiation on only the polymer, D-4355 exposes the entire material to radiation in order to simulate real world conditions.

By definition, an HPTRM is a synthetic textile utilized within the soil surface like a geotextile, however the function and required durability of an HPTRM is greatly different from that of a standard geotextile. Due to their lack of exposure, geotextiles only require a testing duration per ASTM D-4355 of 500 hours. HPTRMs, while intended to be vegetated, are also designed to be exposed. Whether seed or sod is used, no project can be guaranteed to maintain 100% vegetative coverage over the entire design life. It has also been found that even if the vegetative coverage is maintained, the thermal fluctuation in the HPTRM caused by regional temperature change can induce oxidation and reduce the durability of the material. Therefore, HPTRM designs should require more durability than standard geotextiles, having

Please note that the information presented herein is general information only. It is for conceptual use only and not intended to be used for construction. While every effort has been made to ensure its accuracy, this information should not be used for a specific application without independent professional examination and verification of its suitability, applicability, and accuracy. This engineering document is protected by the Copyright Act, 17 U.S.C. §101 et seq. and may be used ONLY with the express written permission of Propex in connection with Propex products. Any copying, distributing, and/or creation of a derivative work without permission of Propex is prohibited and is subject of actual damages, statutory damages and attorney's fees under the Copyright Act.

the test duration per ASTM D-4355 increased to a minimum of 3,000 hours and provided by a third party independent testing agency. ASTM D-4355 has been used by all of the permanent erosion control product manufacturers for over 20 years to specify the durability of HPTRMs and over 40 years to specify the durability of geotextiles.

FIELD PERFORMANCE

In addition to laboratory testing, field samples of Propex HPTRMs are evaluated in order to correlate results from ASTM D-4355 to real world exposure for a better understanding of the material's design life. In 2015, samples of *PYRAMAT 75* were taken from the Bell Road Channel in Scottsdale, Arizona to determine the retained tensile strength after 13 years of exposure. With minimal vegetation established, the majority of the HPTRM was exposed in a severe environment having the highest solar radiation in the continental United States of 21.70 MJ/m2-day. The results showed an average retained tensile strength of 79% when compared to independent third party test results. Using this field retained tensile strength and both our independent and internal test results for UV resistance we can begin to anticipate the functional longevity of *PYRAMAT 75* as shown in Figure 1.

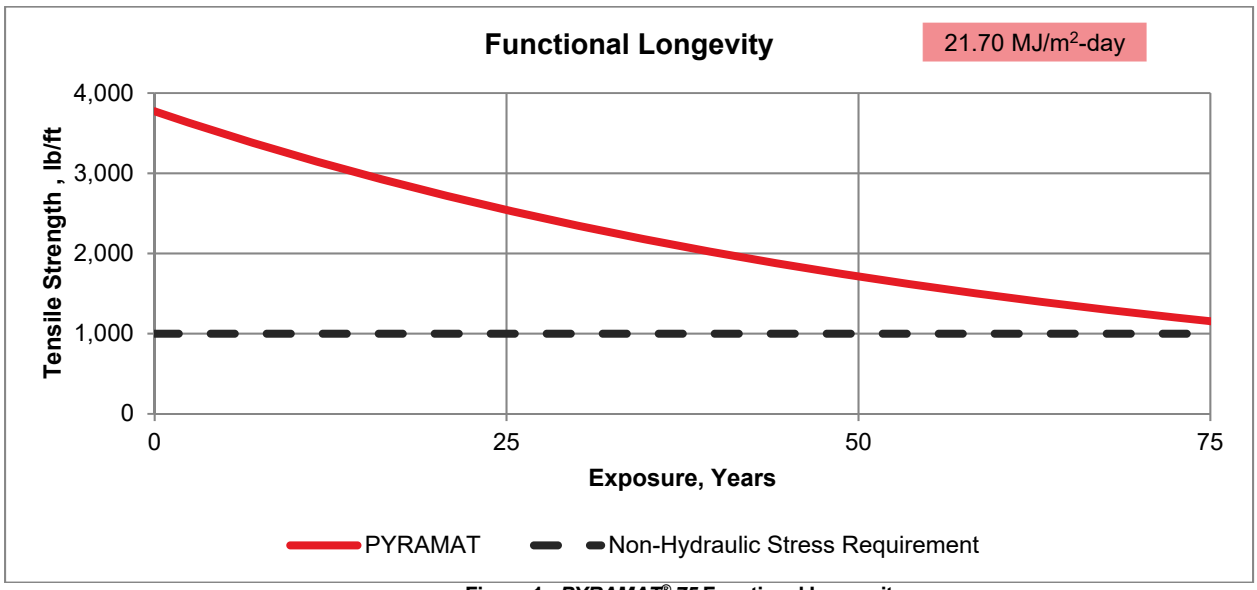

Figure 1 - *PYRAMAT® 75* Functional Longevity

MANUFACTURING QUALITY AND TESTING

Over the past 20 years, Propex has utilized a MQC program to establish internal testing frequencies, set property requirements, and rectify any deficient test results in order to successfully provide over 10 million square yards of HPTRM. Propex proudly manufactures PYRAMAT 75 in Ringgold, GA, controlling the entire process from pellets of resin to the packaging of the HPTRM. Propex HPTRMs are subjected to internal and external testing per ASTM D-4355 on an annual basis for 3,000 and 6,000 hours of exposure (Table 1).

Table 1 - Independent and Internal Test Results

Property	Test Method	*PYRAMAT®* 75
Tensile Strength (Published)	ASTM D-6818	4,000 x 3,000 lb/ft
UV Resistance @ 500 Hours	ASTM D-4355	>95%
UV Resistance @ 1,000 Hours	ASTM D-4355	>95%
UV Resistance @ 3,000 Hours	ASTM D-4355	>90%
UV Resistance @ 6,000 Hours	ASTM D-4355	>90%

PROVEN RESULTS

ARMORMAX has been in the marketplace for over a decade. *ARMORMAX* installations have totaled over 700,000 square yards on applications such as pond banks, levees, canal banks, slopes and channels. The Project Reference list can be found in the appendix of this submittal along with *ARMORMAX* case studies. *ARMORMAX* provides excellent UV Resistance that has been both field and laboratory tested. *ARMORMAX* is also cost-effective and easy to install.

ARMORMAX has been tested and proven to withstand Wave Overtopping Simulations. The Wave Overtopping Simulations, performed by Colorado State University (CSU) and overseen by the U.S. Army Corps of Engineers (USACE), replicated overtopping events corresponding with an incident significant wave height of 8.0 ft. impinging on a seaward-side levee with a slope gradient of 4H:1V. Average wave overtopping discharges of 2, 3, and 4 cfs/ft. were utilized in the testing to account for the change in levee freeboard.

Enclosed please find additional product information for *ARMORMAX 75* and *GEOTEX 601.* Should you have any questions or concerns regarding the analysis or the contents herein, please do not hesitate to contact me by phone at (423) 553-2199 or by email at matt.patton@propexglobal.com.

ARMORMAX®

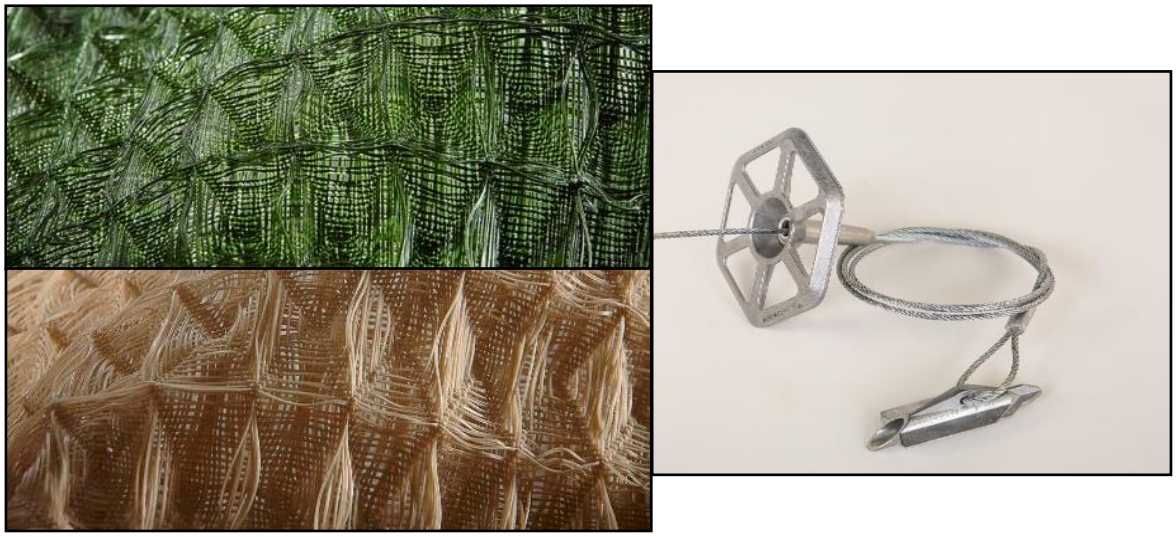
Engineered Earth Armoring System

Product Data

ARMORMAX® 75

For Erosicon Control

The ARMORMAX® 75 for Erosion Control is an Engineered Earth Armoring Solution™ used for permanent erosion protection in vegetated and unvegetated applications. It is composed of two components: PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM) and Type B1 Enginnered Earth Anchors. ARMORMAX® 75 is available in green or tan to provide for an aesthetically pleasing solution with proven performance. The anchor component is specifically designed and tested for compatibility and performance with PYRAMAT® 75 HPTRM to provide a system solution. Propex offers several anchor options to provide the ARMORMAX® 75 system designed for specific challenges and needs. The expected design life of ARMORMAX® 75 is up to 75 years because of its superior UV resistance, resistance to corrosion, strength, and durability in the most demanding environments.



The PYRAMAT® 75 HPTRM component of ARMORMAX® 75 values listed below[1] while manufactured at a Propex facility having achieved ISO 9001:2008 certification. Propex also performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP).

The Type B1 Anchor model is used for permanent erosion protection applications and has a working load of up to 500 lbs. The Type B1 Anchor consists of an aluminum anchor head, galvanized steel cable, aluminum ferrules, aluminum load-locking mechanism, and an aluminum top plate. The bullet nose design of the anchor head allows the anchor to penetrate PYRAMAT® 75 HPTRM resulting in minimal installation damage. The Type B1 Anchor is also designed with a recessed cavity so the top of the cable can be cut below the surface being protected.

NOTES:

1. The property values listed above are effective 01/01/2019 and are subject to change without notice. Values represent testing at time of manufacture.
2. Minimum average roll values (MARV) are calculated as the typical minus two standard deviations. Statistically, it yields a 97.7% degree of confidence that any samples taken from quality assurance testing will exceed the value reported.
3. Maximum Average Roll Value (MaxARV), calculated as the typical plus two standard deviations. Statistically, it yields a 97.7% degree of confidence that any sample taken during quality assurance testing will meet to the value reported.
4. Typical Value.
5. Maximum permissible velocity and shear stress has been obtained through vegetated testing programs featuring specific soil types, vegetation classes, flow conditions, and failure criteria. These conditions may not be relevant to every project nor are they replicated by other manufacturers. Please contact Propex for further information.
6. Calculated as typical values from large-scale flexible channel lining test programs with a flow depth of 6 to 12 inches.

GEOTEX® Nonwoven

Product Data

GEOTEX® 601

GEOTEX® 601 is a polypropylene, staple fiber, needle-punched nonwoven geotextile produced by Propex, and will meet the following Minimum Average Roll Values (MARV) when tested in accordance with the methods listed below. The fibers are needled to form a stable network that retains dimensional stability relative to each other. The geotextile is resistant to ultraviolet degradation and to biological and chemical environments normally found in soils.

GEOTEX® 601 conforms to the property values listed below[1]. Propex performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP). This product is NTPEP tested for AASHTO standards.

		MARV[2]	
PROPERTY	TEST METHOD	ENGLISH	METRIC

ARMORMAX® 75 ON A SLOPE FOR EROSION CONTROL (NON-STRUCTURAL APPLICATION) GENERAL INSTALLATION GUIDELINES

GENERAL NOTES

1. ARMORMAX® 75 is an engineered solution used for permanent erosion protection or surficial slope stability in vegetated and unvegetated applications. It is composed of two components: PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM) and Engineered Earth Anchors. ARMORMAX® 75 is available in green or tan to provide for an aesthetically pleasing solution with proven performance.
   - 1.1. PYRAMAT® 75 HPTRM is a three-dimensional, lofty, woven polypropylene geotextile that is available in green or tan which is specially designed for erosion control applications on steep slopes and vegetated waterways. The matrix is composed of polypropylene monofilament yarns featuring X3® technology woven into a uniform configuration of resilient pyramid-like projections. The material exhibits very high interlock and reinforcement capacity with both soil and root systems, demonstrates superior UV resistance, and enhances seedling emergence.
   - 1.2. The Type B1 Anchor model is used for permanent erosion protection applications and has a working load of up to 500 lbs. The Type B1 Anchor consists of an aluminum anchor head, galvanized steel cable, aluminum ferrules, aluminum load-locking mechanism, and an aluminum top plate. The bullet nose design of the anchor head allows the anchor to penetrate HPTRM resulting in minimal installation damage. The Type B1 Anchor is also designed with a recessed cavity so the top of the cable can be cut below the surface being protected.
2. The 12", 18", and 24" Securing Pins are composed of a wire, mushroomed at the top. A washer is then placed on the wire and the wire is crimped or swedged about 3-1/2" below the top so the washer will not slide off. The end of the wire is cut at a 45 degree angle for easy penetration of the soil. These Pins with washers conform to industry standards for erosion control pins with washers.
3. GEOTEX® 601 nonwoven geotextile should be used to underlay ARMORMAX® 75 to assist with sediment control from the termination trench at the toe of the slope up to 1' above the expected Normal Water Level (NWL).

Vegetation Establishment

4. Prepare seedbed by loosening 50 to 75 mm (2 to 3 in) of soil above final grade. Select and apply soil amendments and fertilizer to scarified surface prior to installation of the ARMORMAX® 75. A site specific soil test should be performed to help determine what soil amendments, such as lime and fertilizer, need to be incorporated into the soil to promote healthy vegetation.
5. Upon installation of the ARMORMAX® 75, sod should be placed atop the ARMORMAX® 75 using sod staples.
6. Irrigate as necessary to establish and maintain vegetation until 90% of vegetation has established and has reached a height of 2 inches. Frequent, light irrigation will need to be applied to seeded areas if natural rain events have not occurred within two weeks of seeding. When watering seeded areas, use a fine spray to prevent erosion of seeds or soil. Do not over irrigate.

BEFORE INSTALLATION BEGINS

7. Coordinate with a Propex Representative: A pre-construction meeting is suggested with the construction team and a representative from Propex. This meeting should be scheduled by the contractor with at least a two week notice.
8. Gather the Tools Needed: Tools that you will need to install ARMORMAX® 75 include a pair of industrial shears to cut PYRAMAT® 75, tape measure, percussion hammer (sized appropriately for the anchors), ground rod driver compatible with the percussion hammer, drive steel compatible with the anchor, setting tool to set and load-lock theanchor, and wire cutters to cut the cable tendon of the anchor. If anchors will be load tested during construction, additional testing equipment may be necessary. Consult the "Anchor Load Test Manual" from Propex for further guidance. Available for purchase from Propex are drive steel, setting tools, and wire cutters.
9. Determine how to Establish Vegetation: The method of vegetation establishment should be determined prior to the start of installation. Different vegetation establishment methods require different orders of installation. Refer to Establish Vegetation for further guidance.
10. Please consult the Propex Website for the most up to date installation guidelines.

EROSION CONTROL INSTALLATION DETAILS

ARMORMAX

ARMORMAX® 75 INSTALLATION DETAILS FOR SLOPES

Date:	Drawn By:	Scale:
01/14/2019	J. HILL	NTS

*ALL DIMENSIONS ARE TO BE VERIFIED BY ENGINEER OF RECORD

Thank you for purchasing ARMORMAX® for Erosion Control or Slope Stability by Propex Operating Company, LLC (Propex). This document provides installation and maintenance guidelines for ARMORMAX used as slope armoring to improve earthen slope resiliency and slope stability. ARMORMAX provides permanent erosion protection of an earthen slope, promotes vegetation, and improves slope stability, consists of two components:

- PYRAMAT® - High Performance Turf Reinforcement Mat (HPTRM)
- Engineered Earth Anchor (Anchor)

Temporary securing pins (pins) are used during installation to hold ARMORMAX in place while installing anchors. Pins also promote vegetation establishment keeping ARMORMAX in intimate contact with the soil.

ARMORMAX is an Engineered Earth Armoring Solution ™ with a unique design for each specific project. While Propex has made every effort to ensure general validity, this information should not be used for a specific application without independent professional examination and verification of its suitability, applicability, and accuracy. The information provided herein is for general information only, and is intended to present installation guidance. Project specific contract documents take precedence when pin and anchor placements are different than what is represented in this document. Depending upon the critical nature of the structure to be armored, work restrictions may be in place such as limiting work based on growing seasons, weather patterns, etc. Work should be performed under the provisions set forth for the specific project. Propex Engineering Services is available for support during installation to consult for solving constructability issues encountered in specific applications. Please feel free to contact our Engineering Serivces team at GeoEngineering@propexglobal.com.

BEFORE INSTALLATION BEGINS

- *Coordinate with a Propex Representative:* A pre-construction meeting is suggested with the construction team and a representative from Propex. This meeting should be scheduled by the contractor with at least a two week notice.
- *Gather the Tools Needed:* Tools that you will need to install ARMORMAX include a pair of industrial shears, tape measure, percussion hammer (sized appropriately for the anchors), ground rod driver compatible with the percussion hammer, drive steel compatible with the anchor, setting tool to set and load-lock the anchor, and wire/bolt cutters to cut the cable tendon of the anchor. If anchors will be load tested during construction, additional testing equipment may be necessary. Consult the "Anchor Load Test Manual" from Propex for further guidance. Available for purchase from Propex are drive steel, JackJaw® Setting Tools, wire cutters, and a gas powered anchor driver.
- *Determine how to Establish Vegetation:* The method of vegetation establishment should be determined prior to the start of installation.
- Different vegetation establishment methods require different orders of installation. Refer to *VEGETATION ESTABLISHMENT* for further guidance.

INSTALLATION OF ARMORMAX ON SLOPES

PREPARE THE SITE

It is recommended during all stages of site preparation that disturbed soils remain unprotected for not more than a single day. Depending on project size this may require progressive site preparation during installation.

1. Grade and compact the area on the slope where ARMORMAX will be installed. The slope surface should be uniform and smooth, having all rocks, clods, vegetation or other objects removed so that during *ARMORMAX* LAYDOWN, ARMORMAX comes in direct, intimate contact with the slope surface.
2. Prepare the area to be armored with ARMORMAX by loosening the topsoil to promote better vegetation establishment. This may be accomplished with a rotary tiller on slopes 3:1 or flatter. For slopes greater than 3:1, prepare topsoil in a safe manner.

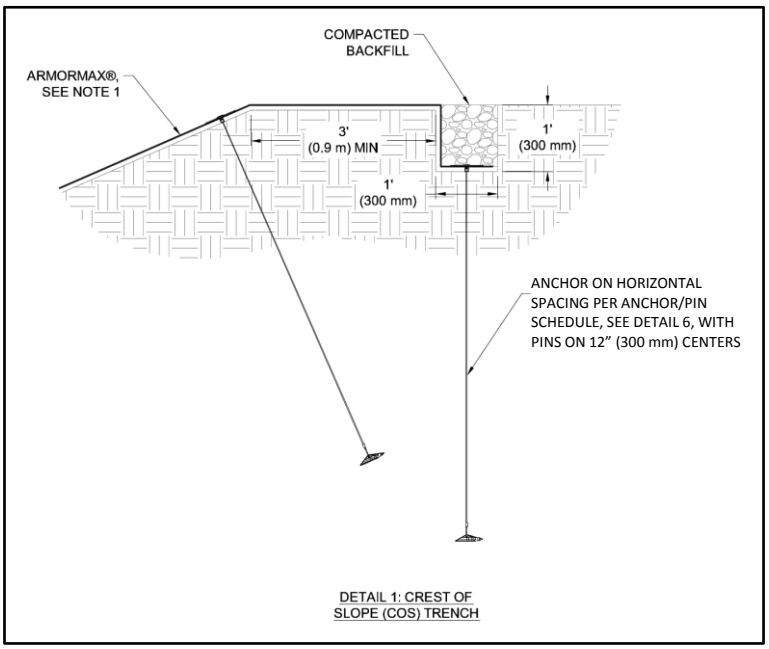

Figure 1: Crest of Slope (COS) Trench

3. Excavate a Crest of Slope (COS) trench 12 in x 12 in (300 mm x 300 mm) minimum at a distance of 3 ft (900 mm) from the crest of the slope. (Figure 1).

4. Excavate a Toe of Slope (TOS) trench 12 in x 12 in (300 mm x 300 mm) minimum at a minimum distance of 5 ft (1.5 m) from the toe of the slope. (Figure 2)

5. If seeding, refer to *VEGETATION ESTABLISHMENT* for additional considerations during site preparation.

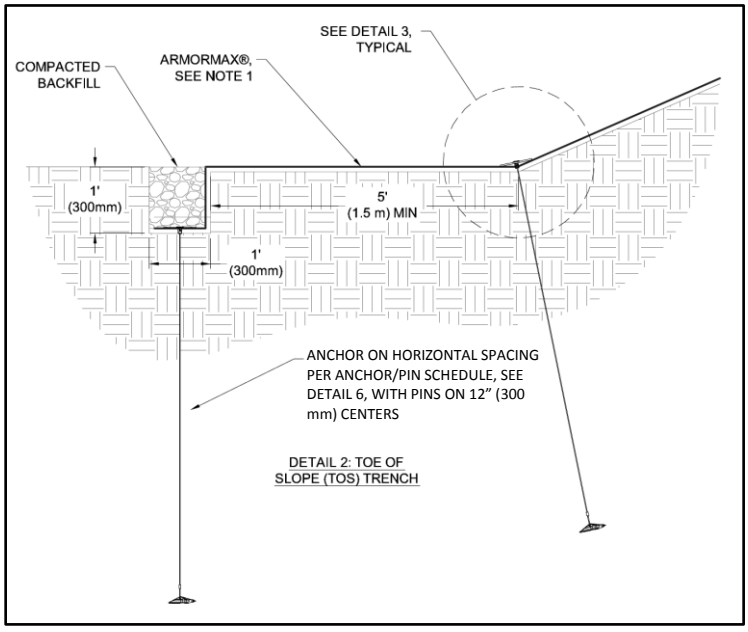

Figure 2: Toe of Slope (TOS) Trench

ARMORMAX LAYDOWN

1. Begin the *ARMORMAX* **LAYDOWN** process by starting with the downstream / downwind end of the site. To ensure proper anchoring of the overlapped areas the proceeding roll width must be laid out before the current roll width can be anchored with exception to the final roll width. For straight sections of a slope, ARMORMAX panel lengths should be long enough to construct COS and TOS trenches while also covering the surface of the slope being armored (Figure 12). Panel edges should rest approximately perpendicular to the slope center line. For best results, panels of ARMORMAX should be continuous and free from seams or roll end overlaps that are parallel to the centerline of the slope. Panel edge overlapping should follow a pattern of placing each proceeding panel's edge overtop the previous panel edge, shingling the panels in the direction of the water flow or prevailing wind.

2. Starting at the COS trench, lay ARMORMAX roll so that the roll ends points towards the crest of the slope (Figure 3), with a 3 inch (75 mm) overlap created at adjacent panel edge locations. Ensure that adjacent panel edges maintain a minimum 3 inch overlap during *ARMORMAX* **LAYDOWN** (Figure 8).

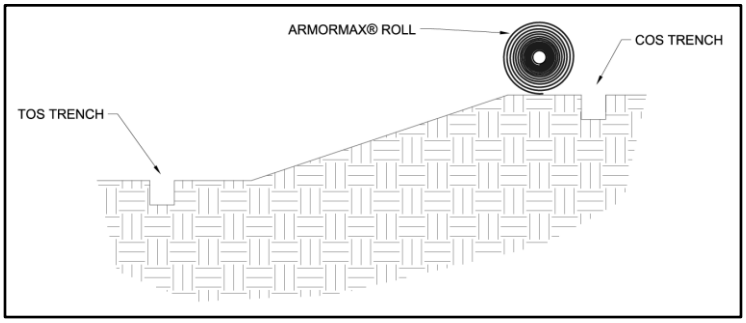

Figure 3: Crest of Slope (COS) Trench Alignment

3. Secure ARMORMAX with pins and Secondary anchors in the COS trench. Pins should be made of steel with a 0.20 in (5 mm) minimum diameter, having a 1.5 in (38mm) diameter washer at the head, and a length between 12 and 24 in (300-600 mm) with sufficient ground penetration to resist pullout (Figure 4). Longer pins may be required for looser soils. Heaver metal stakes may be required in rocky soils. Suggested placement of pins and Secondary anchors for the COS trench is along the bottom of the trench with pins on 12 in (300 mm) centers in between Secondary anchors on 4 ft (1.2 m) centers. Secondary anchors should also be installed on panel edge overlaps in the COS trench.

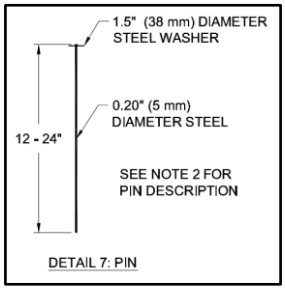

Figure 4: Securing Pin

4. Backfill and compact the COS trench in the location of the first ARMORMAX panel only (Figure 5).

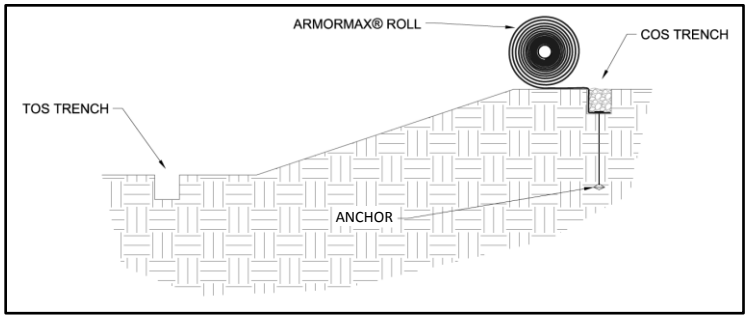

Figure 5: Crest of Slope (COS) Trench Placement

5. Unroll the ARMORMAX roll on the slope surface in the area to be armored (Figure 6). Ensure that ARMORMAX has intimate contact with the ground and all irregular surfaces beneath ARMORMAX are removed.

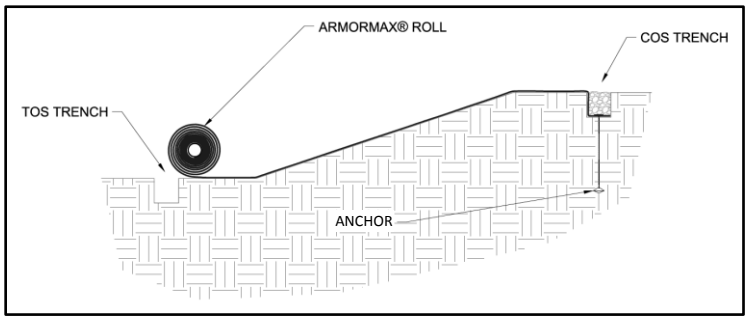

Figure 6: Placement of ARMORMAX across Slope

6. Secure ARMORMAX panels in place using pins, Primary anchors, and anchors across the slope surface according to the project's engineered design. Pin and anchor placement should reflect a staggered checkerboard pattern across the slope surface for best results (Figure 7 and Figure 8).

   - The leading edge of the first ARMORMAX panel should be secured on the Slope Armoring Edge (SAE) with pins on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis.
   - Roll edges shall be overlapped a minimum of 3 in (75 mm) with pins placed on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis (Figure 8).
   - Roll ends shall be overlapped a minimum of 6 in (150 mm) with upstream / upwind panel on top. Secure roll end overlaps with two rows of pins staggered 6 in (150 mm) apart on 12 in (300 mm) centers and with one row of anchors on intervals based on the slope stability analysis (Figure 9)
   - For slope lengths greater than 45 ft (13.7 m), install simulated check slots. This method includes placing two rows of pins 12 in (300 mm) apart on 12 in (300 mm) centers and one row of anchors between the rows of pins on 4 ft (1.2 m) centers at 45 ft (13.7 m) maximum intervals or across the midpoint of the slope for slope lengths less than 60 ft (18.2 m) (Figure 10).
   - At the break in slope interface towards the TOS, it is suggested that anchors be installed on intervals based on the slope stability analysis (Figure 11).

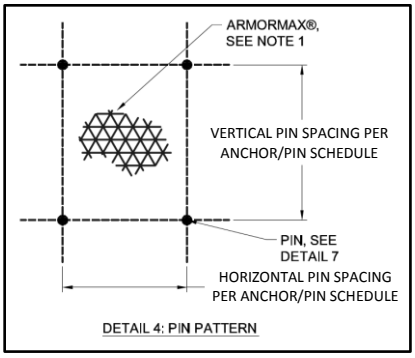

Figure 7: Example Pin Pattern

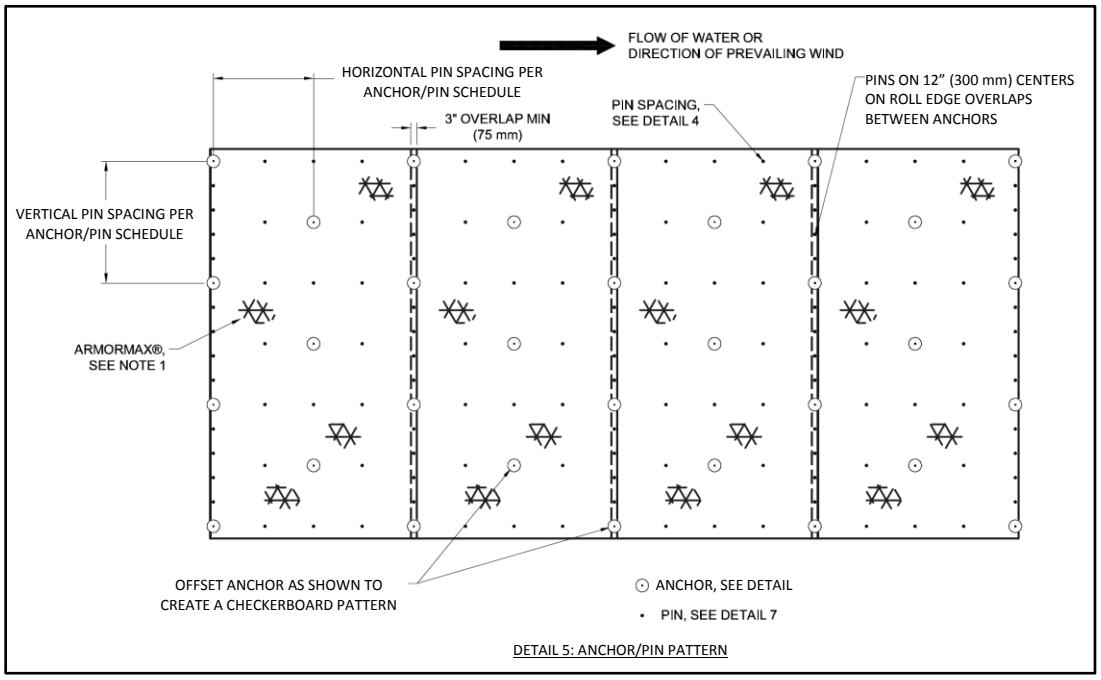

Figure 8: Example of Anchor Pattern - 0.5 Anchors/yd^2

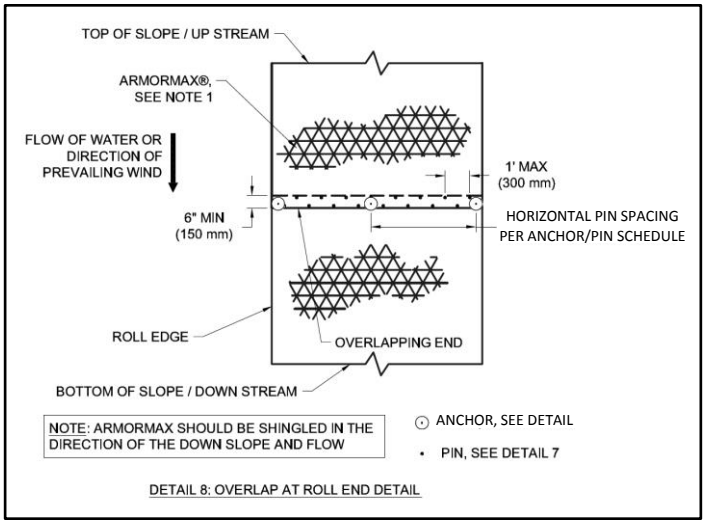

Figure 9: Roll End Overlap

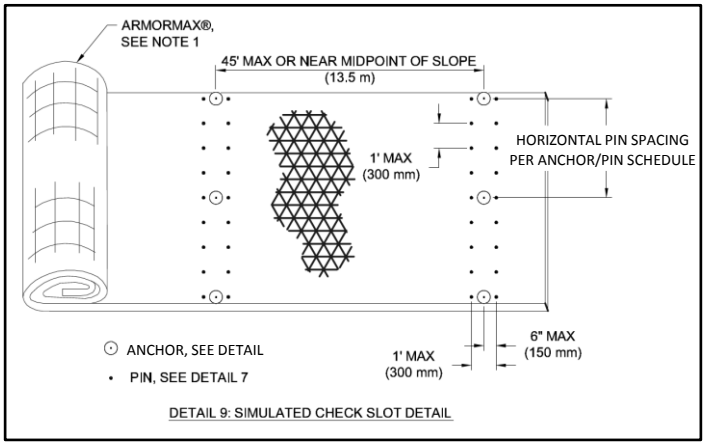

Figure 10: Simulated Check Slot

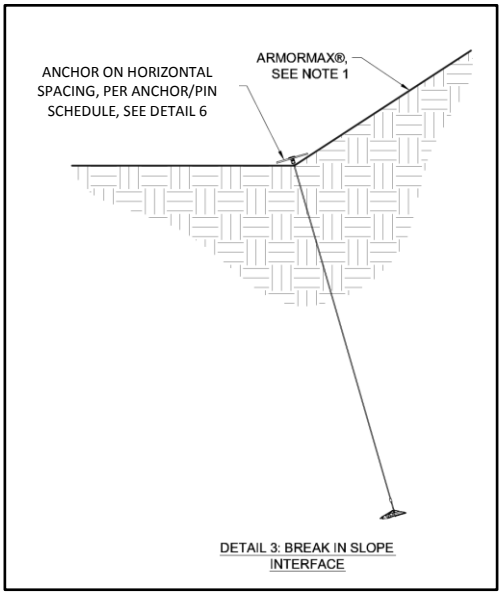

Figure 11: Break in Slope Interface

7. Secure ARMORMAX with pins and anchors in the TOS trench. Suggested placement of pins and anchors for the TOS trench is along the bottom of the trench with pins on 12 in (300 mm) centers in between anchors on 4 ft (1.2 m) centers (Figure 12).

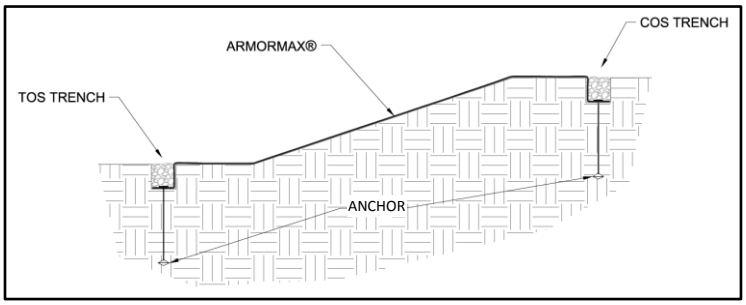

Figure 12: Crest of Slope (COS) Trench and Toe of Slope (TOS) Trench Complete

8. Backfill and compact the TOS trench. (Figure 12)

9. Continue to work down the length of the slope by repeating steps 1 through 8 overlapping each adjacent ARMORMAX panel by 3 inches (75 mm) (Figure 8). The last ARMORMAX panel should terminate on the Slope Armoring Edge (SAE) with pins on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis. At a minimum, ARMORMAX panels should be pinned entirely across the slope surface, pins and anchors should be installed in the trenches, and the trenches should be backfilled and compacted at the end of each day to minimize rework in the case of a major rain event. Specific project conditions may warrant further evaluation of installation order for ease. An example elevation view (Figure 13) of a slope armored with ARMORMAX can be seen below for overall reference. Consult Propex Engineering Services at (800) 621-1273with any questions that you may have.

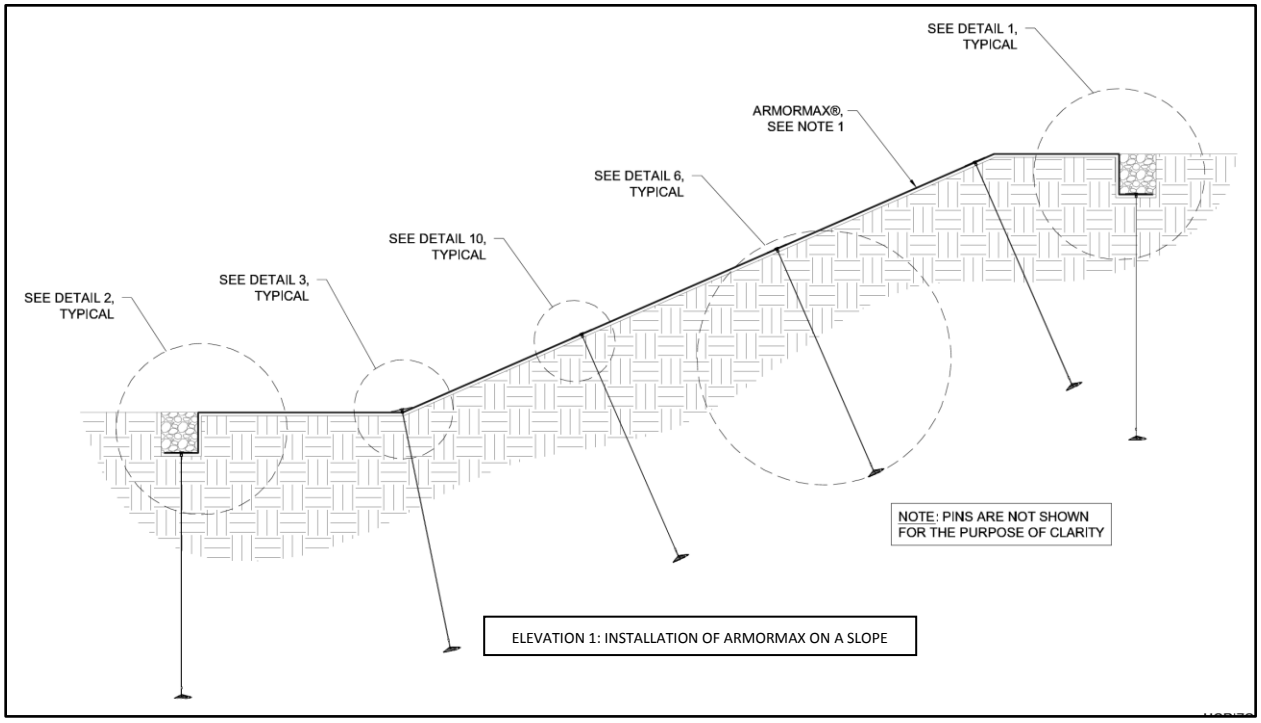

Figure 13: Completed Slope Isometric View

INSTALL ANCHORS

The ARMORMAX anchor typically consists of an anchor head, a flexible cable tendon, and a load bearing plate. For quality control purposes and warranty claims, anchors should be delivered to the jobsite fully assembled and ready for installation.

Anchors are to be installed in locations specified for the project, and are typically installed in conjunction with *ARMORMAX LAYDOWN*. There are several options available from Propex for different types of anchors. For optimal performance with the greatest risk reduction, it is important to select the proper anchor and perform the installation in accordance with the pattern designed for required resiliency and long term durability of the slope. Understanding the mechanics behind installing the anchor component of ARMORMAX will result in a quality ARMORMAX installation.

TYPE B1 & B2 ANCHOR

The installation of either Type B1 or Type B2 Anchor (Figure 14) is described below. The tools that you will need are a percussion hammer, a ground rod driver and drive steel compatible with the anchor and percussion hammer, a JackJaw setting tool, and wire cutters.

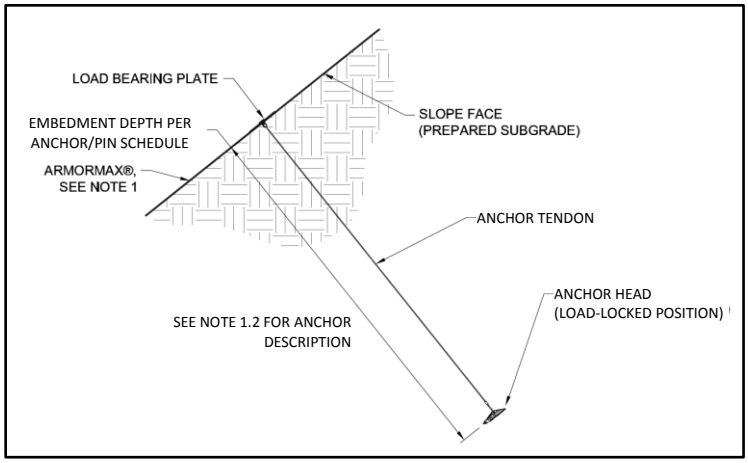

Figure 14: Anchor Detail

1. Use one piece drive steel or assemble segmental drive steel to the appropriate length in order to drive the anchor to the specified embedment depth.

2. Insert the tapered end of the drive steel into the hollow cavity of the anchor head. Position the anchor head/ drive steel tip above the ground at the drive location (Figure 15 and Figure 16).

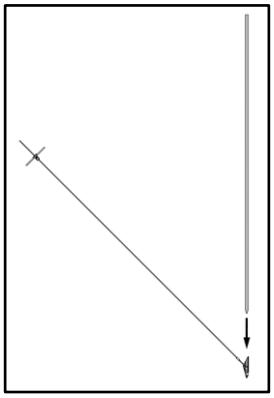

Figure 15: Insert Drive Steel into Anchor

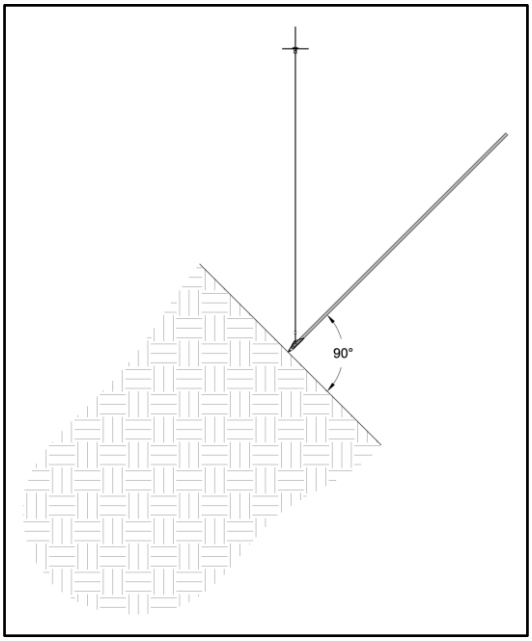

Figure 16: Position Anchor Head / Drive Steel Tip

3. Using a percussion hammer, guide the drive steel into the ground perpendicular to the slope surface at a smooth pace. Continue driving until the desired embedment depth is reached (Figure 17).

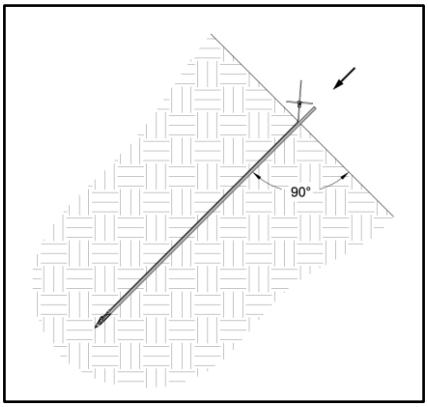

Figure 17: Drive Steel to Drive the Anchor into the Ground

4. Remove the drive steel from the ground. (Figure 18) Depending on soil conditions, this may require the use of a setting tool or leverage device.

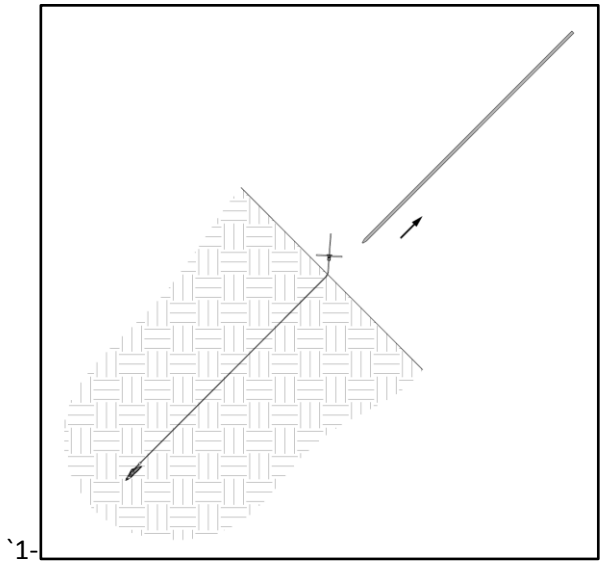

Figure 18: Remove Drive Steel from Ground

5. Slide the load bearing plate down the anchor tendon towards the slope surface using your hands (Figure 19).

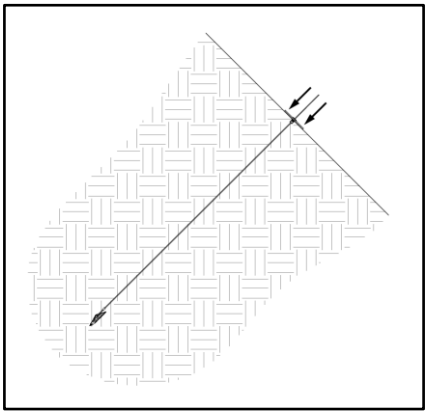

Figure 19: Slide Plate

6. Once the plate is close to the slope surface, place the JackJaw Setting Tool on the anchor plate and place the top of the anchor tendon into the grips, keeping the anchor tendon perpendicular to the slope surface (Figure 20). With gentle force, slowly start to press down on the JackJaw lever – towards the slope surface - causing the anchor tendon to start to move out of the ground (displace). During this step, the anchor head will turn in the ground – a process known as "anchor setting". The change in embedment depth to set a Type B1 Anchor can be up to 6 inches and up to 8 inches for Type B2 depending on soil conditions. When the anchor is set, there will be a noticeable change in the amount of force needed to displace the anchor any further. This is a good indication that the anchor head is now perpendicular to the anchor tendon and the anchor is ready to be load-locked.

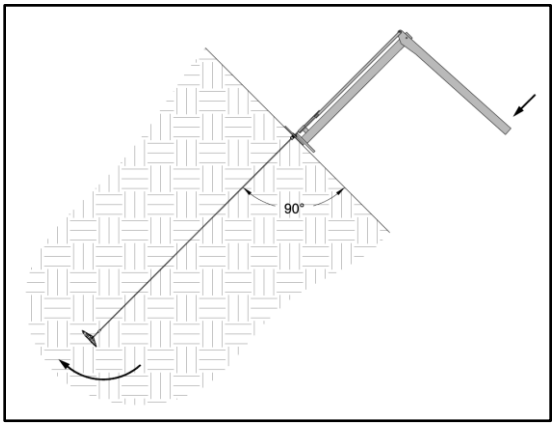

Figure 20: Use JackJaw Setting Tool to Set Anchor

7. To load-lock an anchor, continue to apply tension to the anchor tendon using the JackJaw Setting Tool creating a slight depression on the slope surface. Visually, anchors across ARMORMAX will look similar to buttons across a mattress top when anchors have been properly load-locked.

8. Conduct anchor load tests when required for quality assurance during installation. Refer to the document entitled "Anchor Load Test Manual" by Propex for further details.

9. Once anchors have been load-locked, cut off the excess anchor tendon flush to the plate at the slope surface using wire cutters (Figure 21 and Figure 22).

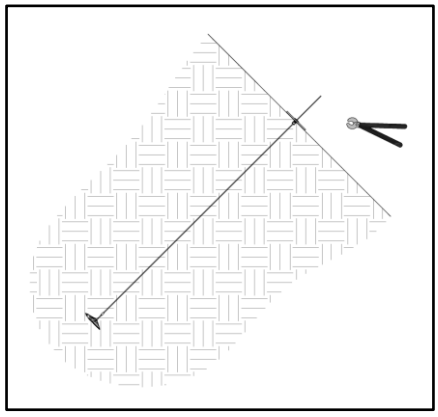

Figure 21: Trim Extra Cable Flush to Plate

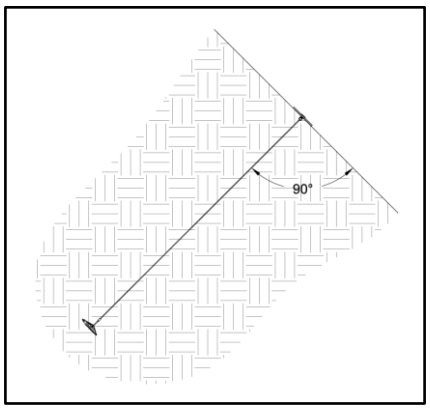

Figure 22: Complete Anchor Installation

VEGETATION ESTABLISHMENT

Vegetation can be established with ARMORMAX by broadcast seeding, hydraulic seed application (hydroseeding), or sodding. Seed application rate, seed type, sod type, and irrigation rate should be selected based on local or site specific knowledge and time of year. For best results, consider having a site specific soil test performed to help determine what soil amendments, such as lime and fertilizer, need to be incorporated into the soil to promote healthy vegetation.

Irrigate as necessary to establish and maintain vegetation until 75% of vegetation has established and has reached a height of 2 inches. Frequent, light irrigation will need to be applied to seeded areas if natural rain events have not occurred within two weeks of seeding. While watering seeded areas use a fine spray to prevent erosion of seeds or soil. Do not over irrigate. Proper irrigation guidance is provided under the Maintenance portion of this document.

PROJECT SPECIFIC CONSIDERATIONS

1. For applications that require special transitions (i.e. connections to riprap, concrete, T-walls, etc.), refer to the project specific drawings or consult with Propex Engineering Services at (800) 621-1273.

2. A deeper terminal trench and/or hard armoring may be required when slopes have severe scour potential at the toe location.

3. For installing ARMORMAX panels around curved sections of a slope, trim panels at an angle so that no more than two layers of ARMORMAX overlap at any point in time. Additional pins and anchors may be needed to secure panel edges towards the toe of the slope depending upon the radius of the curved slope. Install pins or anchors as necessary to securely fasten ARMORMAX to the ground.

4. Allowable Vehicle Traffic:

   A. If using equipment on ARMORMAX, it should be of the rubber-tired type and should avoid sharp turns. Tracked equipment is not permitted to drive over the ARMORMAX without vegetation at any time.

   B. Avoid any traffic over ARMORMAX if loose or wet soil conditions exist.

5. Disturbed areas should be reseeded. If ruts or depressions develop for any reason, rework soil until smooth and reseed such areas.

SHORT-TERM AND LONG-TERM MAINTENANCE OF ARMORMAX

The purpose of this section is to provide some general guidelines for performing short-term and long-term maintenance of ARMORMAX with respect to maintaining vegetation reinforced with ARMORMAX, and patching of ARMORMAX (in the event it needs to be removed or replaced). These procedures are to be considered minimum guidelines for proper maintenance, and further maintenance techniques may be appropriate considering local practices and procedures.

ARMORMAX PROTECTED SLOPES

For ARMORMAX to be most effective, it is important to ensure that it is properly maintained both during construction and after construction. Identifying trouble areas is easy with ARMORMAX, and it can make identifying potential threats much simpler and manageable. Look for areas with sparse, dying, or no vegetation as these are obvious signs that ARMORMAX is losing intimate contact with the slope surface. If loss of ground surface occurs, ARMORMAX will need to be removed and reinstalled as described in *PATCHING AND REPAIRS* section after the eroded area is backfilled with compacted soil that is similar to material of the slope. After ARMORMAX is reinstalled, re-establish vegetation on the newly installed ARMORMAX and disturbed areas. Monitor the sites to determine if frequent watering may be required to establish vegetation.

To minimize exposure to unwanted maintenance and repair, ARMORMAX armored slopes should be free of unauthorized vehicular traffic. Routine maintenance and slope inspections should be performed with rubber tired vehicles. Tracked equipment such as skid steers, excavators, or dozers should only be allowed to traffic over ARMORMAX in times of emergency after vegetation establishment is complete. Failure to control unauthorized traffic can result in ARMORMAX being damaged resulting in erosion below ARMORMAX during storm events. In addition, routine mowing maintenance should be used to keep the protected area free of unwanted brush, saplings, and trees. Selective herbicides that target only the unwanted plants can be used as long as the vegetation established with ARMORMAX is not impaired. Failure to control the sapling and tree growth can result in the trees being uprooted during a flood.

MAINTAINING VEGETATION

Good vegetative cover will ensure maximum performance of ARMORMAX. Vegetative cover care starts before a project is complete and is ongoing until all ARMORMAX is installed. Vegetative cover should be given every opportunity to grow and establish well. This will require that a contractor periodically fertilize, water, and mow the grasses as needed until a project is complete in the short-term, with the owner of the slope fulfilling the maintenance of the slope in a similar fashion for the long-term. For the entire lifecycle of ARMORMAX, every effort must be made to prevent unauthorized encroachments, grazing, vehicle traffic, the misuse of chemicals, or burning during inappropriate seasons.

1. After the installation of vegetation is complete, immediately water and soak the entire area using a fine spray to prevent erosion and loss of seeds. A suggested amount of water is identified below. Prior to installation if using sod, the sod pads in storage should be kept moist at all times and not stored for more than 24 hours from site arrival to installation. Warmer weather will necessitate more frequent applications than listed below.

    A. For each reach/segment of installed vegetation, watering shall be conducted immediately after each installation or the day's work.

    B. For initial vegetation establishment, water vegetation in a manner consistent with best practices for vegetation type and location.

    C. Establish a watering schedule and follow until vegetation is well established and will thrive in the absence of manual watering.

    D. Avoid excessive application of water, so that surface runoff does not occur. Runoff should be prohibited. However, additional watering may be required for repaired or damaged areas.

2. Fertilizer should be applied as needed to address any nutrient deficiencies revealed in soil testing.

3. Implement best practices for mowing over ARMORMAX. While ARMORMAX is designed to withstand non-hydraulic stresses such as mowing, there are procedures to minimize exposure to unwanted damage.

   A. Immediately after installation, signage and post shall be installed stating that "Vehicles and Pedestrians are Prohibited from Access" on the slopes and the newly installed vegetation. Signage shall be posted every 1,500 lineal feet.

   B. Vegetated areas should be mowed to a height no less than 6 inches and no greater than 12 inches from natural ground after a period of 60 days of growth. The excessive grass clippings created from mowing shall be evenly spread on the slope section outside of the armored area. Periodic and final grass mowing should be performed until final inspection and acceptance of slope work. Monitor the vegetated areas throughout winter months and generate reports as needed, noting any issues that should be addressed. Minimum mowing heights will depend on the vegetation density and should be as follows:

      i. 6" with 0 – 30% vegetation establishment
      ii. 4" with 30 – 70% vegetation establishment
      iii. 3" with 70 – 100% vegetation establishment

   C. To prevent damage to the newly established vegetation, the mowing tractor should be fitted with 3-rib agriculture tires. Note that tractors with 8-foot flail mowers provide best results. Tractors with 15-foot brush hogs should avoid sharp turns up the slope to prevent damage to vegetation.

   D. Mowing should not take place for a minimum of 48 hours after a rainfall event of 2 inches or more to minimize the potential for rutting and/or damage to the slope surface. Maintenance mowing of the slope should be done on a consistent basis to prevent vegetation growing to more than 3 feet in height. This will minimize thatch thickness and potential damage to ARMORMAX. If turn-around pads are present, operate mowing equipment utilizing the turn-around pads to the fullest extent. The mowing blade height over ARMORMAX should be a minimum of 8 inches. However, should vegetation grow to more than 3 feet in height, the mowing blade height for the condition should be a minimum of 12 inches.

4. Some special circumstances may exist. When mowing the crown of a slope with a crown or crest equal to or exceeding 20%, it should be mowed with an articulating arm mower to minimize the potential for the mower blades to catch ARMORMAX at the slope surface. The articulating arm mower should be level on the surface with the articulating arm extending over the crown. **Pay close attention to areas where the slope changes.** The mower blades should be set at a minimum height of 8 inches. If ARMORMAX is damaged by the mowing blades at any time, mowing should stop immediately and further direction should be obtained to continue activity. Repair the damaged area as described in the *PATCHING AND REPAIRS* section below.

5. ARMORMAX protected slopes are not as susceptible to animal burrowing due the tenacity of the ARMORMAX; however, inspections to detect the presence of burrowing animal activity are generally most effective immediately after the slope has been mowed. Animal burrows that are identified should be thoroughly excavated and inspected, backfilled with compacted soil that is similar to material of the slope, and vegetation re-established. This will avoid the possibility of water piping through unfilled portions of the burrows. Should ARMORMAX be damaged, it is to be repaired as described *PATCHING AND REPAIRS* section below.

PATCHING AND REPAIRS

ARMORMAX may require localized repair at times. For emergency repairs, an adequate supply of ARMORMAX should be maintained in inventory with the necessary tools to install. This will allow for a timely, initial repair of the system.

1. In order to identify areas in need of repair, the site should be patrolled immediately after mowing and after rain events of 2 inches or more. When patrolling look for areas of sparse vegetation, exposed edges of ARMORMAX, and areas where direct contact between ARMORMAX and the slope surface is compromised. ARMORMAX should be rated as *Acceptable, Minimally Acceptable*, or *Unacceptable* during inspection.

A. *Acceptable* (A) - The rated area is in satisfactory, acceptable condition, and will function as designed and intended during the rain event. ARMORMAX has no exposed edges, is installed tightly by maintaining direct contact to the slope surface with no rilling beneath, and has over 90% vegetation cover. There is no noticeable damage present.

B. *Minimally Acceptable* (M) - The rated area has a minor deficiency that needs to be corrected. The minor deficiency will not seriously impair the functioning of the area during the next rain event; however, the overall reliability of the project will be lowered because of the minor deficiency. ARMORMAX has 75% vegetation cover with un-vegetated patches as large as one square yard. Edges of ARMORMAX are exposed with noticeable damage. Minimal erosion has occurred underneath ARMORMAX.

C. *Unacceptable* (U) - The rated area is unsatisfactory. The deficiency is so serious that the area will not adequately function in the next rain event. ARMORMAX has been physically torn, ripped, or lifted from the slope surface. Less than 75% vegetation cover is present with un-vegetated patches being greater than 1 square yard, and there is evidence that erosion is occurring beneath ARMORMAX.

2. Repair any raised or exposed edges of ARMORMAX by driving existing and additional pins or anchors along the edges as necessary to securely fasten to the ground. Inspect areas where the vegetation is not growing on top of ARMORMAX. Many times this is an indicator that ARMORMAX has lost contact with the ground beneath. Check for voids beneath ARMORMAX and fill any holes, gullies, etc. with compacted fill material if possible. Replace ARMORMAX as described below.

3. To repair ARMORMAX, cut out and remove damaged areas in a square configuration a minimum size of 2 ft by 2 ft. Remove all vegetation and debris atop of ARMORMAX. Loosen the top 1 to 2 in of soil in the patch area then seed. The subgrade of area to be patched shall be prepared to be smooth and uniform and transition smoothly into the in-situ area. Cut a square ARMORMAX patch a minimum of 12 in greater than the damaged area for all four sides of the patch. Overlap the patch area in all directions a minimum of 12 in. The patch overlaps shall be tucked under the existing damaged ARMORMAX material (Figure 23 and Figure 24).

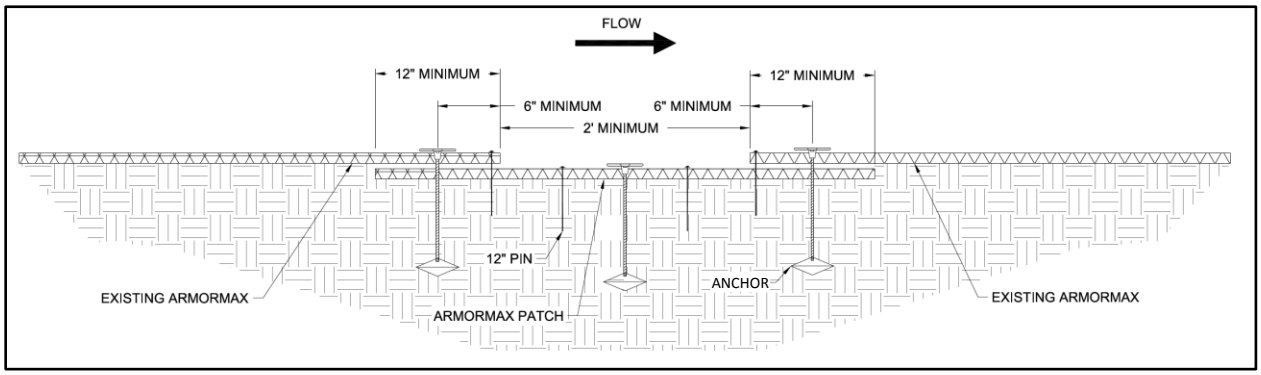

Figure 23: ARMORMAX Patch Cross Section

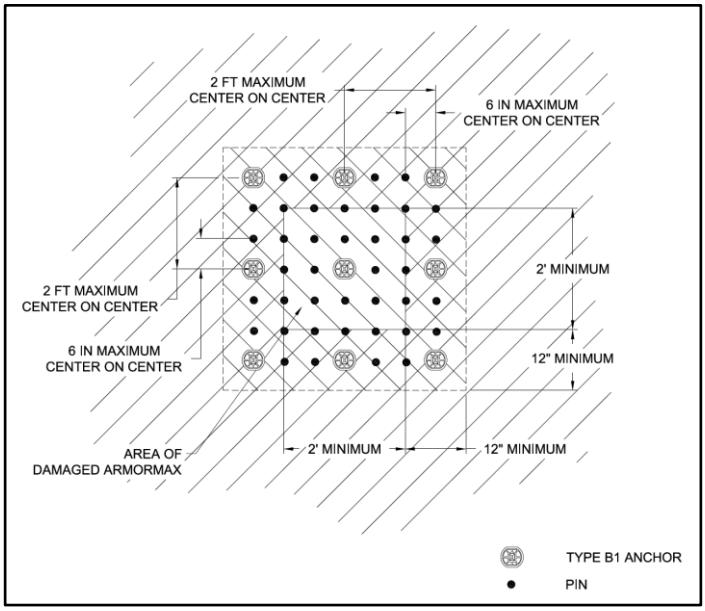

Figure 24: ARMORMAX Patch Plan View

4. Install anchors on 2 ft (600 mm) (max) centers, and pins on 6 in (150 mm) (max) centers. For larger areas of damage, anchors should be installed to match existing anchor pattern and type. Once ARMORMAX is in place, vegetate per project specifications.

SUMMARY

Maintenance should consist of watering and weeding, repair of all erosion, and any re-seeding as necessary to establish a uniform stand of vegetation during construction and beyond. A minimum of 70% of the armored area should be covered with no bare or dead spots greater than 10 ft^2 (1 m^2). Establishing vegetation should not be mowed prior to 70% vegetative density and a minimum grass growth of 4 in (100 mm). Throughout the duration of the project, the contractor should be responsible for mowing to facilitate growth and should not let the vegetation in the armored areas exceed 18 in (450 mm). In addition, the Contractor should water all grassed areas as often as necessary to establish satisfactory growth and to maintain its growth throughout the duration of the project. After the project is complete, it is the responsibility of the Owner to maintain and upkeep all ARMORMAX installed areas for long term performance and best results as described herein for superior slope armoring.

Statement of Work

Purpose

The purpose of this agreement is for the United States Department of Agriculture, Natural Resources Conservation Service, hereinafter referred to as the "NRCS", to provide technical and financial assistance to Escambia County Board of County Commissioners, hereinafter referred to as the "Sponsor", for EWP Project # 5073 (Hurricane Harvey) in Escambia County, Florida for implementation of recovery measures, that, if left undone, pose a risk to life and/or property.

Objectives

The design and installation of EWP measures as detailed in the individual Damage Survey Report (DSR) and described here:

DSR No. ESC-HAR-001 – Grade Stabilization of Motley Court Gully = $761,094

Total Estimated Construction Cost = $761,094

Budget Narrative

A. The estimated costs for the Project:

1. Total Estimated Project Budget: $837,203.40

The budget includes:

Financial Assistance (FA) Costs:
Construction Costs (75% NRCS $570,820.50 + 25% Sponsor $190,273.50): $761,094

Technical Assistance (TA) Costs:
100% NRCS (10.0% of total construction cost): $76,109.40

2. NRCS pays up to 75 percent of eligible construction costs, and Sponsor pays 25 percent of construction costs. NRCS will contribute up to 10.0 percent of the total construction cost for design services, contract administration and construction management costs. It is possible that technical and administrative costs will exceed this amount, requiring the Sponsor to contribute resources to complete technical and administrative work.

3. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for financial assistance (FA) and one for technical assistance (TA). FA costs are associated with construction activities; TA costs are associated with services. These expenditures shall be accounted for separately in order for expenses to be eligible for reimbursement.

4. NRCS will provide FA for actual costs as reimbursement to the Sponsor for approved on-the-ground construction costs, subject to above limits. If costs are reduced, reimbursement will be reduced accordingly. Construction costs are associated with the installation of the project measures including labor, equipment and materials.

5. NRCS will provide TA reimbursement to the Sponsor for technical and administrative costs directly charged to the project, subject to the above limits. If costs are reduced, reimbursement will be reduced accordingly. These costs include

a. engineering costs include, but not limited to, developing a project design that includes construction drawings and specifications, an operation and maintenance plan, a quality assurance/inspection plan and an engineer's estimate of the project installation costs in addition to providing necessary quality assurance during construction.

b. contract administration costs include, but not limited to, soliciting, evaluating, awarding and administering contracts for construction and engineering services, including project management, verifying invoices and record keeping.

6. The Sponsor will contribute funds toward the total construction costs in either direct cash expenditures, the value of non-cash materials or services, or in-kind contributions. The value of any in-kind contribution shall be agreed to in

writing prior to implementation.

Responsibilities of the Parties:

A. Sponsor will—

1. Accomplish construction of the EWP project measures by contracting, in-kind construction services, or a combination of both.

2. Ensure and certify by signing this agreement that its cost share obligation is from a non-Federal source.

3. Designate a project liaison to serve between the Sponsor and NRCS and identify that person's contact information with this executed agreement. Any change in the project liaison during the terms of this agreement must be immediately communicated to NRCS.

4. Appoint a contracting officer and an authorized representative who will have authority to act for the contracting officer, listing their duties, responsibilities, and authorities. Furnish such information in writing to the NRCS State Conservationist.

5. Comply with the terms and conditions of this agreement and the attached general terms and conditions except those that are not applicable to State and local governments.

6. Acquire and provide certification to NRCS that real property rights (land and water), permits and licenses in accordance with local, state, and Federal laws necessary for the installation of EWP project measures have been obtained at no cost to NRCS prior to construction. This includes any rights associated with required environmental mitigation. Sponsors shall provide such certification on Form NRCS-ADS-78, Assurances Relating to Real Property Acquisition. Sponsors shall also provide an attorney's opinion supporting this certification. Costs related to land rights and permits are the Sponsor's responsibility and ineligible for reimbursement.

7. Accept all financial and other responsibility for excess costs resulting from their failure to obtain, or their delay in obtaining, adequate land and water rights, permits and licenses needed for the Project.

8. Provide the agreed-to portion of the actual, eligible and approved construction cost. These costs may be in the form of cash, in-kind construction services, or a combination of both. Final construction items that are eligible construction costs will be agreed upon during the pre-design conference. These costs consist of costs from contracts awarded to contractors and eligible Sponsor in-kind construction costs for materials, labor, and equipment. The Sponsor shall provide NRCS documentation to support all eligible construction costs.

9. Be responsible for 100 percent of all ineligible construction costs and 100 percent of any unapproved upgrade to increase the level of protection over and above that described in the DSR.

10. Account for and report FA and TA expenditures separately in order for expenses to be eligible for reimbursement. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for TA and one for FA, requiring this separation.

11. Contract for services and construction in accordance with the Code of Federal Regulations (CFR), 2 CFR § 200.317 through 200.326, applicable State regulations, and the Sponsor's procurement regulations, as appropriate. (See general terms and conditions attached to this agreement for a link to the CFR.) In accordance with 2 CFR § 200.326, contracts must contain the applicable provisions described in Appendix II to Part 200. Davis-Bacon Act would not apply under this Federal program legislation.

12. The contracts for design services and construction described in this Agreement shall not be awarded to the Sponsor or to any firm in which any Sponsor's official or any member of such official's immediate family has direct or indirect interest in the pecuniary profits or contracts of such firms. Reference 2 CFR § 200.318 regarding standards of conduct covering conflicts of interest and governing the performance of its employees engaged in the selection, award, and administration of contracts.

13. Any costs (construction or technical and administrative services) incurred prior to the Sponsor and NRCS signing this agreement are ineligible and will not be reimbursed.

14. For contracts, provide NRCS a copy of solicitation notice, bid abstract, and notice of contract award, or other basis of cost and accomplishment.

15. For in-kind construction services (materials, labor, and/or equipment supplied by the Sponsor), develop a Plan of Operations describing the construction services to be performed including estimated quantities and values. The Plan of Operations shall be concurred in by NRCS at the pre-design conference. In-kind construction services for equipment shall not exceed published FEMA equipment rates unless otherwise documented and concurred in advance by NRCS.

16. The following documentation is required to support the Sponsor's request for reimbursement of in-kind construction services:

a. Invoices covering actual costs of materials used in constructing the eligible EWP project measures.
b. Records documenting the type, quality, and quantities of materials actually used in constructing the eligible EWP project measures.
c. Daily time records for each employee showing name, classification, wage rate, hours, and dates actually employed for constructing the eligible EWP project measures.
d. Equipment operating records showing the type and size of equipment, hourly rate, actual hours of operation and dates used to install the eligible EWP project measures. Equipment idle time is not eligible in-kind construction services, even if on the job site, and should not be included in the equipment operating records.

17. Within thirty (30) calendar days of signing the project agreement, hold a pre-design conference with the Sponsor, Sponsor's design engineer, and NRCS. The design conference shall set forth design parameters concurred by both the Sponsor and NRCS. During the pre-design conference, NRCS will determine the eligible construction costs.

18. Within fourteen (14) calendar days of the pre-design conference submit to NRCS a schedule with time lines of major items to be completed. Milestones shall include, but not limited to, obtaining land rights, obtaining permits, completing any necessary surveys, completing draft engineering plans and specifications for NRCS review, completing final engineering plans and specifications, completing quality assurance plan, solicit bids, award contract, issue notice to proceed, and complete construction.

19. Prior to commencement of work and/or solicitation of bids, submit for NRCS review, the preliminary design, construction specifications, and engineering drawings prepared in accordance with standard engineering principles and design parameters set forth in the pre-design conference.

20. Upon receiving comments from NRCS, prepare the final design, construction specifications, and engineering drawings in accordance with standard engineering principles that comply with NRCS programmatic principles and design parameters set forth in the pre-design conference. One set of the final plans and specifications shall be submitted to NRCS for final review and concurrence prior to solicitation of bids and/or commencement of work. The final construction plans and specifications shall be signed and sealed by a licensed Professional Engineer registered in the State of Florida (Not required for debris removal only sites). A copy of the signed and seal plans and specifications shall be provided to NRCS.

21. Prior to commencement of work and/or solicitation of bids, submit for NRCS review and concurrence a Quality Assurance Plan (QAP). The QAP shall outline technical and administrative expertise required to ensure the EWP project measures are installed in accordance with the plans and specifications, identify individuals with the expertise, describe items to be inspected, list equipment required for inspection, outline the frequency and timing of inspection (continuous or periodic), outline inspection procedures, and record keeping requirements. A copy of the final QAP shall be provided to NRCS prior to commencement of construction.

22. Provide construction inspection in accordance with the QAP.

23. Prepare and submit for NRCS concurrence an Operation and Maintenance (O&M) Plan, if applicable (Not required for debris removal only sites) , prior to commence of work. The O&M Plan shall describe the activities the Sponsor will do to ensure the project performs as designed. Upon completion of the project measures, the Sponsor shall assume responsibility for O&M.

24. Provide copies of site maps to appropriate Federal and State agencies for environmental review. Sponsor will notify NRCS of environmental clearance, modification of construction plans, or any unresolved concerns as well as copies of all permits, licenses, and other documents required by Federal, state, and local statutes and ordinances prior to solicitation for installation of the EWP project measures. All modifications to the plans and specifications shall be reviewed and concurred on by NRCS.

25. Ensure that any special requirements for compliance with environmental and/or cultural resource laws are incorporated into the project.

26. The Sponsor must secure at its own expense all Federal, State, and local permits and licenses necessary for completion of the work described in this agreement as well as any necessary natural resource rights and provide copies of all permits and licenses obtained to NRCS.

27. Will arrange and pay for any necessary location, removal, or relocation of utilities. EWP program regulations prohibit NRCS from reimbursing the Sponsor or otherwise paying for any such costs; nor do the costs qualify as a Sponsor cost-share contribution.

28. Ensure that technical and engineering standards and specifications of NRCS are adhered to during construction of the Project, as interpreted by NRCS Government Representative (GR). Provide NRCS Program/Technical Contact and GR progress reports every 2 weeks after execution of the agreement. Progress reports should include work accomplished for the period, technical on-site inspections, work planned, results of material tests, deficient work products and/or tests with corrective actions taken, modifications anticipated, technical problems encountered, contractual issues and other relevant information.

29. Ensure that all contractors on NRCS assisted projects are performing their work in accordance with OSHA regulations and the Contract Work Hours and Safety Standards Act (40 USC 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). The Sponsor is responsible for periodically checking the contractor's compliance with safety requirements.

30. Arrange for and conduct final inspection of completed project with NRCS to determine whether all work has been performed in accordance with contractual requirements. Provide a Professional Engineer (PE) certification that the Project was installed in accordance with approved plans and specifications. For debris removal only sites, certification does not need to be from a PE.

31. Provide PE-certified as-built drawings and quantities for the project. A copy of the as-built drawings will be submitted to the NRCS Program/Technical Contact. For debris removal only sites, as-built drawings do not need to be certified by a PE.

32. Pay the contractor(s) for work performed in accordance with the agreement and submit a SF-270, "Request for Advance or Reimbursement" to the NRCS Program/Technical Contact with all documentation to support the request. Payments can be requested as frequently as monthly. Final payment request shall be submitted within 90 calendar days of completion of the EWP project measures. Payments will be withheld until all required documentation is submitted and complete.

a. The required supporting documentation for reimbursement of construction costs include invoices and proof of payment to the contractor showing the items and quantities installed and certified by the engineer of record along with any supporting documentation such as quantity calculations, rock weight tickets, etc.

b. The required supporting documentation for reimbursement of in-kind construction expenses will include employee time sheets, employee hourly rate, equipment operating logs, equipment hourly rate, and material quantities and invoices.

c. The required documentation for reimbursement of technical and administrative services will be invoices and proof or payment to consultants and/or employee time sheets along with the employee's hourly rate, hours worked, and date work was performed.

33. Ensure that information in the System for Award Management (SAM) is current and accurate until the final financial report (SF-425) under this award or final payment is received, whichever is later.

34. Take reasonable and necessary actions to dispose of all contractual and administrative issues arising out of the contract(s) awarded under this Agreement. This includes, but is not limited to disputes, claims, protests of award, source evaluation, and litigation that may result from the Project. Such actions will be at the expense of the Sponsor, including any legal expenses. The Sponsor will advise, consult with, and obtain prior written concurrence of NRCS on any litigation matters in which NRCS could have a financial interest.

35. Sponsor must indemnify and hold NRCS harmless to the extent permitted by State law for any costs, damages, claims, liabilities, and judgments arising from past, present, and future acts or omissions of the Sponsor in connection with its acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement. Further, the Sponsor agrees that NRCS will have no responsibility for acts and omissions of the Sponsor, its agents, successors, assigns, employees, contractors, or lessees in connection with the acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement that result in violation of any laws and regulations that are now or that may in the future become applicable.

36. Retain all records dealing with the award and administration of the contract(s) for 3 years from the date of the Sponsor's submission of the final request for reimbursement or until final audit findings have been resolved, whichever is longer. If any litigation is started before the expiration of the 3-year period, records are to be retained until the litigation is resolved or the end of the 3-year period, whichever is longer. Make such records available to the Comptroller General of the United States or his or her duly authorized representative and accredited representatives of the Department of

Agriculture or cognizant audit agency for the purpose of making audit, examination, excerpts, and transcriptions.

37. Be liable to the NRCS for damages sustained by the NRCS as a result of the contractor failing to complete the work within the specified time. The damages will be based upon the additional costs incurred by the NRCS resulting from the contractor not completing the work within the allowable performance period. These costs include but are not limited to personnel costs, travel, etc. The NRCS will have the right to withhold such amount out of any monies that may be then due or that may become due and payable to the Sponsor. This liability is not applicable to the extent that the contract performance time is extended by court judgment unless such judgment results from actions of the Sponsor not concurred in by NRCS.

38. Take necessary legal action, including bringing suit, to collect from the contractor any monies due in connection with the contract, or upon request of NRCS, assign and transfer to NRCS any or all claims, demands, and causes of action of every kind whatsoever that the Sponsor has against the contractor or his or her sureties.

39. Submit requests for a time extension to the agreement (if necessary) in writing no less than forty-five (45) days prior to the expiration date of the agreement. Submit the written, signed request to the NRCS Program/Technical Contact.

B. NRCS will—

1. Assist Sponsor in establishing design parameters; determine eligible construction costs during the pre-design conference.

2. Designate a Government representative (GR) to serve as liaison with the Sponsor and identify that person's contact information with this executed agreement.

3. Review, comment and concur in preliminary and final plans, specifications, O&M Plan, Plan of Operations (if required) and QAP.

4. Make periodic site visits during the installation of the EWP project measures to review construction progress, document conformance to engineering plans and specifications, and provide any necessary clarification on the Sponsor's responsibilities.

5. Upon notification of the completion of the EWP project measures, NRCS shall promptly review the performance of the Sponsor to determine if the requirements of this agreement and fund expenditures as agreed have been met.

6. Make payment to the Sponsor covering NRCS' share of the cost upon receipt and approval of Form SF-270 and supporting documentation, withholding the amount of damages sustained by NRCS as provided for in this agreement. In the event there are questions regarding the SF 270 and supporting documentation, NRCS will contact the Sponsor in a timely manner to resolve concerns.

SPECIAL PROVISIONS

A. The furnishing of financial, administrative, and/or technical assistance above the original funding amount by NRCS is contingent on there being sufficient unobligated and uncommitted funding in the Emergency Watershed Protection Program that is available for obligation in the year in which the assistance will be provided. NRCS may not make commitments in excess of funds authorized by law or made administratively available. Congress may impose obligational limits on program funding that constrains NRCS's ability to provide such assistance.

B. In the event of default of a construction contract awarded pursuant to this agreement, any additional funds properly allocable as construction costs required to ensure completion of the job are to be provided in the same ratio as construction funds are contributed by the parties under the terms of this agreement. Any excess costs including interest resulting from a judgment collected from the defaulting contractor, or his or her surety, will be prorated between the Sponsor and NRCS in the same ratio as construction funds are contributed under the terms of the agreement.

C. Additional funds, including interest properly allocable as construction costs as determined by NRCS, required as a result of decision of the CO or a court judgment in favor of a claimant will be provided in the same ratio as construction funds are contributed under the terms of this agreement. NRCS will not be obligated to contribute funds under any agreement or commitment made by the Sponsor without prior concurrence of NRCS.

D. The State Conservationist may make adjustments in the estimated cost to NRCS set forth in this agreement for constructing the EWP measures. Such adjustments may increase or decrease the amount of estimated funds that are related to differences between such estimated cost and the amount of the awarded contract or to changes, differing site conditions, quantity variations, or other actions taken under the provisions of the contract. No adjustment will be made to change the cost sharing assistance provided by NRCS as set forth in this agreement, nor reduce funds below the amount required to carry out NRCS' share of the contract.

E. Except for item D. above, this document may be revised as mutually agreed through a written amendment duly executed by authorized officials of all signatory parties to this agreement.

F. NRCS, at its sole discretion, may refuse to cost share should the Sponsor, in administering the contract, elect to proceed without obtaining concurrence as set out in this agreement.

G. Once the project is completed and all requests for reimbursement submitted, any excess funding remaining in the agreement will be de-obligated from the agreement.

H. If inconsistencies arise between the language in the Statement of Work (SOW) in the agreement and the general terms and conditions, the language in the SOW takes precedence.

Expected Accomplishments and Deliverables

The following accomplishments and deliverable will be provided to NRCS.

1. One copy of the final engineering plans, specifications signed and sealed by a licensed professional engineer (if applicable), including engineer's cost estimate, and approved Plan of Operations (if applicable).
2. Signed NRCS-ADS-78 supported by an attorney's opinion.
3. One copy of the quality assurance plan.
4. One copy of the operation and maintenance plan (if applicable).
5. One copy of the notice of solicitation, bid abstract, and notice of award.
6. Certification that the project was installed in accordance with the plans and specifications.
7. As-built drawings of final construction signed by a licensed professional engineer within 30 days of completion of construction.
8. Quantities of the units of work applied for each site within 45 days of completion of construction.

Resources Required

No resources other than funding.

Milestones

Milestones shall include, but not limited to, the following items:

1. Pre-design conference within 30 days of signing agreement.
2. Submit to NRCS a schedule with time lines of major items to be completed within 14 days of the pre-design conference.
3. Acquire needed real property rights and permits (signed NRCS-ADS-78 supported by an attorney's opinion) prior to start of construction.
4. Obtain permits.
5. Complete any necessary surveys.
6. Complete draft engineering plans and specifications for NRCS review.
7. Complete final engineering plans and specifications.
8. Complete quality assurance plan and operation and maintenance plan (if applicable).
9. Solicit bids.
10. Award contract.
11. Manage construction contract and provide quality assurance as described in the QAP.
12. Provide final inspection.
13. Complete as-built drawings.
14. Submit final payment.

GENERAL TERMS AND CONDITIONS

Please reference the below link(s) for the General Terms and Conditions pertaining to this award:

NATURAL RESOURCES CONSERVATION SERVICE U.S. DEPARTMENT OF AGRICULTURE

GENERAL TERMS AND CONDITIONS GRANTS AND COOPERATIVE AGREEMENTS

I. APPLICABLE REGULATIONS

a. The recipient, and recipients of any subawards under this award, agree to comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 25, "Universal Identifier and System of Award Management" (2) 2 CFR Part 170, "Reporting Subaward and Executive Compensation Information" (3) 2 CFR Part 180, "OMB Guidelines To Agencies On Governmentwide Debarment And Suspension (Nonprocurement)" (4) 2 CFR Part 182, "Governmentwide Requirements for Drug-Free Workplace (Financial Assistance)" (5) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles, And Audit Requirements for Federal Awards"

b. The recipient, and recipients of any subawards under this award, assure and certify that they have and/or will comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 175, "Award Term for Trafficking in Persons" (2) 2 CFR Part 417, "Nonprocurement Debarment and Suspension" (3) 2 CFR Part 418, "New Restrictions on Lobbying" (4) 2 CFR Part 421, "Requirements for Drug-Free Workplace (Financial Assistance)"

c. Allowable project costs will be determined in accordance with the authorizing statute, the purpose of the award, and to the extent applicable to the type of organizations receiving the award, regardless of tier. The following portions of the Code of Federal Regulations are hereby incorporated by reference. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles And Audit Requirements For Federal Awards" (2) 48 CFR Part 31, "Contract Cost Principles and Procedures"

II. UNALLOWABLE COSTS

The following costs are not allowed:

a. Costs above the amount authorized for the project b. Costs incurred after the expiration of the award including any no-cost extensions of time c. Costs that lie outside the scope of the approved project and any amendments thereto d. Compensation for injuries to persons or damage to property arising from project activities

This list is not exhaustive. For general information about the allowability of particular items of costs, please see 2 CFR Part 200, "Subpart E – Cost Principles", or direct specific inquiries to the NRCS administrative contact identified in the award.

III. CONFIDENTIALITY

a. Activities performed under this award may involve access to confidential and potentially sensitive information about governmental and landowner issues. The term "confidential information" means proprietary information or data of a personal nature about an individual, or information or data submitted by or pertaining to an organization. This information must not be disclosed without the prior written consent of NRCS.

b. The recipient's personnel will follow the rules and procedures of disclosure set forth in the Privacy Act of 1974, 5 U.S. C. Section 552a, and implementing regulations and policies with respect to systems of records determined to be subject to the Privacy Act. The recipient's personnel must also comply with privacy of personal information relating to natural resources conservation programs in accordance with section 1244 of Title II of the Farm Security and Rural Investment Act of 2002 (Public Law 107-171).

c. The recipient agrees to comply with NRCS guidelines and requirements regarding the disclosure of information protected under Section 1619 of the Food, Conservation, and Energy Act of 2008 (PL 110-246), U.S.C. 8791.

d. The recipient agrees to comply with the "Prohibition Against Certain Internal Confidentiality Agreements:"

1. You may not require your employees, contractors, or subrecipients seeking to report fraud, waste, or abuse to sign or comply with internal confidentiality agreements or statements prohibiting or otherwise restricting them from lawfully reporting that waste, fraud, or abuse to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information. 2. You must notify your employees, contractors, or subrecipients that the prohibitions and restrictions of any internal confidentiality agreements inconsistent with paragraph (1) of this award provision are no longer in effect. 3. The prohibition in paragraph (1) of this award provision does not contravene requirements applicable to any other form issued by a Federal department or agency governing the nondisclosure of classified information. 4. If NRCS determines that you are not in compliance with this award provision, NRCS: a. Will prohibit your use of funds under this award, in accordance with sections 743 and 744 of Division E of the Consolidated Appropriations Act, 2016, (Pub. L. 114-113) or any successor provision of law; b. May pursue other remedies available for your material failure to comply with award terms and conditions.

IV. PRIOR APPROVAL REQUIREMENTS

The following are the most common situations requiring prior approval. However, the recipient is also bound by any other prior approval requirements of the applicable administrative provisions and Federal cost principles.

a. Purpose or Deliverables.—When it is necessary for the recipient to modify the purpose or deliverables, the recipient must submit a written request and justification for the change along with the revised purpose or deliverables of the award to the NRCS administrative contact. The request should contain the following: 1. Grant or agreement number 2. Narrative explaining the requested modification to the project purpose or deliverables 3. A description of the revised purpose or deliverables 4. Signatures of the authorized representative, project director, or both

b. Subaward/contractual Arrangement.—The recipient must submit a justification for the proposed subaward/contractual arrangements, a statement of work to be performed, and a detailed budget for the subaward/contract to the NRCS administrative contact. Subaward/contractual arrangements disclosed in the application do not require additional postaward approval.

c. Absence or Change in Project Leadership.—When a project director or the person responsible for the direction or management of the project—

1. Relinquishes active direction of the project for more than 3 consecutive months or has a 25 percent or more reduction in time devoted to the project, the grantee must notify the NRCS administrative contact in writing, identifying who will be in charge during the project director's absence. The notification must include the qualifications and the signature of the replacement, signifying his or her willingness to serve on the project.

2. Severs his or her affiliation with the grantee, the grantee's options include— i. Replacing the project director. The grantee must request written approval of the replacement from the NRCS administrative contact and must include the qualifications and the signature of the replacement signifying his or her willingness to serve on the project. ii. Subcontracting to the former project director's new organization. The grantee must request approval from the administrative contact to replace the project manager and retain the award, and to subcontract to the former project director's new organization certain portions of the project to be completed by the former project director. iii. Relinquishing the award. The grantee must submit to the NRCS administrative contact a signed letter by the grantee and the project director that indicates that the grantee is relinquishing the award. The letter must include the date the project director is leaving and a summary of progress to date. A final Standard Form (SF) 425 reflecting the total amount of funds spent by the recipient must be attached to the letter.

3. Transfers the award to his or her new organization, the authorized organization's representative at the new organization must submit the following to the NRCS administrative contact as soon as the transfer date is firm and the amount of funds to be transferred is known: i. The forms and certifications included in the application package ii. A project summary and work statement covering the work to be completed under the project (deliverables and objectives must be the same as those outlined in the approved proposal) iii. An updated qualifications statement for the project director showing his or her new organizational affiliation iv. Any cost-sharing requirements under the original award transfer to the new institution; therefore, cost-sharing information must be included in the proposal from the new organization

Note: The transfer of an award from one organization to another can take up to 90 calendar days to accomplish, which may result in a delay in the project director resuming the project at the new organization.

d. Budget Revisions.—Budget revisions will be in accordance with 2 CFR Part 200.308.

e. No-Cost Extensions of Time.—When a no-cost extension of time is required, the recipient must submit a written request to the NRCS administrative contact no later than 30 calendar days before the expiration date of the award. The request must contain the following: The length of additional time required to complete the project and a justification for the extension A summary of progress to date An estimate of funds expected to remain unobligated on the scheduled expiration date A projected timetable to complete the portions of the project for which the extension is being requested Signature of the grantee and the project director A status of cost sharing to date (if applicable)

Note: An extension will not exceed 12 months. Requests for no-cost extensions received after the expiration of the award will not be granted. V. PAYMENTS

a. Payment by NRCS to the entity will be made monthly or quarterly (whichever is mutually agreed upon by both parties) on a reimbursable or advanced basis upon completion of work outlined herein. Payment will be executed upon the submission of a properly executed form SF-270 with supporting documentation. The SF-270 must cite the agreement number, remittance address, and billing period. The SF-270 must be sent to the NRCS administrative contact at the email address identified in block 8 of the Notice of Grant/Agreement Award.

b. Unless otherwise specified in the award, the recipient must receive payments through electronic funds transfers.

c. Recipients requesting advances should request payments in amounts necessary to meet their current needs pursuant to procedures contained in the Federal administrative provisions and 31 CFR Part 205.

d. The method of payment between the recipient and its contractors will be in accordance with the policies and procedures established by the recipient except that the contractors may not use the USDA Office of Financial Management/National Finance Center method to request payments. If the grantee makes advance payments to contractors, the grantee must ensure that the timing of such payments is designed to minimize elapsed time between the advance payment and the disbursement of funds. Payment requests from the grantee's contractors will not be sent to NRCS for review or approval.

e. Accounting records for all costs incurred under this award must be supported by source documentation. Such documentation includes, but is not limited to, canceled checks, paid bills, payroll records, and subaward documents. Labor cost charges to this award must be based upon salaries actually earned and the time actually worked on this award. All project costs must be incurred within the approved project period of this award, including any approved no-cost extension of time. Costs that cannot be supported by source documentation or that are incurred outside of the approved project period and budget may be disallowed and may result in award funds being returned to the Federal Government by the recipient.

VI. ACCRUALS

a. Recipients must submit an accrual estimate to the NRCS Program/Technical no later than 15 calendar days prior to the end of the quarter (submit by March 15, June 15, September 15 and December 15th). b. An accrual represents the value of goods or services provided to NRCS for which you have not requested payment. The quality and completeness of NRCS audited financial statements depends on your continuing cooperation and timely information. c. At a minimum, the signed accrual statement should include, "Under agreement number ____, at the close of the quarter ending ____, we have provided or anticipate providing goods or services that we have not requested payment for in the amount of $_____." Include the name and title of the person preparing the accrual estimate.

VII. FINANCIAL REPORTING

a. Recipients must submit a Federal Financial Report (FFR), SF 425 and 425A, in accordance with the following schedule:

Quarterly Schedule Report Due Date October 1 to December 31 January 31 January 1 to March 31 April 30 April 1 to June 30 July 31 July 1 to September 30 October 31

Reports must be submitted on an accrual accounting basis. Failure to submit reports in accordance with the above schedule may result in suspension or termination of award.

b. A final Report must be submitted no later than 90 calendar days after the completion of the award. For final FFRs, reporting end date must be the end date of the project or agreement period. The reports should be submitted to the NRCS administrative contact identified in award notifications.

VIII. PERFORMANCE MONITORING AND REPORTING

a. The recipient is responsible for monitoring day-to-day performance and for reporting to NRCS. If the project involves subaward arrangements, the recipient is also responsible for monitoring the performance of project activities under those arrangements to ensure that approved goals and schedules are met.

b. Every 6 months the recipient must submit a written progress report. Each report must cover— 1. A comparison of actual accomplishments with the goals and objectives established for the reporting period and, where project output can be quantified, a computation of the costs per unit of output.

2. The reasons why goals and objectives were not met, if appropriate.

3. Additional pertinent information including, where appropriate, analysis and explanation of cost overruns or high unit cost.

c. The recipient must submit a final performance report within 90 calendar days after completion of project.

IX. AUDIT REQUIREMENTS

The recipient is responsible for complying with audit requirements in accordance with 2 CFR 200, Subpart F. A non-Federal entity that expends $750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single or program-specific audit conducted for that year.

X. SPECIAL PROVISIONS

a. The recipient assures and certifies that it will comply with the minimum-wage and maximum- hour provisions of the Federal Fair Labor Standards Act.

b. Employees of NRCS will participate in efforts under this agreement solely as representatives of the United States. To this end, they may not participate as directors, officers, employees, or otherwise serve or hold themselves out as representatives of the recipient. They also may not assist the recipient with efforts to lobby Congress or to raise money through fundraising efforts. Further, NRCS employees must report to their immediate supervisor any negotiations with the recipient concerning future employment and must refrain from participation in efforts regarding such parties until approved by the agency.

c. Employees of the recipient will not be considered Federal employees or agents of the United States for any purposes under this agreement.

XI. PATENTS, INVENTIONS, COPYRIGHTS, AND ACKNOWLEDGMENT OF SUPPORT AND DISCLAIMER

a. Allocation of rights of patents, inventions, and copyrights must be in accordance with 2 CFR Part 200.315. This regulation provides that small businesses normally may retain the principal worldwide patent rights to any invention developed with USDA support.

b. In accordance with 37 CFR Section 401.14, each subject invention must be disclosed to the Federal agency within 2 months after the inventor discloses it in writing to contractor personnel responsible for patent matters. Invention disclosure statements pursuant to 37 CFR Section 401.14(c) must be made in writing to:

Acquisitions Division Grants and Agreements Services Branch 1400 Independence Avenue, SW. Room 6823 South Building Washington, DC 20250

c. USDA receives a royalty-free license for Federal Government use, reserves the right to require the patentee to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must manufacture it domestically.

d. The following acknowledgment of NRCS support must appear in the publication of any material, whether copyrighted or not, and any products in electronic formats (World Wide Web pages, computer programs, etc.) that is substantially based upon or developed under this award:

• "This material is based upon work supported by the Natural Resources Conservation Service, U.S. Department of Agriculture, under number [recipient should enter the applicable award number here]."

In addition, all publications and other materials, except scientific articles or papers published in scientific journals, must include the following statement:

• "Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the U.S. Department of Agriculture."

e. All publications printed with Federal Government funds will include the most current USDA nondiscrimination statement, available from the Public Affairs Division, Civil Rights Division, or on the USDA and NRCS home pages. If the material is too small to permit the full nondiscrimination statement to be included, the material must, at a minimum, include the statement:

• "USDA is an equal opportunity provider and employer." Any publication prepared with funding from this agreement must include acknowledgement to USDA, Natural Resources Conservation Service."

The recipient is responsible for ensuring that an acknowledgment of NRCS is made during news media interviews, including popular media such as radio, television, and news magazines, that discuss in a substantial way work funded by this award.

XII. COST-SHARING REQUIREMENTS

a. If the award has specific cost-sharing requirements, the cost-sharing participation in other projects may not be counted toward meeting the specific cost-share requirement of this award, and must come from non-Federal sources unless otherwise stated in the applicable program announcement.

b. Should the recipient become aware that it may be unable to provide the cost-sharing amount identified in this award, it must— 1. Immediately notify the NRCS administrative contact of the situation. 2. Specify the steps it plans to take to secure replacement cost sharing. 3. Indicate the plans to either continue or phase out the project in the absence of cost sharing.

c. If NRCS agrees to the organization's proposed plans, the recipient will be notified accordingly. If the organization's plans are not acceptable to NRCS, the award may be subject to termination. NRCS modifications to proposed cost sharing revisions are made on a case-by-case basis.

d. Failure by the recipient to notify NRCS in accordance with paragraph (b) above may result in the disallowance of some or all the costs charged to the award, the subsequent recovery by NRCS of some of the NRCS funds provided under the award, and possible termination of the award, and may constitute a violation of the terms and conditions of the award so serious as to provide grounds for subsequent suspension or debarment.

e. The recipient must maintain records of all project costs that are claimed by the recipient as cost sharing as well records of costs to be paid by NRCS. If the recipient's cost participation includes in-kind contributions, the basis for determining the valuation for volunteer services and donated property must be documented.

XIII. PROGRAM INCOME

Income derived from patents, inventions, or copyrights will be disposed of in accordance with the recipient's own policies. General program income earned under this award during the period of NRCS support must be added to total project funds and used to further the purpose and scope of this award or the legislation under which this award is made.

XIV. NONEXPENDABLE EQUIPMENT

Recipients purchasing equipment or products with funds provided under this award are encouraged to use such funds to purchase only American-made equipment and products. Title to nonexpendable equipment purchased with award funds will vest in the recipient upon completion of the award project and acceptance by NRCS of required final reports. When equipment is no longer needed by the recipient and the per-unit fair market value is less than $5,000, the recipient may retain, sell, or dispose of the equipment with no further obligation to NRCS. However, if the per-unit fair market value is $5,000 or more, the recipient must submit a written request to the NRCS administrative contact for disposition instructions.

XV. LIMIT OF FEDERAL LIABILITY

The maximum financial obligation of NRCS to the recipient is the amount of funds indicated in the award as obligated by NRCS. However, in the event that an erroneous amount is stated on the approved budget, or any supporting document relating to the award, NRCS will have the unilateral right to make the correction and to make an appropriate adjustment in the NRCS share of the award to align with the Federal amount authorized.

XVI. MODIFICATIONS AND TERMINATIONS

NRCS may amend or modify the award through an exchange of correspondence between authorized officials of the recipient and NRCS. The award is subject to termination if NRCS determines that the recipient has failed to comply with the terms and conditions of the award. In the event that the award is terminated, the financial obligations of the parties

will be those set forth in 2 CFR Part 200.339.

XVII. AWARD CLOSEOUT

Award closeout is the process by which NRCS determines that all required project activities have been performed satisfactorily and all necessary administrative actions have been completed.

NONDISCRIMINATION STATEMENT

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, SW., Washington, DC 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

PRIVACY ACT STATEMENT

The above statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. Section 522a).

BCC Approved 08-16-2018

Approved as to form and legal sufficiency.

Statement of Work

Purpose

The purpose of this agreement is for the United States Department of Agriculture, Natural Resources Conservation Service, hereinafter referred to as the "NRCS", to provide technical and financial assistance to Escambia County Board of County Commissioners, hereinafter referred to as the "Sponsor", for EWP Project # 5073 (Hurricane Harvey) in Escambia County, Florida for implementation of recovery measures, that, if left undone, pose a risk to life and/or property.

Objectives

The design and installation of EWP measures as detailed in the individual Damage Survey Report (DSR) and described here:

DSR No. ESC-HAR-001 – Grade Stabilization of Motley Court Gully = $761,094

Total Estimated Construction Cost = $761,094

Budget Narrative

A. The estimated costs for the Project:

1. Total Estimated Project Budget: $837,203.40

The budget includes:

Financial Assistance (FA) Costs:
Construction Costs (75% NRCS $570,820.50 + 25% Sponsor $190,273.50): $761,094

Technical Assistance (TA) Costs:
100% NRCS (10.0% of total construction cost): $76,109.40

2. NRCS pays up to 75 percent of eligible construction costs, and Sponsor pays 25 percent of construction costs. NRCS will contribute up to 10.0 percent of the total construction cost for design services, contract administration and construction management costs. It is possible that technical and administrative costs will exceed this amount, requiring the Sponsor to contribute resources to complete technical and administrative work.

3. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for financial assistance (FA) and one for technical assistance (TA). FA costs are associated with construction activities; TA costs are associated with services. These expenditures shall be accounted for separately in order for expenses to be eligible for reimbursement.

4. NRCS will provide FA for actual costs as reimbursement to the Sponsor for approved on-the-ground construction costs, subject to above limits. If costs are reduced, reimbursement will be reduced accordingly. Construction costs are associated with the installation of the project measures including labor, equipment and materials.

5. NRCS will provide TA reimbursement to the Sponsor for technical and administrative costs directly charged to the project, subject to the above limits. If costs are reduced, reimbursement will be reduced accordingly. These costs include

a. engineering costs include, but not limited to, developing a project design that includes construction drawings and specifications, an operation and maintenance plan, a quality assurance/inspection plan and an engineer's estimate of the project installation costs in addition to providing necessary quality assurance during construction.

b. contract administration costs include, but not limited to, soliciting, evaluating, awarding and administering contracts for construction and engineering services, including project management, verifying invoices and record keeping.

6. The Sponsor will contribute funds toward the total construction costs in either direct cash expenditures, the value of non-cash materials or services, or in-kind contributions. The value of any in-kind contribution shall be agreed to in

writing prior to implementation.

Responsibilities of the Parties:

A. Sponsor will—

1. Accomplish construction of the EWP project measures by contracting, in-kind construction services, or a combination of both.

2. Ensure and certify by signing this agreement that its cost share obligation is from a non-Federal source.

3. Designate a project liaison to serve between the Sponsor and NRCS and identify that person's contact information with this executed agreement. Any change in the project liaison during the terms of this agreement must be immediately communicated to NRCS.

4. Appoint a contracting officer and an authorized representative who will have authority to act for the contracting officer, listing their duties, responsibilities, and authorities. Furnish such information in writing to the NRCS State Conservationist.

5. Comply with the terms and conditions of this agreement and the attached general terms and conditions except those that are not applicable to State and local governments.

6. Acquire and provide certification to NRCS that real property rights (land and water), permits and licenses in accordance with local, state, and Federal laws necessary for the installation of EWP project measures have been obtained at no cost to NRCS prior to construction. This includes any rights associated with required environmental mitigation. Sponsors shall provide such certification on Form NRCS-ADS-78, Assurances Relating to Real Property Acquisition. Sponsors shall also provide an attorney's opinion supporting this certification. Costs related to land rights and permits are the Sponsor's responsibility and ineligible for reimbursement.

7. Accept all financial and other responsibility for excess costs resulting from their failure to obtain, or their delay in obtaining, adequate land and water rights, permits and licenses needed for the Project.

8. Provide the agreed-to portion of the actual, eligible and approved construction cost. These costs may be in the form of cash, in-kind construction services, or a combination of both. Final construction items that are eligible construction costs will be agreed upon during the pre-design conference. These costs consist of costs from contracts awarded to contractors and eligible Sponsor in-kind construction costs for materials, labor, and equipment. The Sponsor shall provide NRCS documentation to support all eligible construction costs.

9. Be responsible for 100 percent of all ineligible construction costs and 100 percent of any unapproved upgrade to increase the level of protection over and above that described in the DSR.

10. Account for and report FA and TA expenditures separately in order for expenses to be eligible for reimbursement. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for TA and one for FA, requiring this separation.

11. Contract for services and construction in accordance with the Code of Federal Regulations (CFR), 2 CFR § 200.317 through 200.326, applicable State regulations, and the Sponsor's procurement regulations, as appropriate. (See general terms and conditions attached to this agreement for a link to the CFR.) In accordance with 2 CFR § 200.326, contracts must contain the applicable provisions described in Appendix II to Part 200. Davis-Bacon Act would not apply under this Federal program legislation.

12. The contracts for design services and construction described in this Agreement shall not be awarded to the Sponsor or to any firm in which any Sponsor's official or any member of such official's immediate family has direct or indirect interest in the pecuniary profits or contracts of such firms. Reference 2 CFR § 200.318 regarding standards of conduct covering conflicts of interest and governing the performance of its employees engaged in the selection, award, and administration of contracts.

13. Any costs (construction or technical and administrative services) incurred prior to the Sponsor and NRCS signing this agreement are ineligible and will not be reimbursed.

14. For contracts, provide NRCS a copy of solicitation notice, bid abstract, and notice of contract award, or other basis of cost and accomplishment.

15. For in-kind construction services (materials, labor, and/or equipment supplied by the Sponsor), develop a Plan of Operations describing the construction services to be performed including estimated quantities and values. The Plan of Operations shall be concurred in by NRCS at the pre-design conference. In-kind construction services for equipment shall not exceed published FEMA equipment rates unless otherwise documented and concurred in advance by NRCS.

16. The following documentation is required to support the Sponsor's request for reimbursement of in-kind construction services:

a. Invoices covering actual costs of materials used in constructing the eligible EWP project measures.
b. Records documenting the type, quality, and quantities of materials actually used in constructing the eligible EWP project measures.
c. Daily time records for each employee showing name, classification, wage rate, hours, and dates actually employed for constructing the eligible EWP project measures.
d. Equipment operating records showing the type and size of equipment, hourly rate, actual hours of operation and dates used to install the eligible EWP project measures. Equipment idle time is not eligible in-kind construction services, even if on the job site, and should not be included in the equipment operating records.

17. Within thirty (30) calendar days of signing the project agreement, hold a pre-design conference with the Sponsor, Sponsor's design engineer, and NRCS. The design conference shall set forth design parameters concurred by both the Sponsor and NRCS. During the pre-design conference, NRCS will determine the eligible construction costs.

18. Within fourteen (14) calendar days of the pre-design conference submit to NRCS a schedule with time lines of major items to be completed. Milestones shall include, but not limited to, obtaining land rights, obtaining permits, completing any necessary surveys, completing draft engineering plans and specifications for NRCS review, completing final engineering plans and specifications, completing quality assurance plan, solicit bids, award contract, issue notice to proceed, and complete construction.

19. Prior to commencement of work and/or solicitation of bids, submit for NRCS review, the preliminary design, construction specifications, and engineering drawings prepared in accordance with standard engineering principles and design parameters set forth in the pre-design conference.

20. Upon receiving comments from NRCS, prepare the final design, construction specifications, and engineering drawings in accordance with standard engineering principles that comply with NRCS programmatic principles and design parameters set forth in the pre-design conference. One set of the final plans and specifications shall be submitted to NRCS for final review and concurrence prior to solicitation of bids and/or commencement of work. The final construction plans and specifications shall be signed and sealed by a licensed Professional Engineer registered in the State of Florida (Not required for debris removal only sites). A copy of the signed and seal plans and specifications shall be provided to NRCS.

21. Prior to commencement of work and/or solicitation of bids, submit for NRCS review and concurrence a Quality Assurance Plan (QAP). The QAP shall outline technical and administrative expertise required to ensure the EWP project measures are installed in accordance with the plans and specifications, identify individuals with the expertise, describe items to be inspected, list equipment required for inspection, outline the frequency and timing of inspection (continuous or periodic), outline inspection procedures, and record keeping requirements. A copy of the final QAP shall be provided to NRCS prior to commencement of construction.

22. Provide construction inspection in accordance with the QAP.

23. Prepare and submit for NRCS concurrence an Operation and Maintenance (O&M) Plan, if applicable (Not required for debris removal only sites) , prior to commence of work. The O&M Plan shall describe the activities the Sponsor will do to ensure the project performs as designed. Upon completion of the project measures, the Sponsor shall assume responsibility for O&M.

24. Provide copies of site maps to appropriate Federal and State agencies for environmental review. Sponsor will notify NRCS of environmental clearance, modification of construction plans, or any unresolved concerns as well as copies of all permits, licenses, and other documents required by Federal, state, and local statutes and ordinances prior to solicitation for installation of the EWP project measures. All modifications to the plans and specifications shall be reviewed and concurred on by NRCS.

25. Ensure that any special requirements for compliance with environmental and/or cultural resource laws are incorporated into the project.

26. The Sponsor must secure at its own expense all Federal, State, and local permits and licenses necessary for completion of the work described in this agreement as well as any necessary natural resource rights and provide copies of all permits and licenses obtained to NRCS.

27. Will arrange and pay for any necessary location, removal, or relocation of utilities. EWP program regulations prohibit NRCS from reimbursing the Sponsor or otherwise paying for any such costs; nor do the costs qualify as a Sponsor cost-share contribution.

28. Ensure that technical and engineering standards and specifications of NRCS are adhered to during construction of the Project, as interpreted by NRCS Government Representative (GR). Provide NRCS Program/Technical Contact and GR progress reports every 2 weeks after execution of the agreement. Progress reports should include work accomplished for the period, technical on-site inspections, work planned, results of material tests, deficient work products and/or tests with corrective actions taken, modifications anticipated, technical problems encountered, contractual issues and other relevant information.

29. Ensure that all contractors on NRCS assisted projects are performing their work in accordance with OSHA regulations and the Contract Work Hours and Safety Standards Act (40 USC 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). The Sponsor is responsible for periodically checking the contractor's compliance with safety requirements.

30. Arrange for and conduct final inspection of completed project with NRCS to determine whether all work has been performed in accordance with contractual requirements. Provide a Professional Engineer (PE) certification that the Project was installed in accordance with approved plans and specifications. For debris removal only sites, certification does not need to be from a PE.

31. Provide PE-certified as-built drawings and quantities for the project. A copy of the as-built drawings will be submitted to the NRCS Program/Technical Contact. For debris removal only sites, as-built drawings do not need to be certified by a PE.

32. Pay the contractor(s) for work performed in accordance with the agreement and submit a SF-270, "Request for Advance or Reimbursement" to the NRCS Program/Technical Contact with all documentation to support the request. Payments can be requested as frequently as monthly. Final payment request shall be submitted within 90 calendar days of completion of the EWP project measures. Payments will be withheld until all required documentation is submitted and complete.

a. The required supporting documentation for reimbursement of construction costs include invoices and proof of payment to the contractor showing the items and quantities installed and certified by the engineer of record along with any supporting documentation such as quantity calculations, rock weight tickets, etc.

b. The required supporting documentation for reimbursement of in-kind construction expenses will include employee time sheets, employee hourly rate, equipment operating logs, equipment hourly rate, and material quantities and invoices.

c. The required documentation for reimbursement of technical and administrative services will be invoices and proof or payment to consultants and/or employee time sheets along with the employee's hourly rate, hours worked, and date work was performed.

33. Ensure that information in the System for Award Management (SAM) is current and accurate until the final financial report (SF-425) under this award or final payment is received, whichever is later.

34. Take reasonable and necessary actions to dispose of all contractual and administrative issues arising out of the contract(s) awarded under this Agreement. This includes, but is not limited to disputes, claims, protests of award, source evaluation, and litigation that may result from the Project. Such actions will be at the expense of the Sponsor, including any legal expenses. The Sponsor will advise, consult with, and obtain prior written concurrence of NRCS on any litigation matters in which NRCS could have a financial interest.

35. Sponsor must indemnify and hold NRCS harmless to the extent permitted by State law for any costs, damages, claims, liabilities, and judgments arising from past, present, and future acts or omissions of the Sponsor in connection with its acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement. Further, the Sponsor agrees that NRCS will have no responsibility for acts and omissions of the Sponsor, its agents, successors, assigns, employees, contractors, or lessees in connection with the acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement that result in violation of any laws and regulations that are now or that may in the future become applicable.

36. Retain all records dealing with the award and administration of the contract(s) for 3 years from the date of the Sponsor's submission of the final request for reimbursement or until final audit findings have been resolved, whichever is longer. If any litigation is started before the expiration of the 3-year period, records are to be retained until the litigation is resolved or the end of the 3-year period, whichever is longer. Make such records available to the Comptroller General of the United States or his or her duly authorized representative and accredited representatives of the Department of

Agriculture or cognizant audit agency for the purpose of making audit, examination, excerpts, and transcriptions.

37. Be liable to the NRCS for damages sustained by the NRCS as a result of the contractor failing to complete the work within the specified time. The damages will be based upon the additional costs incurred by the NRCS resulting from the contractor not completing the work within the allowable performance period. These costs include but are not limited to personnel costs, travel, etc. The NRCS will have the right to withhold such amount out of any monies that may be then due or that may become due and payable to the Sponsor. This liability is not applicable to the extent that the contract performance time is extended by court judgment unless such judgment results from actions of the Sponsor not concurred in by NRCS.

38. Take necessary legal action, including bringing suit, to collect from the contractor any monies due in connection with the contract, or upon request of NRCS, assign and transfer to NRCS any or all claims, demands, and causes of action of every kind whatsoever that the Sponsor has against the contractor or his or her sureties.

39. Submit requests for a time extension to the agreement (if necessary) in writing no less than forty-five (45) days prior to the expiration date of the agreement. Submit the written, signed request to the NRCS Program/Technical Contact.

B. NRCS will—

1. Assist Sponsor in establishing design parameters; determine eligible construction costs during the pre-design conference.

2. Designate a Government representative (GR) to serve as liaison with the Sponsor and identify that person's contact information with this executed agreement.

3. Review, comment and concur in preliminary and final plans, specifications, O&M Plan, Plan of Operations (if required) and QAP.

4. Make periodic site visits during the installation of the EWP project measures to review construction progress, document conformance to engineering plans and specifications, and provide any necessary clarification on the Sponsor's responsibilities.

5. Upon notification of the completion of the EWP project measures, NRCS shall promptly review the performance of the Sponsor to determine if the requirements of this agreement and fund expenditures as agreed have been met.

6. Make payment to the Sponsor covering NRCS' share of the cost upon receipt and approval of Form SF-270 and supporting documentation, withholding the amount of damages sustained by NRCS as provided for in this agreement. In the event there are questions regarding the SF 270 and supporting documentation, NRCS will contact the Sponsor in a timely manner to resolve concerns.

SPECIAL PROVISIONS

A. The furnishing of financial, administrative, and/or technical assistance above the original funding amount by NRCS is contingent on there being sufficient unobligated and uncommitted funding in the Emergency Watershed Protection Program that is available for obligation in the year in which the assistance will be provided. NRCS may not make commitments in excess of funds authorized by law or made administratively available. Congress may impose obligational limits on program funding that constrains NRCS's ability to provide such assistance.

B. In the event of default of a construction contract awarded pursuant to this agreement, any additional funds properly allocable as construction costs required to ensure completion of the job are to be provided in the same ratio as construction funds are contributed by the parties under the terms of this agreement. Any excess costs including interest resulting from a judgment collected from the defaulting contractor, or his or her surety, will be prorated between the Sponsor and NRCS in the same ratio as construction funds are contributed under the terms of the agreement.

C. Additional funds, including interest properly allocable as construction costs as determined by NRCS, required as a result of decision of the CO or a court judgment in favor of a claimant will be provided in the same ratio as construction funds are contributed under the terms of this agreement. NRCS will not be obligated to contribute funds under any agreement or commitment made by the Sponsor without prior concurrence of NRCS.

D. The State Conservationist may make adjustments in the estimated cost to NRCS set forth in this agreement for constructing the EWP measures. Such adjustments may increase or decrease the amount of estimated funds that are related to differences between such estimated cost and the amount of the awarded contract or to changes, differing site conditions, quantity variations, or other actions taken under the provisions of the contract. No adjustment will be made to change the cost sharing assistance provided by NRCS as set forth in this agreement, nor reduce funds below the amount required to carry out NRCS' share of the contract.

E. Except for item D. above, this document may be revised as mutually agreed through a written amendment duly executed by authorized officials of all signatory parties to this agreement.

F. NRCS, at its sole discretion, may refuse to cost share should the Sponsor, in administering the contract, elect to proceed without obtaining concurrence as set out in this agreement.

G. Once the project is completed and all requests for reimbursement submitted, any excess funding remaining in the agreement will be de-obligated from the agreement.

H. If inconsistencies arise between the language in the Statement of Work (SOW) in the agreement and the general terms and conditions, the language in the SOW takes precedence.

Expected Accomplishments and Deliverables

The following accomplishments and deliverable will be provided to NRCS.

1. One copy of the final engineering plans, specifications signed and sealed by a licensed professional engineer (if applicable), including engineer's cost estimate, and approved Plan of Operations (if applicable).
2. Signed NRCS-ADS-78 supported by an attorney's opinion.
3. One copy of the quality assurance plan.
4. One copy of the operation and maintenance plan (if applicable).
5. One copy of the notice of solicitation, bid abstract, and notice of award.
6. Certification that the project was installed in accordance with the plans and specifications.
7. As-built drawings of final construction signed by a licensed professional engineer within 30 days of completion of construction.
8. Quantities of the units of work applied for each site within 45 days of completion of construction.

Resources Required

No resources other than funding.

Milestones

Milestones shall include, but not limited to, the following items:

1. Pre-design conference within 30 days of signing agreement.
2. Submit to NRCS a schedule with time lines of major items to be completed within 14 days of the pre-design conference.
3. Acquire needed real property rights and permits (signed NRCS-ADS-78 supported by an attorney's opinion) prior to start of construction.
4. Obtain permits.
5. Complete any necessary surveys.
6. Complete draft engineering plans and specifications for NRCS review.
7. Complete final engineering plans and specifications.
8. Complete quality assurance plan and operation and maintenance plan (if applicable).
9. Solicit bids.
10. Award contract.
11. Manage construction contract and provide quality assurance as described in the QAP.
12. Provide final inspection.
13. Complete as-built drawings.
14. Submit final payment.

GENERAL TERMS AND CONDITIONS

Please reference the below link(s) for the General Terms and Conditions pertaining to this award:

NATURAL RESOURCES CONSERVATION SERVICE U.S. DEPARTMENT OF AGRICULTURE

GENERAL TERMS AND CONDITIONS GRANTS AND COOPERATIVE AGREEMENTS

I. APPLICABLE REGULATIONS

a. The recipient, and recipients of any subawards under this award, agree to comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 25, "Universal Identifier and System of Award Management" (2) 2 CFR Part 170, "Reporting Subaward and Executive Compensation Information" (3) 2 CFR Part 180, "OMB Guidelines To Agencies On Governmentwide Debarment And Suspension (Nonprocurement)" (4) 2 CFR Part 182, "Governmentwide Requirements for Drug-Free Workplace (Financial Assistance)" (5) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles, And Audit Requirements for Federal Awards"

b. The recipient, and recipients of any subawards under this award, assure and certify that they have and/or will comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 175, "Award Term for Trafficking in Persons" (2) 2 CFR Part 417, "Nonprocurement Debarment and Suspension" (3) 2 CFR Part 418, "New Restrictions on Lobbying" (4) 2 CFR Part 421, "Requirements for Drug-Free Workplace (Financial Assistance)"

c. Allowable project costs will be determined in accordance with the authorizing statute, the purpose of the award, and to the extent applicable to the type of organizations receiving the award, regardless of tier. The following portions of the Code of Federal Regulations are hereby incorporated by reference. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles And Audit Requirements For Federal Awards" (2) 48 CFR Part 31, "Contract Cost Principles and Procedures"

II. UNALLOWABLE COSTS

The following costs are not allowed:

a. Costs above the amount authorized for the project b. Costs incurred after the expiration of the award including any no-cost extensions of time c. Costs that lie outside the scope of the approved project and any amendments thereto d. Compensation for injuries to persons or damage to property arising from project activities

This list is not exhaustive. For general information about the allowability of particular items of costs, please see 2 CFR Part 200, "Subpart E – Cost Principles", or direct specific inquiries to the NRCS administrative contact identified in the award.

III. CONFIDENTIALITY

a. Activities performed under this award may involve access to confidential and potentially sensitive information about governmental and landowner issues. The term "confidential information" means proprietary information or data of a personal nature about an individual, or information or data submitted by or pertaining to an organization. This information must not be disclosed without the prior written consent of NRCS.

b. The recipient's personnel will follow the rules and procedures of disclosure set forth in the Privacy Act of 1974, 5 U.S. C. Section 552a, and implementing regulations and policies with respect to systems of records determined to be subject to the Privacy Act. The recipient's personnel must also comply with privacy of personal information relating to natural resources conservation programs in accordance with section 1244 of Title II of the Farm Security and Rural Investment Act of 2002 (Public Law 107-171).

c. The recipient agrees to comply with NRCS guidelines and requirements regarding the disclosure of information protected under Section 1619 of the Food, Conservation, and Energy Act of 2008 (PL 110-246), U.S.C. 8791.

d. The recipient agrees to comply with the "Prohibition Against Certain Internal Confidentiality Agreements:"

1. You may not require your employees, contractors, or subrecipients seeking to report fraud, waste, or abuse to sign or comply with internal confidentiality agreements or statements prohibiting or otherwise restricting them from lawfully reporting that waste, fraud, or abuse to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information. 2. You must notify your employees, contractors, or subrecipients that the prohibitions and restrictions of any internal confidentiality agreements inconsistent with paragraph (1) of this award provision are no longer in effect. 3. The prohibition in paragraph (1) of this award provision does not contravene requirements applicable to any other form issued by a Federal department or agency governing the nondisclosure of classified information. 4. If NRCS determines that you are not in compliance with this award provision, NRCS: a. Will prohibit your use of funds under this award, in accordance with sections 743 and 744 of Division E of the Consolidated Appropriations Act, 2016, (Pub. L. 114-113) or any successor provision of law; b. May pursue other remedies available for your material failure to comply with award terms and conditions.

IV. PRIOR APPROVAL REQUIREMENTS

The following are the most common situations requiring prior approval. However, the recipient is also bound by any other prior approval requirements of the applicable administrative provisions and Federal cost principles.

a. Purpose or Deliverables.—When it is necessary for the recipient to modify the purpose or deliverables, the recipient must submit a written request and justification for the change along with the revised purpose or deliverables of the award to the NRCS administrative contact. The request should contain the following: 1. Grant or agreement number 2. Narrative explaining the requested modification to the project purpose or deliverables 3. A description of the revised purpose or deliverables 4. Signatures of the authorized representative, project director, or both

b. Subaward/contractual Arrangement.—The recipient must submit a justification for the proposed subaward/contractual arrangements, a statement of work to be performed, and a detailed budget for the subaward/contract to the NRCS administrative contact. Subaward/contractual arrangements disclosed in the application do not require additional postaward approval.

c. Absence or Change in Project Leadership.—When a project director or the person responsible for the direction or management of the project—

1. Relinquishes active direction of the project for more than 3 consecutive months or has a 25 percent or more reduction in time devoted to the project, the grantee must notify the NRCS administrative contact in writing, identifying who will be in charge during the project director's absence. The notification must include the qualifications and the signature of the replacement, signifying his or her willingness to serve on the project.

2. Severs his or her affiliation with the grantee, the grantee's options include— i. Replacing the project director. The grantee must request written approval of the replacement from the NRCS administrative contact and must include the qualifications and the signature of the replacement signifying his or her willingness to serve on the project. ii. Subcontracting to the former project director's new organization. The grantee must request approval from the administrative contact to replace the project manager and retain the award, and to subcontract to the former project director's new organization certain portions of the project to be completed by the former project director. iii. Relinquishing the award. The grantee must submit to the NRCS administrative contact a signed letter by the grantee and the project director that indicates that the grantee is relinquishing the award. The letter must include the date the project director is leaving and a summary of progress to date. A final Standard Form (SF) 425 reflecting the total amount of funds spent by the recipient must be attached to the letter.

3. Transfers the award to his or her new organization, the authorized organization's representative at the new organization must submit the following to the NRCS administrative contact as soon as the transfer date is firm and the amount of funds to be transferred is known: i. The forms and certifications included in the application package ii. A project summary and work statement covering the work to be completed under the project (deliverables and objectives must be the same as those outlined in the approved proposal) iii. An updated qualifications statement for the project director showing his or her new organizational affiliation iv. Any cost-sharing requirements under the original award transfer to the new institution; therefore, cost-sharing information must be included in the proposal from the new organization

Note: The transfer of an award from one organization to another can take up to 90 calendar days to accomplish, which may result in a delay in the project director resuming the project at the new organization.

d. Budget Revisions.—Budget revisions will be in accordance with 2 CFR Part 200.308.

e. No-Cost Extensions of Time.—When a no-cost extension of time is required, the recipient must submit a written request to the NRCS administrative contact no later than 30 calendar days before the expiration date of the award. The request must contain the following: The length of additional time required to complete the project and a justification for the extension A summary of progress to date An estimate of funds expected to remain unobligated on the scheduled expiration date A projected timetable to complete the portions of the project for which the extension is being requested Signature of the grantee and the project director A status of cost sharing to date (if applicable)

Note: An extension will not exceed 12 months. Requests for no-cost extensions received after the expiration of the award will not be granted. V. PAYMENTS

a. Payment by NRCS to the entity will be made monthly or quarterly (whichever is mutually agreed upon by both parties) on a reimbursable or advanced basis upon completion of work outlined herein. Payment will be executed upon the submission of a properly executed form SF-270 with supporting documentation. The SF-270 must cite the agreement number, remittance address, and billing period. The SF-270 must be sent to the NRCS administrative contact at the email address identified in block 8 of the Notice of Grant/Agreement Award.

b. Unless otherwise specified in the award, the recipient must receive payments through electronic funds transfers.

c. Recipients requesting advances should request payments in amounts necessary to meet their current needs pursuant to procedures contained in the Federal administrative provisions and 31 CFR Part 205.

d. The method of payment between the recipient and its contractors will be in accordance with the policies and procedures established by the recipient except that the contractors may not use the USDA Office of Financial Management/National Finance Center method to request payments. If the grantee makes advance payments to contractors, the grantee must ensure that the timing of such payments is designed to minimize elapsed time between the advance payment and the disbursement of funds. Payment requests from the grantee's contractors will not be sent to NRCS for review or approval.

e. Accounting records for all costs incurred under this award must be supported by source documentation. Such documentation includes, but is not limited to, canceled checks, paid bills, payroll records, and subaward documents. Labor cost charges to this award must be based upon salaries actually earned and the time actually worked on this award. All project costs must be incurred within the approved project period of this award, including any approved no-cost extension of time. Costs that cannot be supported by source documentation or that are incurred outside of the approved project period and budget may be disallowed and may result in award funds being returned to the Federal Government by the recipient.

VI. ACCRUALS

a. Recipients must submit an accrual estimate to the NRCS Program/Technical no later than 15 calendar days prior to the end of the quarter (submit by March 15, June 15, September 15 and December 15th). b. An accrual represents the value of goods or services provided to NRCS for which you have not requested payment. The quality and completeness of NRCS audited financial statements depends on your continuing cooperation and timely information. c. At a minimum, the signed accrual statement should include, "Under agreement number ____, at the close of the quarter ending ____, we have provided or anticipate providing goods or services that we have not requested payment for in the amount of $_____." Include the name and title of the person preparing the accrual estimate.

VII. FINANCIAL REPORTING

a. Recipients must submit a Federal Financial Report (FFR), SF 425 and 425A, in accordance with the following schedule:

Quarterly Schedule Report Due Date October 1 to December 31 January 31 January 1 to March 31 April 30 April 1 to June 30 July 31 July 1 to September 30 October 31

Reports must be submitted on an accrual accounting basis. Failure to submit reports in accordance with the above schedule may result in suspension or termination of award.

b. A final Report must be submitted no later than 90 calendar days after the completion of the award. For final FFRs, reporting end date must be the end date of the project or agreement period. The reports should be submitted to the NRCS administrative contact identified in award notifications.

VIII. PERFORMANCE MONITORING AND REPORTING

a. The recipient is responsible for monitoring day-to-day performance and for reporting to NRCS. If the project involves subaward arrangements, the recipient is also responsible for monitoring the performance of project activities under those arrangements to ensure that approved goals and schedules are met.

b. Every 6 months the recipient must submit a written progress report. Each report must cover— 1. A comparison of actual accomplishments with the goals and objectives established for the reporting period and, where project output can be quantified, a computation of the costs per unit of output.

2. The reasons why goals and objectives were not met, if appropriate.

3. Additional pertinent information including, where appropriate, analysis and explanation of cost overruns or high unit cost.

c. The recipient must submit a final performance report within 90 calendar days after completion of project.

IX. AUDIT REQUIREMENTS

The recipient is responsible for complying with audit requirements in accordance with 2 CFR 200, Subpart F. A non-Federal entity that expends $750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single or program-specific audit conducted for that year.

X. SPECIAL PROVISIONS

a. The recipient assures and certifies that it will comply with the minimum-wage and maximum- hour provisions of the Federal Fair Labor Standards Act.

b. Employees of NRCS will participate in efforts under this agreement solely as representatives of the United States. To this end, they may not participate as directors, officers, employees, or otherwise serve or hold themselves out as representatives of the recipient. They also may not assist the recipient with efforts to lobby Congress or to raise money through fundraising efforts. Further, NRCS employees must report to their immediate supervisor any negotiations with the recipient concerning future employment and must refrain from participation in efforts regarding such parties until approved by the agency.

c. Employees of the recipient will not be considered Federal employees or agents of the United States for any purposes under this agreement.

XI. PATENTS, INVENTIONS, COPYRIGHTS, AND ACKNOWLEDGMENT OF SUPPORT AND DISCLAIMER

a. Allocation of rights of patents, inventions, and copyrights must be in accordance with 2 CFR Part 200.315. This regulation provides that small businesses normally may retain the principal worldwide patent rights to any invention developed with USDA support.

b. In accordance with 37 CFR Section 401.14, each subject invention must be disclosed to the Federal agency within 2 months after the inventor discloses it in writing to contractor personnel responsible for patent matters. Invention disclosure statements pursuant to 37 CFR Section 401.14(c) must be made in writing to:

Acquisitions Division Grants and Agreements Services Branch 1400 Independence Avenue, SW. Room 6823 South Building Washington, DC 20250

c. USDA receives a royalty-free license for Federal Government use, reserves the right to require the patentee to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must manufacture it domestically.

d. The following acknowledgment of NRCS support must appear in the publication of any material, whether copyrighted or not, and any products in electronic formats (World Wide Web pages, computer programs, etc.) that is substantially based upon or developed under this award:

• "This material is based upon work supported by the Natural Resources Conservation Service, U.S. Department of Agriculture, under number [recipient should enter the applicable award number here]."

In addition, all publications and other materials, except scientific articles or papers published in scientific journals, must include the following statement:

• "Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the U.S. Department of Agriculture."

e. All publications printed with Federal Government funds will include the most current USDA nondiscrimination statement, available from the Public Affairs Division, Civil Rights Division, or on the USDA and NRCS home pages. If the material is too small to permit the full nondiscrimination statement to be included, the material must, at a minimum, include the statement:

• "USDA is an equal opportunity provider and employer." Any publication prepared with funding from this agreement must include acknowledgement to USDA, Natural Resources Conservation Service."

The recipient is responsible for ensuring that an acknowledgment of NRCS is made during news media interviews, including popular media such as radio, television, and news magazines, that discuss in a substantial way work funded by this award.

XII. COST-SHARING REQUIREMENTS

a. If the award has specific cost-sharing requirements, the cost-sharing participation in other projects may not be counted toward meeting the specific cost-share requirement of this award, and must come from non-Federal sources unless otherwise stated in the applicable program announcement.

b. Should the recipient become aware that it may be unable to provide the cost-sharing amount identified in this award, it must— 1. Immediately notify the NRCS administrative contact of the situation. 2. Specify the steps it plans to take to secure replacement cost sharing. 3. Indicate the plans to either continue or phase out the project in the absence of cost sharing.

c. If NRCS agrees to the organization's proposed plans, the recipient will be notified accordingly. If the organization's plans are not acceptable to NRCS, the award may be subject to termination. NRCS modifications to proposed cost sharing revisions are made on a case-by-case basis.

d. Failure by the recipient to notify NRCS in accordance with paragraph (b) above may result in the disallowance of some or all the costs charged to the award, the subsequent recovery by NRCS of some of the NRCS funds provided under the award, and possible termination of the award, and may constitute a violation of the terms and conditions of the award so serious as to provide grounds for subsequent suspension or debarment.

e. The recipient must maintain records of all project costs that are claimed by the recipient as cost sharing as well records of costs to be paid by NRCS. If the recipient's cost participation includes in-kind contributions, the basis for determining the valuation for volunteer services and donated property must be documented.

XIII. PROGRAM INCOME

Income derived from patents, inventions, or copyrights will be disposed of in accordance with the recipient's own policies. General program income earned under this award during the period of NRCS support must be added to total project funds and used to further the purpose and scope of this award or the legislation under which this award is made.

XIV. NONEXPENDABLE EQUIPMENT

Recipients purchasing equipment or products with funds provided under this award are encouraged to use such funds to purchase only American-made equipment and products. Title to nonexpendable equipment purchased with award funds will vest in the recipient upon completion of the award project and acceptance by NRCS of required final reports. When equipment is no longer needed by the recipient and the per-unit fair market value is less than $5,000, the recipient may retain, sell, or dispose of the equipment with no further obligation to NRCS. However, if the per-unit fair market value is $5,000 or more, the recipient must submit a written request to the NRCS administrative contact for disposition instructions.

XV. LIMIT OF FEDERAL LIABILITY

The maximum financial obligation of NRCS to the recipient is the amount of funds indicated in the award as obligated by NRCS. However, in the event that an erroneous amount is stated on the approved budget, or any supporting document relating to the award, NRCS will have the unilateral right to make the correction and to make an appropriate adjustment in the NRCS share of the award to align with the Federal amount authorized.

XVI. MODIFICATIONS AND TERMINATIONS

NRCS may amend or modify the award through an exchange of correspondence between authorized officials of the recipient and NRCS. The award is subject to termination if NRCS determines that the recipient has failed to comply with the terms and conditions of the award. In the event that the award is terminated, the financial obligations of the parties

will be those set forth in 2 CFR Part 200.339.

XVII. AWARD CLOSEOUT

Award closeout is the process by which NRCS determines that all required project activities have been performed satisfactorily and all necessary administrative actions have been completed.

AGREEMENT BETWEEN ESCAMBIA COUNTY, FLORIDA AND CHAVERS CONSTRUCTION, INC. FOR STANDARD ROAD/DRAINAGE CONSTRUCTION CONTRACT DOCUMENTS.

THE BOARD OF COUNTY COMMISSIONERS OF ESCAMBIA COUNTY, FLORIDA, ("County"), hereby contracts with Chavers Construction, Inc. a Florida corporation for profit, to perform all work ("Work") in connection with PD 18-19.033, Motley Court Gully Improvements ("Project"), as detailed in the attached Plans and Specifications and other Contract Documents hereafter specified.

SECTION 1. CONTRACT DOCUMENTS

A. The Contract Documents include this Agreement, including Amendments and Exhibits, the Exhibits described in Section 6, Change Orders, Work Directive Changes, Field Orders and the solicitation documents, including addenda. These Contract Documents are incorporated by reference and made a part of this Agreement. A copy of all Contract Documents shall be maintained by Contractor at the Project site at all times during the performance of the Work.

B. In case of any inconsistency or conflict among the provisions of the agreement and any other terms and conditions of any documents comprising the Contract Documents, the provisions of the Agreement shall control. Concerning the Contract Documents, the order of precedence shall be as follows: 1) the Agreement, including Amendments and Exhibits; 2) Change Orders; 3) Work Directive Changes; 4) Field Orders; 5) the Solicitation Documents, including addenda. The Contract Documents listed above represent the entire and integrated agreement between the parties hereto, and supersede prior negotiations, representations, or agreements, either written or oral.

C. County shall furnish to the Contractor up to four (4) sets of the Contract Documents for execution of the Work. Additional copies of the Contract Documents are available at the cost of reproduction.

SECTION 2. SCOPE OF WORK

Contractor agrees to furnish and pay for all management, supervision, financing, labor, materials, tools, fuel, supplies, utilities, equipment and services of every kind and type necessary to diligently, timely, and fully perform and complete in a good workmanlike manner the Work required by the Contract Documents.

SECTION 3. CONTRACT AMOUNT

For satisfactory completion of the Work the County agrees to pay the Contractor the following amount (herein "Contract Amount"), in accordance with the terms of this Agreement:

Five Hundred Sixty-Five Thousand, Two Hundred Twenty-Eight Dollars and Seventy-Eight Cents

$565,228.78

SECTION 4. BONDS

A. Contractor shall provide at his expense Performance and Payment Bonds, in the form prescribed in **Exhibit B**, in the amount of 100% of the Contract Amount. The Performance and Payment Bonds shall be underwritten by a surety authorized to do business in the State of Florida and otherwise acceptable to County; provided; however, the surety shall be rated as "A-" (excellent) or better as to general policy holders rating and Class V or higher rating as to financial size category and the amount required shall not exceed 5% of the reported policy holder's surplus, all as reported in the most current Best Key Rating Guide, published by A.M. Best Company, Inc. of 75 Fulton Street, New York, New York 10038.

B. If the surety for any bond furnished by Contractor is declared bankrupt, becomes insolvent, its right to do business is terminated in the State of Florida, or it ceases to meet the requirements imposed by the Contract Document, the Contractor shall, within five (5) calendar days thereafter, substitute another bond and surety, both of which shall be subject to the County's approval. Failure by Contractor to maintain its bonds in full force and effect at all times, including the warranty period, shall be grounds for termination of this Contract.

C. As per Florida Statutes, Section 255.05, the Contractor shall be required to execute and record the Performance and Payment bonds. The bonds must state the name and principal business address of both the Principal and the Surety and a description of the project sufficient to identify it. (The filing costs are $10.00 for the first page and $8.50 for each remaining page).

SECTION 5. CONTRACT TIME AND LIQUIDATED DAMAGES.

A. Time is of the essence in the performance of the Work under this Agreement. Contractor shall commence the Work within ten (10) calendar days from the Commencement Date, established in the Notice to Proceed. No Work shall be performed at the Project site prior to the Commencement Date. Contractor shall provide 48 hours' notice prior to beginning the Work. The Work shall be substantially completed within One Hundred (100) calendar days from the Commencement Date. The Work shall be fully completed and deemed ready by the County for final completion within Thirty (30) calendar days from the Substantial Completion Date. The Contract Time shall be the time period from the Commencement Date to the date of final completion totaling One Hundred Thirty (130) calendar days (herein "Contract Time"). No work under this contract shall commence until certificates of insurance have been received and acknowledged by the Purchasing Manager.

B. County and Contractor recognize that, since time is of the essence for this Agreement, the County will suffer financial loss if the Work is not substantially completed within the time specified. Should Contractor fail to substantially complete the Work within the time period noted above, County shall be entitled to assess, as liquidated damages, but not as a penalty, **$1,000.00** for each calendar day thereafter until substantial completion is achieved. The Project shall be deemed to be substantially completed by the County on the date that the County's Architect certifies in writing that the construction of the project, or specified part thereof, is sufficiently completed in accordance with the Contract Documents, so that the Project or specified part can be utilized for the purposes for which it is intended. Along with such certification, the Architect shall compile a "punch list" of

any remaining exceptions that do not adversely affect the use of the Project. Completion of these items will be required prior to final payment.

C. Contractor hereby expressly waives and relinquishes any right which it may have to seek to characterize the above noted liquidated damages as a penalty, which the parties agree represents a fair and reasonable estimate of the County's actual damages at the time of contracting if Contractor fails to substantially complete the Work in accordance with the progress schedule.

D. When any period of time is referenced to by days herein, it shall be computed to exclude the first day and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day shall be omitted from the computation, and the last day shall become the next succeeding day which is not a Saturday, Sunday or legal holiday.

SECTION 6. EXHIBITS INCORPORATED

The following documents are expressly agreed to be incorporated by reference and made a part of this Agreement.

Exhibit A: General Terms and Conditions
Exhibit B: Form of Performance and Payment Bonds
Exhibit C: Insurance and Safety Requirements
Exhibit D: Form of Release and Affidavit
Exhibit E: Form of Contractor Application for Payment
Exhibit F: Form of Change Order
Exhibit G: Payment Adjustment - Bituminous Material
Exhibit H: Technical Specifications
Exhibit I: Plans & Standard Details prepared by or for County and Identified as follows:

TITLE SHEET NO. DATE

Exhibit K: Federal Documents (if applicable)
Exhibit L: Solicitation Documents Index

SECTION 7. NOTICES

A. All notices required or made pursuant to this Agreement by the Contractor to the County shall be in writing. All correspondence with the County should be addressed as follows:

Escambia County Public Works - Engineering
3633 West Park Place
Pensacola, Florida 32505
Attention: TJ Williams

B. All correspondence with the Contractor will be addressed to the following:

Chavers Construction, Inc.
1795 Detroit Boulevard
Pensacola, FL 32534
Ryan Chavers, President

C. Either party may change its above noted address by giving written notice to the other party in accordance with the requirements of this Section.

SECTION 8. MODIFICATION

No modification or change to the Agreement shall be valid or binding upon the parties unless in writing and executed by the party or parties intended to be bound by it.

SECTION 9. SUCCESSORS AND ASSIGNS

Subject to other provisions hereof, the Agreement shall be binding upon and shall inure to the benefit of the successors and assigns of the parties to the Agreement.

SECTION 10. GOVERNING LAW

The Agreement shall be interpreted under and its performance governed by the laws of the State of Florida and the parties agree that venue shall be in Escambia County, Florida for any matter which is the subject of this Contract.

SECTION 11. NO WAIVER

The failure of the County to enforce at any time or for any period of time any one or more of the provisions of the Agreement shall not be construed to be and shall not be a waiver of any such provision or provisions or of its right thereafter to enforce each and every such provision.

SECTION 12. ENTIRE AGREEMENT

Each of the parties hereto agrees and represents that the Agreement comprises the full and entire agreement between the parties affecting the Work contemplated, and no other agreement or understanding of any nature concerning the same has been entered into or will be recognized, and that all negotiations, acts, work performed, or payments made prior to the execution hereof shall be deemed merged in, integrated and superseded by the Agreement.

SECTION 13. SEVERABILITY

Should any provision of the Agreement be determined by a court to be unenforceable, such a determination shall not affect the validity or enforceability of any other section or part thereof.

SECTION 14. PUBLIC RECORDS.

The Contractor acknowledges that this Agreement and any related financial records, audits, reports, plans correspondence, and other documents may be subject to disclosure to members of the public pursuant to Chapter 119, Florida Statutes. Contractor shall maintain all such public records and, upon request, provide a copy of the requested records or allow the records to be inspected within a reasonable time. Contractor shall also ensure that any public records that are exempt or exempt and confidential from disclosure are not disclosed except as authorized by law. Upon the expiration or termination of the Agreement, Contractor agrees to maintain all public records for a minimum period of five (5) fiscal years in accordance with the applicable records retention schedules established by the Florida Department of State. In the event the Contractor fails to abide by the provisions of Chapter 119, Florida Statutes, the County

may, without prejudice to any other right or remedy and after giving the Contractor and surety, if any, seven days written notice, during which period the Contractor still fails to allow access to such documents, terminate the contract. In such case, the Contractor shall not be entitled to receive any further payment. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the Contractor (excluding monies owed the Contractor for subcontractor work).

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:

Escambia County
Office of the County Administrator
221 Palafox Place, Suite 420
Pensacola, Florida 32502
(850) 595-4947

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the respective dates under each signature: the parties hereto have made and executed this Agreement on the respective dates under each signature: Escambia County, Florida through its Board of County Commissioners, signing by its County Administrator, duly authorized to execute this Agreement, and Chavers Construction, Inc. signing by and through its President, duly authorized to execute same.

COUNTY:
Escambia County, Florida, a political subdivision of the State of Florida acting by and through its duly authorized Board of County Commissioners.

EXHIBIT A
GENERAL TERMS AND CONDITIONS

Section 1. INTENT OF CONTRACT DOCUMENTS

1.1. It is the intent of the Contract Documents to describe a functionally complete project (or portion thereof) to be constructed in accordance with the Contract Documents. Any work, materials or equipment that may reasonably be inferred from the Contract Documents, as being required to produce the intended result shall be supplied whether or not specifically called for. When words, which have a well-known technical or trade meaning, are used to describe work, materials or equipment, such words shall be interpreted in accordance with that meaning. Reference to standard specifications, manuals or codes of any technical society, organization or association or to the laws or regulations of any governmental authority having jurisdiction over the Project, whether such reference be specific or by implication, shall mean the latest standard specification, manual, code, law or regulation in affect at the time the Work is performed, except as may be otherwise specifically stated herein.

1.1. If, during the performance of the Work, Contractor discovers a conflict, error or discrepancy in the Contract Document, Contractor immediately shall report same to County and before proceeding with the Work affected thereby shall obtain an interpretation or clarification from the County. Contractor shall take field measurements and verify field conditions and shall carefully compare such field measurements and conditions and other information known to Contractor with the Contract Documents before commencing any portion of the Work.

1.2. Drawings are intended to show general arrangements, design and extent of Work and are not intended to serve as shop drawings. Specifications are separated into divisions for convenience of reference only and shall not be interpreted as establishing divisions for the Work, trades, subcontracts, or extent of any part of the Work. In the event of a discrepancy between or among the drawings, specifications of other Contract Document provisions, Contractor shall be required to comply with the provision which is the more restrictive or stringent requirement upon the Contractor, as determined by the County. Unless otherwise specifically mentioned, all anchors, bolts, screws, fittings, fillers, hardware, accessories, trim and other parts required in connection with any portion of the Work to make a complete, serviceable, finished and first quality installation shall be furnished and installed as part of the Work, whether or not called for by the Contract Documents.

1.3. "Engineer", where referenced on the drawings or in the specifications or in other related documents, shall mean the Escambia County Engineer or the designated representative thereof.

Section 1. INVESTIGATION AND UTILITIES

1.1. Contractor shall have the sole responsibility of satisfying itself concerning the nature and location of the Work and the general and local conditions, and particularly, but without limitation, with respect to the following: those affecting transportation, access, disposal, handling and storage of materials; availability and quality of labor; water and electric power; availability and condition of roads; work area; living facilities; climatic conditions and seasons; physical conditions at the work-site and the Project area as a whole; topography and ground surface conditions; nature and quality of the surface materials to be encountered; subsurface conditions; equipment and facilities needed preliminary to and during performance of the Work; and all other costs associated with such performance. The failure of Contractor to acquaint itself with any applicable conditions shall not relieve Contractor from any of its responsibilities to perform under the Contract Documents, nor shall it be considered the basis for any claim for additional time or

compensation.

1.2. Contractor shall locate all existing roadways, railways, drainage facilities and utility services above, upon, or under the Project site, said roadways, railways, drainage facilities and utilities being referred to in this Section 2 as the "Utilities". Contractor shall contact the owners of all Utilities to determine the necessity for relocating or temporarily interrupting any Utilities during the construction of the Project. Contractor shall schedule and coordinate its Work around any such relocation or temporary service interruption. Where Utilities block construction, Contractor shall aggressively pursue relocation by the Utility owners. Contractor shall immediately notify the County of any delays due to Utilities blockage and document all attempts to resolve such blockage. Contractor shall be responsible for properly shoring, supporting and protecting all Utilities at all times during the course of the Work.

Section 2. SCHEDULE

2.1. The Contractor, within ten (10) calendar days after receipt of the Notice of Award, shall prepare and submit to County, for review and approval, a progress schedule for the Project (herein "Progress Schedule"). The Progress schedule may be provided in an electronic format. The Progress Schedule shall relate to all Work required by the Contract Documents and shall provide for expeditious and practicable execution of the Work within the Contract Time. The Progress Schedule shall indicate the dates for starting and completing the various stages of the Work and shall include dates of Shop Drawing Submittals.

2.2. The Progress Schedule shall be updated monthly by the Contractor. All monthly updates to the Progress Schedule shall be subject to the County's review and approval. Contractor shall submit the updates to the Progress Schedule with its Applications for Payment noted below. The County's review and approval of the submitted Progress Schedule updates shall be a condition precedent to the County's obligation to pay Contractor.

Section 3. PROGRESS PAYMENTS

3.1. Prior to submitting its first Application for Payment, Contractor shall submit to County, for its review and approval, a schedule of values based upon the Contract Price, listing the major elements of the Work and the dollar value for each element. After its approval by the County, this schedule of values shall be used as the basis for the Contractor's Applications for Payment. This schedule shall be updated and submitted along with a completed and notarized copy of the Application for Payment form attached to the Agreement as **Exhibit E.**

3.2. Prior to submitting its first Monthly Application for Payment, Contractor shall submit to County a complete list of all its proposed subcontractors and material men, showing the work and materials involved. The first Application for Payment shall be submitted no earlier than thirty (30) days after Commencement Date.

3.3. If payment is requested on the basis of materials and equipment not incorporated into the Project, but delivered and suitably stored at the site or at another location agreed to by the County in writing, the Application for Payment will subdivide the work into component parts in sufficient detail to serve as the basis for a progress payment and shall also be accompanied by a bill of sale, invoice or other documentation warranting that upon payment by County, the County shall receive the materials and equipment free and clear of all liens, charges, security interests and encumbrances, together with evidence that the materials and equipment are covered by appropriate property insurance and other arrangements to protect County's interest therein, all of which shall be subject to the County's prior written approval.

3.4. Contractor shall submit Four (4) copies of its applications for Payment to the County on or about the 25th day of each month for work performed during that month. Contractor shall submit no more than one application for payment each month. Within ten (10) calendar days after receipt of each Application for Payment, the County shall either: (1) indicate approval of the requested payment; (2) indicate approval of only a portion of the requested payment, stating in writing the reasons therefore; or (3) return the Application for Payment to the Contractor indicating, in writing, the reason for refusing to approve payment. In the event of a total or partial denial of the Application for Payment, the Contractor may make the necessary corrections and resubmit the Application for Payment for reconsideration within ten (10) calendar days of receiving notice of refusal.

If re-submittal of the Application for Payment is refused, in whole or in part, the Contractor may submit a written request to the County Administrator for an administrative decision within two (2) business days of receiving notice of refusal. Upon receiving a timely request, an administrative decision shall be rendered within ten (10) calendar days with written notification provided to the Contractor.

If the administrative decision is disputed, the Contractor may submit a written request to the County Administrator for an administrative hearing before the Dispute Resolution Committee (DRC) within two (2) business days of receiving said decision. A hearing shall be scheduled within ten (10) business days from the date the request is received, and the Contractor will receive written notice of the hearing date. The DRC may, within its discretion, render a final decision at the hearing or may elect to mail a written decision within a period not to exceed ten (10) calendar days from the hearing date. The DRC's written decision shall be considered administratively final.

The County shall, within twenty (20) business days after County approval of an Application for Payment, pay the Contractor the amounts so approved. Provided, however, in no event shall the County be obligated to pay an amount greater than that portion of the Application for Payment approved by the County.

4.5 County shall retain ten percent (10%) of the gross amount of each monthly payment request or ten percent (10%) of the portion thereof approved by the County for payment whichever is less. The retained sum shall be accumulated and not released to Contractor until final payment is due. Any interim interest on such sums shall accrue to County.

At the County's sole discretion, a percentage of the amount retained from the gross amount of each monthly payment may be reduced prior to final completion of the Project and said percentage released to the Contractor upon receiving a certificate of substantial completion and approval from the Architect/Engineer.

Release of any portion or percentage of sums retained prior to final completion of the Project shall in no way imply approval or acceptance of Contractor's work.

4.6 Monthly payments to Contractor shall in no way imply approval or acceptance of Contractor's work.

4.6 Each Application for Payment shall be accompanied by Release and Affidavit, in the form attached as **Exhibit D**, showing that all materials, labor, equipment and other bills associated with that portion of the Work payment is being requested or have been paid in full. The County shall not be required to make payment until and unless these affidavits are furnished by Contractor.

4.7 Applications for Payment will not be approved unless all submittals required by the Contract documents, up to that point, are provided and "As-Built" record documents are maintained as required by Section 8.2.

Section 4. PAYMENTS WITHHELD

4.1. The County may decline to approve any Application for Payment, or portions thereof, because of subsequently discovered evidence or subsequent inspections. The County may nullify the whole or any part of any approval for payment previously issued and County may withhold any payments otherwise due Contractor under this Agreement or any other agreement between County and Contractor, to such extent as may be necessary in the County's opinion to protect it from loss because of: (a) defective Work not remedied; (b) third party claims filed or reasonable evidence indicating probable filing of such claims; (c) failure of Contractor to make payment properly to subcontractors or for labor, materials or equipment; (d) reasonable doubt that the Work can be completed for the unpaid balance of the Contract Amount; (e) reasonable indication that the Work will not be completed within the Contract Time; (f) unsatisfactory prosecution of the Work by the Contractor; or (g) any other material breach of the Contract Documents. If these conditions are not remedied or removed, County may, after three (3) days written notice, rectify the same at Contractor's expense. County also may offset against any sums due Contractor the amount of any liquidated or unliquidated obligations of Contractor to County, whether relating to or arising out of this Agreement or any other agreement between Contractor and County.

Section 5. FINAL PAYMENT

5.1. County shall make final payment to Contractor within forty-five (45) calendar days after the Work is finally inspected and accepted by County in accordance with Section 20.1 herein, provided that Contractor first, and as an explicit condition precedent to the accrual of Contractor's right to final payment, shall have furnished County with a properly executed and notarized copy of the Release and Affidavit attached as Exhibit D, as well as, a duly executed copy of the Surety's consent to final payment and such other documentation that may be required by the Contract Documents or the County.

5.2. Contractor's acceptance of final payment shall constitute a full waiver of any and all claims by Contractor against County arising out of this Agreement or otherwise relating to the Project, except those previously made in writing and identified by Contractor as unsettled at the time of the final Application for Payment. Neither the acceptance of the Work nor payment by County shall be deemed to be a waiver of County's right to enforce any obligations of Contractor hereunder or to the recovery of damages for defective Work not discovered by the County at the time of final inspection.

Section 6. SUBMITTALS AND SUBSTITUTIONS

6.1. Contractor shall carefully examine the Contract Documents for all requirements for approval of materials to be submitted such as shop drawings, data, test results, schedules and samples. When submitted for the Engineer's review, Shop Drawings shall bear the Contractor's certification that the Contractor has reviewed, checked, and approved the Shop Drawings and that they are in conformance with the requirements of the Contract Documents. Contractor shall submit all such materials at its own expense and in such form as required by the Contract Documents in sufficient time to prevent any delay in the delivery of such materials and the installation thereof.

6.2. Prior to submitting its first Application for Payment, Contractor shall provide to County a DVD format showing the pre-existing conditions located within the limits of construction.

6.3. Whenever materials or equipment are specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular supplier, the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by County if sufficient information is submitted by Contractor to allow the County to determine that the material or equipment proposed is equivalent or equal to that named. Requests for review of substitute items of material and equipment will not be accepted by County from anyone other than Contractor and all such requests must be submitted by Contractor to County within thirty (30) calendar days after Notice to Proceed is received by Contractor.

6.4. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make application to the County for acceptance thereof, certifying that the proposed substitute shall perform adequately the functions and achieve the results called for by the general design, be similar and of equal substance to that specified and be suited to the same use as that specified. The application shall state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of substantial completion on time, whether or not acceptance of the substitute for use in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with County for the Project) to adapt the design to the proposed substitute and whether or not incorporation or use by the substitute in connection with the Work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service shall be indicated. The application also shall contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs for redesign and claims of other contractors affected by the resulting change, all of which shall be considered by the County in evaluating the proposed substitute. The County may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

6.5. If a specific means, method, technique, sequence or procedure of construction is indicated in or required by the Contract Documents, Contractor may furnish or utilize a substitute means, method, sequence, technique or procedure of construction acceptable to the County, if Contractor submits sufficient information to allow the County to determine that the substitute proposed is equivalent to that indicated or required by the Contract Documents. The procedures for submission to and review by the County shall be the same as those provided herein for substitute materials and equipment.

6.6. The County shall be allowed a reasonable time within which to evaluate each proposed substitute. The County shall be the sole judge of acceptability, and no substitute will be ordered, installed or utilized without the County's prior written acceptance, which shall be evidenced by either a Change Order or an approved Shop Drawing. The County may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

Section 7. DAILY REPORTS, AS-BUILTS, AND MEETINGS

7.1. Unless waived in writing by County, Contractor shall complete and submit, along with its Application for Payment, to the County on a monthly basis a daily log of the Contractor's work for the preceding month in a format approved by the County. The daily log shall document all activities of Contractor at the Project site including, but not limited to, the following:

7.1.1. Weather conditions showing the high and low temperatures during work hours, the amount of precipitation received on the Project site, and any other weather conditions

which adversely affect the Work;

7.1.2. Soil conditions which adversely affect the Work;

7.1.3. The hours of operation by Contractor's personnel and subcontractor's personnel;

7.1.4. The number of Contractor's and subcontractor's personnel present and working at the Project site, by subcontract and trade;

7.1.5. All equipment present at the Project site, description of equipment use and designation of time equipment was used (specifically indicating any down time);

7.1.6. Description of Work being performed at the Project site;

7.1.7. Any unusual or special occurrences at the Project site;

7.1.8. Materials received at the Project site

The daily log shall not constitute nor take the place of any notice required to be given by Contractor to County pursuant to the Contract Documents.

7.2. Contractor shall maintain in a safe place at the Project site one record copy of the Contract Documents, as well as all shop drawings and other Contractor submittals and all written interpretations and clarifications issued by the County, in good order and annotated to show all changes made during construction. The annotated drawings shall be continuously updated by the Contractor throughout the prosecution of the Work to accurately reflect all field changes that are made to adapt the Work to field conditions, changes resulting from Change Orders, Work Directive Changes and Field Orders, and all concealed and buried installations of piping, conduit and utility services. All buried and concealed items, both inside and outside the Project site, shall be accurately located on the annotated drawings as to depth and in relationship to not less than two (2) permanent features (e.g. interior or exterior wall faces). The annotated drawings shall be clean, and all changes, corrections and dimensions shall be given in a neat and legible manner in a contrasting color. The "As-Built" record documents, together with all approved samples and a counterpart of all approved shop drawings shall be available to County for reference. Upon completion of the Work, and as a condition precedent to Contractor's entitlement to final payment, these "As-Built" record documents, samples and shop drawings shall be delivered to County by Contractor.

7.3. Contractor shall keep all records and supporting documentation which concern or relate to the Work hereunder for a minimum of five (5) years from the date of termination of this Agreement or the date the Project is completed, whichever is later. County, or any duly authorized agents or representatives of County, shall have the right to audit, inspect and copy all such records and documentation as often as they deem necessary during the period of this Agreement and during the five (5) year period noted above; provided, however, such activity shall be conducted only during normal business hours.

Section 8. CONTRACT TIME AND TIME EXTENSIONS

8.1. Contractor shall diligently pursue the completion of the Work and coordinate the Work being done on the Project by its subcontractors and material men, as well as coordinating its Work with all work of others at the Project Site, so that its Work or the work of others shall not be delayed or impaired by any act or omission of Contractor. Contractor shall be solely responsible for all construction means, methods, techniques, sequences, and procedures, as well as

coordination of all portions of the Work under the Contract Documents.

8.2. Should Contractor be obstructed or delayed in the prosecution of or completion of the Work as a result of unforeseeable causes beyond the control of Contractor, and not due to its fault or neglect, including but not restricted to acts of God or of the public enemy, acts of government, fires, floods, epidemics, quarantine regulations, strikes or lockouts, Contractor shall notify the County in writing within forty-eight (48) hours after the commencement of such delay. Written supporting data with specific details of Contractor operations, which were delayed, shall be submitted to the County within fifteen (15) calendar days after the occurrence of the delay, unless the County grants additional time in writing for such submittals, or else the Contractor shall be deemed to have waived any right which Contractor may have had to request a time extension.

8.3. No interruption, interference, inefficiency, suspension or delay in the commencement or progress of the Work from any cause whatever, including those for which County may be responsible, in whole or in part, shall relieve Contractor of his duty to perform or give rise to any right to damages or additional compensation from County. Contractor expressly acknowledges and agrees that it shall receive no damages for delay. Contractor's sole remedy, if any, against County will be the right to seek an extension to the Contract Time; provided, however, the granting of any such time extension shall not be a condition precedent to the aforementioned "No Damages For Delay" provision. This paragraph shall expressly apply to claims for early completion, as well as to claims based on late completion.

8.4. Requests for delays due to adverse weather conditions shall meet all of the following conditions:

8.4.1. Contractor notified the County in writing within forty-eight (48) hours of the delay.

8.4.2. The weather was unusual as documented by supporting data.

8.4.3. The weather did have an adverse impact on the contractor’s schedule (critical path only).

8.4.4. The Contractor and inspector’s daily logs corroborate the adverse impact. Where a conflict exists between the weather data and the daily reports, the daily reports will take precedence.

Section 9. CHANGES IN THE WORK

9.1. County shall have the right at any time during the progress of the Work to increase or decrease the Work. Promptly after being notified of a change, Contractor shall submit an itemized estimate of any cost and/or time increases or savings it foresees as a result of the change. Except in an emergency endangering life or property, or as expressly set forth herein, no addition or changes to the Work shall be made except upon written order of County, and County shall not be liable to the Contractor for any increased compensation without such written order. No officer, employee or agent of County is authorized to direct any extra or changed work orally.

9.2. A Construction Change Order, in the form attached as **Exhibit F** to this Agreement, shall be issued and executed promptly after an agreement is reached between Contractor and County concerning the requested changes. Contractor shall promptly perform changes authorized by duly executed Change Orders. The Contract Amount shall be adjusted in the Change Order in the manner as County and Contractor shall mutually agree.

9.3. If County and Contractor are unable to agree on a Change Order for the requested change, Contractor shall, nevertheless, promptly perform the change as directed by County in a written

Work Directive Change. In that event, the Contract Amount and Contract Time shall be adjusted as directed by County. If Contractor disagrees with the County's adjustment determination, Contractor must make a claim pursuant to Section 11 of these General Conditions or else be deemed to have waived any claim on this matter it might otherwise have had.

9.4. In the event a requested change results in an increase to the Contract Amount, the amount of the increase shall be limited to the Contractor's reasonable direct labor and material costs and reasonable actual equipment costs as a result of the change (including allowance for labor burden costs) plus a maximum ten percent (10%) markup for all overhead and profit. In the event such change Work is performed by a Subcontractor, a maximum ten percent (10%) markup for all overhead and profit for all Subcontractors' and sub-subcontractors' direct labor and material costs and actual equipment costs shall be permitted, with a maximum five percent (5%) markup thereon by the Contractor for all of its overhead and profit, for a total maximum markup of fifteen percent (15%). All compensation due Contractor and any Subcontractor or sub-subcontractor for field and home office overhead is included in the markups noted above.

9.5. County shall have the right to conduct an audit of Contractor's books and records to verify the accuracy of the Contractor's claim with respect to Contractor's costs associated with any Change Order.

9.6. The County shall have authority to order minor changes in the Work not involving an adjustment to the Contract Amount and not inconsistent with the intent of the Contract Documents. Such changes may be affected by Field Order or by other written order. Such changes shall be binding on the Contractor.

Section 10. CLAIMS AND DISPUTES

10.1. A Claim is a demand or assertion by one of the parties seeking an adjustment or interpretation of the terms of the Contract Documents, payment of money, extension of time or other relief with respect to the terms of the Contract Documents. The term "Claim" also includes other disputes and matters in question between County and Contractor arising out of or relating to the Contract Documents. The responsibility to substantiate a Claim shall rest with the party making the Claim.

10.2. Claims by the Contractor shall be made in writing to the County within forty-eight (48) hours after the first day of the event giving rise to such Claim or else the Contractor shall be deemed to have waived the Claim. Written supporting data shall be submitted to the County within fifteen (15) calendar days after the occurrence of the event, unless the County grants additional time in writing, or else the Contractor shall be deemed to have waived the Claim. All claims shall be priced in accordance with the provisions of Subsection 10.4.

10.3. The Contractor shall proceed diligently with its performance as directed by the County, regardless of any pending Claim, action, suit or administrative proceeding, unless otherwise agreed to by the County in writing. County shall continue to make payments in accordance with the Contract Documents pending Claim.

Section 11. OTHER WORK

11.1. County may perform other work related to the Project at the site by County's own forces, have other work performed by utility owners or let other direct contracts. If the fact that such other work is to be performed is not noted in the Contract Documents, notice thereof will be given to Contractor. If Contractor believes that such performance will involve additional expense to Contractor or require additional time, Contractor shall send written notice of that fact with specific details of anticipated costs and delays to County within forty-eight (48) hours of being notified of

the other work. Written supporting data of actual need for additional time or additional expense, shall be submitted to the County within fifteen (15) calendar days after completion of other work, unless the County grants additional time in writing, or else the Contractor shall be deemed to have waived any right which Contractor may have had to request a time extension or adjustment to the Contract Amount.

11.2. Contractor shall afford each utility owner and other contractor (or County, if County is performing the additional work with County's employees) proper and safe access to the site and a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such work and shall properly connect and coordinate its Work with theirs. Contractor shall do all cutting, fitting and patching of the Work that may be required to make its several parts come together properly and integrate with such other work. Contractor shall not endanger any work of others by cutting, excavating or otherwise altering their work and will only cut or alter their work with the written consent of the County and the others whose work will be affected.

11.3. If any part of Contractor's Work depends for proper execution or results upon the work of any other contractor or utility owner (or County), Contractor shall inspect and promptly report to County in writing any delays, defects or deficiencies in such work that render it unavailable or unsuitable for such proper execution and results. Contractor's failure to report will constitute an acceptance of the other work as fit and proper for integration with Contractor's Work.

Section 12. INDEMNIFICATION AND INSURANCE

13.1 Contractor shall pay on behalf of or indemnify and hold harmless County and its agents, officers and employees from and against all liabilities, damages, losses, and costs, including attorney's and paralegal fees, incurred by County to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of Contractor or by any person, firm or corporation to whom any portion of the Work is subcontracted by Contractor or resulting from the use by Contractor, or by anyone for whom Contractor is legally liable, of any materials, tools, machinery or other property of County. Contractor's obligation as provided herein shall be limited to its proportionate share of liability to the extent caused by the negligence, recklessness or intentional wrongful misconduct of Contractor or by any person, firm or corporation to whom any portion of the Work is subcontracted by Contractor, and Contractor shall not be required to pay on behalf of or indemnify and hold harmless County where County's negligence, recklessness, or intentional wrongful misconduct is determined by a court of competent jurisdiction to be the sole cause of its liabilities, damages, losses and costs, including attorney's fees and paralegal fees.

County and Contractor agree one percent (1%) of the Contract Amount paid by County to Contractor shall be given as separate consideration for this indemnification, and any other indemnification of County by Contractor provided for within the Contract Documents, the sufficiency of such separate consideration being acknowledged by Contractor by Contractor's acceptance and execution of the Agreement.

Contractor agrees that such indemnification by Contractor relating to any matter which is the subject of this Agreement shall extend throughout the term of this Agreement and any applicable statutes of limitations thereafter. Contractor's obligation to indemnify shall not be limited by, or in any way to, any insurance coverage or by any provision in or exclusion or omission from any policy of insurance.

13.2 Contractor shall obtain and carry, at all times during its performance under the Contract Documents, insurance of the types and in the amounts set forth in Exhibit C to the Agreement.

All insurance policies shall be from responsible companies duly authorized to do business in the State of Florida and/or responsible risk retention group insurance companies, which are registered with the State of Florida. All commercial insurance carriers providing the Contractor with required insurance shall be a minimum financial size category of VII according to the AM Best Rating Guide, latest edition. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Within ten (10) calendar days after Notice of Award is received by Contractor and prior to the commencement of work, Contractor shall provide County with properly executed Certificates of Insurance to evidence Contractor's compliance with the insurance requirements of the Contract Documents. Said Certificates of Insurance shall be on forms approved by County, such as "Acord Form 25". The Certificates of Insurance shall be personally, manually signed by the authorized representatives of the insurance company/companies shown on the Certificates of Insurance, with proof that they are authorized representatives thereof. Certificates of Insurance shall be mailed to Escambia County in care of: Purchasing Manager, Purchasing Division, P.O. Box 1591, Pensacola, Florida 32597-1591. In addition, certified, true and exact copies of all insurance policies required hereunder shall be provided to County, on a timely basis, when requested by County.

13.3 The Certificates of Insurance and required insurance policies shall contain provisions that thirty (30) days' prior written notice by registered or certified mail shall be given County of any cancellation, intent not to renew, or reduction in the policies or coverages, except in the application of the aggregate limits provisions. In the event of a reduction in the aggregate limit of any policy, Contractor shall immediately take steps to have the aggregate limit reinstated to the full extent permitted under such policy.

13.3 All insurance coverages of the Contractor shall be primary to any insurance or self-insurance program carried by the County applicable to this Project. The acceptance by County of any Certificate of Insurance does not constitute approval or agreement by the County that the insurance requirements have been satisfied or that the insurance policy shown on the Certificate of Insurance is in compliance with the requirements of the Contract Documents. No work shall commence at the Project site unless and until the required Certificates of Insurance are received by the County.

13.4 Contractor shall require each of its subcontractors to procure and maintain, until the completion of the subcontractor's work, insurance of the types and to the limits specified in **Exhibit C**, unless such insurance requirements for the subcontractor is expressly waived in writing by the County. All liability insurance policies, other than professional liability, worker's compensation and employer's liability policies, obtained by Contractor to meet the requirements of the Contract Documents shall name Escambia County as an additional insured and shall contain Severability of Interest provisions. Escambia County shall also be designated as certificate holder with the address of P. O. Box 1591, Pensacola, Florida 32597-1591. If any insurance provided pursuant to the Contract Documents expires prior to the completion of the Work, renewal Certificates of Insurance and, if requested by County, certified, true copies of the renewal policies shall be furnished by Contractor within thirty (30) days prior to the date of expiration.

13.5 All liability policies shall be underwritten on the "occurrence" basis, unless otherwise approved in writing by the County Division of Risk Management. "Claims made" policies, if approved by the Risk Manager, and subsequent insurance certificates shall provide a "retro-date" which shall include the effective date of the contract. "Claims-made" renewals or carrier and policy replacements shall reflect the original "retro-date."

13.6 Should at any time the Contractor not maintain the insurance coverages required herein, the County may terminate the Agreement or at its sole discretion shall be authorized to purchase such coverages and charge the Contractor for such coverages purchased. The County shall be

under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company or companies used. The decision of the County to purchase such insurance coverages shall in no way be construed to be a waiver of any of its rights under the Contract Documents.

13.7 Contractor shall submit to County a copy of all accident reports arising out of any injuries to its employees or those of any firm or individual to whom it may have subcontracted a portion of the Work, or any personal injuries or property damages arising or alleged to have arisen on account of any work by Contractor under the Contract Documents.

13.8 Duty to Provide Legal Defense. Contractor shall pay for and provide a legal defense for the County, which shall include attorneys' fees and costs, both of which will be done only if and when requested by the County, for all liabilities, damages, losses, and costs as described in paragraph 13.1 above. Such payment on the behalf of the County shall be in addition to any and all other legal remedies available to the County and shall not be considered to be the County's exclusive remedy.

Section 13. COMPLIANCE WITH LAWS

14.1 Contractor agrees to comply, at its own expense, with all federal, state and local laws, codes, statutes, ordinances, rules, regulations and requirements applicable to the Project, including but not limited to those dealing with taxation, worker's compensation, equal employment and safety. If Contractor observes that the Contract Documents are at variance therewith, it shall promptly notify County in writing. Compliance with the above laws shall include but is not limited to: (1) the Occupational Safety and Health Act, 29 CFR 1910 and 1926, respectively, General Industry Standards and Construction Industry Standards, including regulations regarding Trenching and Shoring; (2) the Florida Workers' Compensation Law, Chapter 440, Florida Statutes; (3) Rules 38F and 38I, Florida Administrative Code; and (4) Section 102, Standard Specifications for Road and Bridge Construction, Florida Department of Transportation.

14.2 EMPLOYMENT ELIGIBILITY VERIFICATION (E-VERIFY): In accordance with State of Florida, Office of the Governor, Executive Order 11-116 (superseding Executive Order 11-02; Verification of Employment Status), in the event performance of this Agreement is or will be funded using state or federal funds, the CONTRACTOR must comply with the Employment Eligibility Verification Program ("E-Verify Program") developed by the federal government to verify the eligibility of individuals to work in the United States and 48 CFR 52.222-54 (as amended) is incorporated herein by reference. If applicable, in accordance with Subpart 22.18 of the Federal Acquisition Register, the CONTRACTOR must (1) enroll in the E-Verify Program, (2) use E-Verify to verify the employment eligibility of all new hires working in the United States, except if the CONTRACTOR is a state or local government, the CONTRACTOR may choose to verify only new hires assigned to the Agreement; (3) use E-Verify to verify the employment eligibility of all employees assigned to the Agreement; and (4) include these requirement in certain subcontracts, such as construction. Information on registration for and use of the E-Verify Program can be obtained via the internet at the Department of Homeland Security Web site: http://www.dhs.gov/E-Verify.

Section 14. CLEANUP AND PROTECTIONS

14.1. Contractor agrees to keep the Project site clean at all times of debris, rubbish and waste materials arising out of the Work. At the completion of the Work, Contractor shall remove all debris, rubbish and waste materials from and about the Project site, as well as all tools, appliances, construction equipment and machinery and surface materials, and shall leave the Project site clean and ready for occupancy by County. Non-compliance with directives of this section may serve as a basis of rejection of Application for Payment.

14.2. Any existing surface or subsurface improvements, including, but not limited to, pavements, curbs, sidewalks, pipes, utilities, footings, structures, trees and shrubbery, not indicated in the Contract Documents to be removed or altered, shall be protected by Contractor from damage during the prosecution of the Work. Any such improvements so damaged shall be restored by Contractor to the condition equal to that existing at the time of Contractor's commencement of the Work.

Section 15. ASSIGNMENT

15.1. Contractor shall not assign this Agreement or any part thereof, without the prior consent in writing of County. If Contractor does, with approval, assign this Agreement or any part thereof, it shall require that its assignee be bound to it and to assume toward Contractor all of the obligations and responsibilities that Contractor has assumed toward County.

Section 16. PERMITS, LICENSES AND TAXES

16.1. Except as noted in paragraph 17.2 below, all permits and licenses necessary for the prosecution of the Work shall be procured and paid for by Contractor. All permits or fees, including but not limited to, all license fees, permit fees, impact fees or inspection fees payable by Contractor to County have been disclosed to Contractor in the bidding documents or other request for proposal at the time the Project was let for bid. If Contractor performs any Work without obtaining, or contrary to, such permits or licenses, Contractor shall bear all costs arising there from. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the Work.

16.2. Permits required for the Work from FDOT, FDEP, the Army Corps of Engineers, and any archeological permitting agency will be paid for and obtained by the County.

16.3. Contractor shall pay all sales, consumer, use and other similar taxes associated with the Work or portions thereof, which are applicable during the performance of the Work.

Section 17. TERMINATION FOR DEFAULT

17.1. Contractor shall be considered in material default of the Agreement and such default shall be considered cause for County to terminate the Agreement, in whole or in part, as further set forth in this Section, if Contractor: (1) fails to begin the Work under the Contract Documents within the time specified herein; or (2) fails to properly and timely perform the Work as directed by the County or as provided for in the approved Progress Schedule; or (3) performs the Work unsuitably or neglects or refuses to remove materials or to correct or replace such Work as may be rejected as unacceptable or unsuitable; or (4) discontinues the prosecution of the Work; or (5) fails to resume Work which has been suspended within a reasonable time after being notified to do so; or (6) becomes insolvent or is declared bankrupt, or commits any act of bankruptcy; or (7) allows any final judgment to stand against it unsatisfied for more than ten (10) days; or (8) makes an assignment for the benefit of creditors; or (9) fails to obey any applicable codes, laws,

ordinances, rules or regulations with respect to the Work; or (10) materially breaches any other provision of the Contract Documents.

17.2. County shall notify Contractor in writing of Contractor's default(s). If County determines that Contractor has not remedied and cured the default(s) within seven (7) calendar days following receipt by Contractor of said written notice, then County, at its option, without releasing or waiving its rights and remedies against the Contractor's sureties and without prejudice to any other right or remedy it may be entitled to hereunder or by law, may terminate Contractor's right to proceed under the Agreement, in whole or in part, and take possession of all or any portion of the Work and any materials, tools, equipment, and appliances of Contractor, take assignments of any of Contractor's subcontracts and purchase orders, and complete all or any portion of Contractor's Work by whatever means, method or agency which County, in its sole discretion, may choose.

17.3. If County deems any of the foregoing remedies necessary, Contractor agrees that is shall not be entitled to receive any further payments hereunder until after the Project is completed. All monies expended and all of the costs, losses, damages and extra expenses, including all management, administrative and other overhead and other direct and indirect expenses (including attorneys' fees) or damages incurred by County incident to such completion, shall be deducted from the Contract Amount, and if such expenditures exceed the unpaid balance of the Contract Amount, Contractor agrees to pay promptly to County on demand the full amount of such excess, including costs of collection, attorney's fees (including appeals) and interest thereon at the maximum legal rate of interest until paid. If the unpaid balance of the Contract Amount exceeds all such costs, expenditures and damages incurred by the County to complete the Work, such excess shall be paid to the Contractor. The amount to be paid to the Contractor or County, as the case may be, and this obligation for payment shall survive termination of the Agreement.

17.4. The liability of Contractor hereunder shall extend to and include the full amount of any and all sums paid, expenses and losses incurred, damages sustained, and obligations assumed by County in good faith under the belief that such payments or assumptions were necessary or required, in completing the Work and providing labor, materials, equipment, supplies, and other items therefore or re-letting the Work, in settlement, discharge or compromise of any claims, demands, suits, and judgments pertaining to or arising out of the Work hereunder.

17.5. If, after notice of termination of Contractor's right to proceed pursuant to this Section, it is determined for any reason that Contractor was not in default, or that its default was excusable, or that County is not entitled to the remedies against Contractor provided herein, then Contractor's remedies against County shall be the same as and limited to those afforded Contractor below under Subsection 19.1, Termination for Convenience.

17.6. If the Contractor refuses to allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the Contractor in conjunction with this Agreement then the County may, without prejudice to any right or remedy and after giving the Contractor and his surety, if any, seven (7) days' written notice, during which period Contractor still fails to allow access, terminate the employment of the Contractor and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon, owned by the Contractor, and may finish the project by whatever method it may deem expedient. In such case, the Contractor shall not be entitled to receive any further payment until the Project is finished. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the Contractor (excluding monies owed the Contractor for subcontract work).

Section 18. TERMINATION FOR CONVENIENCE AND RIGHT OF SUSPENSION

18.1. County shall have the right to terminate this Agreement without cause upon seven (7) calendar days written notice to Contractor. In the event of such termination for convenience, Contractor's recovery against County shall be limited to that portion of the Contract Amount earned through the date of termination, together with any retainage withheld and reasonable termination expenses incurred, but Contractor shall not be entitled to any other or further recovery against County, including, but not limited to, damages or any anticipated profit on portions of the Work not performed.

18.2. County shall have the right to suspend all or any portions of the Work upon giving Contractor two (2) calendar days' prior written notice of such suspension. If all or any portion of the Work is so suspended, Contractor's sole and exclusive remedy shall be to seek an extension of time to its schedule in accordance with the procedures set forth in the Contract Documents. In no event shall the Contractor be entitled to any additional compensation or damages. Provided, however, if the ordered suspension exceeds three (3) months, the Contractor shall have the right to terminate the Agreement with respect to that portion of the Work which is subject to the ordered suspension.

Section 19. COMPLETION

19.1. Upon receipt of written notice, the County will ascertain whether the work or designated portions thereof are ready for the Engineer's substantial completion inspection. From the Engineer's list of incomplete or unsatisfactory items, a schedule for the County's review will be prepared for their completion indicating such completion dates. The County will issue a Certificate of Substantial Completion when the work on the punch list has been accomplished.

19.2. Upon receipt of written notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the County shall promptly make such inspection and, if it finds the work acceptable and fully performed under the Contract Documents, shall promptly issue a Certificate of Final Completion and Recommendation for Payment, stating that, on the basis of observations and inspections, the Work has been completed in accordance with the terms and conditions of the Contract Documents and that the entire balance found to be due the Contractor is due and payable. The final payment shall not become due and payable until Contractor submits: (1) the Release and Affidavit in the form attached as **Exhibit D**, (2) consent of surety to final payment, (3) if required by County, other data establishing payment or satisfaction of all obligations, such as receipts, releases and waivers of liens, arising out of the Contract Documents, to the extent and in such form as may be designated by County, and (4) a published copy of the Notice of Completion as provided for in this section. County reserves the right to inspect the Work and make an independent determination as to the Work's acceptability. Unless and until the County is completely satisfied, the final payment shall not become due and payable.

19.3. After the Work is ready for final inspection and acceptance by the County, a legal advertisement must be published by the Contractor in a local newspaper of a general countywide circulation at least thirty (30) days before final payment shall be made. Example of such publication is as follows:

Legal Notice of Completion

Notice is hereby given that the undersigned Contractor has completed and has ready for acceptance by the Board of County Commissioners of Escambia County, Florida, the following construction project:

_____
(Project Name and Address)

_____
(Legal Name and Address - entity of the Contractor)

Subcontractors, material men, and other persons having payment claims against the Contractor relating to this project should govern themselves accordingly.

Section 20. WARRANTY

20.1. Contractor shall obtain and assign to County all express warranties given to Contractor or any subcontractors by any material men supplying materials, equipment or fixtures to be incorporated into the Project. Contractor warrants to County that any materials and equipment furnished under the Contract Documents shall be new unless otherwise specified, and that all Work shall be of good quality, free from all defects and in conformance with the Contract Documents. Contractor further warrants to County that all materials and equipment furnished under the Contract Documents shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the instructions of the applicable manufacturers, fabricators, suppliers or processors except as otherwise provided for in the Contract Documents. If, within two (2) years after substantial completion and acceptance, any Work is found to be defective or not in conformance with the Contract Documents, Contractor shall correct it promptly after receipt of written notice from County. Contractor shall also be responsible for and pay for replacement or repair of adjacent materials or Work, which may be damaged as a result of such replacement or repair. These warranties are in addition to those implied warranties to which County is entitled as a matter of law. The Performance Bond shall remain in full force and effect throughout the two (2) year Warranty Period.

Section 21. PROJECT LAYOUT AND CONTROL

21.1. Engineer will provide survey control, referencing beginning and ending stations, P.C.'s, P.T.'s and intermediate stations at 500-foot intervals. Staking is to be set along control line (base line or centerline of right-of-way, as indicated on plans) or at an offset determined by the Engineer. Bench Marks will be provided at intervals no greater than 1000 feet. The Engineer at the Contractor's expense shall replace any of these points, which are disturbed or destroyed by the Contractor.

21.2. Contractor shall employ a competent Engineer or Land Surveyor licensed in the State of Florida familiar with construction control procedures to lay out all other parts of the work, and to establish all points, grades and levels necessary to locate the work. The Contractor shall be held responsible for all mistakes that may be caused by his incorrect layout and grade spotting work, or caused by the loss or disturbance of the Engineer's layout work.

21.3. Should the Contractor in the course of the work find that the points, grades, and levels which are shown upon the Drawings are not conformable to the physical conditions of the locality at the proposed work or structure, he shall immediately inform the Engineer of the discrepancy between the actual physical conditions of the locality of the proposed work, and the points, grades and levels which are shown on the Drawings. No claim shall be made by the Contractor against the Owner for compensation or damage by reasons for failure of the Engineer to represent upon said Drawings, points, grades and levels conformable to the actual physical conditions of the locality of the proposed work.

Section 22. TESTS AND INSPECTIONS

22.1. County, its respective representatives, agents and employees, and any governmental agencies with jurisdiction over the Project shall have access at all times to the Work, whether the Work is being performed on or off of the Project site, for their observation, inspection and testing. Contractor shall provide proper, safe conditions for such access. Contractor shall provide County with timely notice of readiness of the Work for all required inspections, tests or approvals.

22.2. If the Contract Documents or any codes, laws, ordinances, rules or regulations of any public authority having jurisdiction over the Project requires any portion of the Work to be specifically inspected, tested or approved, Contractor shall assume full responsibility therefore, pay all costs in connection therewith and furnish County the required certificates of inspection, testing or approval. All inspections, tests or approvals shall be performed in a manner and by organizations acceptable to the County.

22.3. If any Work that is to be inspected, tested or approved is covered without written concurrence from the County, such work must, if requested by County, be uncovered for observation. Such uncovering shall be at Contractor's expense unless Contractor has given County timely notice of Contractor's intention to cover the same and County has not acted with reasonable promptness to respond to such notice. If any Work is covered contrary to written directions from County, such Work must, if requested by County, be uncovered for County's observation and be replaced at Contractor's sole expense.

22.4. Neither observations by the County nor inspections, tests or approvals by others shall relieve Contractor from Contractor's obligations to perform the Work in accordance with the Contract Documents.

22.5. Prior to payment for any Work for which testing is specified, Contractor shall provide the County a copy of reasonably acceptable test results relating to such work as required by the technical specifications of the solicitation.

Section 23. DEFECTIVE WORK

23.1. Work not conforming to the requirements of the Contract Documents shall be deemed defective Work. If required by County, Contractor shall, as directed, either correct all defective Work, whether or not fabricated, installed or completed, or, if the defective Work has been rejected by County, remove it from the site and replace it with acceptable Work. Contractor shall bear all direct, indirect and consequential costs of such correction or removal (including, but not limited to fees and charges of engineers, architects, attorneys and other professionals) made necessary thereby, and shall hold County harmless for same.

23.2. If the County considers it necessary or advisable that covered Work be observed by County or inspected or tested by others, Contractor, at County's request, shall uncover, expose or otherwise make available for observation, inspection or tests as County may require, that portion of the Work in question, furnishing all necessary labor, material and equipment. If it is found that such Work is defective, Contractor shall bear all direct, indirect and consequential costs of such uncovering, exposure, observation, inspection and testing and of satisfactory reconstruction (including, but not limited to, fees and charges of engineers, architects, attorneys and other professionals), and County shall be entitled to an appropriate decrease in the Contract Amount. If, however, such Work is not found to be defective, Contractor shall be allowed an increase in the Contract Amount and/or an extension of the Contract Time, directly attributable to such uncovering, exposure, observation, inspection, testing and reconstruction.

23.3. If any portion of the Work is defective, or Contractor fails to supply sufficient skilled workers with suitable materials or equipment, or fails to finish or perform the Work in such a way that the completed Work will conform to the Contract Documents, County may order Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of County to stop the Work shall not give rise to any duty on the part of County to exercise this right for the benefit of Contractor or any other party.

23.4. Should the County determine, at its sole opinion, it is in the County's best interest to accept defective Work, the County may do so. Contractor shall bear all direct, indirect and consequential costs attributable to the County's evaluation of and determination to accept defective Work. If such determination is rendered prior to final payment, a Change Order shall be executed evidencing such acceptance of such defective Work, incorporating the necessary revisions in the Contract Documents and reflecting an appropriate decrease in the Contract Amount. If the County accepts such defective Work after final payment, Contractor at the discretion of the County shall promptly pay County an appropriate amount to adequately compensate County for its acceptance of the defective Work or shall increase in the Work's warranty period beyond two (2) years.

23.5. If Contractor fails, within a reasonable time after the written notice from County, to correct defective Work or to remove and replace rejected defective Work as required by County, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to comply with any of the provisions of the Contract Documents, County may, after seven (7) days' written notice to Contractor, correct and remedy any such deficiency. To the extent necessary to complete corrective and remedial action, County may exclude Contractor from any or all of the Project site, take possession of all or any part of the Work, and suspend Contractor's services related thereto, take possessions of Contractor's tools, appliances, construction equipment and machinery at the Project site and incorporate in the Work all materials and equipment stored at the Project site or for which County has paid Contractor but which are stored elsewhere. Contractor shall allow County, and their respective representatives, agents, and employees such access to the Project site as may be necessary to enable County to exercise the rights and remedies under this Subsection. All direct, indirect and consequential costs of

County in exercising such rights and remedies shall be charged against Contractor, and a Change Order shall be issued, incorporating the necessary revisions to the Contract Documents, including an appropriate decrease to the Contract Amount. Such direct, indirect and consequential costs shall include, but not be limited to, fees and charges of engineers, architects, attorneys and other professionals, all court and arbitration costs and all costs of repair and replacement of work or others destroyed or damaged by correction, removal or replacement of Contractor's defective Work. Contractor shall not be allowed an extension of the Contract Time because of any delay in performance of the Work attributable to the exercise by County of County's rights and remedies hereunder.

Section 24. SUPERVISION AND SUPERINTENDENTS

24.1. Contractor shall supervise and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents. Contractor shall be responsible to see that the finished Work complies accurately with the Contract Documents. Contractor shall keep on the Work at all times during its progress a competent resident superintendent acceptable to the County, who shall not be replaced without prior written notice to County except under extraordinary circumstances. The resident superintendent shall possess Florida Department of Transportation approved training and certifications applicable to the Work, including but not limited to National Pollutant Discharge Elimination System (NPDES) Stormwater Management and Maintenance of Traffic Control Devices. The superintendent shall be Contractor's representative at the Project site and shall have authority to act on behalf of Contractor. All communications given to the superintendent shall be as binding as if given to the Contractor. County shall have the right to direct Contractor to remove and replace its Project superintendent, with or without cause.

Section 25. PROTECTION OF WORK

25.1. Contractor shall fully protect the Work from loss or damage and shall bear the cost of any such loss or damage until final payment has been made. If Contractor, or any one for whom Contractor is legally liable, is responsible for any loss or damage to the Work, or other work or materials of County or County's separate contractors, Contractor shall be charged with the same, and any monies necessary to replace such loss or damage shall be deducted from any amounts due Contractor.

25.2. Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent property to stresses or pressures that will endanger it.

Section 26. EMERGENCIES

26.1. In the event of an emergency affecting the safety or protection of persons or the Work or property at the Project site or adjacent thereto, Contractor, without special instruction or authorization from County is obligated to act to prevent threatened damage, injury or loss. Contractor shall give County written notice within forty-eight (48) hours after the occurrence of the emergency, if Contractor believes that any significant changes in the Work or variations from the Contract Document have been caused thereby. If the County determines that a change in the Contract Documents is required because of the action taken in response to an emergency, a Change Order shall be issued to document the consequences of the changes or variations. If Contractor fails to provide the forty-eight (48) hour written notice noted above, the Contractor shall be deemed to have waived any right it otherwise may have had to seek an adjustment to the Contract Amount or an extension to the Contract Time.

Section 27. USE OF PREMISES

27.1. Contractor shall confine all construction equipment, the storage of materials and equipment and the operations of workers to the Project site and land and areas identified in and permitted by the Contract Documents and other lands and areas permitted by law, rights of way, permits and easements, and shall not unreasonably encumber the Project site with construction equipment or other material or equipment. Contractor shall assume full responsibility for any damage to any such land or area, or to the owner or occupant thereof, or any land or areas contiguous thereto, resulting from the performance of the Work.

27.2. Contractor shall provide and maintain in a neat, sanitary condition such accommodation for the use of his employees as may be necessary to comply with the regulations of the State Board of Health or other bodies having jurisdiction. He shall commit no public nuisance.

Section 28. SAFETY

28.1. The Contractor shall designate in writing the individual responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the Work. The Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury or loss to:

28.1.1. All employees of the Work and other persons and/or organizations who may be affected thereby;

28.1.2. All the Work and materials and equipment to be incorporated therein, whether in storage on or off the Project site; and

28.1.3. Other property on Project site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, utilities and any underground structures or improvements not designated for removal, relocation or replacement in the contract documents.

28.2. The Contractor shall comply with all applicable codes, laws, ordinances, rules and regulations of any public body having jurisdiction for the safety of persons or property or to protect them from damage, injury or loss. The Contractor shall erect and maintain all necessary safeguards for such safety and protection. The Contractor shall notify owners of adjacent property and of underground structures and improvements and utility owners when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation or replacement of their property. Contractor's duties and responsibilities for the safety and protection of the Work shall continue until such time as the Work is completed and final acceptance of same by County has occurred.

29.3 The Contractor shall designate a responsible representative at the Project site whose duty shall be the prevention of accidents. This person shall be Contractor's superintendent unless otherwise designated in writing by the Contractor to the County.

29.4 The Contractor shall adhere at all times to the minimum safety guidelines for construction and renovation projects as set out in **Exhibit C** of this Agreement.

Section 30. PROJECT MEETINGS

Prior to the commencement of Work, the Contractor shall attend a pre-construction conference

with the County to discuss the Progress Schedule, procedures for handling shop drawings and other submittals, and for processing Applications for Payment, and to establish a working understanding among the parties as to the Work. During the prosecution of the Work, the Contractor shall attend any and all meetings convened by the County with respect to the Project, when directed to do so by County. Contractor shall have its subcontractors and suppliers attend all such meetings (including the pre-construction conference) as may be directed by the County.

EXHIBIT B
PERFORMANCE AND PAYMENT BOND

BOND NO. _____

PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: That

_____

_____

(Insert name, address, and phone number of contractor), as Principal, and

_____

_____

_____, (Insert full name, home office address and phone number of surety) as Surety, are held and firmly bound unto the Board of County Commissioners for Escambia County, Florida, 221 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, as Obligee in the sum of

_____

____ Dollars ($_____), for the payment whereof we bind ourselves, our heirs, executors, personal representatives, successors and assigns, jointly and severally, firmly by these present.

WHEREAS, Principal has entered into a contract dated as of the _____ day of_____, 20____, with Obligee for Contract No._____,_____

_____

_____

(Insert name of project, including legal description, street address of property and general description of improvement) in accordance with drawings and specifications, which contract is by reference made a part hereof, and is hereinafter referred to as the Contract.

THE CONDITION OF THIS BOND is that if Principal:

1. Performs the Contract at the times and in the manner prescribed in the Contract; and

2. Pays Obligee any and all losses, damages, costs and attorneys' fees that Obligee sustains because of any default by Principal under the Contract; and

3. Performs the guarantee of all work and materials furnished under the Contract applicable to the work and materials, then this bond is void; otherwise it remains in full force; and

4. Principal understands and agrees that this bond shall remain in full force and effect throughout the two (2) year warranty period after substantial completion of the work.

The Surety, for value received, hereby stipulates and agrees that no changes, extensions of time, alterations or additions to the terms of the Contract or other work to be performed hereunder, or the specifications referred to therein shall in anywise affect its obligation under this bond, and it does hereby waive notice of any such changes, extensions of time, alterations or additions to the terms of the Contract or to work or to the specifications.

This instrument shall be construed in all respects as a common law bond.

In no event will the Surety be liable in the aggregate to Obligee for more than the penalty sum of this Performance Bond, regardless of the number of suits that may be filed by Obligee.

IN WITNESS WHEREOF, the above parties have executed this instrument this _____ day of _____, 20____, the name and corporate seal of each corporate party being hereto affixed and these premises duly signed by its undersigned representative, pursuant to authority of its governing body.

PAYMENT BOND

BY THIS BOND, We, _____
(Insert name, address and phone number of contractor)
_____ (hereinafter called the "Principal") and

_____ (hereinafter called the "Surety"),
(Insert name)
located at _____, a surety insurer
(Insert address and phone number)
chartered and existing under the laws of the State of _____ and authorized to do business

in the State of Florida, are held and firmly bound unto the Board of County Commissioners for Escambia

County, Florida, 221 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, (hereinafter called

the "County") in the sum of _____ ($_____) for

payment of which we bind ourselves, our heirs, our personal representatives, our successors and our assignees, jointly and severally.

WHEREAS, Principal and County have reached a mutual agreement relating to Contract No._____

(hereinafter referred to as the "Contract") as of _____ (the bid award date for projects thereto)

for the purpose of _____

(Insert name of project, including legal description, street address of property and general description of improvement.)
_____

_____

_____

said Contract being made a part of this Bond by this reference.

NOW, THEREFORE, THE CONDITION OF THIS BOND IS THAT IF THE PRINCIPAL:

1. Performs the contract dated _____, _____, between Principal and County for construction of _____, the contract being made a part of this bond by reference, at the times and in the manner prescribed in the contract; and

2. Promptly makes payments to all claimants, as defined in Section 255.05(1), Florida Statutes, supplying Principal with labor, materials, or supplies, used directly or indirectly by Principal in the prosecution of the work provided for in the contract; and

3. Pays County all loses, damages, expenses, costs, and attorney's fees, including appellate proceedings, that the County sustains because of a default by Principal under the contract; and

4. Performs the guarantee of all work and materials furnished under the contract for the time specified in the contract, then this bond is void; otherwise it remains in full force.

Any action instituted by a claimant under this bond for payment must be in accordance with the

notice and time limitation provisions in Section 255.05(2), Florida Statutes.

BE IT FURTHER KNOWN:

1. Any changes in or under the Contract and compliance or noncompliance with any formalities connected with the said Contract or alterations which may be made in the terms of the said Contract, or in the work to be done under it, or the giving by the County of any extension of time for the performance of the said Contract, or any other forbearance on the part of the County or Principal to the other, shall not in any way release the Principal and the Surety, or either of them, their heirs, personal representatives, successors or assigns from liability hereunder, notice to the Surety of any such changes, alterations, extensions or forbearance being hereby waived.

2. Certain claimants seeking the protection of this Bond must timely comply with the strict requirements set forth in Section 255.05, Florida Statutes, and as otherwise provided by law.

3. As concerns payment for labor, materials and supplies, as affects certain claimants, no legal action shall be instituted against the Principal or Surety on this Bond after one (1) year from the performance of labor or the completion of delivery of the materials or supplies as is specifically mandated pursuant to Section 255.05, Florida Statutes.

THIS BOND DATED THE _____ DAY OF _____, 20____ (the date of issue by the Surety or by the Surety's agent and the date of such agents power-of-attorney).

EXHIBIT C
INSURANCE AND SAFETY

INSURANCE - BASIC COVERAGES REQUIRED

The Contractor shall procure and maintain the following described insurance, except for coverages specifically waived by the County. Such policies shall be from insurers with a minimum financial size of VII according to the latest edition of the AM Best Rating Guide. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Such on policies shall provide coverages for any or all claims which may arise out of, or result from, the services, work and operations carried out pursuant to and under the requirements of the Contract Documents, whether such services, work and operations be by the Contractor, its employees, or by subcontractor(s), or anyone employed by or under the supervision of any of them, or for whose acts any of them may be legally liable.

The Contractor shall require, and shall be responsible for assuring throughout the time the Agreement is in effect, that any and all of its subcontractors obtain and maintain until the completion of that subcontractor's work, such of the insurance coverages described herein as are required by law to be provided on behalf of their employees and others.

The required insurance shall be obtained and written for not less than the limits of liability specified hereinafter, or as required by law, whichever is greater.

These insurance requirements shall not limit the liability of the Contractor. The County does not represent these types or amounts of insurance to be sufficient or adequate to protect the Contractor's interests or liabilities, but are merely minimums.

Except for workers compensation and professional liability, the Contractor's insurance policies shall be endorsed to name Escambia County as an additional insured to the extent of its interests arising from this agreement, contract or lease.

The Contractor waives its right of recovery against the County, to the extent permitted by its insurance policies.

The Contractor's deductibles/self-insured retentions shall be disclosed to the County and may be disapproved by the County. They shall be reduced or eliminated at the option of the County. The Contractor is responsible for the amount of any deductible or self-insured retention.

Insurance required of the Contractor or any other insurance of the Contractor shall be considered primary, and insurance of the County, if any, shall be considered excess, as may be applicable to claims obligations, which arise out of this agreement, contract or lease.

Workers Compensation Coverage
The Contractor shall purchase and maintain workers compensation insurance for all workers compensation obligations imposed by state law and with employer's liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease, or a valid

certificate of exemption issued by the state of Florida, or an affidavit in accordance with the provisions of Florida Workers Compensation law.

Contractor shall also purchase any other coverages required by law for the benefit of employees.

General, Automobile and Excess Or Umbrella Liability Coverage

The Contractor shall purchase and maintain coverage on forms no more restrictive than the latest editions of the Commercial General Liability and Business Auto policies of the Insurance Services Office.
Minimum limits of $1,000,000 per occurrence for all liability must be provided, with excess or umbrella insurance making up the difference, if any, between the policy limits of underlying policies (including employers liability required in the Workers Compensation Coverage section) and the total amount of coverage required.

General Liability Coverage - Occurrence Form Required
Coverage A shall include bodily injury and property damage liability for premises, operations, products and completed operations, independent contractors, contractual liability covering this agreement, contract or lease, broad form property damage coverages, and property damage resulting from explosion, collapse or underground (x,c,u) exposures.

Coverage B shall include personal injury.

Coverage C, medical payments, is not required.

The Contractor is required to continue to purchase products and completed operations coverage, at least to satisfy this agreement, contract or lease, for a minimum of three years beyond the County's acceptance of renovation or construction projects.

Business Auto Liability Coverage
Business Auto Liability coverage is to include bodily injury and property damage arising out of ownership, maintenance or use of any auto, including owned, non-owned and hired automobiles and employee non-ownership use.

Excess or Umbrella Liability Coverage
Umbrella Liability insurance is preferred, but an Excess Liability equivalent may be allowed. Whichever type of coverage is provided, it shall not be more restrictive than the underlying insurance policy coverages. Umbrella coverage shall drop down to provide coverage where the underlying limits are exhausted.

Evidence/Certificates of Insurance
Required insurance shall be documented in Certificates of Insurance. If and when required by the County, Certificates of Insurance shall be accompanied by documentation that is acceptable to the County establishing that the insurance agent and/or agency issuing the Certificate of Insurance has been duly authorized, in writing, to do so by and on behalf of each insurance company underwriting the insurance coverages(s) indicated on each Certificate of Insurance.

New Certificates of Insurance are to be provided to the County at least 30 days prior to coverage renewals. Failure of the Contractor to provide the County with such renewal certificates may be

considered justification for the County to terminate this agreement, contract or lease.

Certificates should contain the following additional information.

1. Indicate that Escambia County is an additional insured on the general liability policy.
2. Include a reference to the project and the Office of Purchasing number.
3. Disclose any self-insured retentions in excess of $1,000.
4. Designate Escambia County as the certificate holder as follows:
   Escambia County
   Attention: Jeffrey Lovingood, Purchasing Coordinator
   Office of Purchasing
   P.O. Box 1591
   Pensacola, FL 32597-1591
   Email: JDLovingood@myescambia.com
5. Indicate that the County shall be notified at least 30 days in advance of cancellation.

Receipt of certificates or other documentation of insurance or policies or copies of policies by the County, or by any of its representatives, which indicate less coverage than required does not constitute a waiver of the Contractor's obligation to fulfill the insurance requirements herein.

If requested by the County, the Contractor shall furnish complete copies of the Contractor's insurance policies, forms and endorsements, and/or such additional information with respect to its insurance as may be requested.

For Commercial General Liability coverage, the Contractor shall, at the option of the County, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage.

MINIMUM PROJECT SAFETY REQUIREMENTS

The following safety requirements represent the minimum condition, which shall be met by all Contractors and subcontractors performing work for Escambia County: Reported or observed violations of Federal and State laws and regulations, or County ordinances shall be brought to the attention of the County project manager and County's Department of Safety and Risk Services and shall be immediately corrected by the Contractor. Additionally, the County may order work to be stopped if conditions exist that present immediate danger to persons or property. The Contractor acknowledges that any such stoppage will not shift responsibility for any damages from the Contractor to the County. Failure to comply with required safety procedures shall result in the suspension of the Work of the Contractor until such time as his operations are brought into compliance. Items which are not corrected or that are disputed by the Contractor may be referred by the County's Department of Safety and Risk Services for inspection or interpretation. The Contractor shall take reasonable precautions for work place safety and shall provide reasonable protection to prevent damage, injury, or loss to employees on the work site and to other persons who may be affected by the Work.

(1) Prior to the commencement of the project, the Contractor and all subcontractors shall provide to the County a written copy of their respective safety and health plans for review as part of the pre-submittal bid package.

(2) The Contractor shall establish and maintain an access control system at the work site, including a daily sign-in log, for all visitors, including County and regulatory personnel. Prior to commencement of construction, the project manager may designate specific individuals for routine access so that their duties are not impeded. All visitors that are not pre-approved for admittance shall be escorted through the project by either a Contractor representative or by the project manager or designee.

(3) The Contractor shall provide all necessary safety equipment for County staff, employees, and visitors to enter the work site. This equipment may include hard hats, hearing protection, safety glasses, or any other safety items deemed necessary by the Contractor or required by State or Federal safety regulations.

(4) Construction vehicles on the work site shall always be operated in a safe manner. The Contractor shall take appropriate action to ensure the safety of County staff, visitors, and the general public while operating work vehicles at a "controlled" construction site. Where conditions warrant, or at the request of the County, temporary barriers shall also be established for these traffic areas.

(5) The Contractor shall prominently mark the work site and ensure its security. Site security shall include appropriate fencing, barricades, warning tape, covered walkways and warning signs. In no instance shall a work site be accessible, without obvious warning, to County staff, visitors, or the general public. At a minimum, the project site shall be posted with the appropriate trespass warning signs as specified in Section 810.09(2)(d), Florida Statutes: THIS AREA IS A DESIGNATED CONSTRUCTION SITE; ANYONE TRESPASSING ON THIS PROPERTY SHALL, UPON CONVICTION, BE GUILTY OF A FELONY; "A DANGER, CONSTRUCTION SITE. AUTHORIZED PERSONNEL ONLY," and other general safety warning signs, i.e., "HARD HAT AREA," as are deemed necessary by the Contractor and project manager.

(6) In the event barricading of a work site is not feasible, alternative measures may be used upon prior approval by the County safety Office. Alternative measures may include, but are not limited to, working during "off 'hours such as nights, weekends, or holidays, or the providing of temporary accommodations for building occupants (to be prearranged, if necessary, at the discretion of the County).

(7) The Contractor shall ensure compliance with all fire safety codes at the work site, especially as to egress, during the construction phase of an occupied facility. In no instance, (except where impractical and with the prior approval of the County's Department of Safety and Risk Services and the appropriate life safety code inspector), shall the life safety code components of an occupied facility be reduced or otherwise compromised.

A set of these construction plans, with a signature of approval by the appropriate life safety code inspector, shall be kept at each construction site and available for routine inspection. The Contractor shall communicate with each subcontractor and County's Department of Safety and Risk Services as to scheduling of events that may pose hazards or inconveniences to building occupants. The Contractor shall also ensure that appropriate scheduling information is also conveyed to the project manager.

- When a project alters a building's fire protection compartment features, such as fire barriers, smoke barriers, or corridor walls, exits must provide free and unobstructed egress. Employees shall receive notice if any alternative exits have been designated. Buildings or areas under construction must maintain escape egress for construction workers at all times. These means of egress shall be inspected daily by the Contractor.

- When a project affects fire alarms, fire detection, or fire suppression systems, of a building that is occupied, the Contractor must ensure that such systems are not functionally impaired. Any temporary systems, which are installed, must be inspected and tested monthly by the Contractor. Employees must be notified when such temporary systems are in place.

- When any sources of ignition are present, such as welding torches, smoking by all persons shall be prohibited on any construction site and in any County facility.

(8) Noise, dust, and the use of chemical products may create inside health hazards at the work site to building occupants requiring that the Contractor to adhere to the following guidelines at a minimum:

(a) The Contractor shall initiate construction and engineering safety controls to minimize exposure of dusts, noise, and chemical odors to building occupants. These controls may involve the construction or use of temporary walls, plastic barriers, mechanical ventilation, elimination of make-up air returns from work areas, pressurizing occupied areas, or a combination of several methods. The Contractor shall coordinate all such engineering efforts with the project manager, and these control measures shall require prior approval by the County's Department of Safety and Risk Services. In cases where these efforts may not be feasible, alternative work schedules on evenings and weekends may be instituted as a part of this process.

(b) Material Safety Data Sheets (MSDS) shall be provided to the County's Department of Safety and Risk Services for all hazardous substances used on the project or brought on the job site. These products include, but are not limited to, paints, solvents, roofing compounds, and cleaning compounds.

(c) Appropriate precautions shall be taken to prevent occupant exposure to hazardous respirable dusts, contaminants, and fumes from welding, cutting, or drilling of concrete and masonry, or the operation of internal combustion engines. The Contractor shall also determine whether respirable crystalline silica, which is a potential carcinogen contained in many building products, is present at the work site. Control of dusts from these types of products and operations shall be an essential safety requirement for the Contractor.

(d) The Contractor should be aware of other buildings adjacent to his work areas and shall be prepared to take necessary actions to prevent the spread of dusts and fumes to those facilities.

(9) The Contractor shall ensure that all emergency notifications, including those for fires and medical needs, shall be promptly made by dialing County 911 dispatchers. The Caller should state the exact location of the work site emergency, the nature of the emergency, and specifically indicate if medical or fire services are needed.

(10) The Contractor agrees and understands that all County construction/renovation sites shall be subject to periodic inspection by life safety code inspectors, Florida Department of Labor and Employment Security, Division of Safety, Occupational Safety and Health Administration, Florida Department of Environmental Protection, Environmental Protection Agency, and other Federal, State, or County regulatory agencies.

(11) The Contractor shall provide adequate refuse containers for the disposal of construction debris. Refuse shall not be allowed to accumulate on the project site grounds, and the Contractor shall ensure that these containers are subsequently emptied on a regular basis.

(12) Water runoff and soil erosion from the project site shall be controlled by the Contractor pursuant to the regulations of the Florida Department of Environmental Protection.

(13) Water-based paint and stain products shall be used by the Contractor in the place of solvent-based products where the application so permits. Use of organic solvent-based products shall be used only where absolutely necessary and with the prior approval of the project manager. Lead-containing paints shall not be normally used or specified for any application. If the use of lead-containing paint is essential for a specific application, prior written approval from the County's Department of Safety and Risk Services shall be obtained before their use.

(14) The use of any products containing toxic metals, especially those regulated by Resource Conservation and Recovery Act (RCRA), (i.e. lead, chromium, barium, silver, arsenic,

cadmium, mercury, selenium), on the work site shall be avoided. Prior written approval for use of these metals shall be obtained by the Contractor from the County's Department of Safety and Risk Services.

(15) The use of any radioactive materials by the Contractor on project sites shall require pre-approval. Copies of appropriate certifications, licenses, testing, and inspection records shall be provided by the Contractor to the project manager and County's Department of Safety and Risk Services for review.

(16) The County contracts out the identification and abatement of asbestos containing building materials. Asbestos abatement can only be performed by state licensed asbestos abatement contractors. General contractors, therefore, shall not be authorized to remove or disturb any asbestos containing materials. Although efforts are made to identify or remove such asbestos containing materials prior to renovations, the possibility exists that asbestos materials may be encountered at a work site. If so, Contractors who encounter such materials shall immediately stop work and notify the project manager and the County's Department of Safety and Risk Services.

(17) The above-cited guidelines represent minimum expectations and actions, which shall be taken by Contractors while under contract for County construction and renovation projects. These guidelines are not all inclusive and will be revised as necessary. In the event these guidelines conflict with other contract documents, the most stringent application shall apply. Any questions or disputes should be brought to the immediate attention of the project manager and County's Department of Safety and Risk Services.

EXHIBIT D
RELEASE AND AFFIDAVIT

COUNTY OF ESCAMBIA
STATE OF FLORIDA

Before me, the undersigned authority, personally appeared _____, who after being duly sworn, deposes and says:

(1) In accordance with the Contract Documents and in consideration of $_____ paid, _____ ("Contractor") releases and waives for itself and its subcontractors, material men, successors and assigns, all claims demands, costs and expenses, whether in contract or in tort, against the Board of County Commissioners of Escambia County, Florida, ("County") relating in any way to the performance of the Agreement between Contractor and County dated _____, 20____, for the period from _____ to _____.

(2) Contractor certifies for itself and its subcontractors, material men, successors and assigns, that all charges for labor, materials, supplies, lands, licenses and other expenses for which County might be sued or for which a lien or a demand against any payment bond might be filed, have been fully satisfied and paid.

(3) Contractor agrees to indemnify, defend and save harmless County from all demands or suits, actions, claims of liens or other charges filed or asserted against the County arising out of the performance by Contractor of the Work covered by this Release and Affidavit.

(4) This Release and Affidavit is given in connection with Contractor's (monthly/final) Application for Payment No. _____.

EXHIBIT G
PAYMENT ADJUSTMENT - BITUMINOUS MATERIALS.

1. The bid unit price for Bituminous Material will be adjusted to reflect changes, both increases and decreases, in the Asphalt Index price of bituminous material from that in effect during the month in which bids were received for this contract. The Contractor will not be given the option to reject this cost adjustment of Bituminous Materials. This adjustment will be made in accordance with the following criteria:

1.1. Price adjustments will apply only to the price of bituminous material F. O. B. manufacturer's asphalt terminal and will not reflect variations in the cost of transportation from the terminal to the job site.

1.2. Price adjustments will be made for all bituminous material incorporated into asphalt pavement whether paid for under a separate bid item or under other items, which include the cost of bituminous material.

1.3. Price adjustments will not be made until the semi-final or final payment is made on the contract. The bid unit price for bituminous material will be used in preparing monthly progress payments.

1.4. No price adjustment reflecting any further increases in the cost of bituminous material will be made for any month after expiration of the allowable contract time, including any extensions that may be granted.

1.5. The adjusted unit price shall be calculated for the month during which the material was incorporated into the project in accordance with the following formula:

Pa ‘ PbX(Id-Ib) where:
Pa ‘ Adjusted unit price for Bituminous Material. (To be calculated separately for each month during which bituminous material is used and will reflect an increased or decreased price.)
Pb ‘ Bid unit price for Bituminous Material.
Id ‘ Asphalt Price Index during the month in which the material is incorporated into the project.
Ib ‘ Asphalt Price Index during the month in which bids were received for this contract.

1.6. The County will determine the Asphalt Price Index for each month. The Index shall be determined by averaging quotations in effect on the first day of the month at all terminals, which could reasonably be expected to furnish bituminous material to projects in the State of Florida.

1.7. A price adjustment will be made only when the current Asphalt Price Index varies by 5% or more from the Index that was applicable when bids were received or 5% or more from when the last previous adjustment was made.

The Asphalt Price Index to be used by the County will be that used by the Florida Department of Transportation, as available from them after the 15th of each month.

ITEM 1:
IT IS THE CONTRACTOR'S RESPONSIBILITY TO SELECT AND GAIN PERMISSION TO USE OTHER SITES/PARCELS FOR LAY DOWN OR TEMPORARY EARTHWORK DISPOSAL (INCLUDING SEDIMENT CONTROL). THE CONTRACTOR SHALL RETURN ALL SITES USED FOR THESE PURPOSES TO ORIGINAL CONDITION OR BETTER. EXISTING SIGNAGE SHALL BE PROTECTED AND STOCKPILED IF NECESSARY. ANY COSTS ASSOCIATED WITH THE ABOVE SHALL BE INCLUDED IN THE COST OF MOBILIZATION/DEMOBILIZATION.

ITEM 2:
ALL PIPES TO BE REMOVED, ASSOCIATED DRAINAGE STRUCTURES, REMNANT SITE IMPROVEMENTS, AND ALL TREES WITH DIAMETER OF 12" OR LESS LOCATED IN THE LIMITS OF CONSTRUCTION WHICH NEED TO BE REMOVED SHALL BE INCLUDED IN THE COST OF CLEARING AND GRUBBING. THE CONTRACTOR SHALL FAMILIARIZE HIMSELF WITH THE AMOUNT, LOCATION, AND SIZE OF TREES BEFORE BIDDING. PROTECTION BARRICADE SHALL BE INCLUDED IN THIS ITEM WHERE TREES ARE TO REMAIN ADJACENT TO CONSTRUCTION.

ITEM 3:
ITEM INTENDED TO COVER REMOVAL OF TREES GREATER THAN 12" IN DIAMETER WITHIN THE LIMITS OF CONSTRUCTION. QUANTITY AS FOLLOWS:

TREES WITH DIAMETER OF 13" TO 24" = 129
TREES WITH DIAMETER OF 25" TO 48" = 3

ITEM 4:
EARTHWORK IS A LUMP SUM PAY ITEM. EARTHWORK IS THE IN-PLACE QUANTITY FOR SEDIMENT BASINS, DITCHES, AND ASSOCIATED IMPROVEMENTS INDICATED TO FINISHED GRADE WITHIN THE LIMITS OF CONSTRUCTION. SAND FILTER FILL IS QUANTIFIED IN ITEM 5. OTHER TEMPORARY AND PERMANENT EARTHWORK REQUIRED DURING CONSTRUCTION INCLUDING BUT NOT LIMITED TO SHORING, TRENCH EXCAVATION, TEMPORARY SLOPES, TRENCH BOXES, AND OTHER ITEMS ASSOCIATED WITH CONTRACTOR'S MEANS AND METHODS SHALL BE INCLUDED IN THE LUMP SUM COST OF EARTHWORK. ANY DAMAGE TO ROADWAY OR ADJACENT PROPERTIES CAUSED BY CONTRACTOR'S OPERATIONS SHALL BE REPAIRED BY THE CONTRACTOR AT THE CONTRACTOR'S COST AND EXPENSE. EARTHWORK TOTALS:

EARTHWORK TOTALS
CUT: 9,421 CY, FILL: 5,585 CY
SAND FILTER - CUT ONLY: 135 CY

ITEM 5:
THE LAB SAMPLE REQUIREMENT OF THE FILTER SAND IN PLACE (SAND FILTER BACKFILL) SHALL BE INCLUDED IN THE COST OF THE SAND FILTER MEDIA. THE BACKFILL SHOULD BE PERFORMED WITH A MEDIUM CLEAN SAND SOIL WITH A MINIMUM PERMEABILITY OF 30 FEET/DAY AT A MINIMUM OF 100% OF THE STANDARD PROCTOR TEST (ASTM D 698) ENERGY.

THIS ITEM DOES NOT INCLUDE FILTER SAND ASSOCIATED WITH THE FDOT TYPE III UNDERDRAIN

ITEM 6:
8" STABILIZED SUBGRADE IS TO BE USED ON ALL MAINTENANCE ACCESS AREAS. SEE PLANS.

ITEM 10:
SEE DRAINAGE DETAILS SHEET

ITEM 14:
THE FOLLOWING OPTIONAL PIPE MATERIALS ARE ALLOWED FOR THIS PROJECT AT LOCATIONS WHERE PIPE IS NOT LOCATED UNDER ROADWAYS OR EXPOSED TO UV LIGHT: RCP, HDPE, AND PP. HDPE AND PP PIPE OPTIONS SHALL BE CLASS II (100-YEAR DESIGN SERVICE LIFE) AND MEET THE REQUIREMENTS OF FDOT SPEC 948. DISSIMILAR PIPE CONNECTIONS (COLLARS) SHALL BE INCLUDED IN THE COST OF PIPE AND ARE ONLY ALLOWED AT MES LOCATIONS WHERE MATERIAL CHANGE TO CONCRETE MAY OCCUR. DISSIMILAR PIPE CONNECTIONS SHALL BE PER FDOT INDEX 430-001.

ITEM 15:
FDOT TYPE III UNDERDRAIN (PER FDOT INDEX 440-001) SHALL INCLUDE THE COST OF 451 LF OF 8" PDW HDPE SOCK WRAP UNDERDRAIN, FILTER FABRIC, 75 CY FILTER SAND, AND 41 CY OF NO. 57 COARSE AGGREGATE REQUIRED TO CONSTRUCT THE UNDERDRAIN. CLEANOUTS SHALL BE PLACED PER COUNTY SPEC 2320 AND INCLUDED IN THE TOTAL COST FOR THIS ITEM.

ITEM 18:
THIS ITEM OR APPROVED EQUAL. PRODUCT MUST BE ON THE FDOT APPROVED PRODUCTS LIST. PERMANENT ANCHORING SYSTEM PER MANUFACTURERS RECOMMENDATIONS SHALL BE INCLUDED IN THE COST OF THIS ITEM. SUPPLEMENTAL INFORMATION FOR THIS ITEM, INCLUDING ANCHORING DETAILS, IS INCLUDED IN THE PROJECT SPECIFICATIONS PACKAGE. THE PRODUCT IS INTENDED TO BE COVERED WITH SOD FOR SHORT-TERM VEGETATION ESTABLISHMENT. THE COST OF PREPARING THE PRODUCT FOR SOD PLACEMENT, SUCH AS SOIL PRIMING, IF NECESSARY, IS INCLUDED IN THIS ITEM WITH THE GOAL BEING SUCCESSFUL VEGETATION ESTABLISHMENT. THE COST OF SOD IS INCLUDED IN ITEM 21. AN ADDITIONAL 10% QUANTITY OF MATERIAL IS INCLUDED BUT ONLY SHALL BE USED UPON PRIOR APPROVAL.

ITEM 19:
ADDITIONAL PLACEMENT AND SHAPING DETAILS INCLUDED IN THE PLANS.

ITEMS 20, 21, 22, AND 23
THE QUANTITIES SHOWN REPRESENT THE TEMPORARY EROSION CONTROL FEATURES SHOWN IN THIS PLAN SET. ULTIMATELY THE CONTRACTOR IS RESPONSIBLE FOR ALL SEDIMENT AND EROSION CONTROL FOR THIS PROJECT INCLUDING ASSOCIATED ITEMS, QUANTITES, INSPECTION, AND ASSOCIATED WORK PER THE NPDES PERMIT.

ITEM 24:
THE CONTRACTOR MUST CONSTRUCT A STABILIZED GRAVEL CONSTRUCTION ENTRANCE AT ALL CONSTRUCTION ENTRANCES. IT IS ASSUMED THE CONTRACTOR WILL HAVE ONE ENTRANCE ON THE NORTH SIDE OF THE PROJECT AND ONE ENTRANCE ON THE SOUTH SIDE OF THE PROJECT. THE QUANTITY ASSUMES TWO 100 SY CONSTRUCTION ENTRANCES.

ITEM 26:
RIPRAP RUBBLE AT THE FAR SOUTH END OF THE PROJECT MAY BE USED IN PROPOSED RIPRAP RUBBLE LOCATIONS ON SITE IF THE MATERIAL MEETS COUNTY SPECIFICATIONS.

SHEET NO. 5

THE OFFICIAL RECORD OF THIS SHEET IS THE ELECTRONIC FILE DIGITALLY SIGNED AND SEALED UNDER RULE 61G15-23.004, F.A.C.

PHWALKER 2/11/2019 9:30:33 AM PW:\3011\10125425\6.0_CAD_BIM\6.2_WIP\roadway\TYPDRD01.DGN

GENERAL NOTES:

1. THE CONTRACTORS SHALL NOTIFY THE COUNTY DESIGN ENGINEER OR DESIGNEE 48 HOURS PRIOR TO CONSTRUCTION.

2. ALL CONDITIONS AND STIPULATIONS OF THE CONSTRUCTION PERMITS AND THE APPROVALS ISSUED BY THE ESCAMBIA COUNTY ENGINEER SHALL BE COMPLIED WITH IN EVERY DETAIL.

3. ALL ROADS DAMAGED BY CONSTRUCTION OPERATIONS ARE TO BE PATCHED OR RECONSTRUCTED AS DIRECTED BY THE COUNTY ENGINEER OR DESIGNEE.

4. THE CONTRACTOR SHALL TAKE STEPS NECESSARY TO PREVENT EROSION AND ANY OFF SITE SEDIMENT TRANSPORT RESULTING FROM INCREASED RUNOFF DURING CONSTRUCTION BY PROVIDING SILT FENCE AND/OR STAKED HAY BALES AS REQUIRED BY THE FLORIDA STORMWATER, EROSION, AND SEDIMENT CONTROL INSPECTOR'S MANUAL, JULY 2018 EDITION, OR AS INDICATED ON THE PLANS. ALL EROSION CONTROL MEASURES SHALL REMAIN IN PLACE UNTIL ASSOCIATED DISTURBED AREAS ARE STABILIZED AS TO REDUCE SEDIMENT RUNOFF, UNLESS OTHERWISE DIRECTED BY THE ENGINEER OR DESIGNEE.

5. ANY NECESSARY PERMITS WILL BE THE RESPONSIBILITY OF THE CONTRACTOR. ESCAMBIA COUNTY OR ITS DESIGNEE WILL ASSIST CONTRACTOR WITH REQUIRED PERMITS.

6. THE CONTRACTOR IS CAUTIONED TO VISIT THE SITE AND FAMILIARIZE HIMSELF WITH THE PROJECT PRIOR TO BIDDING AND/OR CONSTRUCTION.

7. IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO PRESERVE OR RELOCATE ALL BENCHMARKS (VERTICAL CONTROL) AS NEEDED DURING CONSTRUCTION. ALL PUBLIC OR PRIVATE CORNER MONUMENTATION SHALL BE PROTECTED. IF A PUBLIC OR PRIVATE CORNER MONUMENTATION IS IN DANGER OF BEING DESTROYED AND HAS NOT BEEN PROPERLY REFERENCED, THE CONTRACTOR SHALL NOTIFY THE ENGINEER OR DESIGNEE IMMEDIATELY. ANY ESCAMBIA COUNTY HARN/GPS NETWORK MONUMENTS OR BUREAU OF SURVEY AND MAPPING GPS NETWORK MONUMENTS WITHIN THE LIMITS OF CONSTRUCTION SHALL BE PROTECTED. IF A HARN/GPS NETWORK MONUMENTS OR BUREAU OF SURVEY AND MAPPING GPS NETWORK MONUMENTS ARE DISTURBED OR DESTROYED THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELACEMENT REPLACEMENT OF THE MONUMENTS AND HAVE THE MONUMENTS POSITION DETERMINED BY A FLORIDA LICENSED PROFESSIONAL SURVEYOR AND MAPPER USING GUIDELINES AS ESTABLISHED BY NATIONAL GEODETIC SURVEY FOR BLUE BOOKING AND APPROVAL.

8. EXISTING DRAINAGE FEATURES WITHIN CONSTRUCTION LIMITS SHALL REMAIN UNLESS OTHERWISE NOTED.

9. THE CONTRACTOR SHALL MATCH EXISTING CONDITIONS AT THE BEGINNING AND END OF CONSTRUCTION AS DIRECTED BY THE COUNTY ENGINEER OR DESIGNEE.

10 EXISTING STREETS AND DRIVES SHALL BE MAINTAINED TO LOCAL TRAFFIC AND PROPERTY OWNERS.

11. ALL MATERIALS, TESTING, AND CONSTRUCTION METHODS SHALL CONFORM TO THE ESCAMBIA COUNTY TECHNICAL SPECIFICATIONS, LATEST EDITION.

12. ANY REFERENCE TO FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, LATEST EDITION, DIVISION 1, GENERAL REQUIREMENTS AND COVENANTS, SHALL BE EXCLUDED AND NOT APPLICABLE TO ANY SPECIFICATION REFERRED HEREIN OR OTHERWISE LISTED IN THESE PLANS OR RELATED DOCUMENTS OR THE ESCAMBIA COUNTY TECHNICAL SPECIFICATIONS.

13. CONTRACTOR SHALL COMPLY WITH ALL F.D.E.P. AND ARMY CORP. OF ENGINEERS REQUIREMENTS. THE PROJECT IS PERMITTED BY NWFWMD (GEN-033-284800-1)

14. ONLY ACCESS TO THE EASEMENTS AS SHOWN ARE GUARANTEED BY THE COUNTY. PRIVATE R/W REQUIRED BY THE CONTRACTOR TO FACILITATE CONSTRUCTION SHALL BE ACQUIRED BY THE CONTRACTOR WITH NO ADDITIONAL COMPENSATION OR ASSISTANCE FROM THE COUNTY.

15. IN THE EVENT THAT SURVEY MONUMENTATION OR REFERENCE POINTS ARE MISSING OR HAVE BEEN DESTROYED, PLEASE CONTACT:

    ERIC STUART, PSM
    NOBLES CONSULTING GROUP, INC.
    600 UNIVERSITY PLAZA DRIVE
    PENSACOLA, FLORIDA 32504 PH (850) 678-9932

16. DIRECT SPECIAL ATTENTION TO THE PROTECTION OF ALL GEODETIC MONUMENTS, HORIZONTAL OR VERTICAL, AND PUBLIC LAND SURVEY CORNERS LOCATED WITHIN THE PROJECT. IF ANY GEODETIC MONUMENT OR PUBLIC LAND SURVEY CORNER, LOCATED WITHIN THE PROJECT, IS AT RISK OF BEING DAMAGEDOR DESTROYED, IMMEDIATELY NOTIFY THE COUNTY ENGINEER OR DESIGNEE. IN ADDITION, CONTACT JOE BARRETT, ESCAMBIA COUNTY SURVEYOR, TO OBTAIN APPROVAL TO LOCATE AND REPLACE ANY DAMAGED OR DESTROYED GEODETIC MONUMENTS OR PUBLIC LAND SURVEY CORNERS UNDER THE DIRECTION OF A PROFESSIONAL SURVEYOR AND MAPPER REGISTERED IN THE STATE OF FLORIDA.

17. VEGETATION ON R/W AND EASEMENTS SHALL BE RESTORED TO ORIGINAL CONDITION UNLESS OTHERWISE NOTED ON THE PLAN SHEETS. COST OF SAID RESTORATION SHALL BE CONSIDERED INCIDENTAL TO OTHER PAY ITEMS.

18. ALL TREES WITHIN LIMITS OF CONSTRUCTION SHALL BE REMOVED UNLESS OTHERWISE NOTED IN PLANS.

19. ALL COMPACTED FILL SHALL BE PLACED IN 4" LIFTS FOR HAND POWERED TAMPERS AND 8" LIFTS FOR HEAVY EQUIPMENT OPERATED TAMPERS.

20. PIPE LENGTHS SHOWN IN THE PLANS DO NOT INCLUDE THE LENGTH OF PIPE THAT MUST BE INSTALLED WITH THE MITERED END SECTION. THEREFORE, ALL PIPES LENGTHS ASSOCIATED WITH MITERED END SECTIONS SHALL BE PAID FOR IN THE UNIT COST OF THE MITERED END SECTION.

21. IF ARCHAEOLOGICAL MATERIAL/PREHISTORIC ARTIFACTS SUCH AS POTTERY OR CERAMICS, STONE TOOLS OR METAL IMPLEMENTS, OR ANY OTHER PHYSICAL REMAINS THAT COULD BE ASSOCIATED WITH NATIVE AMERICAN CULTURES, OR EARLY COLONIAL OR AMERICAN SETTLEMENT ARE ENCOUNTERED AT ANY TIME, THE PROJECT SHOULD CEASE ALL ACTIVITIES INVOLVING SUBSURFACE DISTURBANCE IN THE IMMEDIATE VICINITY OF SUCH DISCOVERIES. THE APPLICANT/RECIPIENT, OR OTHER DESIGNEE, SHOULD CONTACT THE FLORIDA DEPARTMENT OF STATE, DIVISION OF HISTORICAL RESOURCES, THE STATE HISTORIC PRESERVATION OFFICER (SHPO) AND THE DSH/FEMA REGION IV ENVIRONMENTAL OFFICER AND FDEM STATE ENVIRONMENTAL LIAISON OFFICER FOR FURTHER GUIDANCE. PROJECT ACTIVITIES SHOULD NOT RESUME WITHOUT VERBAL AND/OR WRITTEN AUTHORIZATION FROM THE DIVISION OF HISTORICAL RESOURCES.

22. IN THE EVENT THAT UNMARKED HUMAN REMAINS ARE ENCOUNTERED DURING PERMITTED ACTIVITIES, ALL WORK MUST STOP IMMEDIATELY AND THE PROPER AUTHORITIES NOTIFIED IN ACCORDANCE WITH F.S. 872.05.

UTILITY NOTES:

1. THE LOCATION SHOWN FOR EXISTING UNDERGROUND UTILITIES IS APPROXIMATE. THE CONTRACTOR SHALL DETERMINE THE EXACT LOCATION OF ALL EXISTING UTILITIES BEFORE COMMENCING WORK IN EACH AREA. THE CONTRACTOR AGREES TO BE COMPLETELY RESPONSIBLE FOR ALL DAMAGES WHICH MIGHT OCCUR BY HIS FAILURE TO EXACTLY LOCATE AND PRESERVE ALL UTILITIES.

2. UTILITY OWNERS SHALL BE NOTIFIED AT LEAST 48 HOURS PRIOR TO ANY CONSTRUCTION SO THAT THE UTILITY OWNER CAN SPOT VERIFY AND/OR EXPOSE THEIR UTILITIES. KNOWN UTILITIES OWNERS ACCORDING TO THE SUNSHINE ONE CALL INCLUDE:

    WATER/SEWER – EMERALD COAST UTILITY AUTHORITY

THE OFFICIAL RECORD OF THIS SHEET IS THE ELECTRONIC FILE DIGITALLY SIGNED AND SEALED UNDER RULE 61G15-23.004, F.A.C.

SITE-SPECIFIC EROSION AND SEDIMENT CONTROL PLAN

THE CONTRACTOR'S PROFESSIONAL ENGINEER (PE), OR CERTIFIED PROFESSIONAL IN EROSION AND SEDIMENT CONTROL (CPESC) WILL PREPARE AND SUBMIT A SITE-SPECIFIC EROSION AND SEDIMENT CONTROL PLAN TO ESCAMBIA COUNTY FOR REVIEW AND APPROVAL PRIOR TO ANY WORK BEING PERFORMED. THE EROSION AND SEDIMENT CONTROL PLAN SHALL FOLLOW GUIDELINES DOCUMENTED IN THE STATE OF FLORIDA, EROSION AND SEDIMENT CONTROL – DESIGNER AND REVIEWER MANUAL, DATED JUNE 2007, UPDATED 2013 (http://www.fdot.govroadway/drainage/files/Erosion-Sediment-Control.pdf).

AT A MINIMUM, THE EROSION AND SEDIMENT CONTROL PLANS FOR THIS PROJECT REQUIRE SEDIMENT BARRIER TO BE PLACED WHERE THERE IS POTENTIAL FOR TURBID STORMWATER RUNOFF TO DISCHARGE OFF-SITE. INLET PROTECTION IS REQUIRED FOR ALL INLETS THAT COULD RECEIVE RUNOFF FROM DISTURBED AREAS. ARTIFICIAL COVERINGS AND TEMPORARY SLOPE DRAINS ARE REQUIRED IN AREAS WITH HIGH SLOPES. RUNOFF CONTROL STRUCTURES WILL BE REQUIRED WITHIN ALL CHANNELS. A SOIL TRACKING PREVENTION DEVICE SHALL BE INSTALLED AT POINTS OF EGRESS FROM UN-STABLIZED AREAS OF THE PROJECT TO PUBLIC ROADS WHERE OFF-SITE TRACKING OF MUD COULD OCCUR.

PAY PARTICULAR ATTENTION TO THE PROTECTION OF UPLAND BUFFERS, NON-IMPACTED WETLANDS, AND SURFACE WATERS ADJACENT TO THE LIMITS OF WORK TO PREVENT TURBID DISCHARGES TO THESE AREAS.

THE MEASURES LISTED ABOVE AND SHOWN ON THE PLANS ARE THE MINIMUM REQUIREMENTS WITH ADDITIONAL CONTROLS TO BE UTILIZED AS NEEDED, DEPENDENT UPON ACTUAL SITE CONDITIONS AND CONSTRUCTION OPERATIONS AND PHASING.

1. SITE DESCRIPTION:

CONSTRUCTION ACTIVITY INCLUDES NEW CONSTRUCTION, STORM SEWER, DITCH GRADING, AND SEDIMENT BASIN GRADING.

PROJECT LIMITS:
NORTH END OF MOTLEY CT. FROM APPROX 180 FEET NORTH OF VALLEY RIDGE CIR. TO APPROX 1,640 FEET NORTH OF VALLEY RIDGE CIR. (APPROX 0.28 MILES)

PROJECT DESCRIPTION:
CONSTRUCTION OF ACCESS ROADS, SEDIMENT BASINS, AND DRAINAGE CHANNELS NORTH OF MOTLEY CT.

THE MAJOR SOIL DISTURBING ACTIVITIES INCLUDE DITCH EXCAVATION AND SEDIMENT BASIN EXCAVATION.

TOTAL AREA TO BE DISTURBED:

RUNOFF COEFFICIENTS:
C= 0.15 (BEFORE)
C= 0.50 (DURING)
C= 0.20 (AFTER)

(2) ESTIMATES OF SIZE OF PROJECT AREA FOR EACH OUTFALL:
CLEAR CREEK – TOTAL AREA 2.98 ACRES

(3) LOCATIONS OF OUTFALLS:
NORTH POND OUTFALL: LAT N30° 33' 30", LONG. W87° 15' 11" (CLEAR CREEK)

(4) DESCRIPTION OF SOIL OR QUALITY OF DISCHARGE:
SOILS ARE PRIMARILY TROUP SANDS AND TROUP-POARCH SANDY LOAM.

THE CONSTRUCTION PLANS ARE BEING USED FOR THE SITE MAP.

2. CONTROLS:

TEMPORARY EROSION CONTROL MEASURES ARE SHOWN ON THE EROSION CONTROL PLANS AND PERMANENT EROSION CONTROL MEASURES ARE SHOWN IN THE CONSTRUCTION PLANS.

a. EROSION AND SEDIMENT CONTROLS:
(1) STABILIZATION PRACTICES:

X TEMPORARY SODDING	X ARTIFICIAL COVERING
___ TEMPORARY GRASSING	X BUFFER ZONES
X PERMANENT PLANTING, SODDING, OR SEEDING	___ PRESERVATION OF NATURAL RESOURCES
___ TEMPORARY MULCHING	

-LOCATION OF ARTIFICIAL COVERING IS TO BE DETERMINED BASED ON SITE CONDITIONS
-THIS LIST MAY NOT INCLUDE ALL MEASURES BASED ON ACTUAL SITE CONDITIONS

STABILIZATION MEASURES SHALL BE INITIATED AS SOON AS PRACTICAL, BUT IN NO CASE MORE THAN 14 DAYS, IN PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITIES HAVE TEMPORARILY OR PERMANENTLY CEASED.

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(2) STRUCTURAL PRACTICES:

___ SAND BAGGING	___ SEDIMENT TRAPS
X SEDIMENT BARRIER	X SEDIMENT BASINS
___ SYNTHETIC BALES	___ STORM INLET SEDIMENT TRAP
X BERMS	___ STONE OUTLET STRUCTURES
___ DIVERSION, INTERCEPTOR, OR PERIMETER DITCHES	___ CURBS AND GUTTERS
X PIPE SLOPE DRAINS	X STORM SEWERS
___ FLUMES	___ VELOCITY CONTROL DEVICES
X ROCK BEDDING AT CONSTRUCTION EXIT	___ FLOATING TURBIDITY BARRIER
___ TIMBER BEDDING AT CONSTRUCTION EXIT	X RIPRAP
X RUNOFF CONTROL STRUCTURE	X WATTLES
X INLET PROTECTION	

LOCATIONS OF SEDIMENT BASINS, STORM DRAINS, AND RIP RAP ARE SHOWN ON THE CONSTRUCTION PLANS. THIS LIST MAY NOT INCLUDE ALL CONTROL MEASURES. ACTUAL SITE CONDITIONS MAY REQUIRE ADDITIONAL CONTROL MEASURES.

SEDIMENT BARRIER WILL BE USED TO PROTECT ALL UNDISTURBED WETLANDS.

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

b. DESCRIPTION OF SEDIMENT BASINS:
THERE ARE 3 SEDIMENT BASIN FACILITIES TO BE CONSTRUCTED WITH THIS PROJECT.

c. OTHER CONTROLS
(1) WASTE DISPOSAL:
THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(2) OFFSITE VEHICLE TRACKING:
X HAUL ROADS DAMPENED FOR DUST CONTROL
X LOADED HAUL TRUCKS TO BE COVERED WITH TARPAULIN
X EXCESS DIRT ON ROAD REMOVED DAILY
X STABILIZED CONSTRUCTION ENTRANCES

OTHER:
THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(3) SANITARY WASTE:
THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(4) FERTILIZERS AND PESTICIDES:
FERTILIZER WILL BE APPLIED ACCORDING TO APPLICABLE SUBSECTIONS OF THE ESCAMBIA COUNTY GENERAL PAVING & DRAINAGE TECHNICAL SPECICATIONS. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR DOCUMENTING THE USE OF PESTICIDES IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

(5) TOXIC SUBSTANCES (INCLUDING SPILL REPORTING):
THE CONTRACTOR IS RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY. IF CONTAMINATED SOIL OR GROUNDWATER IS ENCOUNTERED, CONTACT THE COUNTY PROJECT MANAGER IMMEDIATELY.

d. FEDERAL, STATE, AND LOCAL PLANS, AND PERMITS:
- NORTHWEST FLORIDA WATER MANAGEMENT DISTRICT,1½ GENERAL PERMIT (403.814 (12) F.S)
- FDEP NPDES GENERIC PERMIT FOR STORMWATER DISCHARGE FROM CONSTRUCTION SITE, (CH 62-621 FAC) TO BE OBTAINED BY THE CONTRACTOR
- THERE ARE NO WETLANDS IN THE PROJECT LIMITS

3. MAINTENANCE:

MAINTENANCE OF PERMANENT AND TEMPORARY FEATURES SHALL BE DONE IN ACCORDANCE WITH THE ESCAMBIA COUNTY GENERAL PAVING & DRAINAGE TECHNICAL SPECIFICATIONS.

THE CONTRACTOR IS ALSO RESPONSIBLE FOR DOCUMENTING THIS PORTION OF THE SWPPP IN THE EROSION CONTROL PLAN SUBMITTED TO THE COUNTY.

4. INSPECTION:

THE CONTRACTOR IS SOLELY RESPONSIBLE FOR INSPECTIONS OF EROSION CONTROL FEATURES. QUALIFIED PERSONNEL SHALL INSPECT THE FOLLOWING ITEMS AT LEAST ONCE EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A STORM THAT IS 0.25 INCHES OR GREATER. WHERE SITES HAVE BEEN FINALLY STABILIZED, INSPECTIONS SHALL BE CONDUCTED AT LEAST ONCE EVERY MONTH.
-POINTS OF DISCHARGE FROM THE PROJECT SITE
-DISTURBED AREAS OF THE SITE THAT HAVE NOT BEEN FINALLY STABILIZED
-AREAS USED FOR STORAGE OF MATERIALS THAT ARE EXPOSED TO PRECIPITATION
-STRUCTURAL CONTROLS
-SEDIMENT BASINS
-LOCATIONS WHERE VEHICLES ENTER OR EXIT THE SITE

5. NON-STORMWATER ACTIVITIES:

THE CONTRACTOR IS RESPONSIBLE FOR OBTAINING ALL DEWATERING PERMITS AND IDENTIFYING ALL ANTICIPATED NON-STORMWATER DISCHARGES.

THE OFFICIAL RECORD OF THIS SHEET IS THE ELECTRONIC FILE DIGITALLY SIGNED AND SEALED UNDER RULE 61G15-23.004, F.A.C.

SECTION 01000 – DEFINITIONS

PART 1 - GENERAL

The following terms, when used in the Contract Documents, have the meaning described

Advertisement
The public announcement, as required by law, inviting bids for work to be performed or materials to be furnished, usually issued as “Notice to Contractors,” or “Notice to Bidders.”

Bidder
An individual, firm, or corporation submitting a proposal for the proposed work.

Bridge
A structure, including supports, erected over a depression or over an obstruction such as water, highway or railway, or for elevated roadway, for carrying traffic or other moving loads, and having a length, measured along the center of the roadway, of more than 20 feet between the inside faces of end supports. A multiple-span box culvert is considered a bridge, where the length between the extreme ends of the openings exceeds 20 feet.

Calendar day
Every day shown on the calendar, ending and beginning at midnight.

Contract
The term “Contract” means the entire and integrated agreement between the parties there under and supersedes all prior negotiations, representations, or agreements, either written or oral. The Contract Documents form the Contract between the County and the Contractor setting forth the obligations of the parties thereunder, including, but not limited to, the performance of the Work and the basis of payment.

Contract Documents
The term “Contract Documents” includes: Advertisement for Proposal, Proposal, Certification as to Publication and Notice of Advertisement for Proposal, Appointment of Agent by Nonresident Contractors, Noncollusion Affidavit, Warranty Concerning Solicitation of the Contract by Others, Resolution of Award of Contract, Executed Form of Contract, Performance Bond and Payment Bond, Specifications, plans (including revisions thereto issued during construction), Addenda, or other information mailed or otherwise transmitted to the prospective bidders prior to the receipt of bids, work orders and supplemental agreements, all of which are to be treated as one instrument whether or not set forth at length in the form of contract.

Contract Bond
The security furnished by the Contractor and the surety as a guaranty that the Contractor shall fulfill the terms of the Contract and pay all legal debts pertaining to the construction of the project.

Contract Letting
The date that the County opened the bid proposals.

Contract Time
The number of calendar days allowed for completion of the Contract work, including authorized time extensions.

Contractor
The individual, firm, joint venture, or company contracting with the County to perform the work.

Contractor's Engineer of Record
A Professional Engineer registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, who undertakes the design and drawing of components of the permanent structure as part of a redesign or Cost Savings Initiative Proposal, or for repair designs and details of the permanent work. The Contractor's Engineer of Record may also serve as the Specialty Engineer. The Contractor's Engineer of Record must be an employee of a pre-qualified firm. Any Corporation or Partnership offering engineering services must hold a Certificate of Authorization from the Florida Department of Business and Professional Regulation.

As an alternate to being an employee of a pre-qualified firm, the Contractor's Engineer of Record may be a pre-qualified Specialty Engineer. For items of the permanent work declared by the State Construction Office to be "major" or "structural", the work performed by a prequalified Specialty Engineer must be checked by another pre-qualified Specialty Engineer. An individual Engineer may become pre-qualified in the work groups listed in the Rules of the Department of Transportation, Chapter 14-75, if the requirements for the Professional Engineer are met for the individual work groups. Pre-qualified Specialty Engineers are listed on the State Construction Website. Pre-qualified Specialty Engineers will not be authorized to perform redesigns or Cost Savings Initiative Proposal designs of items fully detailed in the plans.

Controlling Work Items
The activity or work item on the critical path having the least amount of total float. The controlling item of work will also be referred to as a Critical Activity.

County
Escambia County Public Works Department

Culverts
Any structure not classified as a bridge that provides an opening under the roadway.

Delay
Any unanticipated event, action, force or factor which extends the Contractor's time of performance of any controlling work item under the Contract. The term "delay" is intended to cover all such events, actions, forces or factors, whether styled "delay", "disruption", "interference", "impedance", "hindrance", or otherwise, which are beyond the control of and not caused by the Contractor, or the Contractor's subcontractors, materialmen, suppliers or other agents. This term does not include "extra work".

Department
Escambia County.

Developmental Specification See definition for Specifications.

Engineer
The Professional Engineer, registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, acting as the project's Construction Engineering Inspection Manager. The Engineer may be County in-house staff or a consultant retained by the County

Engineer of Record
The Professional Engineer or Engineering Firm registered in the State of Florida that develops the criteria and concept for the project, performs the analysis, and is responsible for the preparation of the Plans and Specifications. The Engineer of Record may be County in-house staff or a consultant retained by the County.

The Contractor shall not employ the Engineer of Record as the Contractor’s Engineer of Record or as a Specialty Engineer.

Equipment
The machinery and equipment, together with the necessary supplies for upkeep and maintenance thereof, and all other tools and apparatus necessary for the construction and acceptable completion of the work.

Extra Work
Any “work” which is required by the Engineer to be performed and which is not otherwise covered or included in the project by the existing Contract Documents, whether it be in the nature of additional work, altered work, deleted work, work due to differing site conditions, or otherwise. This term does not include a “delay”.

Highway, Street, or Road
A general term denoting a public way for purposes of vehicular travel, including the entire area within the right-of-way.

Holidays
Days designated by the Board of County Commissioners as holidays, which include, but are not limited to, New Year’s Day, Martin Luther King’s Birthday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and the following Friday, and Christmas Day.

Inspector
An authorized representative of the County, assigned to make official inspections of the materials furnished and of the work performed by the Contractor.

Laboratory
The testing laboratory used by the Contractor.

Major Item of Work

Any item of work having an original Contract value in excess of 5% of the original Contract amount.

Materials
Any substances to be incorporated in the work under the Contract.

Median
The portion of a divided highway or street separating the traveled ways for traffic moving in opposite directions.

Plans
The approved plans, including reproductions thereof, showing the location, character, dimensions, and details of the work.

Proposal (Bid, Bid Proposal)
The offer of a bidder, on the prescribed form, to perform the work and to furnish the labor and materials at the prices quoted.

Proposal Form
The official form or the expedite program generated bid item sheets on which the County requires formal bids to be prepared and submitted for the work.

Proposal Guaranty
The security furnished by the bidder as guaranty that the bidder will enter into the Contract for the work if the County accepts the proposal.

Right-of-Way
The land that the County has title to, or right of use, for the road and its structures and appurtenances, and for material pits furnished by the County.

Roadbed
The portion of the roadway occupied by the subgrade and shoulders.

Roadway
The portion of a highway within the limits of construction.

Section
A numbered prime division of these Specifications.

Special Provisions
See definition for Specifications.

Specialty Engineer
A Professional Engineer registered in the State of Florida, other than the Engineer of Record or his subcontracted consultant, who undertakes the design and drawing preparation of components, systems, or installation methods and equipment for specific temporary portions of the project work or for special items of the permanent works not fully detailed in the plans and required to be furnished by the Contractor such as but not limited to pot bearing designs, nonstandard expansion joints, MSE wall designs and

other specialty items. The Specialty Engineer may also provide designs and details for items of the permanent work declared by the State Construction Office to be “minor” or “non-structural”. The Specialty Engineer may be an employee or officer of the Contractor or a fabricator, an employee or officer of an entity providing components to a fabricator, or an independent consultant. For items of work not specifically covered by the Rules of the Department of Transportation, a Specialty Engineer is qualified if he has the following qualifications:

Registration as a Professional Engineer in the State of Florida.
The education and experience necessary to perform the submitted design as required by the Florida Department of Business and Professional Regulation.

Specifications
The directions, provisions, and requirements contained herein, together with all stipulations contained in the Contract Documents, setting out or relating to the method and manner of performing the work, or to the quantities and qualities of materials and labor to be furnished under the Contract.

Standard Specifications: “Standard Specifications for Road and Bridge Construction” a bound book, applicable to all FDOT Contracts containing adopted requirements, setting out or relating to the method or manner of performing work, or to the quantities and qualities of materials and labor.

Supplemental Specifications: Approved additions and revisions to the Standard Specifications, applicable to all Department Contracts.

Special Provisions: Specific clauses adopted by the Department that add to or revise the Standard Specifications or supplemental specifications, setting forth conditions varying from or additional to the Standard Specifications applicable to a specific project.

Technical Special Provisions: Specifications, of a technical nature, prepared, signed, and sealed by an Engineer registered in the State of Florida other than the State Specifications Engineer or his designee, that are made part of the Contract as an attachment to the Contract Documents.

Developmental Specification: A specification developed around a new process, procedure, or material.

Standard Specifications
See definition for Specifications.

State
State of Florida.

Subarticle
A headed and numbered subdivision of an Article of a Section of these Specifications.

Subgrade
The portion of the roadbed immediately below the base course or pavement, including

below the curb and gutter, valley gutter, shoulder and driveway pavement. The subgrade limits ordinarily include those portions of the roadbed shown in the plans to be constructed to a design bearing value or to be otherwise specially treated. Where no limits are shown in the plans, the subgrade section extends to a depth of 12 inches below the bottom of the base or pavement and outward to 6 inches beyond the base, pavement, or curb and gutter.

Substructure
All of that part of a bridge structure below the bridge seats, including the parapets, backwalls, and wingwalls of abutments.

Superintendent
The Contractor's authorized representative in responsible charge of the work.

Superstructure
The entire bridge structure above the substructure, including anchorage and anchor bolts, but excluding the parapets, backwalls, and wingwalls of abutments.

Supplemental Agreement
A written agreement between the Contractor and theCounty, and signed by the surety, modifying the Contract within the limitations set forth in these Specifications.

Supplemental Specifications See definition for Specifications.

Surety
The corporate body that is bound by the Contract Bond with and for the Contractor and responsible for the performance of the Contract and for payment of all legal debts pertaining thereto.

Technical Special Provisions See definition for Specifications.

Traveled Way
The portion of the roadway providing for the movement of vehicles, exclusive of shoulders and auxiliary lanes.

Unilateral Payment
A payment of money made to the Contractor by the Department pursuant to Section 337.11(12), Florida Statutes (2009), for sums the Department determines to be due to the Contractor for work performed on the project, and whereby the Contractor by acceptance of such payment does not waive any rights the Contractor may otherwise have against the Department for payment of any additional sums the Contractor claims are due for the work.

Work
All labor, materials and incidentals required to execute and complete the requirements of the Contract including superintendence, use of equipment and tools, and all services and responsibilities prescribed or implied.

Work Order
A written agreement between the Contractor and the County modifying the Contract within the limitations set forth in these Specifications. Funds for this agreement are drawn against the Initial Contingency Pay Item or a Contingency Supplemental Agreement.

Working Day
Any calendar day on which the Contractor works or is expected to work in accordance with the approved work progress schedule.

END OF SECTION 01000

SECTION 01300 - SUBMITTALS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

Drawings and General and Supplemental Provisions of the Contract, apply to this Section.

1.2 SUMMARY

A. This Section includes administrative and procedural requirements for submittals required for performance of the Work, including, but not limited to the following:

1. Submittal Procedures
2. Contractor's Construction Schedule
3. Daily Construction Reports
4. Shop Drawings
5. Product Data
6. Samples
7. Quality Assurance Submittals
8. Licenses
9. Pictures, Video of Pre-Construction Conditions

B. Administrative Submittals: Refer to other Sections and other Contract Documents for requirements for administrative submittals. Such submittals include, but are not limited to, the following:

1. Permits
2. Applications for Payment
3. Performance and Payment Bonds
4. Insurance Certificates
5. List of Subcontractors
6. Licenses

1.3 SUBMITTAL PROCEDURES

A. Coordination: Coordinate preparation and processing of submittals with performance of construction activities. Transmit each submittal sufficiently in advance of performance of related construction activities to avoid delay.

1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, inspections, and related activities that require sequential activity.

2. Coordinate transmittal of different types of submittals for related elements of the Work so processing will not be delayed by the need

to review submittals concurrently for coordination. The County reserves the right to withhold action on a submittal requiring coordination with other submittals until all related submittals are received.

3. Processing: To avoid the need to delay construction as a result of the time required to process submittals, allow sufficient time for submittal review, including time for re-submittals. Allow 2 weeks for initial review. Allow additional time if the County must delay processing to permit coordination with subsequent submittals.

    a. If an intermediate submittal is necessary, process the same as the initial submittal.
    b. Allow 2 weeks for reprocessing each submittal.
    c. No extension of Contract Time will be authorized because of failure to transmit submittals to the County sufficiently in advance of the Work to permit processing.

B. Submittal Preparation: Place a permanent label or title block on each submittal for identification. Indicate the name of the entity that prepared each submittal on the label or title block.

1. Provide a space approximately 4 by 5 inches on the label or beside the title block on Shop Drawings to record the Contractor's review and approval markings and the action taken.

2. Include the following information on the label for processing and recording action taken.

    a. Project Name.
    b. Date.
    c. Name and Address of the Engineer.
    d. Name and Address of the Contractor.

C. Submittal Transmittal: Package each submittal appropriately for transmittal and handling. Four copies of each submittal (three hard copy and one digital) shall be transmitted. Transmit each submittal from the Contractor to the County, (copy Engineer) using a transmittal form. The County will not accept submittals received from sources other than the Contractor. Submittals must be approved by Contractor prior to review by County. On the transmittal, record relevant information and requests for data. On the form or on a separate sheet, record deviations from Contract Document requirements, including variations and limitations. Include Contractor's certification that the information complies with Contract Document requirements on each submittal.

1.4 CONSTRUCTION SCHEDULE/DOCUMENTATION

A. Bar-Chart Schedule: Prepare a fully developed, horizontal bar-chart-type, contractor's construction schedule. Submit within 10 days of the issuance of the Notice to Proceed. The contractor shall submit an updated schedule at least once per month, showing any schedule changes. This may be requested up to three times per month by the County. Include dates of shop drawing submittals.

B. Cost Correlation: At the head of the schedule, provide a cost correlation line, indicating planned and actual costs. On the line, show dollar volume of Work performed as of the dates used for preparation of payment requests.

C. Pre-Construction Site Conditions Photos/Video: Contractor shall submit a DVD of photos and video of the site conditions prior to the performance of any work.

D. Licenses: All required licenses to perform work shall be submitted prior to the commencement of construction.

1.5 DAILY CONSTRUCTION REPORTS

Prepare a daily construction report recording the following information concerning events at the site, and submit duplicate copies to the County at weekly intervals including, but not limited to:

1. Work performed.
2. Approximate count of personnel at the site.
3. Count and type of major equipment at the site.
4. High and low temperatures, general weather conditions, including daily rainfall amount from gauge installed on site jointly recorded by contractor and county representative.
5. Accidents and unusual events.
6. Meetings and significant decisions.
7. Stoppages, delays, shortages, and losses.
8. Emergency procedures.
9. Orders and requests of governing authorities.
10. Change Orders received, implemented.
11. Material Expenditures.

1.6 SHOP DRAWINGS

A. Submit shop drawings for structures unless FDOT approved structures are used.

B. Shop Drawings – Including, but not limited to the following information:

1. Dimensions.
2. Identification of products and materials included by sheet and detail number.
3. Compliance with specified standards.

1.7 PRODUCT DATA

Product Data - Include the following information:

1. Manufacturer's printed recommendations.
2. Compliance with trade association standards.
3. Compliance with recognized testing agency standards.
4. Application of testing agency labels and seals.

1.8 SAMPLES

Submit samples as specified in the technical specifications.

1.9 QUALITY CONTROL (QC) / QUALITY ASSURANCE (QA) SUBMITTALS

A. Submit the QC Plan to the County for approval within 21 calendar days after the Notice to Proceed. The County will review the QC Plan and respond to the Contractor within 21 calendar days of receipt.

If at any time the Contractor is not in compliance with the approved QC Plan, or a part thereof, affected portions of the plan will be disapproved. The contractor shall cease work in the affected operation(s) and submit a revision to the County. If the QC Plan, or a part thereof, must be revised, submit the revision to the County. The County will review the revision and respond within seven calendar days of receipt.

Continue to work on operations that are still in compliance with the approved sections of the QC Plan.

B. Certifications: Where other Sections of the Specifications require certification that a product, material, or installation complies with specified requirements, submit to the County a certification from the manufacturer certifying compliance with specified requirements.

C. Inspection and Test Reports: Requirements for specific testing are included in the technical specifications.

1. Submit to the County: Two (2) copies (one hard copy and one digital) of the inspection and test reports from a qualified, independent, geotechnical engineering testing agency, under the direction of a Professional Engineer, licensed in the State of Florida.

2. All testing required by the specifications or the County shall be at the contractors expense.

3. No additional work within/upon the tested area shall proceed until submitted test results confirm compliance with specification requirements.

4. Areas where submitted test results indicate non-compliance shall be removed, replaced, and retested. Extents of area out of compliance shall be determined by testing at 25’ increments, in each direction within the construction area, until passing results are achieved.

5. Variations from testing requirements and frequency of testing may be authorized by the County and will be documented in writing.

1.10 ENGINEER'S ACTION

Except for submittals for the record or information, where action and return is required, the County will review each submittal, mark to indicate action taken, return to contractor within the timeframe allotted herein. Compliance with specified characteristics is the Contractor's responsibility.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION (Not Applicable)

END OF SECTION 01300

SECTION 02230 - CLEARING & GRUBBING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions shall apply to this Section.

B. Florida Department of Transportation*, Standard Specifications for Road and Bridge Construction, Section 110, Latest Edition.*

C. Emerald Coast Utility Authority (ECUA) *Engineering Manual*, *Latest Edition.*

1.2 SUMMARY

A. This Section includes, but is not limited to, the following:

1. Protection of existing trees indicated to remain.
2. Removal of trees and other vegetation.
3. Clearing and grubbing.
4. Removing above-grade improvements.
5. Removing below-grade improvements.

B. Extent of clearing & grubbing shall remain in County right-of-way, easements (temporary or permanent), or approved written work agreement areas, unless otherwise noted or instructed.

1.3 PROJECT CONDITIONS

Provide protection for all public land corners and monuments within the limits of construction. Any Monuments disturbed while performing the work will be replaced at the contractor's expense.

PART 2 - PRODUCTS (Not Applicable)

PART 3 - EXECUTION

3.1 SITE CLEARING

A. General: Remove trees, shrubs, grass, and other vegetation, improvements, or obstructions, as required, to permit installation of new construction. Remove similar items elsewhere on site or premises as specifically indicated. Removal includes digging out and off-site disposal of stumps and roots.

Carefully and cleanly cut minor roots and branches of trees indicated to

remain in a manner where such roots and branches obstruct installation of new construction.

B. Clearing and Grubbing: Clear site of trees, shrubs, and other vegetation, except for those indicated to remain.

1. Completely remove all stumps within the roadway. Remove roots and other debris to a depth of 12” below the ground surface or finished grade, whichever is lower.

2. Use only hand methods for grubbing inside drip line of trees Indicated to remain.

3. Fill depressions caused by clearing and grubbing operations with satisfactory soil material, unless further excavation or earthwork is indicated in accordance with Section 2300.

C. Removal of Improvements: Remove existing above grade and below grade improvements as indicated and as necessary to facilitate new construction, and other work as indicated.

3.2 DISPOSAL OF WASTE MATERIALS

A. Burning: Burning is not permitted on County property. Requests to burn will be considered on a case by case basis. If approved, Contractor is to acquire permits and provide copies to the County.

B. Removal from County Property: Remove waste materials and unsuitable or excess topsoil from County property, and dispose of off site in a legal manner.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Lump Sum Payment: When direct payment is provided in the Contract for the quantity to be paid for as the lump sum quantity cleared and grubbed, no additional measurements will be made.

B. Payment By The Acre/Square Yard: For areas of Clearing and Grubbing that are designated to be paid for separately by the acre or square yard, the quantity to be paid for will be determined by measurement of the areas shown on the plans or authorized by the County to be cleared and grubbed, and acceptably completed.

4.2 BASIS OF PAYMENT

A. General: Price and payment will be full compensation for all Clearing and Grubbing required for the roadway right-of-way and for lateral ditches, channel changes, or other outfall areas, and any other Clearing and Grubbing indicated, or required for the construction of the entire project, except for any areas designated to be paid for separately or to be specifically included in the costs of other work under the contract. Price and payment, either lump sum or by the acre/square yard will be full compensation for all the work specified in this Section, including all necessary hauling, furnishing equipment, equipment operation, furnishing any areas required for disposal of debris, leveling of terrain and the landscaping work of trimming, etc., as specified herein.

B. Lump Sum Payment: Payment shall be made at the lump sum contract price for Clearing and Grubbing, lump sum.

C. Payment: Payment shall be made at the per unit contract price for Clearing and Grubbing, per acre or square yard.

END OF SECTION 02230

SECTION 02300 - EARTHWORK

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions, apply to this Section.

B. Florida Department of Transportation*, Standard Specifications for Road and Bridge Construction, Latest Edition*.

1.2 SUMMARY

A. This Section includes preparing and grading for pavement, curb, subgrades, drainage features, and general site work.

B. Related Sections: The following Sections contain requirements that relate to this Section.

1. Section 2230 "Clearing & Grubbing" for clearing, grubbing, and tree protection.

2. Section 2600 “Stormwater System” for installation of stormwater systems.

1.3 DEFINITIONS

A. Excavation consists of the removal of material encountered to subgrade elevations and the reuse or disposal of materials removed.

B. Subgrade: The uppermost surface of an excavation or the top surface of a fill or backfill immediately below subbase, base, drainage fill, or topsoil materials.

C. Borrow: Soil material obtained off-site when sufficient approved soil material is not available from on-site excavations.

D. Subbase Course: The layer placed between the subgrade and base course in a paving system.

E. Base Course: The layer placed immediately beneath the surface pavement in a paving system.

F. Unauthorized excavation consists of removing materials beyond indicated subgrade elevations or dimensions without direction by the County. Unauthorized excavation, as well as remedial work directed by the Engineer, shall be at the Contractor's expense.

G. Structures: Buildings, footings, foundations, retaining walls, slabs, tanks, curbs, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below ground surface.

H. Utilities include on-site above ground utilities, overhead utilities and underground utilities including: pipes, conduits, ducts, and cables, as well as related appurtenances and underground services within building lines.

I. Unsuitable Material: Any material such as muck, wood, rock, peat, garbage, non-compactable soils in dry condition, and any other material that is considered by the County Engineer to be unsuitable.

J. Topsoil: Topsoil is defined as the surface layer of soil found normally to a depth of at least 4 to 8 inches that typically contains organic materials. Satisfactory topsoil is reasonably free of roots, clay lumps, stones, other objects over 2 inches in diameter, and any other objectionable or deleterious material.

1.4 SUBMITTALS

A. General: Submit the following in accordance with Section 1300, "Submittals."

B. Product Data and Samples of the following:

1. 1-lb representative samples of each proposed fill and backfill soil material from borrow sources as selected by the County.

2. 12-by-12-inch sample of filter fabric.

3. Representative samples of the proposed base and sub-base materials.

C. Test Reports: In addition to test reports required under field quality control, submit the original directly to the County from the testing services, with a copy to the Contractor:

1. Laboratory analysis as specified in 1.1 (Related Documents) of each soil material proposed for fill and backfill from borrow sources.

2. One optimum moisture-maximum density curve for each soil material.

3. Report of actual unconfined compressive strength and/or results of bearing tests of each stratum tested.

1.5 QUALITY CONTROL / QUALITY ASSURANCE

A. Codes and Standards: Perform earthwork complying with all requirements of authorities having jurisdiction.

B. Testing and Inspection Service: A qualified independent geotechnical engineering testing agency, under the direction of a Professional Engineer, licensed in the State of Florida to classify, perform soil tests, and provide inspection services for quality control. All proposed borrow soils will require the testing agency to verify that soils comply with specified requirements and to perform required field and laboratory testing. Contractor shall replace materials removed for testing purposes. Should any work or materials fail to meet the requirements set forth in the plans and specifications, contractor shall reimburse for additional and re-testing.

1.6 PROJECT CONDITIONS

A. Site Information: Data in the subsurface investigation Report, if available, is used for the basis of the design and is available to the contractor for information only. Conditions are not intended as representations or warranties of accuracy or continuity between soil borings. The County will not be responsible for interpretations or conclusions drawn from this data by the Contractor.

B. Existing Utilities: After location of utilities by the appropriate utility company, it is the Contractor's responsibility to protect all such utility lines, including service lines and appurtenances, and to replace at his own expense any that may be damaged by the Contractor's equipment or forces during construction of the Project.

1. Provide a minimum of 48-hours notice to the County and receive written notice to proceed before interrupting any utility.

2. The contractor is responsible for contacting all utility companies to verify locations of all existing utilities, utility-related obstructions, or utility relocations that he may encounter during construction.

3. Adequate provision shall be made for the flow of existing sewers, drains, and water courses encountered during construction, and structures which may be disturbed shall be satisfactorily restored by the Contractor at his expense.

C. Should uncharted, or incorrectly charted, piping or other utilities be encountered during the course of the work, consult the County immediately for directions. Cooperate with the County and utility companies in keeping respective services and facilities in operation.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. General: Soils used as fill shall be clean sands, similar to existing site soil, with less than 5% passing the number 200 sieve when existing subgrade conditions are considered wet as per the County. Soils as described above with less than 15% passing the number 200 sieve and meeting the requirements of Section 902-6 of the FDOT Specifications may be used when existing subgrade conditions are considered dry as per the County. The sand shall have a maximum dry density of at least 100 pounds per cubic foot, according to the Standard Proctor compaction test, AASHTO T-99, ASTM D698. Provide approved borrow soil materials from off-site when sufficient satisfactory soil materials are not available from on-site excavations.

If the Contractor elects to import any materials, then he will do so only with the approval of the County and at his own expense, unless separate payments for such items are called for in these specifications. Provide laboratory certification that soils meet requirements of specifications.

B. Sub-Base Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, or sand. The material shall be stabilized in accordance with FDOT Standard Specification Section 160-5.4. ASTM D 2940, with at least 95 percent passing a 1-1/2-inch sieve, and not more than 8 percent passing a No. 200 sieve.

PART 3 - EXECUTION

3.1 DEWATERING

A. Prevent surface water and subsurface or groundwater from entering excavations, from ponding on sub-grades in work areas, and from flooding project site and surrounding area.

B. Protect subgrades and foundation soils from softening and damage by rain or water accumulation.

C. The Contractor shall prevent the accumulation of water in excavated areas, and shall remove, by pumping or other means, any water that accumulates in the excavation. The Contractor shall prevent the accumulation of water in both structural and trench excavations and shall remove, by well point system or by other means, water which accumulates. The Contractor shall provide, install and operate a suitable and satisfactory dewatering system, when needed to dry sub-grades or other work areas. The Contractor shall comply with the latest testing requirements as set forth by the applicable regulatory agency. At a minimum, the contractor shall test once prior to dewatering, once within

the first week of dewatering, and once every thirty (30) days while dewatering.

D. Establish and maintain temporary drainage ditches and other diversions outside excavation limits to convey rainwater and water removed from excavations to collection or runoff areas. Do not use trench excavations as temporary drainage ditches. Discharged water shall be clean, not silt or sediment laden, prior to discharge to untreated system and/or waters of the State.

3.2 EXCAVATION

A. Explosives: Not permitted.

B. Strip topsoil and significant root systems to whatever depths encountered in a manner to prevent intermingling with underlying subsoil or other objectionable material. Remove heavy growths of grass from areas before stripping. Where existing trees are indicated to remain, leave existing topsoil in place within drip lines to prevent damage to root systems.

3.3 STABILITY OF EXCAVATIONS

A. Comply with local codes, ordinances, and requirements of authorities having jurisdiction to maintain stable excavations.

B. All excavation work shall conform to all applicable OSHA Publications, Latest Editions. The Contractor's method of providing protective support to prevent cave-ins shall conform to OSHA requirements. Slope excavations, shoring, and trench box usage in the field must be based on tabulated data and designed by the Contractor. The contractor is solely responsible for job site safety and shall not be compensated for required safety equipment/devices.

3.4 EXCAVATION FOR STRUCTURES

Excavate to indicated elevations and dimensions within a tolerance of plus or minus 0.10 foot. Extend excavations a sufficient distance from structures for placing and removing concrete formwork, maintaining a safe slope, installing services and other construction, and for inspections.

A. Footings and Foundations: Excavate by hand to final grade just before placing concrete reinforcement. Trim bottoms to required lines and grades to leave solid base to receive other work.

B. Pile Foundations: After piles have been installed, remove loose and displaced material. Excavate to final grade, leaving solid base to receive concrete pile caps.

C. Excavation for Underground Tanks, Basins, and Mechanical or Electrical Appurtenances: Excavate to elevations and dimensions indicated within a tolerance of plus or minus 0.10 foot.

3.5 EXCAVATION FOR WALKS AND PAVEMENTS

Excavate surfaces under walks and pavements to indicated cross sections, elevations, and grades. Consider Dewatering and other sections as applicable.

3.6 EXCAVATION FOR STORMWATER SYSTEMS

Excavate and compact the backfill of trenches to the densities specified for embankment or subgrade, as applicable, and in accordance with the requirements of Section 2600. Consider Dewatering and other sections as applicable.

3.7 STORAGE OF SOIL MATERIALS

Stockpile excavated materials acceptable for backfill, fill soil, and topsoil materials, including acceptable borrow materials. Stockpile soil materials without intermixing. Stockpiles shall be placed, graded, and shaped to drain surface water and prevent erosion. Cover to prevent wind-blown dust and/or erosion. Stockpile soil materials away from edge of excavations. Do not store within drip line of remaining trees.

3.8 BACKFILL

A. Backfill excavations promptly, but not before completing the following:

1. Acceptance of construction below finish grade including, where applicable, filter fabric installation and gravel bedding.

2. Surveying locations of underground utilities for record documents.

3. Testing, inspecting, and approval of underground utilities.

4. Removal of trash and debris from excavation.

5. Removal of temporary shoring, bracing, and sheeting unless specified to remain.

B. No backfill material shall be placed, spread or rolled during unfavorable weather conditions. When the work is interrupted by heavy rain, backfill operations shall not be resumed until the moisture content of the fill is as previously specified to achieve proper compaction.

3.9 FILL

A. Preparation: Remove vegetation, topsoil, debris, wet and unsatisfactory soil materials, obstructions, and deleterious materials from ground surface prior to placing fills. Plow strip, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing surface. In order to insure proper bond and prevent slipping between the original ground and fill, the surface of the original ground shall be scarified to a depth of at least three inches. Each layer of fill material shall be compacted until the required density is achieved, and the density achieved should be verified in accordance with specifications using in-place density testing.

B. When subgrade or existing ground surface is to receive fill and has a density less than that required for fill, break up ground surface to depth required, pulverize, moisture condition or aerate soil and re-compact to required density.

C. Place fill material in layers to required elevations for each location listed below.

1. Under grass, subbase or base material, use satisfactory excavated or borrow soil material.

2. Under walks and pavements, curbs, steps, ramps, building slabs, footings and foundations use subbase and/or base material.

3.10 MOISTURE CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill layer before compaction to within 2 percent of optimum moisture content.

B. Do not place backfill or fill material on surfaces that contain excessive moisture.

C. Remove and replace, or scarify and air-dry satisfactory soil material that is too wet to compact to specified density. Stockpile or spread and dry removed wet satisfactory soil material.

3.11 COMPACTION

A. Place backfill and fill materials in layers or lifts not more than 12 inches in loose depth for material compacted by heavy compaction equipment, and not more than 8 inches in loose depth for material compacted by hand-operated tampers.

B. Place backfill and fill materials evenly on all sides of structures to required elevations. Place backfill and fill uniformly along the full length of each structure.

C. Percentage of Maximum Dry Density Requirements: Compact soil to not less than the following percentages of maximum dry density according to ASTM Modified Proctor):

1. Under structures, building slabs, steps, and pavements, compact each layer of backfill or fill material at a minimum of 98% Modified Proctor of the material's maximum dry density.

2. Under lawn or unpaved areas, compact each layer of backfill or fill material at 95% Modified Proctor maximum dry density.

3.12 GRADING

A. General: Uniformly grade areas to a smooth surface, free from irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.

1. Provide a smooth transition between existing adjacent grades and new grades.

2. Cut out soft spots, fill low spots, and trim high spots to conform to required surface tolerances.

B. Site Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish subgrades to required elevations within the following tolerances:

1. Lawn or Unpaved Areas: Plus or minus 0.10 foot.

2. Walks: Plus or minus 0.10 foot.

3. Pavements: Plus or minus ½ inch.

3.13 STABILIZED SUBGRADE

A. For stabilized subgrade the type of materials, commercial or local, is at the Contractor's option and no separate payment for stabilizing materials will be made (other than as may be paid for as borrow).

B. When stabilizing is designated as Type B, compliance with the bearing value requirements will be determined by the Limerock Bearing Ratio Method. Minimum LBR shall be 40.

C. It is the Contractor's responsibility that the finished roadbed section meets the bearing value requirements, regardless of the quantity of stabilizing materials necessary to be added. Also, full payment will be made for any areas where the existing subgrade materials meet the design bearing value requirements without the addition of stabilizing additives, as well as areas where the Contractor may elect to place select high-bearing

materials from other sources, within the limits of the stabilizing.

D. After the roadbed grading operations have been substantially completed, the Contractor shall make his own determination as to the quantity (if any) of stabilizing material, of the type selected by him, necessary for compliance with the bearing value requirements. The contractor shall notify the Engineer of the approximate quantity to be added, and the spreading and mixing-in of such quantity of materials shall meet the approval of the County as to uniformity and effectiveness.

3.14 FIELD QUALITY CONTROL

A. Testing Agency Services: Allow testing agency to inspect and test each subgrade and each fill or backfill layer. Do not proceed until test results for previously completed work verify compliance with requirements.

1. Perform field in-place density tests according to ASTM D 1556 (sand cone method), ASTM D 2167 (rubber balloon method), ASTM D 293 (drive cylinder method), or ASTM D 2922 (nuclear method), as applicable.

a. Field in-place density tests may also be performed by the nuclear method according to ASTM D 2922, provided that calibration curves are periodically checked and adjusted to correlate to tests performed using ASTM D 1556. With each density calibration check, check the calibration curves furnished with the speedy moisture meter according to ASTM D 3017.

b. When field in-place density tests are performed using nuclear methods, make calibration checks of both density and speedy moisture meter at beginning of work, on each different type of material encountered, and at intervals as directed by the Engineer.

2. Paved Areas: Make at least one field density test of subgrade, base, and each compacted fill layer for every 300 linear feet of roadway or equivalent area, but in no case less than two tests. Tests shall be staggered to ensure representative sampling.

3. Unpaved Areas: Make at least one field density test of each compacted fill layer or subgrade for every 1000 square yards of area, but in no case less than two tests.

4. Other tests may be required at County’s discretion.

B. If, in the opinion of the County, based on testing service reports and

inspection or the Engineer's observations, subgrades, fills, or backfills are below specified density, scarify and moisten or aerate as needed, or remove and replace soil to the depth required, re-compact, and re-test until required density is obtained at no additional expense.

3.15 REPAIR & CORRECTIONS

A. Protecting Graded Areas: Protect newly graded areas from traffic and erosion. Keep free of trash and debris. Repair and re-establish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or lose compaction due to subsequent construction operations or weather conditions. Scarify or remove and replace material to depth directed by the Engineer; reshape and re-compact at optimum moisture content to the required density.

B. Settling: Where settling occurs, remove finished surfacing, backfill with additional approved material, compact, and reconstruct surfacing. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to the greatest extent possible.

C. When traffic must cross open trenches, the contractor shall provide suitable bridge of graded aggregate base or temporary asphalt paving as directed by County at no additional expense. (See Section 4060 for additional requirements.)

D. Erosion Control: The Contractor shall be responsible for the prevention of erosion from the site and for maintaining filled and graded surfaces for the duration of the project. This includes, but is not limited to, the erection of a silt fence and hay bale barricade as per Florida Stormwater Erosion and Sedimentation Control Inspector's Manual and/or as shown in the construction plans. The Contractor shall take whatever steps necessary to prevent erosion and sedimentation, and will be responsible for any damages which might occur to down-land properties as a result of run-off from the site during sitework construction at no additional cost. Provide erosion control measures to prevent erosion or displacement of soils and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways.

3.16 DISPOSAL OF SURPLUS AND WASTE MATERIALS

Surplus excavated material becomes the property of the Contractor unless otherwise noted. Waste materials, including unsatisfactory soils, trash and debris shall be removed and legally disposed of, off the Owner's property.

3.17 CLEAN-UP AND FINAL INSPECTION

Before final inspection and acceptance the Contractor shall clean ditches, shape

shoulders and restore all disturbed areas, including street crossings, grass plots, re-grassing if necessary, to as good a condition as existed before work started.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Excavation: When payment for excavation is on a volumetric basis, the quantity to be paid for will be the volume, in cubic yards, calculated by the method of average end areas according to the survey and plans. If actual quantities vary in field, contractor shall communicate with Engineer and/or County to request additional payment. The measurement will include the net volume of material between the original ground surface and the surface of completed earthwork according to the survey and plans. If actual quantities vary in field, contractor shall communicate with the County to request additional payment. Excavation for swales and channels will be included in the total quantity for Excavation. Subsoil Excavation will be measured to the lines and grades indicated on the plans or as approved by the County. Backfill material shall either include normal excavation material from within project limits or borrow material supplied by the Contractor.

B. Embankment: Quantities for Embankment will be calculated by the method of average end or square yard areas, and will include material placed above the original ground line, within the lines and grades indicated on the plans or as directed by the County.

C. Calcium Chloride for Dust Control: The quantity to be paid for will be the weight, in tons, of calcium chloride authorized and acceptably spread on the road, within the limits specified by the County. The quantity will be determined from scales, certified freight bills, or other sources, the accuracy of which can be authenticated.

4.2 BASIS OF PAYMENT

A. General: Prices and payments for the various work items included in this section will be full compensation for all work described herein, including excavating, dewatering, dredging, hauling, placing, and compacting. Separate pay items will be provided for all devices required to maintain control of erosion according to plans and NPDES permit. Additional devices shall be no additional cost.

B. Excavation: Unit prices will be established for required cubic yard volumes of Regular Excavation, Subsoil Excavation, and Borrow Excavation as necessary. When subsoil excavation is required to a depth greater than plans and specifications require, and additional excavation is not due to unsuitable, a change order will be required to establish a new quantity utilizing the current unit price.

C. Embankment: Payment shall be made at the unit contract price for Embankment, cubic yard or square yard, in place, according to plans.

D. Calcium Chloride for Dust Control: Price and payment will be full compensation for all work and materials specified for this item, including specifically all required shaping and maintenance of the treated area and all water furnished and applied to the area.

E. Dewatering: The contractor shall include the cost of dewatering in the unit price bid for the stormwater pipe if there is not a specific line item used in the contract.

END OF SECTION 02300

SECTION 02320 - UNDERDRAIN AND EXFILTRATION TRENCH

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawing and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 440, and Design Standards, Latest Edition*.

1.2 DESCRIPTION OF WORK

This section shall cover the work of furnishing pipe for underdrain and exfiltration trenches, the type and size shown on the plans or in the proposal in accordance with the requirements of these specifications, and installing such pipe at the locations shown on the plans or designed by the County in substantial conformity with the established lines, trench widths, filter media, and grades. The work shall include furnishing and construction of such joints and connections to other pipes as may be required to complete the work, as shown on the plans or directed, together with the specified trench, filter media, and filter fabric materials. Filter media may be sand, gravel, gravel pack, and/or a combination thereof.

PART 2 - PRODUCTS

A. Underdrain Pipe: Underdrain pipe shall conform to the requirements of Florida Department of Transportation Standard Specification 948-2, Latest Edition. The perforations shall meet the requirements for perforations as specified in AASHTO M294. Pipe shall be perforated polyethylene ADS N-12 or approved equal.

B. Filter Aggregate shall be clean, washed gravel free of organic material and fines with minimum 33% percent voids. Aggregate shall be at least FDOT stone or equivalent.

C. Filter Fabric shall be Terratex EP (Woven) or approved equal meeting the requirements of FDOT Specification Section 985.

D. Filter sand shall be clean sand, free of organic materials and fines, with an effective grains size of 0.20 to 0.55 mm, uniformity coefficient of 1.5 to 4.0, a K value (recommended design permeability) not to exceed 2.5 ft/hr, and the contractor shall provide a grain-size analysis to the County for the project.

PART 3 - EXECUTION

3.1 STANDARD INSTALLATION:

A. Trenches shall be excavated to the dimensions shown on the plans or as directed. A bedding layer of filter aggregate or filter sand of the size shown on the plans shall be placed in the bottom of the filter fabric lined trench for its full width and length and compacted as directed.

B. Subdrainage pipe of the type and size specified shall be embedded firmly in the bedding material. All pipe sections shall be securely joined with the appropriate coupling fittings or bands as per manufacturer's specifications.

C. After the pipe installation has been inspected and approved, the specified filter aggregate, gravel pack, and/or filter sand shall be placed as shown on the drawings and filter fabric wrapped around the filter media with a minimum overlap (as required) on top. Install wire mesh at opening/outfall. Care shall be taken not to displace the pipe.

D. The Contractor shall take every precaution to prevent the entrance of soil and sediments into the filter bed during construction, which would sacrifice the integrity of the filter fabric and aggregate installed. Stormwater runoff and sedimentation controls to be provided so as to protect the underdrain or exfiltration trench system.

E. Installation of the corrugated polyethylene pipe shall be in accordance with the ASTM D-2321 Latest Revision.

F. Gravel packs shall be installed around the filter-drain underdrain pipe an average thickness of at least six inches from the underdrain pipe for all underdrain systems located within pond bottoms and pond banks. The minimum separation between the gravel pack and the top of the filter bed shall be two feet. A permeable filter fabric shall be wrapped around the gravel pack.

G. Cleanouts or inspection boxes shall be installed, at minimum, every 400 feet or as specified by plan, at every directional change or bend, and at the beginning (upstream) and at the terminus (downstream) of the underdrain pipes or exfiltration trench systems.

H. Cleanouts shall have vertical portions non-perforated, include water-tight caps, and shall incorporate fittings (wye fittings or elbow bends) that have an angle no less than 45 degrees.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the length, in feet, of underdrain, which include trench filter fabric, measured in place, along the centerline and gradient of the underdrain, completed and accepted. The quantities to be paid for will be the length, in feet, of outlet pipe measured in place, along the centerline and gradient of the outlet pipe, completed and accepted. The quantity of underdrain inspection boxes and cleanouts to be paid for will be the number completed and accepted. When payment for gravel or sand filter media is on a volumetric basis, the quantity to be paid for will be the volume, in cubic yards, calculated based upon the length, width, and depth of the underdrain or exfiltration trench dimensions, minus the pipe volume, as shown on the plans, unless the filter media is specified as a bid item included in the costs of the underdrain or exfiltration system.

4.2 BASIS OF PAYMENT

Prices and payment for this item shall include all labor, equipment and materials necessary to complete the work in accordance with the plans and specifications. Materials covered under this pay item include but are not limited to: pipe including fittings, filter fabric, filter media, filter sand, filter aggregate, cleanout structures and inspections boxes. Payment shall be made for the underdrain or exfiltration pipe based upon the length of pipe. Unit prices will be established for the number of cleanouts structures and inspection boxes, unless otherwise specified as a bid item included in the under underdrain or exfiltration trench system. Unit prices will also be established for required cubic yard volume of gravel or sand filter media based upon the length, width, and depth of the underdrain or exfiltration trench, minus the pipe volume, as shown on the plans, unless otherwise specified as a lump sum bid item included in the costs of the underdrain or exfiltration trench system. No additional payment will be made for filter media overages larger than the specified plan volume. No additional payment will be made for excavation of the trench or lining the trench with filter fabric. No additional payment will be made for underdrain pipe with a sock filter fabric.

END OF SECTION 02320

SECTION 02340 - RIPRAP

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 530*, and *Design Standards 281*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

This section shall cover the work of furnishing and constructing the Riprap which shall consist of a protective course of stone or other approved materials on embankment slopes, in channels, or other work as shown on the plans or directed, with or without a Filter Blanket, all in accordance with these Specifications and in conformity with the lines and grades noted in the plan details.

PART 2 - PRODUCTS

2.1 MATERIALS

Rubble\Stone Riprap shall comply with Florida Department of Transportation *Standard Specification 530-2.2*

A. Banks and shore protection shall comply with Florida Department of Transportation *Standard Specification 530-2.2.1*.

B. Ditch lining shall comply with Florida Department of Transportation *Standard Specification 530-2.2.2*.

C. Broken stone and broken concrete shall comply with Florida Department of Transportation *Standard Specification 530-2.2.3*.

D. Geotextile fabric shall comply with Florida Department of Transportation *Standard Specification 514* and Florida Department of Transportation *Design Standards 104* according to its application.

E. Bedding stone shall comply with Florida Department of Transportation *Standard Specification 530-2.3*.

F. Sand/Cement Riprap: Materials and placement shall comply with Florida Department of Transportation *Standard Specification 530-2.1*.

PART 3 - EXECUTION

3.1 EXECUTION

A. Construction Requirements:

General: All slopes to be treated with riprap shall be trimmed to the lines and grades indicated by the plans or directed, such that the plan grades are the top of the placed riprap, unless otherwise noted. Loose material shall be compacted by methods approved by the Engineer or removed.

Slopes which require a filter blanket under the riprap shall, in addition to the above, be prepared as noted below.

1. Placement of any riprap on a filter blanket shall be by such means that will not damage or destroy the blanket. Any damage to the blanket shall be repaired without additional compensation.

2. Unless directed otherwise by the Engineer or shown by plan details, all outer edges and the top of riprap where the riprap terminates shall be formed so that the surface of the riprap will be embedded and even with the surface of the ground and/or slope.

3. All riprap construction shall begin at the bottom of the slope and progress upward.

4. Filter Blanket: Unless otherwise specified by the plans or ordered in writing, a fabric blanket will not be allowed for soils with 85% by weight passing the No. 200 sieve (U.S. Std.)

5. The bedding stone shall be constructed in accordance with Florida Department of Transportation Specification 530-3.3.

6. Foundation Preparation: Areas on which filter fabrics are to be placed shall be uniformly trimmed and dressed to conform to cross-sections shown by the plans.

B. Plastic Filter Fabric (Geotextile):

Plastic filter fabric shall be placed in the manner and at the locations shown in the plans or as directed by the Engineer. At the time of installation, fabric shall be rejected if it has defects, rips, holes, flaws, deterioration or damage incurred during manufacturer, transportation or storage. The fabric shall be placed with the long dimension parallel to the centerline of the channel or shoreline unless otherwise directed by the Engineer, and shall be laid smooth and free of tension, stress, folds, wrinkles or creases. The strips shall be placed to provide a minimum

width of 24 inches of overlap for each joint with the upstream strip of fabric overlapping the downstream strip. Overlap joints and seams shall be measured as a single layer of cloth. Securing pins with washers shall be inserted through both strips of overlapped cloth as recommended by the manufacturer, but no greater than the following intervals along a line through the midpoint of the overlap.

Pin Spacing	Slope
2 ft.	Steeper than 3:1
3 ft.	3:1 to 4:1
5 ft.	Flatter than 4:1

The fabric shall be turned down and buried two feet at all exterior limits except where a stone-filled key is provided below natural ground.

Additional pins regardless of location shall be installed as necessary to prevent any slippage of the filter fabric. Overlaps in the fabric shall be placed so that any upstream strip of fabric will overlap the downstream strip. Should the Engineer direct that the fabric be placed with the long dimension perpendicular to the centerline of the channel or shoreline, the lower strip of fabric shall underlap the next higher strip. Each securing pin shall be pushed through the fabric until the washer bears against the fabric and secures it firmly to the foundation. The fabric shall be protected at all times during construction from contamination by surface runoff and any fabric so contaminated shall be removed and replaced with uncontaminated fabric. Any damage to the fabric during its installation or during placement of riprap shall be replaced by the Contractor. The work shall be scheduled so that the manufacturer's recommendation for UV exposure is not exceeded or 5 days does not expire between placement of the fabric and the covering of the fabric with riprap, whichever is less.

3.2 STONE AND CONCRETE RUBBLE RIPRAP

General: Unless otherwise shown by plan details or directed, stone or concrete shall not be placed on slopes steeper than the natural angle of repose of the riprap material.

Placement of stone or concrete may, unless otherwise noted hereinafter, be placed by methods and equipment suitable for the purpose of placing the riprap in accordance with the requirements for the class riprap involved without damaging any existing facility or construction material.

The stone or concrete shall be placed in such a manner as to produce a reasonably well graded mass of rock with the minimum practical percentage of voids. Stone or concrete shall be laid with close broken joints and resting on the embankment slope. The top of the riprap shall be constructed to the lines, grades and thickness shown by the plans or as directed. Riprap shall be placed

to its full course thickness in one operation and in such a manner as to avoid displacing or damaging the filter blanket material. The larger stone or concrete shall be well distributed and the entire mass of stone or concrete, in their final position, shall conform to a reasonable uniform gradation. The finished riprap shall be free from objectionable pockets of small stone or concrete and clusters of larger stone or concrete. Open joints shall be filled with spalls, or small stone or concrete in such manner that all stone or concrete are tightly wedged or keyed. Placing riprap by dumping into chutes or by other methods likely to cause segregation of sizes will not be permitted. The desired distribution of the various sizes of stone or concrete throughout the mass shall be obtained by selective loading of the material at the source, by controlled dumping of successive loads during final placing, or by other methods of placement which will produce the specified results. The individual pieces of stone or concrete in each horizontal course shall be laid so that they will not break away from embankment. Rearranging of individual stone or concrete by mechanical equipment, or by hand, will be required to the extent necessary to obtain a reasonably well graded distribution of stone or concrete as specified above.

3.3 SAND/CEMENT RIPRAP

A. Placing: Immediately following mixing, the mixture shall be placed in the bags, tied (so that when laid in position, they will flatten out and give a thickness of not less than six inches) and placed flat on the area designed. Use only one type of bag per structure. Bags shall be layered and wedged against each other to form closed joints, with tied ends of sacks all laid in the same direction. Sacks ripped or torn in placing shall be removed and replaced with sound, unbroken sacks. When required to be placed under water, special care shall be taken to see that bags are closely jointed to give the same tight joints as required on dry slopes. After the riprap is placed, it shall be sprinkled with water as directed and kept damp for not less than three days. No sand/cement riprap shall be mixed in freezing weather.

B. Grouting: Immediately after watering, all openings between sacks shall be filled with dry grout composed of one part Portland cement and five parts sand.

C. Pinned/Staked Bags: Bags shall be pinned/staked when called for on drawings.

3.4 CLEAN UP

Before final inspection and acceptance, the Contractor shall remove all excess material from site and restore all disturbed areas to as good a condition as existed before work started.

3.5 MAINTENANCE

The Contractor shall maintain all riprap until the contract work is accepted, and shall replace, without additional compensation, any damaged or missing riprap.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Sand-Cement: The quantity to be paid for will be the volume, in cubic yards, of sand actually used in the sand cement mixture and grout, satisfactorily placed and accepted. If sand is proportioned by volume, the sand will be measured loose in an approved measure prior to mixing with cement. If sand cement is proportioned by weight, approved scales will be used for this purpose and the volume will be calculated using a standard conversion factor for sand of 85lbs. /cubic feet. No adjustment of batch weights to allow for varying moisture content of the sand will be made.

B. Stone/Concrete Rubble and Bedding Stone: The quantities to be paid for will be, as per plans/bid schedule, and either by the weight in tons in surface dry natural state; by railroad scales, truck scales, or barge displacement, or by square yards (according to plan thickness.) The Contractor shall determine the weights as follows:

1. Railroad Weights: The Contractor shall weight railroad cars on railroad scales, before and after loading or before and after unloading. If weighed by other than the Engineer, a certified statement of weights will be required. Certificates of weight, furnished by the railroad company, will be accepted without further certification.

2. Truck Weights: The Contractor shall weigh trucks on certified scales, loaded and empty, as prescribed above for railroad weights. The Contractor shall weigh trucks in presence of the Engineer, or furnish certificates of weights.

3. Barge Displacement: The Engineer will measure each barge. The Contractor shall fit each barge with gauges graduated in tenths of a foot increment. The Contractor shall locate a gauge at each corner of the barge near the lower end of the rake. The Contractor shall furnish additional gauges amidships, if the Engineer deems necessary. The Engineer will review and check all computed weights. Weight certificates may be submitted.

4. In Place Measurement: The Contractor shall measure surface area (in square yards) of area riprap has been placed.

4.2 BASIS OF PAYMENT

A. Sand-Cement: Price and payment will be full compensation for all work specified in this Section, including all materials, labor, hauling, excavation, and backfill. The Contractor shall include the cost of dressing and shaping the existing fills (or subgrade) for placing riprap in the Contract unit price for Riprap (Sand-Cement.)

B. Stone/Rubble: Price and payment will be full compensation for all work specified in this Section, including all materials, hauling, excavation, and backfill. The Contractor shall include the cost of dressing and shaping the existing fill (or subgrade) for placing riprap in the Contract unit price for Riprap (Stone/Rubble). As an exception to the above, concrete that is shown to be removed from the project site and subsequently disposed of by being crushed and used in the embankment as riprap will not be paid for under this section. Include the cost of such work order under Removal of Existing Structures.

C. Bedding Stone: Price and payment will be full compensation for all work specified in this Section, including all materials and hauling. The Contractor shall include the cost of dressing and shaping the existing fills (or subgrade) for placing bedding stone in the Contract unit price for Riprap (Stone/Rubble).

END OF SECTION 02340

SECTION 02400 - GRADED AGGREGATE BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of contract, including General and Supplementary Conditions and other Specification Sections, apply to the work of this section.

1.2 DESCRIPTION OF WORK

This item shall consist of a base course of graded aggregate constructed on a subgrade prepared in accordance with the specifications and in conformity with the line, grades and typical cross-section as shown on the drawings.

PART 2 - PRODUCTS

2.1 MATERIALS

Use graded aggregate material which yields a satisfactory mixture meeting all the requirements of these Specifications after it has been crushed and processed as a part of the mining operations.

The Contractor may furnish the material in two sizes of such gradation that, when combined in a central mix plant pugmill, the resultant mixture meets the required specifications.

Use graded aggregate base material of uniform quality throughout, substantially free f rom organic matter, shale, lumps and clay balls, and having a Limerock Bearing Ratio value of not less than 98. Use material retained on the No.10 sieve composed of aggregate meeting the following requirements:

Soundness Loss, Sodium, Sulfate: AASHTO T 104.....15%
Percent Wear: AASHTO T 96 (Grading A)
Group 1 Aggregates..... 45%
Group 2 Aggregates..... 65%
Group 1 : This group of aggregates is composed of limestone, marble, or dolomite.
Group 2: This group of aggregates is composed of granite, gneiss, or quartzite.
Use graded aggregate base material meeting the following gradation:

Sieve Size	Percent by Weight Passing
2 inch	100
1 1/2 inch	95 to 100
3/4 inch	65 to 90
3/8 inch	45 to 75
No. 4	35 to 60

No. 10	25 to 45
No. 50	5 to 25
No. 200	0 to 10

For Group 1 aggregates, ensure that the fraction passing the No. 40 sieve has a Plasticity I ndex (AASHTO T 90) of not more than 4.0 and a Liquid Limit (AASHTO T 89) of not more than 25, and contains not more than 67% of the weight passing the No. 200 sieve.

For Group 2 aggregates, ensure that the material passing the No. 10 sieve has a sand equivalent (AASHTO T 176) value of not less than 28.

The Contractor may use graded aggregate of either Group 1 or Group 2, but only use one group on any Contract. (Graded aggregate may be referred to hereinafter as “aggregate”.)

2.2 EQUIPMENT

The aggregate shall be spread by mechanical rock spreaders, equipped with a device which strikes off the aggregate uniformly to laying thickness, and capable of producing an even distribution of the aggregate. For crossovers, intersections and ramp areas; for roadway widths of 20 feet or less; for the main roadway area when forms are used and for any other areas where the use of a mechanical spreader is not practicable; spreading may be done by bulldozers or blade graders. All equipment for proper construction of this project shall be in first-class working condition.

PART 3 - EXECUTION

3.1 TRANSPORTING GRADED AGGREGATE

The graded aggregate shall be transported to the point where it is to be used, over aggregate previously placed if practical, and dumped on the end of the preceding spread. Hauling over the subgrade and dumping on the subgrade will be permitted when, in the County’s opinion, these operations will not be detrimental to the subgrade.

3.2 SPREADING GRADED AGGREGATE

A. Method of Spreading: The graded aggregate shall be spread uniformly. All segregated areas of fine or coarse aggregate shall be removed and replaced with properly graded aggregate.

B. Number of Courses: When the specified compacted thickness of the base is greater than six inches, the base shall be constructed in two courses. The thickness of the first course shall be a pproximately one-half the total thickness of the finished base, or enough addi tional material added to bear the weight of the construction equipment without disturbing the

subgrade. When compacted thickness is six inches or less, graded aggregate shall be placed in one lift.

3.3 COMPACTING AND FINISHING BASE

A. Single-Course Base: For single-course base, after the spreading is completed, the entire surface shall be scarified and then shaped so as to produce the required grade and cross-section, free of scabs and laminations, after compaction.

B. Multiple-Course Base: For multiple-course base, the first course shall be cleaned of foreign material and bladed and brought to a surface cross-section approximately parallel to that of the finished base. Prior to the spreading of any material for the upper course, the density tests for the lower course shall be made, and the County shall have proof that the required compaction has been obtained. After the spreading of the material for the second course is completed, its surface shall be finished and shaped so as to produce the required grade and cross-section after compaction, and free of scabs and laminations.

C. Moisture Content: When the material does not have the proper moisture content to ensure the required density, wetting or drying will be required. When water is added, it shall be uniformly mixed-in by disking to the full depth of the course which is being compacted. Water shall be added before beginning compaction operations. Wetting or drying operations shall involve manipulation, as a unit, of the entire width and depth of the course which is being compacted. This shall be performed utilizing the speedy moisture meter.

3.4 DENSITY REQUIREMENTS

As soon as proper conditions of moisture are attained, the material shall be compacted to a density of not less than 98% of the modified proctor maximum density as determined by AASHTO T-180 (Modified Proctor.)

3.5.1 TESTING SURFACE, PROTECTION, AND MAINTENANCE

A. Density Tests: A minimum of at least one field density test on each course of compacted base shall be performed for every 500 square yards, or every 300 linear feet of road pavement, or as directed by the Engineer. Additional tests may be made if deemed necessary by the Engineer and/or County/CEI.

B. During final compacting operations, if blading of any areas is necessary to obtain the true grade and cross-section, the compacting operations for such areas shall be completed prior to making the density tests on the finished base.

C. Correction of Defects: Contamination of Base Material: If, at any time, the subgrade material should become mixed with the base course materials, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the subgrade and replace the materials removed with clean base material, which shall be shaped and compacted as specified above.

D. Cracks and Checks: If cracks or checks appear in the base, either before or after priming, which in the opinion of the County, would impair the structural efficiency of the base, the Contractor shall remove the cracks or checks by re-scarifying, reshaping, adding base material where necessary, and re-compacting, without additional compensation.

E. Compaction of Widening Strips: Where base construction consists of widening strips and the trench width is not sufficient to permit use of standard base compaction equipment, compaction shall be accomplished by use of vibratory compactors, trench rollers, mechanical plate tampers, or other special equipment which will achieve the density requirements specified herein. When multiple-course base construction is required by the plans or specifications, the required compaction shall be achieved in each course prior to spreading material for the overlaying course.

F. Testing Surface: The finished surface of the base course shall be checked from the required crown and ensure longitudinally a smooth, consistent surface for the placement of the asphalt course(s). All irregularities, greater than 1/4 inch per 15' straight edge test, shall be corrected, after which the entire area shall be re-compacted and tested as specified herein before. In the testing of the surface, the measurements will not be taken in small holes caused by individual pieces of rock having been pulled out by the grader.

G. Priming and Maintaining:

Priming: The prime coat shall be applied only when the base meets the specified density requirements and the moisture content in the top half of the base does not exceed 90% of the optimum moisture of the base material. At the time of priming, the base shall be firm, unyielding and in such condition that no undue distortion will occur. See FDOT Prime Coat Specification.

Maintaining: The Contractor will be responsible for assuring that the true crown and template are maintained, with no rutting or other distortions, and that the base meets all the requirements, at the time the surface course is applied.

H. Thickness Requirements:

Measurements: Thickness of the base shall be measured at intervals in

such a manner that each test represents 500 square yards, or every 300 linear feet of road pavement, or as otherwise directed by the County. Measurements shall be taken at various points on the cross-section, through holes not less than three inches in diameter.

Areas Requiring Correction: Where the compacted base is deficient by more than ½ inch from the thickness called for in the plans, the Contractor shall correct such areas. The affected areas shall then be brought to the required state of compaction and to the required thickness and cross-section.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT:

The quantity to be paid for will be the area, in square yards, completed and accepted.

4.2 BASIS OF PAYMENT:

Price and payment will be full compensation for all work specified in this section, including dust abatement, correcting all defective surfaces and deficient thickness, removing cracks and checks, the additional aggregate required for such crack elimination, and the prime coat.

END OF SECTION 02400

SECTION 02410 – RECYCLED CONCRETE AGGREGATE BASE
(CRUSHED CONCRETE)

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of contract, including General and Supplementary Conditions and other Specification Sections, apply to the work of this section.

1.2 The County recognizes the beneficial reuse of construction materials where said materials can be used in a manner that provides a construction product meeting specifications adopted by state and/or federal agencies. As such, the County shall allow, as noted below, the use of Recycled Concrete Aggregate (RCA) for the purpose of constructing an aggregate base course for the placement of an asphaltic concrete surface course in accordance with this section.

1.3 This section shall conform to section 2400 G.A.B. except as noted.

1.4 SPECIFIC CONSENT REQUIRED

Recycled Concrete Aggregate may only be used on projects with specific written consent of the County Engineer, or designee, subject to the conditions outlined herein. No such permission shall be given until the requirements of Items 2.1 through 3.1.A-D have been affirmatively addressed by the Engineer of Record for the project. Additionally, construction may not proceed until the requirements of Item 3.2.B have been addressed. Should construction commence more than six months after the date of the geotechnical report and/or roadway locations and/or elevations change, a geotechnical addendum shall be submitted confirming groundwater elevations. Should County staff observe differing construction or material conditions after approval; additional testing or re-evaluation of existing conditions for use may be required. RCA installations not in compliance with these specifications shall be subject to removal and replacement.

PART 2 - PRODUCTS

2.1 MATERIALS

The material requirements of Recycled Concrete Aggregate shall be in accordance with the Florida Department of Transportation Special Provisions Specification Section 204, “Graded Aggregate Base.”

A. Recycled Concrete Aggregate used shall not be required to comply with FDEP source approval requirements specified in FAC 62-701.730 or be qualified as a clean debris source under FDEP rules, as outlined in Florida Department of Transportation Special Provisions Specification Section 204-2.2, “ Graded Aggregate Base.” The aggregate supplied shall be

capable of meeting the requirements outlined in this item. NO material shall be used that has been obtained from potentially contaminated sources that may contain asbestos or other hazardous materials.

PART 3 - EXECUTION

3.1 SPECIFIC USE & LOCATION REQUIREMENTS

A. The use of Recycled Concrete Aggregate shall be in accordance with the Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."* It should be noted RCA may not be used on FHWA funded projects.

B. Unless the Engineer of Record can demonstrate that the grading plan provides a minimum vertical separation of 18 inches between the bottom of the base and the seasonal high water table provided in the geotechnical report, permanent groundwater control measures shall be incorporated in the roadway design (i.e. under drains with positive out falls, etc.). If the subsurface conditions encountered in the geotechnical study indicate the presence of, or the potential for, perched groundwater, the geotechnical engineer shall address the appropriate measures to remedy perched groundwater in the geotechnical report or addendum.

C. The Engineer of Record shall as part of the original construction plans approved by the County or by addendum approved by the County provide construction details and specifications for the road section(s) to be used with RCA. The section shall include material types, thickness requirements, and compaction requirements for all materials required for the flexible pavement section. The plan and profiles shall detail groundwater levels (apparent or perched) and the use of under drains with positive out falls, where applicable/appropriate. Where under drains are required, they shall be detailed in cross section relative to the road section. The Engineer of Record shall also provide calculations which detail the calculated capacity of all components of the underdrain section, transmission pipes and receiving system.

D. If, during the time period of construction, water is observed bleeding thru the pavement, new or additional permanent groundwater control measures to a positive, approved, out fall shall be installed. Such measures shall be submitted to the County for review and approval per Item C above.

3.2 TESTING & CERTIFICATION REQUIREMENTS

A. The installation of Recycled Concrete Aggregae shall be in accordance with the Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."*

B. Upon delivery of RCA to the project site, the contractor, NOT the supplier, shall provide to the County a report from an independent FDOT certified testing laboratory certifying that the material meets the gradation and Limerock Bearing Ratio requirements of Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base."*

C. During the course of construction, quality control samples of RCA delivered to the project site shall be selected under the supervision of the County, or its representative, for gradation testing. Sampling shall be at a minimum frequency of one sample for every 3,600 square yards of in-place base material.

D. All testing shall be in accordance with Florida Department of Transportation *Special Provisions Specification Section 204, "Graded Aggregate Base,"* and/or the County requirements, whichever is more stringent.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT:

The quantity to be paid for will be the area, in square yards, completed and accepted.

4.2 BASIS OF PAYMENT:

Price and payment will be full compensation for all work specified in this section, including dust abatement, correcting all defective surfaces and deficient thickness, removing cracks and checks, the additional aggregate required for such crack elimination, and the prime coat.

END OF SECTION 02410

SECTION 02440 – SUPERPAVE ASPHALT BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of Contract, including General and Supplementary Conditions and other Specifications sections, apply to work of this section.

1.2 SUBMITTALS

Submit certification of compliance with applicable specifications in accordance with *Section 01300, "Submittals".*

1.3 ENVIRONMENTAL CONDITIONS

Construct bituminous courses when underlying course is dry, and when atmospheric temperature is 40°F and rising for courses 1½" or greater, and 45°F and rising for courses less than 1½".

1.4 CONSTRUCTION EQUIPMENT

A. Spreading Equipment: Self-propelled electronically controlled type, unless other equipment is authorized. Spreading equipment shall be capable of spreading hot bituminous mixtures without tearing, shoving, or gouging and to produce a finished surface of specified grade and smoothness. The use of a spreader that leaves indented areas or other objectionable irregularities in the fresh laid mix during operations will not be permitted.

B. Rolling Equipment: Self-propelled pneumatic-tired rollers supplemented by three-wheel and tandem type steel wheel rollers. The number, type and weight of rollers shall be sufficient to compact the mixture to the required density without detrimentally affecting the compacted material. All rollers shall be suitable for rolling hot-mix bituminous pavements and capable of reversing without backlash. Pneumatic-tired rollers shall be capable of being operated both forward and backward without turning on the mat, and without loosening the surface being rolled. Equip rollers with suitable devices and apparatus to keep the rolling surfaces wet and prevent adherence of bituminous mixture.

At the Contractor's option, vibratory rollers especially designed for bituminous concrete compaction may be used, provided rollers do not impair stability of pavement structure and any underlying layers. Repair depressions in pavement surfaces resulting from use of vibratory rollers at no cost to the Owner. Rollers shall be self-propelled, single or dual vibrating drums, and steel drive wheels, as applicable; equipped with variable amplitude and separate controls for energy and propulsion.

C. Hand Tampers: Hand tampers shall weigh not less than 25 pounds and have a tamping face of not more than 50 square inches.

D. Mechanical Hand Tampers: Commercial type, operated by pneumatic pressure or by internal combustion.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall conform to the requirements of these Specifications for the pavement sections as shown on the drawings.

PART 3 - EXECUTION

3.1 TRANSPORTATION OF BITUMINOUS MIXTURES

Deliver mixture to the area to be paved in such a manner that the temperature, at the time of dumping into the spreader, shall be not less than 285°F or greater than 34 5°F or that temperature required to obtain the specified compaction. Reject any load that has become wet prior to placing or falls outside of the above temperature ranges.

3.2 PLACING

Provide line and grade stakes as necessary for control. Place grade stakes in lanes parallel to centerline of area to be paved, and suitably space for string lines. Place and compact bituminous courses in such thicknesses as to achieve density and smoothness requirements. Maximum lift of bituminous base course shall not exceed 3 inches. Prior to laying the base course, clean underlying course of foreign and objectionable matter with power blowers, power brooms, or hand brooms in places inaccessible to power equipment, and inspect for compaction and smoothness requirements. The range of temperatures of the mixtures at the time of spreading shall be between 285°F and 345°F. Reject bituminous mixture having a temperature outside these limits when dumped into the hopper of the spreader. Adjust mechanical spreader and regulate speed so that the surface of the course is smooth, and when compacted conforms to depth, cross sections, grades and contours indicated. When irregularities of surface or deficiency in depth is more than specified tolerances, remove defective work and replace with new material. Whenever possible, place the mixture in strips not less than 10 feet wide. Overlap rolling to previously placed strip and extend to overlap first strip. Place mixture as continuously as possible. Shovelers and rakers shall follow spreading equipment, adding hot mixture and raking as required to produce a course that, when completed, shall conform to requirements specified. In areas where the use of machine spreading is impractical, mixture may be spread by hand. Distribute mixture into place from dump boards by means of hot shovels and spread with hot rakes in a uniformly

loose layer of such thickness that, when completed, it conforms to required grade and thickness. Do not dump loads any faster than they can be handled by shovelers and rakers. Paint contact surfaces of previously constructed curbs, manholes, and similar structures with a thin coat of emulsion or other approved bituminous material prior to placing the bituminous mixture.

3.3 COMPACTION OF MIXTURE

A. Affect compaction by rolling. Begin rolling as soon after placing as the mixture will bear the roller without undue displacement. Delays in rolling freshly spread mixture will not be tolerated. Start rolling longitudinally at extreme sides of lanes and proceed toward center of pavement, overlapping on successive strips by at least one-half the width of rear wheel of roller. Alternate trips of roller shall be slightly different lengths. Affect initial longitudinal rolling by the use of steel roller. Make tests for conformity with specified crown, grade and smoothness immediately after initial compression. Before continuing rolling, correct any variations by removing or adding materials, then roll course using pneumatic-tired rollers or tandem rollers, while mixture is hot and in condition suitable for proper compaction. Speed of rollers shall not exceed 3 miles per hour and at all times be slow enough to avoid displacement of hot mixture. Correct any displacement of mixture at once by use of rakes and apply fresh mixture or remove mixture as required. Continue rolling until all roller marks are eliminated. During rolling, moisten rollers to prevent adhesion of mixture to rolling surfaces, but do not permit an excess of water. Provide sufficient rollers for each spreading machine in operation on the job and to handle plant output. In places not accessible to rollers, compact mixture with hot pneumatic or manual hand tampers. Skin patching of an area that has been rolled is not permitted. Remove any mixture that becomes mixed with foreign material or is defective, replace with fresh mixture, and compact to density of surrounding area. Roller shall not pass over unprotected edge until asphalt has cooled to at least 120°F. Contractor shall provide workmen who are capable of performing work incidental to correction of pavement irregularities. After final rolling, permit no traffic of any kind on the pavement until the surface temperature has cooled to at least 120°F. Surface temperature shall be measured with surface thermometers or other satisfactory methods.

B. Testing Base Course:

1. Density: Within the entire limits of the width and depth of the base, obtain a minimum density in all areas of the roadway of 98% of modified Proctor maximum density as determined by AASHTO FM 1-T 180, Method D. Compact the base of any LOT of shoulder pavement to not less than 95% of the modified Proctor maximum density as determined by FM 1-T 180, Method D. Additional tests and cores may be required at the County's discretion.

2. Thickness: Measure thickness throughout the placement of any and all courses. In addition, perform periodic check on the yield during the placement of any and all courses. The maximum allowable deficiency at any point shall not be more than 1/4 inch less than the indicated thickness for the course. The average thickness of the course shall not be less than the indicated thickness. Where he deficiency is more than the specified tolerances, the contractor shall correct each such representative area or areas by removing the pavement in question and replacing with new pavement.

3. Smoothness: Straightedge the compacted surface of the course, utilizing a 15' rolling straightedge, as deemed necessary by the County. Apply a rolling straightedge parallel with the centerline of the road and a non-rolling straightedge at right angles to the centerline of the road after final rolling. Unevenness of the course shall not vary more than plus or minus 3/16 inch in 15 feet. Correct any portion of the pavement showing irregularities greater than that specified.

4. Thicknesses and Density Requirements: The thickness and density shall e checked at intervals not to exceed one per 300 linear feet of roadway, but in any case, should not be less than three tests. Tests shall be staggered to ensure representative sampling.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

ASPHALT BASE COURSE:
The uantity to be paid for will be the area, in square yards, of asphalt base course after adjustment to the equivalent area of specified thickness.

4.2 BASIS OF PAYMENT

ASPHALT BASE COURSE:
Prices and payments will be full compensation for all work specified in this Section.

END OF SECTION 02440

SECTION 02460 - SAND-CLAY BASE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction* (FDOT 2000 Specs), *Sections 240 and 912*, *Latest Edition.*

1.2 DESCRIPTION OF WORK

This item shall consist of a base course composed of sand-clay mixtures constructed on a subgrade prepared in accordance with the specifications and in conformity with the line and grades shown on the drawings.

1.3 USE

Sand-clay base may only be ued on projects with specific written consent from the County Engineer, or designee, subject to the conditions outlined herein.

Graded aggregate base shall be utilized in unsuitable soils, moisture sensitive areas, where g oundwater fluctuates to within two feet of average grade, adjacent to wetlands/surface waters where the subgrade soils have a low permeability, and for roadways that will be dedicated to the County for maintenance.

PART 2 - PRODUCTS

2.1 MATERIALS

A. All materials shall be secured from sources approved by the County and shall be furnished by the Contractor.

B. Sand-Clay shall consist of natural or artificial mixtures of clay or soil binder and gravel, sand or other aggregates. The materials shall be free from organic matter and trash and shall not contain any aggregate particles that will not pass a one-inch (1") sieve. It shall be uniform and shall not contain lumps or aggregate in sufficient quantity to prevent securing a smooth surface free from pits or pockets.

C. The material passing the 10-mesh sieve shall meet the following requirements:

1. Clay (material smaller than 0.005mm) 8-21%

2. Silt (material from 0.05 to 0.005mm) 0-10%

3. Combined Clay and Silt 8-25%

D. It shall have a plasticity index of not more than 6 and have a liquid limit of not more than 25. The material shall have the minimum limerock bearing ratio (LBR) of 75.

PART 3 - EXECUTION

3.1 PLACING AND MIXING MATERIALS

A. Sand-Clay Base; minimum 6-inch compacted thickness. At least 98 percent of the modified proctor maximum dry density must be achieved throughout the full material thickness. The proposed sand-clay base material must be checked by a registered geotechnical engineer or by using hydrometer testing to determine clay content.

B. The material may be dumped directly on the subgrade, but shall be uniformly distributed. The loose thickness will be checked continuously by the Contractor to insure that the finished base course will have the thickness and shape required by the typical section.

3.2 COMPACTING AND FINISHING SAND-CLAY BASE

A. General: After spreading is completed, the base shall be compacted with water being added as required, until the required density has been obtained.

B. Density Requirements: As soon as the proper condition of moisture is attained, the material shall be compacted to a density not less than 98 percent of maximum density as determined by modified proctor test ASTM 1557.

C. Finishing: Upon completion of the initial compaction, the entire surface shall be scarified and then shaped to exact crown and cross-section. The base shall be re-watered, if needed, before final compaction. Final compaction shall be done with any type compacting equipment, in conjunction with traffic rollers, which will obtain the required density. Compaction shall continue until the required density has been obtained and until free water disappears from the surface.

D. Correction of Defects: If at any time, the sub-grade material should become mixed with the base course material, the Contractor shall, without additional compensation, dig out and remove the mixture, reshape and compact the sub-grade and replace the materials removed with base material, which shall be watered, if needed, and rolled until the

required density is obtained.

E. Priming: Allow base to cure until moisture does not exceed 90 percent of optimum moisture content for the base course material. Priming shall meet the requirements of Section 300 of FDOT *Standard Specifications, Latest Edition.*

3.3 TESTING SURFACE, PROTECTION AND MAINTENANCE

A. Testing Surfaces: The finished surface of the base course shall be true to the grades shown on drawings. All i regularities greater than 3/ 8-inch shall be corrected by scarifying and removing or adding base material as may be required, after which the entire area shall be re-compacted to meet the specified density requirements.

B. Thickness of Base: A three-eighths inch (3/8") under tolerance in the base will be allowed. All areas where the thickness of the completed base is less than the thickness required after such tolerance shall be corrected by scarifying, adding base material and re-compacting.

C. Protection, Priming and Maintaining: The base shall be kept well drained at all times. Wherever ruts or low spots are found, the areas affected shall be brought to grade and, if necessary, shall be kept moist until the prime coat is applied, so as to prevent dusting and raveling.

D. Thicknesses and Density Requirements: The thickness and density shall be checked at intervals not to exceed one per 300 linear feet of roadway. In no case shall less than three t sts be performed. Tests shall be staggered to ensure representative sampling.

E. Paved Areas: Make at least one field density test of each compacted fill layer (subgrade, base, etcetera) for every 300 l inear feet of roadway or equivalent area, but in no case less than three tests. Tests shall be staggered to ensure representative sampling.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

Sand-clay Base to be paid for will be the plan quantity, in square yards.

4.2 BASIS OF PAYMENT

Price and Payment will be full compensation for all work specified in this Section, including all materials; all clearing and grubbing of material pits; all stripping of overburden from the pits, if required; all hauling of material, application of prime and all incidentals necessary to complete the work.

END OF SECTION 02460

SECTION 02500 – SUPERPAVE ASPHALT CONCRETE

PART 1 - GENERAL

1.1 GENERAL

A. Construct a Type SP Asphalt pavement for local agencies using the type of mixture specified in the Contract, or when offered as alternates, as approved.

B. For this Section only, all references to the Department shall mean the County. All references to the Engineer shall mean the Engineer of Record, designated Engineer of Escambia County and/or CEI.

C. The County will accept the work based on one of the following methods as described in Part 5: 1) Certification, 2) Certification and process control testing by the Contractor, 3) acceptance testing by the County, or 4) other method(s) as determined by the Contract.

1.2 LAYER THICKNESSES

A. Use only fine graded Type SP asphalt mixes. Fine graded mixes are defined as having a gradation that passes above the restricted zone when plotted on an FHWA 0.45 Power Gradation Chart.

B. FINE MIXES: The allowable structural layer thicknesses for fine Type SP Asphalt Concrete mixtures are as follows:

Type SP 9.5	1-1 ½ inches
Type SP 12.5	1 ½ - 2 ½ inches
Type SP 19.0	2-3 inches

In addition to the minimum and maximum thickness requirements, the following restrictions are placed on fine mixes when used as a structural course:

Type SP 9.5 - Limited to the final (top) structural layer, one layer only

Type SP 12.5 - May not be used in the first layer of courses over 3 1/ 2 inches thick, nor in the first layer of courses over 2 3/4 inches thick on limited access facilities.

The thickness of the new pavement may be checked by core samples, as determined by the Engineer. The Contractor shall be required to correct any deficiency either by replacing the full thickness; or overlaying the area as directed by the Engineer. County inspection shall be performed and all base failures shall be corrected prior to asphalt installation.

Type SP 19.0 - May not be used in the final (top) structural layer.

C. ADDITIONAL REQUIREMENTS: The following requirements also apply to fine Type SP Asphalt Concrete mixtures:

1. A minimum 1 1/2 inch initial lift is required over an Asphalt Rubber Membrane Interlayer (ARMI).

2. When construction includes the paving of adjacent shoulders (5 feet wide or less), the layer thickness for the upper pavement layer and shoulder shall be the same and paved in a single pass, unless shown differently in the plans.

3. Use the minimum and maximum layer thicknesses as specified in 1.2 B above unless shown differently in the plans. On variable thickness overbuild layers, the minimum allowable thickness may be reduced by 1/2 inch, and the maximum allowable thickness may be increased 1/2 inch, unless shown differently in the plans.

PART 2 - PRODUCTS

2.1 GENERAL REQUIREMENTS

Meet the material requirements specified in F DOT Standard Specifications Division III. Specific references are as follows:

Superpave PG Asphalt Binder or Recycling Agent – Sections 916-1, 916-2
Coarse Aggregate, Stone, Slag or Crushed Gravel – Section 901
Fine Aggregate – Section 902

Aggregates utilized on Escambia County projects must be in accordance with FDOT Qualified Products List

2.2 GRADATION REQUIREMENTS

Combine the coarse and fine aggregate in proportions that will produce an asphalt mixture meeting all of the requirements defined in this Specification and conform to the gradation requirements at d sign as defined in Table 1 bel ow. Aggregates from various sources may be combined.

Table 1
Aggregate Gradation Control Points
(Gradation Design Ranges)

	Type SP Asphalt Mixture (Percent Passing)					
	SP 9.5		SP 12.5		SP 19.0	
Sieve Size	Min.	Max.	Min.	Max.	Min.	Max
1 inch	-	-	-	-	100	-

3/4 inch	-	-	100	-	90	100
1/2 inch	100	-	90	100	-	90
3/8 inch	90	100	-	90	-	-
No. 4	-	90	-	-	-	-
No. 8	32	67	28	58	23	49
No. 200	2	10	2	10	2	8
For additional information, refer to AASHTO M-323-04, Table 3						

2.3 RESTRICTED ZONE

The gradation ientified in 2.2 shall pass above the restricted zone specified in Table 2 below.

Table 2
Aggregate Gradation Restricted Zone (Design Only)

Sieve Size within Restricted Zone	Boundaries of Restricted Zone Type SP Asphalt Mixture (Percent Passing)					
	SP 9.5		SP 12.5		SP 19.0	
	Min.	Max.	Min.	Max.	Min.	Max
No. 4	-	-	-	-	-	-
No. 8	47.2	47.2	39.1	39.1	34.6	34.6
No. 16	31.6	37.6	25.6	31.6	22.3	28.3
No. 30	23.5	27.5	19.1	23.1	16.7	20.7
For additional information, refer to AASHTO M-323-04, Table 4						

2.4 AGGREGATE CONSENSUS PROPERTIES

A. Meet the following consensus properties at design for the aggregate blend:

1. Coarse A ggregate A ngularity: When tested in accordance with ASTM D 5821, meet the coarse aggregate angularity requirement defined in Table 3 below.

Table 3
Coarse Aggregate Angularity Criteria
(Minimum Percent Fractured Faces)

	Depth of Top of Pavement Layer From Surface			
	≤4 inches		>4 inches	
	1 or More Fractured Faces (%)	2 or More Fractured Faces (%)	1 or More Fractured Faces (%)	2 or More Fractured Faces (%)
	85	80	60	-
For additional information, refer to AASHTO M-323-04, Table 5				

2. Fine Aggregate Angularity: When tested in accordance with AASHTO T-304, meet the fine aggregate angularity requirement defined in Table 4 below.

Table 4 Fine Aggregate Angularity Criteria		
	Depth of Top of Pavement Layer From Surface	
	≤4 inches	>4 inches
	Minimum Uncompacted Void Content (%)	Minimum Uncompacted Void Content (%)
	45	40
For additional information, refer to AASHTO M-323-04, Table 5		

3. Flat and Elongated Particles: When tested in accordance with ASTM D 4791, use a ratio of maximum to minimum dimensions of 5:1 and do not exceed 10% as the maximum amount of flat and elongated particles.

2.5 USE OF RECLAIMED (MILLED) ASPHALT PAVEMENT

A. General Requirements: Reclaimed Asphalt Pavement (RAP) may be used as a component material of the asphalt mixture subject to the following:

1. The Contractor assumes responsibility for the design of asphalt mixes which incorporate RAP as a component material.

2. For design purposes, the Contractor assumes responsibility for establishing accurate specific gravity values for the RAP material. This may be accomplished by one of the following methods:

   a. Calculation of the bulk specific gravity value based upon the effective specific gravity of the RAP, determined on the basis of the asphalt binder content and maximum specific gravity. The Engineer and/or Engineer of Record will approve the estimated asphalt binder absorption value used in the calculation.

   b. Testing of the extracted aggregate obtained through a vacuum extraction or ignition oven extraction.

3. The amount of RAP material used in the mix is not to exceed 50% by weight of total aggregate.

4. Use a grizzly or grid over the RAP cold bin, in-line roller crusher, screen, or other suitable means to prevent oversized RAP material from showing up in the completed recycled mixture.

If oversized RAP material appears in the completed recycled mix, take the appropriate corrective action immediately. If the appropriate corrective actions are not taken immediately, plant operations should be stopped.

5. Provide stockpiled RAP material that is reasonably consistent in characteristics and contains no aggregate particles that are soft or conglomerates of fines.

6. Provide RAP, having minimum average asphalt content of 4.0% by weight of total mix. The Engineer may sample the stockpile to verify that this requirement is met.

B. Binder for Mixes with RAP: Select the appropriate binder based on the table below. The Engineer and/or Engineer of Record reserves the right to change binder type and grade at design based on the characteristics of the RAP binder, and reserves the right to make changes during production. Maintain the viscosity of the recycled mixture within the range of 4,000 to 12,000 poises. Obtain a sample of the mixture for the Engineer within the first 1,000 tons and at a frequency of approximately one per 4,000 tons of mix.

Binder Grade for Mixes Containing RAP	
% RAP	Asphalt Binder Grade
<20	PG 67-22
20-29	PG 64-22
≥ 30	Recycling Agent
Note: When a PG 76-22 Asphalt Binder is called for in the Contract, limit the amount of RAP material used in the mix to a maximum of 15%.	

PART 3 - GENERAL COMPOSITION OF MIXTURE

3.1 GENERAL

Compose the asphalt mixture using a combination of aggregate (coarse, fine or mixtures thereof), mineral filler, if required, and asphalt binder material. Size, grade and combine the aggregate fractions to meet the grading and physical properties of the approved mix design. Aggregates from various sources may be combined.

3.2 MIX DESIGN

A. Design the Type SP asphalt mixture in accordance with AASHTO PP-28, except as noted herein, to meet the requirements of this Specification. Use only previously approved designs. Prior to the production of any Type SP asphalt mixture, submit the proposed mix design with supporting

test data indicating compliance with all Type SP asphalt mix design criteria.

The Engineer and/or Engineer of Record will consider any marked variations from original test data for a mix design or any evidence of inadequate field performance of a mix design as sufficient evidence that the properties of the mix design have changed, and the Engineer and/or Engineer of Record will no longer allow the use of the mix design.

1. Grading Requirements: Meet Gradation Design Ranges in PART 2.

2. Gyratory Compaction: Compact the design mixture in accordance with AASHTO TP-4. Use the number of gyrations as defined in the table below.

Type SP Design Gyratory Compactive Effort			
	$N_{initial}$	N_{design}	$N_{maximum}$
SP Mixes	7	75	115

3. Volumetric Criteria: Use an air void content of the mixture at design of 4.0% at the design number of gyrations (N_{design}). Meet the requirements of the table below.

Mixture Densification Criteria			
	% G_{mm}		
	$N_{initial}$	N_{design}	$N_{maximum}$
SP Mixes	$\geq$ 89.0	96.0	$\leq$ 98.0

4. VMA Criteria: Meet the requirements of the table below for Voids in the Mineral Aggregate (VMA) of the mixture at the design number of gyrations.

VMA Criteria	
Type Mix	Minimum VMA (%)
SP 9.5	15.0
SP 12.5	14.0
SP 19.0	13.0

5. VFA Criteria: Meet the requirements of the table below for voids filled with asphalt (VFA) of the mixture at the design number of gyrations.

VFA Criteria	
	Design VFA (%)
SP Mixes	65 - 75

6. Dust Proportion: Use an effective dust-to-binder ratio as efined in FDOT Section 334-3.2.5.

7. Moisture Susceptibility: Provide a mixture (4 inch s pecimens) having a retained tensile strength ratio of at least 0. 80 and a minimum tensile strength (dry and unconditioned) of 100 psi.

8. Additional Information: In addition to the requirements listed above, provide t he following information with each proposed mix design submitted for use:

    a. The design number of gyrations (N_{design}).

    b. The source and description of the materials to be used.

    c. The FDOT source number product code of the aggregate components furnished from an FDOT approved source.

    d. The gradation and proportions of the raw materials as intended to be combined in the paving mixture. The gradation of the component materials shall be representative of the material at the time of use. Compensate for any change in aggregate gradation in handling and processing as necessary.

    e. A single percentage of the combined mineral aggregate passing each specified sieve. Degradation of the aggregate due to processing (particularly -No. 200 [-75 µm]) should be accounted for and identified for the applicable sieves.

    f. The bulk specific gravity value for each individual aggregate (and RAP) component as identified in the FDOT aggregate control program.

    g. A single percentage of asphalt binder by weight of total mix intended to be incorporated in the completed mixture, shown to the nearest 0.1%.

    h. A target temperature at which the mixture is to be discharged from the plant and a target roadway temperature (per 30 -6.3). Do not exceed a target temperature of 340°F for modified asphalts and 315°F for unmodified asphalts.

    i. Evidence that the completed mixture conforms to all specified physical requirements.

    j. The name, seal, and/or certification of the Mix Designer.

3.3 REVISION OF MIX DESIGN

During production, the Contractor may request a t arget value revision to a mix design, subject to: (1) the target change falls within the limits defined in the table below, (2) ap propriate data exists demonstrating that the mix complies with production air voids specification criteria, and (3) the mixture gradation meets the basic gradation requirements defined in 2.2 and 2.3.

Limits for Potential Adjustments to Mix Design Target Values	
Characteristic	Limit from Original Mix Design
No. 8 sieve and Coarser	± 5.0%
No. 16 sieve	± 4.0%
No. 30 sieve	± 4.0%
No. 50 sieve	± 3.0%
No. 100 sieve	± 3.0%
No. 200 sieve	± 1.0%
Asphalt Binder Content (1)	± 0.3%
(1) R eductions to t he as phalt bi nder c ontent w ill not be permitted i f the VMA during production is lower than 1.0% below the design criteria.	

Submit all requests for revisions to mix designs, along with supporting documentation, to the Engineer. In order to expedite the revision process, the request for revision or discussions on the possibility of a revision may be made verbally, but must be followed up by a written request. The initial mix design will remain in effect until a change is authorized by the Engineer and/or Engineer of Record. In no case may the effective date of the revision be established earlier than the date of the first communication between the Contractor and the Engineer regarding the revision.

A new design mix will be required for any substitution of an aggregate product with a different aggregate code, unless approved by the Engineer and/or Engineer of Record.

3.4 PAVING EQUIPMENT

A. Mechanical Spreading and Screeding Equipment:

1. General: Provide mechanical spreading and screeding equipment of an approved type that is self-propelled and can be steered. Equip it with a receiving and distribution hopper and a mechanical screed. Use a mechanical screed capable of adjustment to regulate the depth of material spread and to produce the desired cross-section.

2. Automatic Screed Control: For all asphalt courses, placed with mechanical spreading and finishing equipment, equip the paving

machine with automatic longitudinal screed controls of either the skid type, traveling stringline type, or non-contact averaging ski type. Ensure that the length of the skid, traveling stringline, or non-contact averaging ski is at least 25 feet. On the final layer of base, overbuild, structural, and friction courses, use the joint matcher in lieu of the skid, traveling stringline, or non-contact averaging ski on all passes after the initial pass. Furnish a paving machine equipped with electronic transverse screed controls when required by the Contract Documents.

3. Inflation of Tires: When using paving machines equipped with pneumatic tires, the Engineer may require that the tires be ballasted.

4. Screed Width: Provide paving machines on full width lanes that have a screed width greater than 8 feet. Does not use extendable screed strike-off devices that do not provide preliminary compaction of the mat in place of fixed screed extensions. The Contractor may use a strike-off device on irregular areas that would normally be done by hand and on shoulders 4 feet or less in width. When using the strike-off device on shoulders in lieu of an adjustable screed extension, the Contractor must demonstrate the ability to obtain an acceptable texture, density, and thickness. When using an extendable screed device to extend the screed's width on the full width lane or shoulder by 24 inches or greater, an auger extension, paddle, or kicker device is required unless the Contractor provides written documentation from the manufacturer that these are not necessary.

5. Motor Graders: Provide two motor graders for spreading widening courses with prior approval from the Engineer only. Use motor graders that are rated at not less than 6 tons and are self-propelled and power-controlled. Mount them on smooth tread or rib-type tires (no lug types allowed) with a wheel base of at least 15 feet. Equip the front motor grader with a spreader box capable of spreading the mix at the required rate.

6. Rollers:

   a. Steel-Wheeled Rollers: Provide compaction equipment capable of meeting the density requirements described in these Specifications. Provide a tandem steel-wheeled roller weighing a minimum of 8 tons for seal rolling, and for the final rolling, use a separate roller with a minimum weight of 8 tons. Variations from these equirements shall be approved by the Engineer.

b. Traffic Rollers: Provide compaction equipment capable of meeting the density requirements described in these specifications. Provide a self-propelled, pneumatic-tired traffic roller equipped with at least seven smooth-tread, low pressure tires, equipped with pads or scrapers on each tire. Maintain the tire pressure between 50 and 55 psi or as specified by the manufacturer. Use rollers with a minimum weight of 6 tons. Do not use wobble-wheeled rollers. Variations from these requirements shall be approved by the Engineer.

c. Prevention of Adhesion: Do not allow the mixture to adhere to the wheels of any rollers. Do not use fuel oil or other petroleum distillates to prevent adhesion. Do not use any method which results in water being sprinkled directly onto the mixture.

7. Trucks: Transport the mix in trucks of tight construction, which prevents the loss of material and the excessive loss of heat. Provide each truck with a tarpaulin or other waterproof cover mounted in such a manner that it can cover the entire load when required. When in place, overlap the waterproof cover on all sides so that it can be tied down.

8. Coring Equipment: Furnish a suitable saw or drill for obtaining the required density cores.

9. Hand Tools: Provide the necessary hand tools such as rakes, shovels, etc., and a suitable means for keeping them clean.

PART 4 - CONTRACTOR'S PROCESS CONTROL

4.1 GENERAL

A. Personnel: Provide qualified personnel (certified technician) for sampling, testing (by certified lab), and/or sign-off by P.E., and inspection of materials and construction activities. Ensure that qualifications are maintained during the course of sampling, testing and inspection.

Construction operations that require a qualified technician must not begin until the Department verifies that the technician is on the CTQP (Construction Training Qualification Program) list of qualified technicians. The CTQP lists are subject to satisfactory results from periodic Independent Assurance evaluations.

B. Calibration of the Gyratory Compactor: Calibrate the Gyratory Compactor in accordance with the manufacturer's recommendations prior to

producing the mixture for any project. Check the height calibration, the speed of rotation; ram pressure and angle of gyration.

C. Plant Testing Requirements: During the initial production of a mix design, test mix to ensure proper performance and provide results to the department.

D. Roadway Testing Requirements: Areas that demonstrate concerns of the mix design quality or poor/improper compaction efforts may be subject to additional coring and testing as seen fit by the Engineer.

E. Extraction Gradation Analysis: Sample the asphalt mixture at the plant and perform extraction test prior to asphalt being delivered to project. The percent asphalt binder content of the mixture will be determined in accordance with FM 5-563 (ignition oven). The gradation of the extracted mixture will be determined in accordance with FM 1-T 030. All test results will be shown to the nearest 0.01. All calculations will be carried to the nearest 0.001 and rounded to the nearest 0.01. All results shall be provided to the department prior to placement of asphalt on any project.

Run an extraction gradation analysis on the mixture at a minimum frequency of once per 1,000 tons or a maximum of four consecutive days of paving, which ever comes first.

The target gradation and asphalt content will be as shown on the mix design. Any changes in target will require a change in the mix design.

If the percentage of asphalt binder deviates from the optimum asphalt binder content by more than 0.55%, or the percentage passing any sieve falls outside the limits in the table below, immediately resample the mix and test to validate the previous test result, and if needed, make the necessary correction. If the results for two consecutive tests deviate from the optimum asphalt binder content by more than 0.55%, or exceed the limits in the table for any sieve, notify the Engineer and take immediate steps to identify and correct the problem, then resample the mix. If the results from this test deviate from the optimum asphalt binder content by more than 0.55%, or exceed the limits in the table for any sieve, stop plant operations until the problem has been corrected.

Tolerances for Quality Control Tests (Extraction Gradation Analysis)	
Size	Percent Passing
1 inch	7.0
3/4 inch	7.0
1/2 inch	7.0
3/8 inch	7.0
No. 4	7.0
No. 8	5.5
No. 16	5.0
No. 30	4.5
No. 50	4.5
No. 100	3.0
No. 200	2.0

F. Volumetric Control: During poduction of the mix, monitor the volumetric properties of the Type SP asphalt mix with a Type SP Gyratory Compactor to determine the air voids, VMA, VFA, and dust-to-effective asphalt binder ratio (dust proportion) at N_{design}.

Take appropriate corrective actions in order to maintain an air void content at N_{design} between 3.0 and 5.0% during production. When the air void content at N_{design} drops below 2.5 or exceeds 5.5%, stop plant operations until the appropriate corrective actions are made and the problem is resolved to the satisfaction of the Engineer and/or Engineer of Record. Evaluate any failing material in accordance with Part 6.

Determine the volumetric properties of the mixture at a minimum frequency of once per production day when the daily production is less than 1,000 tons. If the daily production exceeds 1,000 tons, monitor the volumetric properties two times per production day.

During normal production, volumetric properties of the mixture will not be required on days when mix production is less than 100 tons. However, when mix production is less than 100 tons per day on successive days, run the test when the accumulative tonnage on such days exceeds 100 tons.

Testing required for volumetric property determination includes AASHTO TP-4, FM 1-T 209, FM 5-563 and FM 1-T 030. Prior to testing samples in accordance with AASHTO TP-4 and FM 1-T 209, condition the test-sized sample for one hour at the compaction temperature in a covered container.

G. Plant Calibration: At or before the start of mix production, perform an extraction gradation analysis of the mix to verify calibration of the plant.

The sample t sted at the start of any project may be utilized for this requirement.

H. Process Control of In-Place Compaction: Develop and implement a method to control the compaction of the pavement and ensure its compliance with the minimum specified density requirements. The department may require the use of a nuclear gauge to test areas suspected of not having proper compaction. Other density measuring devices may be used in lieu of the nuclear density gauge, provided that it is demonstrated to the satisfaction of the Engineer and/or Engineer of Record that the device can accurately measure the relative level of density in the pavement on a consistent basis.

PART 5 - ACCEPTANCE OF THE MIXTURE

5.1 GENERAL

The asphalt mixture will be ac cepted based on one of the following methods as determined by the Engineer and/or Contract Documents:

1. Certification by the Contractor
2. Certification and Process Control Testing by the Contractor
3. Acceptance testing by the Engineer
4. Other method(s) as determined by the Contract

5.2 CERTIFICATION BY THE CONTRACTOR

Submit a Notarized Certification of pecification Compliance letter on company letterhead to the Engineer that all material produced and placed on the project was in substantial compliance with these specifications.

5.3 CERTIFICATION AND PROCESS CONTROL TESTING BY THE CONTRACTOR

Submit a N tarized Certification of Specification Compliance letter on company letterhead to the ngineer that all material produced and placed on the project was in substantial compliance with these specifications, along with supporting test data documenting all process control testing. Utilize an Independent Laboratory as approved by the Engineer for the Process Control testing.

5.4 ACCEPTANCE TESTING BY THE ENGINEER

A. Acceptance at the Plant:

1. The asphalt mixture will be accepted, with respect to gradation and asphalt binder content, based on the results from the start up test. However, any load or loads of mixture which, in the opinion of the Engineer and/or Engineer of Record, are unacceptable for reasons of excessive segregation, aggregates improperly coated, or of excessively high or low temperature will be rejected for use in the work.

2. Acceptance Procedures: Control all operations in the handling, preparation, and production of the asphalt mix so that the percent asphalt binder content and the percents passing the No. 8 and No. 200 sieves will meet the targets from the mix design within the tolerances shown in the table below.

Tolerances for Acceptance Tests	
Characteristic	Tolerance*
Asphalt Binder Content	±0.55%
Passing No. 8 Sieve	±5.50%
Passing No. 200 Sieve	±2.00%
*Tolerances for sample size of n=1.	

Calculations for the acceptance test results for asphalt binder content and gradation (percentages passing the No. 8 and No. 200 sieves) will be shown to the nearest 0.01. Calculations for arithmetic averages will be carried to the 0.001 and rounded to the nearest 0.01.

Payment will be based on the acceptance of the project by the Engineer.

B. Acceptance of the Roadway:

1. Density Control: The in-place density of any questionable section of a course of asphalt mix will be ev aluated by the use of a nuclear gauge and/or by the testing of 6 inch diameter roadway cores.

The Engineer will not perform dnsity testing on leveling courses, open-graded friction courses, or any course which does not show signs of poor /improper compaction efforts. In addition, density testing will not be per formed on t he following areas when they are less than 1 ,000 feet in length: crossovers, intersections, turning lanes, acceleration lanes or deceleration lanes. Compact these courses (with the exception of open-graded friction courses) in accordance w ith t he appropriate rolling pr ocedure a s specified i n these specifications or as approved by the Engineer.

2. Acceptance**:** The completed pavement will be accepted with respect to overall ride, overall appearance, and overall yield as determined by the Engineer or Engineer of Record.

   Areas of question may be tested with a nuclear gauge or by the testing of the density of the cores, as determined by the engineer.

3. Additional Density Requirement: On shoulders with a width of 5 feet or less, compact the pavement in accordance with the rolling procedure (equipment and pattern) as specified herein or as approved by the Engineer. Stop the production of the mix if the rolling procedure deviates from the approved procedure.

4. Surface Tolerance: The asphalt mixture will be accepted on the roadway with respect to surface tolerance by the use of a 15 ft rolling straight edge. The department will determine if the use of a straight edge test is warranted. Unevenness of the course shall not vary more than plus or minus 3/16 inch in 15 feet.

5.5 ADDITIONAL TESTS

The Department reserves the right to run any test at any time for informational purposes and for determining the effectiveness of the Contractor's quality control.

PART 6 - DISPOSITION OF FAILING MATERIAL

Any material that is represented by failing test results will be evaluated to determine if removal and replacement is necessary. Remove and replace any material, if required, at no cost to the Department. The evaluation will be conducted by the Engineer and/or Engineer of Record. If so directed, obtain an engineering analysis, as directed by the Engineer, by the independent laboratory (as approved by the Engineer) to determine if the material can (a) remain in place, for this case the appropriate pay factor will be applied, or (b) be removed and replaced at no cost to the Department. The analysis will be a signed and sealed report by a Professional Engineer licensed in the State of Florida.

PART 7 – MEASUREMENT/PAYMENT

7.1 METHOD OF MEASUREMENT

For the work specified under this Section the quantity to be paid for will be the in-place measurement of the area in square yards unless otherwise stated in the project plan details.

The bid price for the asphalt mix will include the cost of the liquid asphalt or the asphalt recycling agent. There will be no separate payment or unit price adjustment for the asphalt binder material in the asphalt mix.

7.2 BASIS OF PAYMENT

Price and payment will be full compensation for all the work specified under this section.

END OF SECTION 02500

SECTION 02510 – ASPHALT RUBBER MEMBRANE INTERLAYER
(ARMI) CRACK RELIEF

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawing and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, apply to work of this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 440, and Design Standards, Latest Edition*.

1.2 DESCRIPTION OF WORK

A. Construct an asphalt rubber membrane interlayer composed of a separate application of asphalt rubber binder covered with a single application of aggregate.

PART 2 - MATERIALS

A. Asphalt Rubber Binder: Use ARB-20, or approved equal, meeting the **r**equirements of FDOT *Standard Specification Section 336*.

B. Cover Material: Use Size No. 6 stone, slag, or gravel meeting the requirements of FDOT *Standard Specification Section 901*.

PART 3 - EQUIPMENT

A. Power Broom: Provide a power broom, for cleaning the existing pavement, capable of removing all loose material from the surface.

B. Spreading Equipment: Provide a self-propelled aggregate spreader that can be adjusted to accurately apply the cover material at the specified rate and that spreads the material uniformly.

C. Rollers: Provide self-propelled, pneumatic-tired traffic type rollers equipped with at least 7 smooth tread, low-pressure tires, and capable of carrying a gross load of at least 8 tons. Maintain a minimum tire inflation pressure of 90 psi, or as specified by the manufacturer, such that the air pressure in no two tires varies more than 5 psi. Load the traffic roller as directed by the Engineer.

D. Mixing Equipment: Use mixing equipment for asphalt rubber binder designed for that purpose and capable of producing and maintaining a

homogeneous mixture of rubber and asphalt cement at the specified temperature.

E. Pressure Distributor: Use a pressure type distributor to apply asphalt rubber binder capable of maintaining a homogeneous mixture of rubber and asphalt cement at the specified temperature and consistently apply the material in a uniform manner.

PART 4 - CONTRACTOR'S QUALITY CONTROL (QC) PLAN

Provide the necessary quality control of the asphalt rubber binder and construction in accordance with the Contract requirements. Provide in the QC Plan procedures for monitoring and controlling of rate of application. If the rate of application varies by more than 5% from the rate set by the County, in accordance with 4.6 herein, immediately make all corrections necessary to bring the spread rate into the acceptable range. The County may take additional measurements at any time. The County will randomly check the Contractor's measurement to verify the spread rate.

PART 5 - PREPARATION OF ASPHALT RUBBER BINDER

Combine the materials as rapidly as possible for such a time and at such a temperature that the consistency of the binder approaches that of a semi-fluid material. Use the time and temperature for blending of the asphalt rubber binder as specified in FDOT Standard Specifications Table 336-1. The manufacturer must ensure the material has reached application consistency. If not, the manufacturer will determine if an extender oil or diluents is needed. After reaching the proper consistency, proceed with application immediately. Never hold the mixture at temperatures over 350ºF for more than six hours after reaching that temperature.

PART 6 - CONSTRUCTION PROCEDURE

A. Preparation of Surface: Prior to application of the asphalt rubber binder, clean the existing pavement as specified in FDOT Standard Specifications 300-5.

B. Application of Asphalt Rubber Binder: Apply the asphalt rubber binder only under the following conditions:

1. The air temperature is above 50ºF and rising.

2. The pavement is absolutely dry.

3. The wind conditions are such that cooling of the asphalt rubber binder will not be so rapid as to prevent good bonding of the aggregate.

Uniformly apply the asphalt rubber binder, at the rate of 0.6 to 0.8 gal/yd^2 or as directed by the manufacturer. Use an application rate based on the unit weight as shown in FDOT Standard Specifications, Table 336-1. For conversions to standard 60ºF, refer to FDOT Standard Specifications 300-9. Determine the rate of application after each application operation.

C. Application of Cover Material: Immediately after application of the asphalt rubber binder, uniformly spread the cover material at a rate of 0.26 and 0.33 ft^3/yd^2 or as directed by the County. Determine the application rate at the beginning of each day's production, and as needed to control the operation, a minimum of twice per day. Maintain an application rate such that the pavement is covered uniformly with aggregate, and is one aggregate layer thick. For the cover material, use aggregate that is reasonably free of any adherent coatings and that does not contain excessive moisture. Immediately after the application of cover material, check the surface to ensure a uniform distribution of cover material and a smooth surface.

Do not separate the application of the asphalt rubber binder and the application of the cover material by more than 300 feet, unless approved by the County.

D. Rolling: In order to ensure maximum embedment of the aggregate, cover the entire width of the mat immediately by traffic rollers. For the first coverage, provide a minimum of three traffic rollers in order to accomplish simultaneous rolling in echelon of the entire width of the spread.

After initial rolling, immediately correct all portions of the completed surface that the County deem are defective (not properly covered by aggregates, fat spots, excessive free aggregate, etc.)

Following the first coverage, make additional coverages with traffic rollers as directed by the County.

E. Traffic Control: For the normal sequence of construction operations, place the first course of asphalt concrete overlay over the membrane prior to opening to traffic.

PART 7 - UNACCEPTABLE ASPHALT RUBBER MEMBRANE INTERLAYER

If the asphalt rubber membrane interlayer is unacceptable due to incorrect blending, application rate, or not meeting the requirements of this Section, or damaged prior to placement of the asphalt concrete layer, remove and replace it as directed by the County, at no additional cost to the County. Do not apply excessive amounts of asphalt rubber binder.

PART 8 - PLACEMENT OF ASPHALT CONCRETE OVERLAY

Ensure that the thickness and temperature of the initial layer of asphalt concrete placed on top of the asphalt rubber membrane interlayer are such that the overlay bonds to the interlayer and the underlying layer without voids or excessive binder. Core the asphalt overlay as directed by the County to evaluate the binder and aggregate spread rates, as well as the effectiveness of the asphalt concrete overlay in producing a well-bonded interlayer.

PART 9 – MEASUREMENT/PAYMENT

9.1 METHOD OF MEASUREMENT

A. Asphalt Rubber Membrane Interlayer: The quantity to be paid for will be plan quantity, in square yards, completed and accepted.

B. Bituminous Material (Asphalt Rubber Binder-Interlayer): The quantity will be the volume, in gallons, determined as provided in FDOT Standard Specifications 300-8.

9.2 BASIS OF PAYMENT

A. Asphalt Rubber Membrane Interlayer: Price and payment will be full compensation for all work specified in this Section, including furnishing cover materials, handling, spreading, rolling, bituminous material, and other incidental work necessary to complete this item.

B. Bituminous Material (Asphalt Rubber Binder-Interlayer): Payment will be included in the price of the asphalt rubber membrane interlayer and will be full compensation for furnishing asphalt cement, ground tire rubber, blending and handling.

C. Payment Items: Payment will be made determined by the square yards of in-place product accepted.

END OF SECTION 02510

SECTION 02580 – HOT IN-PLACE RECLAIMED ASPHALT AND RESURFACING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the contract, including general and supplementary conditions ad other specification sections, apply to work of this section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction Section 327*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

This work consists of rehabilitating the surface layer of the existing asphalt roadway to a depth of one inch and placing a layer of new Hot Mix Asphalt Concrete (HMAC) material over the rehabilitated surface. This will be accomplished with a specially designed machine in a simultaneous process of heating, scarifying, applying an asphalt rejuvenating agent (emulsifier), thoroughly re-mixing and reshaping the existing surface, and application of the final overlay. The overlay of the new HMAC placed over the rejuvenated layer of existing asphalt, shall be in compliance with the lines, grades, thickness and typical cross section established by the County.

The machine that heats, scarifies, rejuvenates, and remixes must also lay the recycled asphalt material, as well as lay the new HMAC material. The County will provide the list of streets and surface selected for this application. Additional pre-heaters may be required to achieve the specified depth, as directed by the County.

PART 2 - MATERIALS

A. Asphalt Recycling Agent (Emulsifier): The County will appove the asphalt-recycling agent. The recycling agent used to restore the plasticity of the existing asphaltic pavement shall be an emulsified agent. The recycling agent shall meet the requirements of ECR 1 or equal. A manufacturer's certification shall be submitted to the County for the recycling agent.

B. Hot Mix Aphaltic Concrete (HMAC): The delivery of the new HMAC will be coordinated with the HMAC supplier by the selected recycling contractor.

PART 3 - JOB CONDITIONS

A. Weather limitation for this work shall be a minimum of 50° F and rising.

B. Prior to the repaving operation, the pavement shall be cleaned so as to be reasonably free from sand, dirt and other deleterious substances that would affect the quality of the recycled mix. No separate payment shall be made for this requirement.

C. Existing manholes, water valves boxes, junction boxes, etc. that do not conform to the finished pavement grades shall be adjusted to finish grade.

D. The Contractor shall be responsible for protecting the areas adjacent to the work from damage. (Heat, etc.)

PART 4 - EQUIPMENT

A. All tools, equipment, and machinery shall be maintained in satisfactory working condition and shall be subject to the approval of the County Engineer.

B. Repaving Machine: The machine shall be an approved, self-contained, self propelled, automated unit that heats, scarifies (or mills), automatically applies recycling agent at a uniform rate, thoroughly mixes, redistributes and levels the existing asphalt to the specified depth, and lays the new HMAC material overlay. The new HMAC must be laid within 30 seconds after the scarification begins to ensure a hot monolithic bond with the recycled asphalt pavement. The machine shall also be capable of reworking the material around manholes and other obstacles; the machine shall be capable of adding and mixing the recycling agent evenly and shall be equipped with a leveling blade and screed for re-grading of the existing asphaltic concrete surface.

C. Pre-heater: This unit shall be hooded to prevent damage to adjacent property, including trees shrubs and landscaping. The heating hood shall be capable of heating the pavement surface to a minimum temperature of 225 degrees F, not to exceed 325 degrees F. This will allow for scarification to the required depth without breaking the aggregate particles or charring the pavement surface.

D. Scarifying and Milling units shall be automatically controlled units in order to control the depth of penetration and to clear utility manholes and other obstructions. The depth of scarification shall be directed by the County. Note: Scarifying depth may vary in range form 3/4 of one inch to 1 ½ inches.

E. Recycling Agent Applicator: This system shall be automatically controlled; the recycling agent must be applied to the scarified material at a uniform rate. The application rate shall be synchronized with the machine's forward speed to maintain a tolerance within ± *5%* of the specified rate.

F. Receiving hopper and Conveying System: The machine shall consist of a

hopper and conveyor system to collect and transport the new HMAC to the finishing unit without segregation of the new material.

G. Recycling Unit: The machine shall consist of a system that mixes and redistributes and levels the scarified material over the width being processed to produce a uniform cross-section of recycled material. The recycling screed shall be heated and have crown control, and be capable of redistributing the recycled material to the desired longitudinal grade and transverse cross section.

H. Finishing unit: The machine shall have an automatic controlled screed to produce a surface conforming to the surface thickness as required by the County. The thickness of the surface course lift shall not exceed 2 inches. This unit shall be capable of a plying the new HMAC to a uniform longitudinal profile and cross slope of 1/4 inch per foot. The finishing screed must be heated and capable of electronically controlling the cross slope, and applying he n ew HMAC to produce a uniform surface and texture.

I. Rollers: Rolling equipment shall be of sufficient type and weight to compact the new HMAC and the recycled material to the required density as specified in Section 2500. Sufficient numbers of rollers (2 minimum) shall be furnished to keep up with the operation. All rolling should be completed before the temperature of the new HMAC drops below 190 F.

PART 5 - TRAFFIC CONTROL

A. Pavement markings shall conform to the requirements of *Section 04040*.

B. Maintenance of Traffic: Suitable methods shall be used by the contractor to protect the new asphalt surface from all types of vehicular traffic without damage. Opening to traffic does not constitute acceptance of work. Conform to requirements of *Section 04060*.

C. The Contractor will maintain at least one-way traffic and shall provide effective Traffic Control at all times. Two-Lane traffic shall be maintained wherever possible.

D. No interruption of access to property shall be made unless prior arrangements acceptable to the occupant or owner of the affected property have been made and approved by the County.

E. Submit a Traffic Control Plan forapproval in accordance with *Section 04060.*

PART 6 - EXECUTION

A. Notify the County at least 48 hours prior to commencement of any paving operation.

B. The heating unit shall produce sufficient heat to soften the pavement uniformly without burning or charring the existing asphalt pavement.

C. The process shall produce a welded, longitudinal joint, the standing edge of the ajoining asphalt pavement shall be fully heated to a width of t least 2 inches beyond the width to be scarified and recycled.

D. Immediately following heating of the pavement, the existing surface shall be scarified (milled) to the specified depth. The machine shall have the capability of maintaining a recycled mat with a minimum temperature of 190°F and a maximum temperature of 2 25°F throughout the repaving operation.

E. Due to the varying locations and properties of the existing asphalt pavement, the following adjustments may be made, if directed by the County.

1. Depth of scarification may be varied to correct existing cross slopes and grades.

2. Application rate for the recycling agent may be adjusted as necessary to maintain a uniform mixture.

3. Spot leveling may be necessary.

4. Variable Message Boards may be required. No additional compensation will be made for these traffic control devices after contract is awarded.

F. CLEANUP

The Contractor will keep the work site free from accumulations of waste material, rubbish and debris from the Contractor's performance of the scope of work resulting from the use of all tools, construction equipment, and machinery, and surplus materials, and will leave the site clean and ready for use. The Contractor will restore to their original condition those portions of the work site, such as staging and stockpile areas, not designed for alteration as contained in the Contract Documents. This will include returning the area to the proper grade and slope, as well as replacing sod, if so required by the County.

PART 7 - QUALITY CONTROL

The County has the option of testing to ensure the surface is in compliance with thickness, smoothness, etc. and meets requirements of the specifications as directed by the County and as outlined in *Section 2500*.

Contractor will assign a Quality Control (QC) Supervisor to the project. The QC Supervisor will work in conjunction with the County.

PART 8 - MEASUREMENT/PAYMENT

8.1 METHOD OF MEASUREMENT

A. The accepted quantities of asphalt pavement surface recycled will be measured and paid by the square yard. Pay item, Hot In-Place Recycling, Square Yard.

B. Asphalt recycling agent will be measured by the gallon, used in place, as determined by the County and the Contractor Supervisor. Pay item, Emulsifier, Gallon.

C. New HMAC will be measured by the tons used in place. Pay item, HMAC, Tons.

8.2 BASIS OF PAYMENT

A. Price and payment will be full compensation for all work specified in this Section.

B. No separate payment for traffic control will be made.

C. Spot leveling will be paid for by the measured square yards under the unit price for Hot-In-Place Recycling.

END OF SECTION 02580

SECTION 02600 - STORMWATER SYSTEM

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specification Sections, specifically 2300, 3300, and Florida Department of Transportation *Design Standards*, apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction, Sections 425, 430 and 530*, *Latest Edition*.

1.2 SUMMARY

This Section includes stormwater system piping and appurtenances. All labor, material, equipment, appurtenances, services, and other work or costs necessary to construct the facilities and place them into operation shall be furnished by the Contractor.

1.3 SUBMITTALS

A. General: Submit the following in accordance with Conditions of Contract.

B. Shop drawings for drainage pipe, pre-cast concrete storm drainage manholes and catch basins, including frames, covers, and grates.

C. Shop drawings for cast-in-place concrete or field-erected masonry storm drainage manholes and catch basins, including frames and covers.

1.4 QUALITY ASSURANCE

A. Environmental Compliance: Comply with applicable portions of local, state, and federal environmental agency regulations pertaining to stormwater systems impacts.

B. Utility Compliance: Comply with local utility regulations and standards pertaining to relocation, clearances, etc. related to installation of stormwater systems.

C. Quality control to adhere to QA/QL Plan.

1.5 PROJECT CONDITIONS

Site Information: Perform site inspection, research public utility records, and verify existing utility locations. Verify that stormwater system piping may be installed in compliance with design plans and referenced standards. Locate existing stormwater system piping and structures that are out of service and

closed as per 3.8 this section.

1.6 SEQUENCING AND SCHEDULING

A. Notify the County Inspector assigned to the subdivision or Project Coordinator assigned to project prior to pouring backfilling or form work.

B. Coordinate connection to existing private and public drainage system with Owner and/or County.

C. Coordinate with adjacent utilities work.

PART 2 - PRODUCTS

2.1 MATERIALS

2.1.1 PIPE

Meet the following requirements of *FDOT Specifications*, *Latest Edition*:

Reinforced Concrete Pipe	Section 449
Round Rubber Gaskets	Section 942
Corrugated Steel Pipe & Pipe Arch	Section 943
Corrugated Aluminum Pipe & Pipe Arch	Section 945
Corrugated Polyethylene Pipe	Section 948
Polyvinyl Chloride (PVC)	Section 948

2.1.2 MANHOLES

A. Precast Concrete Manholes: Per FDOT Standard Specification 425-5 and ASTM C 478, precast reinforced concrete, of depth indicated with provision for rubber gasket joints.

B. Cast-in-Place Manholes: Per FDOT Standard Specification 425 Cast reinforced concrete of dimensions and with appurtenances indicated.

C. Manhole Frames and Covers: Construct Per FDOT Standard Specification 42 5-3.2 and FDOT Design Standards. All units shall bear the lettering "STORM SEWER" cast into cover. All proposed substitutes must have equal or greater opening sizes and weights.

2.1.3 INLETS

A. Precast Concrete Catch Basins Inlets: Construct per FDOT Standard Specification 425-5.

B. Cast-in-Place Inlets: Construct per FDOT Standard Specification 425 to dimensions and with appurtenances indicated.

1. Bottom, Walls, and Top: Reinforced concrete.
2. Channel and Bench: Concrete.

C. Inlet Frames and Grates: Per FDOT Standard Specification 425-3.2 & FDOT Design Standards. All units shall bear the lettering "STORM SEWER" cast into cover.

2.1.4 END TREATMENT

General: Head wall, apron, and mitered ends, per FDOT Standard Specification 430-4.6.

2.2 CONCRETE AND REINFORCEMENT

A. Concrete: Portland cement mix, 3,000 psi; shall be in accordance with Section 03300.

1. Cement: ASTM C 150, Type II.
2. Fine Aggregate: ASTM C 33, sand.
3. Coarse Aggregate: ASTM C 33, crushed gravel.
4. Water: Potable.

B. Reinforcement: Steel conforming to the following:

1. Fabric: ASTM A 185, welded wire fabric, plain.
2. Reinforcement Bars: ASTM A 615, Grade 60, deformed.

C. Forms:

1. Form Materials: Plywood, metal, metal-framed plywood, or other acceptable panel-type materials to provide full-depth, continuous, straight, smooth exposed surfaces without distortion or defects. Material shall be of size and strength to resist movement during concrete placement and to retain horizontal and vertical alignment until removal.

2. Form Release Agent: Provide commercial formulation form-release agent with a maximum of 350 mg/l volatile organic compounds (VOCs) that will not bond with, stain, or adversely affect concrete surfaces and will not impair subsequent treatments of concrete surfaces. Release agent to be within allowable volatile limits according to applicable local, state and federal codes.

2.3 MASONRY

Materials for accessories shall be per FDOT Standard Specification 949. Mortar shall be one part Portland cement and three parts masonry sand to which shall

be added lime putty in the amount of 50% of the volume of cement. Special commercial mortar mixes may be used if approved by the Engineer. All masonry materials shall conform to the latest applicable ASTM specifications. Set all masonry units in full beds of mortar, with full joints and strike all joints flush. Masonry reinforcements shall be galvanized Dur-O-Wal, or approved equal, and shall be installed at every other bed joint. Hollow block shall be poured solid with re-bar as designed.

2.4 CURING MATERIALS

Conform to FDOT Standard Specification 520-8.

2.5 BEDDING STONE

Subbase or base materials shall meet requirements of FDOT Standard Specification 530-2.3.

PART 3 - EXECUTION

3.1 EXCAVATIONS FOR MANHOLES, INLETS, AND PIPE

Excavation shall be sufficient enough to leave at least 12 inches in the clear between their outer surfaces and the embankment. Excavation for all structures shall be made to the dimensions and elevations indicated on the drawings. Where the excavation is made below the indicated elevations, the excavation shall be restored to the proper elevation with compacted suitable material without extra compensation.

3.2 PREPARATION OF FOUNDATION FOR BURIED STORMWATER SYSTEMS

A. Grade trench bottom to provide a smooth, firm, stable, and rock-free foundation, throughout the length of the pipe.

B. Remove unstable, soft, and unsuitable materials at the surface upon which pipes are to be laid, and backfill with bedding stone per FDOT Standard Specification 530-2.3 to indicated level.

C. Shape bottom of trench to fit bottom of pipe. Fill unevenness with tamped sand backfill. Dig bell holes at each pipe joint to relieve the bells of all loads and to ensure continuous bearing of the pipe barrel on the foundation.

3.3 PIPE INSTALLATION

A. Drawings (plans and details) indicate the general location and arrangement of the underground stormwater system piping. Location and arrangement of piping layout takes into account many design considerations. Install the piping as indicated, to the extent practical.

Deviations shall be approved by the County.

B. Install piping beginning at low point of systems, true to grades and alignment indicated with unbroken continuity of invert. Place bell ends of piping facing upstream. When installing gaskets, seals, sleeves, and couplings, follow manufacturer's recommendations for use of lubricants, cements, and other installation requirements. Maintain swab or drag in line and pull past each joint as it is completed.

The pipe shall be carefully examined for defects and the inside cleaned. After placing pipe in the ditch, the ends shall be wiped free from all dirt, sand and foreign material. All pipe and joints shall be made, handled, and installed in strict accordance with the manufacturer's recommendations and instructions. Install pipe in accordance with FDOT Standard Specification 430.

C. Install piping pitched down in direction of flow, at minimum slope per plans and in accordance with manufacturer's recommendations, specifications, and design plans.

D. Boring: Install pipe under streets or other obstructions that cannot be disturbed, by boring, jacking, or a combination of both. These methods of installation are not allowed for newly paved roadways. Utility conduit should be installed prior to paving.

E. All RCP joints shall be sock/filter wrapped prior to backfilling unless a manufacturer recommended coupling is used.

F. Field repairs of pipeline shall be in strict accordance with manufacturer's recommendations and specifications.

G. Only conventional concrete pipe shall be allowed under dedicated County roads.

H. Pipe Cover: Cover shall be a minimum of 12", unless approved by the County.

I. Pipe Size: Minimum Pipe size shall be 18" diameter or equivalent, unless approved by the County.

3.4 MANHOLES

A. General: Install manholes complete with accessories as indicated. Form continuous concrete or split pipe section channel and benches between inlets and outlet. Set tops of frames and covers flush with finish surface where manholes occur in pavements. Elsewhere, set tops 3 inches above finished grade, unless otherwise indicated.

B. Place precast concrete manhole sections as indicated, and install in accordance with ASTM C 891.

C. Construct cast-in-place manholes as indicated.

D. Provide rubber joint gasket complying with ASTM C443 at joints of sections; or apply bituminous mastic coating at joints of sections.

3.5 INLETS

A. Construct inlets to sizes and shapes indicated per FDOT Standard Specification 425-6, or as modified in the plans.

B. Set frames and grates to elevations indicated.

C. Inlet throat openings larger than 7" in height must be equipped with horizontal trash bar(s). Trash bar(s) shall be 1” diameter galvanized rod installed in the center of the opening, or evenly spaced if more than one is used.

3.6 OUTFALL STRUCTURES

A. Pipe systems shall be utilized for primary out fall of retention/detention areas.

B. Weirs and flumes will not be acceptable for use as primary pond outfall structures or to primarily route stormwater to retention/detention areas at the end of down-gradient roadways.

3.7 END TREATMENT

Construct End Treatment per FDOT Standard Specification 430-4.6.

3.8 STORMWATER SYSTEM BACKFILL

Place and compact backfill material in accordance with Section 02300 and FDOT Specification 125-8.

3.9 CLOSING OUT-OF-SERVICE STORMWATER SYSTEMS

A. Out-of-Service Piping: Close open ends of out of service underground piping that is indicated to remain in place. Provide sufficiently strong closures to withstand hydrostatic or earth pressure that may result after pipe ends have been closed and grout filled with non-shrink grout.

1. Close open ends of concrete pipe or structures with not less than 8-inch-thick brick masonry bulkheads and grout fill.

2. Close open ends of other piping with plastic plugs, or other acceptable methods suitable for size and type of material being closed. Wood plugs are not acceptable.

B. Out-of-Service Structures: Remove structure and close open ends of the remaining piping or remove top of structure down to not less than 3 feet below final grade; fill structure with stone, rubble, gravel, compacted dirt, or flowable fill to within 1 foot of top of structure remaining, and fill with concrete.

3.10 FIELD QUALITY CONTROL

A. Refer to Section 03300 for Concrete Testing and 02300 for Earthwork Testing.

B. Cleaning: Interior of piping and structures shall be cleared of dirt and other superfluous material as work progresses. Maintain swab or drag in piping and pull past each joint as it is completed.

1. In large, accessible piping, brushes and brooms may be used for cleaning.

2. Place plugs in ends of uncompleted pipe at end of day or whenever work stops.

3. Flush piping between manholes, to remove collected debris.

C. Interior Inspection: Inspect piping to determine whether line displacement or other damage has occurred.

1. Make inspections after pipe between manholes has been installed, cleaned and approximately 2 feet of backfill is in place, and again at completion of project. Each section of pipe between structures is to show from either end on examination, a full circle of light. Each appurtenance to the system shall be of the specified size and form, to be neatly and substantially constructed, with the top set permanently to exact position and grade.

2. If inspection indicates poor alignment, debris, displaced pipe, infiltration, or other defects, correct such defects and re-inspect. All repairs shown necessary by the inspections are to be made, broken, cracked, or punctured pipe replaced, all deposits removed and the pipe left true to line and grade as herein specified, or shown on the plans, entirely clean and free from abnormalities and ready for use at no additional expense to the County.

3. All stormwater pipes will be subject to video camera inspection by County staff.

D. Trench Backfill Around and Above Pipe:

1. In each compacted backfill layer, perform density test as specified in Section 02300.

2. Other tests may be required at County's discretion.

E. Clean Up: Before final inspection and acceptance, the Contractor shall clean ditches, shape shoulders and restore all disturbed areas, including street crossings, grass plots, to as good as condition as existed before work started. All trenches shall be leveled and loose material removed from pavement gutters, sidewalks, pipelines, and inlet sediment traps, employing hand labor, if necessary.

F. Pipe Inspection: The County may elect for the contractor to perform pipe inspection according to the following.

For pipes installed under the roadway, inspection is to be conducted when backfill reaches 3 feet above the pipe crown or upon completion of placement of the stabilized subgrade. For pipe installed within fills, including embankments confined by walls, inspection is to be conducted when compacted embankment reaches 3 feet above the pipe crown or the finished earthwork grade as specified in the Plans. Prior to conducting the inspection, submit to the Engineer a video recording schedule for videoing, dewater installed pipe, and remove all silt, debris and obstructions. Submit pipe videoing and reports to the County for review prior to the continuation of paving.

For pipe 48 inches or less in diameter, submit to the Engineer a video DVD. For all pipe types, provide a Pipe Observation Summary Report for each pipe run that includes:

1. Actual recorded length and width measurements of all cracks within the pipe.
2. Actual recorded separation measurement of all rigid pipe joints.
3. Detailed written observations of leaks, debris, or other damage or defects.

For flexible pipe types, submit a Pipe Quality Report for each pipe run that includes:

1. Representative diameter of the pipe.
2. Pipe deformation/deflections measurements with the 5% deflection limit clearly delineated.

Reports submitted in electronic media are preferred. The Engineer may waive this requirement for side drains and cross drains which are short enough to inspect from each end of the pipe.

G. Video Report: Provide a high-quality DVD in a MPEG2 format video with a standard resolution of 720 x 480. Use a camera with lighting suitable to allow a clear picture of the entire periphery of the pipe. Center the camera in the pipe both vertically and horizontally and be able to pan and tilt to a 90 degree angle with the axis of the pipe and rotating 360 degrees. Use equipment to move the camera through the pipe that will not obstruct the camera's view or interfere with proper documentation of the pipe's condition.

The video image shall be clear, focused, and relatively free from roll, static, or other image distortion qualities that would prevent the reviewer from evaluating the condition of the pipe. The video will include identification before each section of pipe filmed. The identification will include the project number, the structure number corresponding to the structure number in the Plans for the project, size of pipe, the date and time, and indicate which pipe is being filmed if multiple pipes are connected to the structure. Notes should be taken during the video recording process. Submit these notes along with the video.

Move the camera through the pipe at a speed not greater than 30 feet per minute. Mark the video with the distance down the pipe. The distance shall have an accuracy of one foot per 100 feet. Film the entire circumference at each joint. Stop the camera and pan when necessary to document and measure defects. Position the camera head perpendicular to all defects requiring measurement by the video micrometer.

H. Reinspection: At any time after reviewing the submitted pipe inspection reports, the Engineer may direct additional inspections. If no defects are observed during the reinspection, the County will pay for the cost of the reinspections. If defects are observed, the reinspection and all work performed to correct the defects will be done at no cost to the County. Acceptance of all replacements or repairs will be based on video documentation of the completed work prior to Final Completion.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be (1) the number of inlets, manholes, end walls, mitered end sections, flared end sections, junction boxes, and yard drains, including fittings and appurtenances, completed and accepted; (2) length of pipe to the nearest foot of type specified; and (3) the number of structures of these types (including also valve boxes and monument boxes) satisfactorily adjusted.

4.2 BASIS OF PAYMENT

Price and payment will be full compensation for finishing all materials and completing all work described herein or shown in the plans, including all clearing and grubbing outside the limits of clearing and grubbing as shown in the plans, all excavation except the volume included in the measurement designated to be paid for under the items for the grading work on the project, all backfilling around the structures, the disposal of surplus material, and the furnishing and placing of all the gratings, frames, covers, and any other necessary fittings.

If the County elects for the contractor to perform pipe inspection, payment shall be made under a separate line item and be based upon linear foot of pipe videoing. No additional payment will be made for cleaning new stormwater pipe systems.

END OF SECTION 02600

SECTION 02800 - FENCING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions, apply to this Section.

B. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 550 and* Florida Department of Transportation *Design Standards Index 800, Latest Editions*

1.2 SUMMARY

A. This Section includes, but is not limited to, the following:

1. Chain link fence

2. Farm Fence

3. Wood privacy fence

B. Where existing fences are to be relocated, but existing materials are deteriorated or damaged, fencing shall be replaced in kind or as specified by the County.

1.3 PROJECT CONDITIONS

A. Traffic: Conduct fencing operations to ensure minimum interference with roads, streets, walks, and other adjacent occupied or used facilities and to minimize disturbance of the activities of adjacent property owners. Do not close or obstruct streets, walks, or other occupied or used facilities without prior approval.

B. Security: Do not leave any fence unfinished or incomplete which might allow the escape of livestock or household pets, access to a private/public pool or pond, etc without temporary measures in place during construction.

1.4 PRODUCT DELIVERY, STORAGE AND HANDLING

A. Deliver material in manufacturer's original packaging with all tags and labels intact and legible.

B. Handle and store material in such a manner as to avoid damage.

PART 2 - PRODUCTS

2.1 CHAIN LINK FENCING:

Chain link fence shall meet the requirements of FDOT *Design Standards Index 802*.

2.2 GATES

A. Swing Gates: Per FDOT Design Standards Index 802, as modified herein, construct of 1.625" o.d. steel pipe galvanized in accord with ASTM A-53 and weighing 2.27 pounds per lineal foot. Provide gates more than 8 feet wide with either intermediate members or diagonal truss rods. Provide gates less than 8 feet wide with truss rods or intermediate braces. Arrange latches for padlocking to provide accessibility from both sides of the gate. Where a double swing gate is called out, Construct Concrete Anchor rod Base 8” in diameter a nd 4” deep flush with top of ground. Opening in base for rod shall accommodate standard size in accordance with manufacturer and shall be PVC or galvanized steel pipe.

B. Slide Gates: shall be constructed per FDOT Design Standards Index 803.

2.3 ACCESSORIES

Post Tops: pressed steel, or malleable iron. Where top rail is used, provide post tops to permit passage of top rail.

2.4 FARM FENCING

Farm Fencing shall meet the requirements of FDOT Design Standards Index 801.

2.5 WOOD PRIVACY FENCE

A. Where existing fences are to be relocated, but existing materials are deteriorated or damaged, fencing shall be replaced in kind or as specified by the County.

B. Shall be constructed as per industry standard with proper clearance below fence so as not to impede stormwater flow.

PART 3 - EXECUTION

3.1 CHAIN LINK FENCING

Chain link fence shall meet the requirements of FDOT Design Standards Index 802.

A. Drill holes for post footings in firm, undisturbed or compacted soil.

B. Place concrete around posts in a continuous pour, tamp for

consolidation. Check each post for vertical and top alignment.

C. Set Keepers, stops, sleeves and other accessories into concrete as required.

D. Topping of the fence with barbed wire shall not be included unless specifically shown on the plans.

3.2 INSTALLATION

A. Brace Assemblies: install braces so posts are plumb when diagonal rod is under proper tension.

B. Tension Wire: install tension wires before stretching fabric and tie to each post with ties or clips.

C. Fabric: pull fabric taut 2 inches above grade level and tie to posts, rails, and tension wires. Attach fabric to terminal or gateposts by a stretcher bar and clip to other framework so that fabric remains in tension after pulling force is released.

D. Hinge gates to swing through 180 degrees from closed to open.

3.3 FARM FENCING

A. General installation shall be in accordance with FDOT Design Standards Index 801, as modified herein.

B. Fence shall be installed with wire side to the private property side.

C. Topping of the fence with barbed wire shall not be included unless existing farm fence includes barbed wire topping.

3.4 WOOD PRIVACY FENCING:

Shall be constructed as per industry standard with proper clearance below fence so as not to impede stormwater flow.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. GENERAL

The quantities to be paid for will be either the number of gates, the length of each type of fence, the number of corner post assemblies, constructed and accepted for the length of each type of fence with all other items necessary for construction as incidental. In addition, extra payment will be

made, for additional lengths of post approved by the County.

B. MEASUREMENT OF FENCE LENGTH

The length of fence to be paid for will be measured along the bottom of the fabric, out-to-out of end posts, in the completed and accepted fence. Measurement for Resetting Fence will be the actual length of existing fence reset, including gates when applicable.

C. CORNER POST ASSEMBLIES, PULL, AND END POST ASSEMBLIES

The number of corner post assemblies and of pull and end post assemblies to be paid for will be the number of such post as semblies constructed and accepted.

4.2 BASIS OF PAYMENT

A. BASIC ITEMS OF FENCING

The contract unit price will be full compensation for all work and materials necessary for the complete installation, including line posts, but not including the corner, end, and pull posts and the assemblies thereof.

B. ITEMS OF POST ASSEMBLIES

The Contract unit prices for the items of Corner Post Assemblies and Pull and End Post Assemblies will include the posts and the complete assemblies therewith for each such item. Approach posts and brace posts will be considered as part of the assembly of the corner, end, or pull post serves as a brace in more than one horizontal line.

C. PAYMENT RATES FOR EXTRA-LENGTH POSTS

For any length of posts in excess of the standard length for each particular type of post, approved by the Engineer as provided above, payment will be made for each foot in excess of the standard length at the percentage of the Contract unit price per foot for the item of Fencing, as shown in the following schedule:

Total Post Length	Steel and Aluminum Posts	Recycled Plastic & Timber Posts
Standard up to 14’	50%	60%
Between 14’ – 20’	60%	80%
Over 20’ *	*	*

*When the length of post exceeds 20 feet, the work of finishing and installing such posts and the costs incidental thereto will be paid for as unforeseeable through a change order.

The standard length of steel, recycled plastic and aluminum posts will be the required length as indicated in the plans for each type and case. The above provisions for extra length payment will apply to end, corner and pull posts.

The payment for additional length of post will include the cost of additional concrete to extend concrete bases, as applicable.

D. GATE PAYMENT

The quantities to be paid for will be full compensation for all labor, materials, posts and associated hardware for the complete installation of the type gate specified in the plans, and accepted by the County.

END OF SECTION 02800

SECTION 02900 - GRASSING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Specifications Sections apply to this Section.

B. Florida Department o f Transportation*, Standard Specifications for Road and Bridge Construction,* Section 570 and Section 981, *Latest Edition*

1.2 SUMMARY

Extent of grassing work is as specified or shown on the construction plans. Sodded areas disturbed during construction shall be re-sodded to match existing. Areas disturbed beyond specified construction area shall be sodded, at no additional expense, either to match existing or as per County direction.

1.3 SUBMITTALS

See par agraph 1. 9 A *Quality Control/Quality Assurance Submittals*, Section 1300.

1.4 DELIVERY AND STORAGE

A. General: Seed, fertilizer, sod and other grassing materials shall be stored under cover and protected from damaged which would make them unacceptable for use.

B. Seed: All seed shall be labeled in accordance with U.S. Department of Agriculture Rules and Regulations under the Federal Seed Act in effect on the date of invitation for bids. All seed shall be furnished in sealed standard containers, unless exception is granted in writing. Seed, which has become wet, moldy, or otherwise damaged in transit or in storage, shall not be used.

C. Fertilizer: Fertilizer shall be delivered to the site in the original, unopened containers, each b earing the manufacturer's guaranteed analysis. Any fertilizer, which becomes caked or otherwise damaged, making it unsuitable for use, shall not be used.

D. Sod: Do not use sod which has been cut (stripped) for more than 48 hours. Stack all sod that is not planted 24 hours after cutting and maintain proper moist condition.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Lime: Lime shall be ground limestone (Dolomite) containing not less than 85 percent of total carbonates, and shall be ground to such a fineness that 50-percent will pass a 100-mesh sieve and 90-percent will pass a 20-mesh sieve.

B. Fertilizer: Apply fertilizer at the following rates:
10-10-10 1000 lbs/acre=0.2 lbs/sq yd
13-13-13 770 lbs/acre=0.16 lbs/sq yd

C. Seed: Apply seed at the rate as specified:

GRASS SEEDING RATES (Lbs/Ac)

TYPE OF SEED	**ZONE I**				**ZONE II**			
	COASTAL*		**INLAND**		**COASTAL***		**INLAND**	
	Mar.-Nov.	Nov.-Mar.	Mar.-Nov.	Nov.-Mar.	Mar.-Nov.	Nov.-Mar	Mar.-Nov.	Nov.-Mar.
PERMANENT GRASSES								
Unhulled Bermuda**		90		20		90		20
Hulled Bermuda**	60		15		60		15	
Bahia (Argentine or Pensacola)			180	180			180	180
QUICK GROWING GRASS								
Annual Rye Grass		90		90		90		90
TOTAL POUNDS PER ACRE	60	180	195	290	60	180	195	290

* Locations where salt sensitive plants may be adversely affected by high concentrations of salt in soils, water, or air. This may include seaside locations, low-lying areas subjected to periodic saltwater inundation from storms or high tides, or where salt intrusion into groundwater supply has occurred.

** Bermuda shall not be used in areas adjacent to existing or proposed landscaping.

NOTE: All seeding shall be performed meeting the requirements of Section 570 of the Standard Specifications

Activities such as clearing, grading, and excavating that will disturb one or more acres of land require coverage under the Generic Permit for Stormwater Discharge from Large and Small Construction Activities from the Florida Department of Environmental Protection, and implementation

of appropriate pollution prevention measures to minimize erosion and sedimentation. Please refer to the National Pollutant Discharge Elimination System (NPDES) Permit.

E. Mulch: The mulch material shall be dry straw or hay, consisting of oat, rye, or wheat straw, or of pangola, peanut, coastal Bermuda or Bahia grass, hay or compost; and shall be free from noxious weeds and plants. Any plant officially listed, as being noxious or undesirable by any Federal Agency, any agency of the State of Florida or any local jurisdiction in which the project is being constructed shall not be used. Furnish to the engineer, prior to incorporation onto the project, a certification from the Florida Department of Agriculture and Consumer Services, Division of Plant Industry, stating that the Mulch materials are free of noxious weeds. Any such noxious plant or plant part found to be delivered shall be removed by the Contractor at his expense. Only undeteriorated mulch, which can readily be cut into the soil, shall be used. The “air-dry” weight (as defined by the Technical Association of the Pulp and Paper Industry, for wood cellulose) shall be marked on each package by the producer. Apply mulch at a rate of 2 ton/acre or 1 lb/sq yd.

E. Sod: All sod shall be healthy Centipede Sod unless otherwise required. Sod shall be strongly rooted, free of weeds and undesirable grasses and capable of providing vigorous growth and development when planted. Sod shall match existing species where restoration is required as a result of the Contractor's work.

PART 3 - EXECUTION

3.1 REQUIREMENTS

All areas disturbed by the Contractor's operations, shall be grassed, unless otherwise noted.

3.2 PLANTING SEED

A. Grading: Areas to be grassed shall be graded to remove depressions, undulations, and irregularities in the surface before grassing. Adhere to grades as shown on plans.

B. Tillage: The area to be grassed shall be thoroughly tilled to a depth of four inches using a plow and disc harrow or rotary tilling machinery until a suitable bed has been prepared and no clods or clumps remain larger than 1½ inches in diameter. Remove sticks, roots, and rubbish.

C. Applying Lime: The pH of the soil shall be determined. If the pH is below 5.0, sufficient lime shall be added to provide a pH between 5.5 and 6.5. The lime shall be thoroughly incorporated into the top three to four inches

of the soil. Lime and fertilizer may be applied in one operation.

D. Applying Fertilizer: Fertilizer shall be applied in accordance with the rates specified in Part 2, and shall be thoroughly incorporated into the top three to four inches of soil before sod is installed. FDOT Section 982.

E. Seed and Mulch: Apply in accordance with the rates specified in Part 2.

F. Maintenance: Maintenance shall begin immediately following the last operation of grassing and continue until final acceptance. Maintenance shall include watering, mowing, replanting, and all other work necessary to produce a uniform stand of grass, all at the contractor's expense.

3.3 PLACING SOD

A. Use Centipede sod (Eremochloa ophiuroides) unless otherwise required. The sod shall have a thick mat of roots (minimum 2") with enough adhering soil to assure growth. Apply sod within 48 hours of stripping. Protect sod against drying and breaking of rolled strips.

B. Placement: Prepare the g ound by loosening the soil. Place sod perpendicular to the slope. Place sod on the prepared soil to form a solid mass with tightly fitted joints. Ensure the butt ends and sides of sod strips do not overlap. The seam should have a flush tight transition from new to existing sod with no overlap. Stagger strips to avoid a continuous downhill seam. Tamp or roll lightly to ensure contact with subgrade. Tamp the outer edges of the sodded area to produce a s mooth contour. Work sifted soil into minor cracks between pieces of sod; remove excess to avoid smothering o f adjacent g rass. Water sod thoroughly with a fine spray immediately after planting.

C. Pinning: All sod placed on a slope steeper than 3:1 shall be pinned, at the top of the sod, at a rate listed in the table below:

Sod Size	Pins Required
Square Sod	2 pins per sod square
Mini Roll	3 pins per roll
Standard Rolls	1 pin per linear foot

C. Watering: Keep sod continuously moist to a depth below the root zone for three weeks after placement. If there is no water available to the site, the Contractor shall provide the water. Do not water in excess of 1" (one inch) per square yard per week for establishment.

D. Clean-Up: All excess soil, excess grass materials, stones, pallets and other waste shall be removed from the site daily and not allowed to accumulate. All paved areas shall be kept clean at all times.

E. Maintenance: Maintain sod by watering, fertilizing, weeding, mowing, trimming and other operations such as rolling, re-grading, and re-planting as required to establish a lawn free of eroded or bare areas and acceptable to the County. Where inspected work and materials do not comply with requirements, replace rejected work and continue maintenance until re-inspected by County and found to be acceptable. Remove rejected materials promptly from the project site. FDOT Section 570-4.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be for the following items, completed and accepted: square yards of seeding, square yards of seeding and mulching, and square yards of sodding.

4.2 BASIS OF PAYMENT

Prices and payments will be full compensation for all work and materials specified in this Section.

END OF SECTION 02900

SECTION 03300 – PORTLAND CEMENT CONCRETE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specification Sections, apply to this Section.

B. Florida Department of Transportation (FDOT), *FDOT Material's Manual, Chapter 9.2, Volume II, FDOT Standard Specifications for Road and Bridge Construction, Section 346, 347, 350, 400, 522, & 925, Latest Edition.*

1.2 SUMMARY

This Section includes concrete work for the following:

1. Roadways
2. Parking lots
3. Curbs and gutters
4. Walkways
5. Pads
6. Flumes
7. Curb Ramps
8. Cast in Place Structures

1.3 SUBMITTALS

A. Product data for proprietary materials and items, including reinforcement and forming accessories, admixtures, joint systems, curing compounds, dry-shake finish materials, and others if requested by the County.

B. Design mixes for each class of concrete. Include revised mix proportions when characteristics of materials, project conditions, weather, test results, or other circumstances warrant adjustments.

C. Material certificates in lieu of material laboratory test reports when permitted by the County. Material certificates shall be signed by manufacturer and Contractor certifying that each material item complies with or exceeds requirements. Provide certification from admixture manufacturers that chloride content complies with requirements.

1.4 PROJECT CONDITIONS

A. Traffic Control: Comply with requirements of Escambia County Specification, Section 04060, "Maintenance of Traffic."

B. Utilize flagmen, barricades, warning signs and warning lights as required, as shown on plans, or as directed by the County.

PART 2 - PRODUCTS

2.1 GENERAL REQUIREMENTS

A. Concrete shall conform to requirements of FDOT Standard Specification, Sections 346, 347, & 522 for curbs, gutters, sidewalks, structures and miscellaneous concrete.

B. Concrete for pavement shall conform to requirements of FDOT Standard Specification, Section 350.

C. Curb Ramps shall conform to FDOT Design Standards Index 304.

2.2 REINFORCING MATERIALS

A. Reinforcing Bars and Tie Bars: ASTM A 615, Grade 60, deformed.

B. Welded Steel Wire Fabric: ASTM A 185.

1. Furnish in flat sheets, not rolls.

C. Deformed-Steel Welded Wire Fabric: ASTM A 497.

D. Fabricated Bar Mats: Welded or clip-assembled steel bar mats, ASTM A184. Use ASTM A615, Grade 60 steel bars, unless otherwise indicated.

E. Joint Dowel Bars: Plain steel bars, ASTM A615, Grade 60. Cut bars true to length with ends square and free of burrs.

F. Hook Bolts: ASTM A307, Grade A bolts, internally and externally threaded. Design hook bolt joint assembly to hold coupling against pavement form and in position during concreting operations, and to permit removal without damage to concrete or hook bolt.

G. Supports for Reinforcement: Chairs, spacers, dowel bar supports and other devices for spacing, supporting, and fastening reinforcing bars, welded wire fabric, and dowels in place. Use wire bar-type supports complying with CRSI specifications. Use supports with sand plates or horizontal runners where base material will not support chair legs.

2.3 CONCRETE MATERIALS

A. Portland Cement: Type I, Type IP, Type IS, Type IP (MS), Type II, or Type III.

1. Use one brand of cement throughout Project.

2. All concrete shall develop a 28-day compressive strength of 3000 psi for non -structural (NS). If any concrete should fail to meet the strength requirement the structure shall be removed as necessary to remove the defective concrete and shall then be rebuilt at the Contractor's expense.

B. Fly Ash: ASTM C618, Class C or Class F.

C. Normal-Weight Aggregates: ASTM C33, Class 4, and as follows. Provide aggregates from a single source.

1. Maximum Aggregate Size: 1-1/2 inches.

2. Do not use fine or coarse aggregates that contain substances that cause spalling.

3. Local aggregates not complying with ASTM C33 that have been shown to produce concrete of adequate strength and durability by special tests or actual service may be used when acceptable to Engineer.

D. Water: Potable.

E. Fiber Reinforcement: Synthetic fibers engineered and designed for secondary reinforcement of concrete slabs, complying with ASTM C1116, Type III.

2.4 ADMIXTURES

A. Provide concrete admixtures that contain not more than 0. 01 percent chloride ions.

B. Air-Entraining Admixture: ASTM C260, certified by manufacturer to be compatible with other required admixtures.

C. Water-Reducing Admixture: ASTM C494, Type A.

D. High-Range Water-Reducing Admixture: ASTM C494, Type F or Type G.

E. Water-Reducing and Accelerating Admixture: ASTM C494, Type E.

F. Water-Reducing and Retarding Admixture: ASTM C494, Type D.

2.5 CONCRETE MIX

A. Prepare design mixes for each type and strength of normal-weight concrete

per FDOT Standard Specification, Section 346-6.2 and FDOT Material's Manual, Chapter 9. 2, Volume II. Use a qualified independent testing laboratory for preparing and reporting proposed mix designs. Do not use the Owner's field quality-control testing laboratory as the independent testing laboratory.

B. Fiber Reinforcement: Add to mix at rate of 1. 5 l b per cu. yd., unless manufacturer recommends otherwise.

C. Adjustment to Concrete Mixes: Mix design adjustments may be requested by Contractor when characteristics of materials, project conditions, weather, test results, or other circumstances warrant.

2.6 CONCRETE MIXING

Ready-Mixed Concrete: Comply with requirements of FDOT Standard Specification, Section 346-7 and FDOT Material's Manual, Chapter 9.2, Volume II.

PART 3 - EXECUTION

3.1 SURFACE PREPARATION FOR CONCRETE PAVEMENT

A. Proof-roll prepared base or subgrade surface to check for unstable areas and verify need for additional compaction. Do not begin concrete work until such conditions have been corrected and are ready to receive paving.

B. Remove loose material from compacted subbase surface immediately before placing concrete.

3.2 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides to required lines, grades, and elevations. Install sufficient forms to allow continuous progress of work and so that forms can remain in place at least 24 hours after concrete placement.

B. Check completed formwork and screeds for grade and alignment to following tolerances:

1. Top of Forms: Not more than 1/8 inch in 10 feet.

2. Vertical Face on Longitudinal Axis: Not more than 1/4 inch in 10 feet.

C. Clean forms after each use and coat with form release agent as required ensuring separation from concrete without damage.

3.3 PLACING REINFORCEMENT

A. General: Comply with Concrete Reinforcing Steel Institute's recommended practice for " Placing Reinforcing Bars" for placing and supporting reinforcement. Comply with FDOT Standard Specification, Section 350-7.

B. Clean reinforcement of loose rust and mill scale, earth, ice, or other bond-reducing materials.

C. Arrange, space, and securely tie bars and bar supports to hold reinforcement in position during concrete placement. Secure reinforcemen einforcement against displacement by formwork, construction, or concrete placement operations. Locate and support reinforcing by metal chairs, runners, bolsters, spacers and hangers, as required. Set wire ties so ends are directed into concrete, not toward exposed concrete surfaces. Maintain minimum cover to reinforcement.

D. Install welded wire fabric in lengths as long as practicable. Lap adjoining pieces at least one full mesh and lace splices with wire. Offset laps of adjoining widths to prevent continuous laps in either direction. Use of chairs is required. Welded wire fabric shall not be “pulled” to center of slab.

E. Install fabricated bar mats in lengths as long as practicable. Handle units to keep them flat and free of distortions. Straighten bends, kinks, and other irregularities or replace units as required before placement. Set mats for a minimum 2-inch overlap to adjacent mats.

3.4 JOINTS

A. General: Construct control (contraction) joints, construction, and isolation joints true to line with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to the centerline, unless indicated otherwise. When joining existing paving, place transverse joints to align with previously placed joints, unless indicated otherwise.

B. Control (Contraction) Joints: Control joints are grooved, formed, or sawed into sidewalks, driveways and concrete pavements so that cracking will occur in these joints randomly. If not specified on drawings, intervals shall be not greater than 10 feet or less than 5 feet. Construct control joints for a depth equal to at least 1/4 of the concrete thickness, as follows:

1. Tooled Joints: Form contraction joints in fresh concrete by grooving and finishing each edge of joint with a radiused jointer tool.

2. Sawed Joints: Form contraction joints with power saws equipped with shatterproof abrasive or diamond-rimmed blades. Cut 1/8-inch-wide joints into hardened concrete when cutting action will not tear, abrade, spawl or ot herwise dam age s urface and before development of

random contraction cracks.

3. Inserts: Form contraction joints by inserting premolded plastic, hardboard, or fiberboard strips into fresh concrete until top surface of strip is flush with paving surface. Radius each joint edge with a jointer tool. Carefully remove strips or caps of two-piece assemblies after concrete has hardened. Clean groove of loose debris.

C. Construction Joints: Set construction joints at side and end terminations of paving and at locations where paving operations are stopped for more than ½ hour, unless paving terminates at isolation joints.

1. Provide preformed galvanized steel or plastic keyway-section forms or bulkhead forms with keys, unless indicated otherwise. Embed keys at least 1-1/2 inches into concrete.

2. Continue reinforcement across construction joints unless indicated otherwise.

D. Expansion Joints: Form expansion joints of preformed joint filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, walks, other fixed objects, and where indicated.

1. Locate expansion joints at intervals of 30 feet, unless indicated otherwise or directed by County.

2. Extend joint fillers full width and depth of joint, not less than ½ inch or more than 1 inch below finished surface where joint sealant is indicated. Place top of joint filler flush with finished concrete surface when no joint sealant is required.

3. Furnish joint fillers in one-piece lengths for full width being placed wherever possible. Where more than one length is required, lace or clip joint filler sections together.

4. Protect top edge of joint filler during concrete placement with a metal, plastic, or other temporary preformed cap. Remove protective cap after concrete has been placed on both sides of joint.

E. Filler and Sealants: Submit specifications to Engineer for approval.

F. Install dowel bars and support assemblies at joints where indicated. Lubricate or asphalt-coat one half of dowel length to prevent concrete bonding to one side of joint.

3.5 CONCRETE PLACEMENT

A. Comply with requirements of FDOT Standard Specification, Sections 350-8

and 400-7 for placing concrete.

B. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place. No concrete will be placed on concrete which has hardened sufficiently to cause the formation of seams or planes of weakness. Deposit concrete as nearly as practical to its final location to avoid segregation. When concrete placing is interrupted for more than ½ hour, place a construction joint.

C. Use a bonding agent at locations where fresh concrete is placed against hardened or partially hardened concrete surfaces.

D. Consolidate concrete by mechanical vibrating equipment supplemented by hand-spading, rodding, floating, or tamping. Use equipment and procedures to consolidate concrete complying with FDOT Standard Specification, Section 350-9.

E. Screed paved surfaces with a straightedge and strike off. Use bull floats or darbies to form a smooth surface plane before excess moisture or bleed water appears on the surface. Do not further disturb concrete surfaces prior to beginning finishing operations.

F. Place concrete in two operations; strike off initial pour for entire width of placement and to the required depth below finish surface. Lay welded wire fabric or fabricated bar mats immediately in final position. Place top layer of concrete, strike off, and screed. Remove and replace portions of bottom layer of concrete that have been placed more than 15 minutes without being covered by top layer or use bonding agent if acceptable to County.

G. Curbs and Gutters: Shall be constructed in accordance with FDOT Specs. When automatic machine placement is used for curb and gutter placement, submit revised mix design and laboratory test results that meet or exceed requirements. Produce curbs and gutters to required cross section, lines, grades, finish, and jointing as specified for formed concrete. If results are not acceptable, remove and replace with formed concrete.

H. Slip-Form Pavers: When automatic machine placement is used for paving, submit revised mix design and laboratory test results that meet or exceed requirements. Produce paving to required thickness, lines, grades, finish, and jointing as required for formed paving. Compact subgrade of sufficient width to prevent displacement of paver machine during operations.

I. When adjoining pavement lanes are placed in separate pours, do not operate equipment on concrete until pavement has attained 85 percent of its 28-day compressive strength, or sufficient strength to carry loads without damage or injury. Maturity Method Testing, as outlined in FDOT Standard Specification, Section 353-10.2, should be used to determine

concrete strength.

J. Cold-Weather Placement: Comply with provisions of FDOT Standard Specification, Sections 346-7.4 and 400-7.1.1. Protect concrete work from physical damage or reduced strength that could be caused by frost, freezing actions, or low temperatures.

K. Hot-Weather Placement: Place concrete complying with FDOT Standard Specification, Sections 346-7.5 and 400-7.1.2, and as specified when hot weather conditions exist.

3.6 CONCRETE FINISHING

A. Float Finish: Begin floating when bleed-water sheen has disappeared and the concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats or by hand -floating if area is small or inaccessible to power units. Finish surfaces to true planes within a tolerance of 1/8 inch in 10 feet as determined by a 10-foot-long straight-edge placed anywhere on the surface in any direction. Cut down high spots and fill low spots. Refloat surface immediately to a uniform granular texture.

1. Medium-to-Fine-Textured Broom Finish: Draw a soft bristle broom across concrete surface perpendicular to line of traffic to provide a uniform fine line texture finish.

2. Tine Finishes: Apply to curb cut ramps and other areas as noted on the drawings. Finish shall be applied by an approved hand method and shall consist of transverse grooves which are 0.03 to 0.12 inch in width and 0.10 to 0.15 inch in depth, spaced at approximately ½ inch center to center.

B. Final Tooling: Tool edges of paving, gutters, curbs, and joints formed in fresh concrete with a jointing tool to the following radius. Repeat tooling of edges and joints after applying surface finishes. Eliminate tool marks on concrete surfaces. Radius: ½ inch.

3.7 CONCRETE PROTECTION AND CURING

General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures. Comply with the recommendations of FDOT Standard Specification, Sections 350-11 and 925.

3.8 QUALITY CONTROL TESTING

A. A qualified, accredited testing and inspection laboratory, under the direction of a Professional Engineer, licensed in the State of Florida, shall sample materials, perform tests, and submit test reports during concrete placement as follows:

1. Sampling Fresh Concrete: ASTM C172, except modified for slump to comply with ASTM C94. All concrete should be sampled by ACI certified technicians.

    a. Slump: ASTM C143; one test at point of placement for each compressive-strength test but no less than one test for each day's pour of each type of concrete. Additional tests will be required when concrete consistency changes.

    b. Air Content: ASTM C231, pressure method; one test for each compressive-strength test but no less than one test for each day's pour of each type of air-entrained concrete.

    c. Concrete Temperature: ASTM C1064; one test hourly when air temperature is 40 deg F (4 deg C) and below and when 80 deg F (27 deg C) and above, and one test for each set of compressive-strength specimens.

    d. Compression Test Specimens: ASTM C31; one set of four standard cylinders for each compressive- strength test, unless directed otherwise. Mold and store cylinders for laboratory-cured test specimens except when field-cured test specimens are required.

    e. Compressive-Strength Tests: ASTM C39; one set for each day's pour of each concrete class, plus one set for each additional 50 cu. yd. Test one specimen at 7 days, two specimens at 28 days, and retain one specimen in reserve for earlier or later testing if required. Class I Concrete NS compression test specimens cylinders are not required, except as directed by County.

    f. Contractor shall repair the area to the satisfaction of the Engineer where material was removed for testing purposes. Should any work or materials fail to meet the requirements set forth in the plans and specifications, contractor shall pay for retesting of same.

2. Basis for acceptance of concrete will be per FDOT Standard Specification, Sections 346-8 through 346-11.

B. Test results will be reported in writing to the County, within 24 hours of testing. Reports of compressive strength tests shall contain the Project identification name and number, date and location of concrete placement, name of concrete testing laboratory, concrete type and class, design compressive strength at 28 days, concrete mix proportions and materials, compressive breaking strength, and type of break for both 7-day and 28-day tests.

C. Nondestructive Testing: Non-destructive test methods may be used with approval of the Engineer, but shall not be used as the sole basis for acceptance or rejection.

D. Additional Tests: The testing laboratory will make additional tests of the concrete when test results indicate slump, air entrainment, concrete strengths, or other requirements have not been met, as directed by Engineer. Testing laboratory may conduct tests to determine adequacy of concrete by cored cylinders complying with ASTM C 42, or by other methods as directed.

3.9 REPAIRS AND PROTECTION

A. Remove and replace concrete work that is broken, damaged, or defective, or does not meet the requirements of this Section.

B. Drill test cores where directed by the County when necessary to determine magnitude of cracks or defective areas. Fill drilled core holes in satisfactory concrete areas with Portland cement concrete bonded to paving with epoxy adhesive.

C. Protect concrete from damage. Exclude traffic from concrete pavement for at least 14 days after placement. When construction traffic is permitted, maintain concrete as clean as possible by removing surface stains and spillage of materials as they occur.

D. Maintain concrete work free of stains, discoloration, dirt, and other foreign material. Sweep concrete paving not more than 2 days prior to date scheduled for Substantial Completion inspections.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the plan quantity, in square yards, of Plain Cement Concrete Pavement, Reinforced Cement Concrete Pavement, square yards of sidewalk, and linear feet of curb and/or gutter.

4.2 JOINTS AND CRACKS

The Contractor shall include the cost for Cleaning and Sealing Joints in the cost of the newly constructed pavement for: (1) transverse and longitudinal joint construction for new pavement; and (2) abutting joints between existing pavement and new pavement.

For replacing joint seals and sealing random cracks in existing Portland cement concrete pavement, the quantity to be paid for will be as specified below:

A. The length of pavement joint that has been satisfactorily cleaned and sealed in existing Portland cement concrete pav ement, as determined by field measurement along the joints, will be paid for at the Contract unit price per foot for Cleaning and Resealing Joints.

B. The length of random cracks in existing Portland cement concrete pavement that have been satisfactorily cut, cleaned, and sealed, as determined by field measurement along the joints, will be paid for at the Contract unit price per foot for Cleaning and Sealing Random Cracks.

4.3 BASIS OF PAYMENT

Prices and payment will be full compensation for all work specified in this Section, including any preparation of the subgrade not included in the work to be paid for under another Contract item; all transverse and longitudinal joint construction, including tie-bars and dowel bars; the furnishing of test specimens; repair of core holes; and all incidentals necessary to complete the work.

END OF SECTION 03300

SECTION 03310 – TIED CONCRETE BLOCK

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specification Sections, apply to this Section.

1.2 SCOPE OF WORK

A. Scope of Work The Contractor shall furnish all labor, materials, equipment, and incidentals required and perform all operations in connection with the installation of tied concrete erosion control mats in accordance with the lines, grades, design and di mensions shown on the Contract Drawings and as specified herein.

1.3 SUBMITTALS

A. The Contractor shall submit to the Engineer all manufacturer's performance research results and calculations in support of the tied concrete block mat system. Calculations and shop drawings shall be provided by the manufacturer for the means and methods necessary to place the mats in accordance with PART 2.A and in accordance with the plans. The shop drawings shall indicate the size and location of mats and placement along with providing the details and how the mats are tied together and are to be moved.

B. The Contractor shall furnish to the Engineer all manufacturers' specifications, literature, shop drawings for the installation of the mats, and any recommendations, if applicable, that are specifically related to this project.

PART 2 – PRODUCTS

2.1 PROJECTS

A. General Tied concrete block mats shall be manufactured or field fabricated from individual concrete blocks tied together with a high strength geogrid.

Each block shall be tapered, beveled and interlocked. Each block shall incorporate interlocking surfaces or connections that prevent lateral displacement of the blocks within the mats when they are lifted for placement.

B. Tied Concrete Block Mat

1. Scope: This specification covers concrete blocks for erosion control

mats used for stabilizing channels.

2. Materials Cementitious Materials - Materials shall conform to the following applicable ASTM specifications:

   a. Portland Cements -Specification C 150, for Portland Cement.
   b. Blended Cements -Specification C 595, for Blended Hydraulic Cements.
   c. Hydrated Lime Types -Specification C 207, for Hydrated Lime Types.
   d. Pozzolans -Specification C 618, for Fly Ash and Raw or Calcined Natural Pozzolans for use in Portland Cement Concrete.

   Aggregates shall conform to the following ASTM specifications, except that grading requirements shall not necessarily apply: Normal Weight -Specification C 33, for Concrete Aggregates.

3. Physical Requirements Durability. The manufacturer shall satisfy the purchaser by proven field performance that the concrete units have adequate durability even if they are to be subjected to a freeze-thaw environment.

TABLE 1. PHYSICAL REQUIREMENTS			
Compressive Strength Net Area Min. psi (mPa)		Water Absorption Max., lb/ft3 (kg/m3)	
Avg. of 3 units	Individual Unit	Avg. of 3 units	Individual Unit
4,000 (27.6)	3,500 (24.)	10 (160)	12 (192)

4. Visual Inspection: All units shall be sound and free of defects that would interfere with the proper placing of the unit or impair the strength or permanence of the construction. Surface cracks incidental to the usual methods of manufacture, or surface chipping resulting from customary methods of handling in shipment and delivery, shall not be deemed grounds for rejection.

5. Sampling and Testing: The purchaser or his authorized representative shall inspect the units upon delivery. Units missing more than 4 blocks per 80 square feet section shall be deemed grounds for rejection.

6. The tied concrete block mats shall have one or more of the following nominal characteristics: Minimum open area of 10%

   The tied concrete block mat shall exhibit resistance to mild concentrations of acids, alkalis, and solvents.

   Polypropylene Geogrid Revetment mat shall be constructed of high tenacity, low elongating, and continuous filament polypropylene fibers.

Interlocking geogrid shall have the following physical characteristics:
Mass/Unit Area: ASTM D-5261 7.0 oz/yd2 240 g/m2
Aperture Size: Measured 1.6 x 1.6 inch 40 x 40 mm
Wide Width Tensile Strength:
Machine Direction (MD) ASTM D-6637 2,055 lb/ft 30 kN/m Cross
Machine Direction (CMD) ASTM D-6637 2,055 lb/ft 30 kN/m
Elongation at Break: ASTM D-6637 6% 6%
Tensile Strength @ 2% :
Machine Direction (MD) ASTM D-6637 822 lb/ft 12 kN/m
Cross Machine Direction (CMD) ASTM D-6637 822 lb/ft 12 kN/m
Tensile Strength @ 5% :
Machine Direction (MD) ASTM D-6637 1,640 lb/ft 24 kN/m Cross
Machine Direction (CMD) ASTM D-6637 1,640 lb/ft 24 kN/m
Tensile Modulus @ 2%:
Machine Direction (MD) ASTM D-6637 41,100 lb/ft 600 kN/m Cross
Machine Direction (CMD) ASTM D-6637 41,100 lb/ft 600 kN/m
Tensile Modulus @ 5%:
Machine Direction (MD) ASTM D-6637 32,900 lb/ft 480 kN/m Cross
Machine Direction (CMD) ASTM D-6637 32,900 lb/ft 480 kN/m

NOTE: Polypropylene geogrid shall be determined by the manufacturer.

Tied concrete block mats are packaged in rolls. These are packaged with high strength lifting straps for moving material into place with an excavator.

PART 3 – CONSTRUCTION

A. Prior to placing the tied concrete block mats, prepare the sub grade as detailed on the plans. All subgrade surfaces prepared for placement of mats shall be smooth and free of all rocks, stones, sticks, roots, other protrusions, or debris of any kind.

B. The prepared surface shall provide a firm unyielding foundation for the mats with no sharp or abrupt changes or breaks in the grade.

C. Apply seed directly to the prepared soil prior to installation of the Tied Concrete Block Mat. Use seed per project specifications.

D. Install mats to the line and grade shown on the plans and according to the manufacturer's installation guidelines.

E. The manufacturer will provide technical assistance during the slope preparation and installation of the tied concrete block mats as needed.

C. Clean forms after each use and coat with form release agent as required ensuring separation from concrete without damage.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The completed work as described shall be measured and paid for at the contract unit price per square yard.

4.2 BASIS OF PAYMENT

Prices and payment for Tied Concrete Block Material will be full compensation for all work (including but not limited to labor, equipment, and materials) specified in this Section, including any preparation of the Subgrade not included in the work to be paid for under another Contract item, and all incidentals necessary to complete the work.

END OF SECTION 03310

SECTION 03350 – PERVIOUS CONCRETE PAVING

PART 1 - GENERAL

1.1 SCOPE OF WORK

A. The work to be completed under this contract includes the furnishing of all labor, materials and equipment necessary for the construction of the dual-use system in accordance with the plans and these specifications.

1.2 REFERENCES

A. Environmental Protection Agency (EPA)
   1. Green Infrastructure - Statement of Intent

B. National Institute of Building Sciences (NIBS)

   4. ACI Field Technician Certification Program

D. American Society for Testing and Materials
   1. ASTM C33 "Specification for Concrete Aggregates"
   2. ASTM C94 "Specification for Ready-Mixed Concrete"
   3. ASTM C150 "Specification for Portland Cement"
   4. ASTM C494 "Specification for Chemical Admixtures for Concrete"
   5. ASTM C595 "Specification for Blended Hydraulic Cements"
   6. ASTM D3385 "Test Method for Infiltration Rate of Soils Using Double-Ring Infiltrometer"

E. National Ready Mixed Concrete Association (NRMCA)
   1. Pervious Concrete Contractor Certification Manual

1.3 QUALITY ASSURANCE

A. Prior to the award of contract, the proposed contractor must submit evidence of having the appropriate tools, and experience, to accomplish the work. Experience will be based on at least one person, in charge of the crew, being NRMCA Certified as a Pervious Concrete "Craftsman",

plus two crew members being Certified by the NRMCA as Pervious Concrete Technicians.

1.4 SPECIAL EQUIPMENT

A. Contractor must show evidence of having the specialized equipment required for the installation of Pervious Concrete Pavements. Pervious Concrete is finished and jointed using three classes of specialized rollers. These rollers consist of form-to-form, steel-pipe rollers which are 8-inches to 12-inches in diameter, and smaller cross-rollers, with tapered edges. A special flanged-roller is used to place control joints in the pervious concrete before the pavement is covered to moist-cure.

B. Project may require the use of vibratory screeds. These screeds must provide an adjustment for the frequency of vibration.

C. Project may require the use of a power-sprayer with a "fogging-nozzle" attachment.

1.5 SUBMITTALS

A. All submittals shall be approved prior to construction.

B. Plans shall be submitted to the County Engineer's Representative, by the Contractor indicating:

1. Proposed Start Date, sequence of construction, and time of completion, for the scope of work.

2. Proposed locations for all construction-joints, and control joints, in the pavement.

3. Sections and Details showing depths, and types of materials, for all locations in the scope of work.

C. A one-square-foot section of the proposed filter fabric shall be submitted to the County Engineer's Representative. Information regarding the properties of the material, manufacturer, suggested method of placement and guarantees shall also be submitted with the fabric.

D. A one-quarter-cubic-foot sample of the proposed washed, crushed-stone/gravel-fill for the infiltration basin (pavement base) shall be submitted to the County Engineer's Representative.

E. A Mix-Design, showing the weights of all materials, for the proposed pervious concrete pavement shall be submitted to the County Engineer's Representative. It shall be the Contractor's responsibility to become familiar with the properties, and workability, of the proposed mix-design.

F. Evidence of qualifications of the Contractor, as per the "Quality Assurance" section shall be submitted to the County Engineer's Representative.

1.6 TEST PANELS

A test panel shall be constructed by the Contractor, and approved by the County Engineer's Representative. The test panel shall become the "standard" by which the Contractor's work is judged for completion of work and payment schedules.

A. The test panel shall be constructed in accordance with the plans and specifications, and shall be a minimum of 225 square-feet. Construction of the test panel shall be accomplished by the same crew, equipment and materials as submitted for approval. The depth of all materials shall be the same as shown on the plans.

B. The cost of constructing, and removing (if necessary), the test panel shall be included in the contract bid.

PART 2 - MATERIALS

2.1 Filter Fabric: The filter fabric shall be a non-woven geotextile fabric suitable for the application, and installed as per the manufacturer's directions.

2.2 Infiltration Basin Gravel-Fill: The Infiltration Basin shall be filled with clean (washed) gravel or crushed stone. The stone material shall be a single-size, and have a diameter of from 3/4-inch to 2-inches, and shall comply with ASTM C33. The total depth of the gravel-fill shall be indicated on the plans.

2.3 Pervious Concrete: The permeable pavement section shall consist of portland-cement based pervious concrete. Pervious concrete has no ACI or ASTM Specifications. It is therefore recommended that the guidelines for Ready-Mixed Concrete, ASTM C94, be used as a general guideline for the manufacturing and delivery of the pervious concrete. It is the responsibility of the Contractor to work with the local Ready-Mix suppliers to finalize a mix-design that will be acceptable for this project. If the mix-design is new to the local supplier, then at least three trial-batches shall be made before the decision is made to use that particular mix design. Both the Contractor, and the Supplier, must agree on any particular mix design before it is submitted to the County Engineer's Representative.

PART 3 - EXECUTION

3.1 Subgrade: The subgrade is defined as the native soil, or finished grade, of any cut-and-fill operation that may be required to bring the soil elevation to proper grade. The top of subgrade is also the bottom of the clean-gravel. The final grade of the top of subgrade shall be <u>flat</u> (no slope), and at the proper elevation to allow for the thickness of the layer of gravel and the pervious concrete pavement. Final compaction of the subgrade shall take into effect the type of soil and permeability requirements, and requirements for pavement support. Compaction should be uniform, and not greater than 95%

3.2 Filter Fabric: The filter fabric shall be placed on top of the final grade by the Contractor following the Manufacturer's directions.

3.3 Infiltration Basin Gravel-Fill: The placement of the gravel should be done to

minimize destruction of the filter fabric, and over-compaction of the subgrade. Compaction of the gravel is unnecessary.

3.4 Pervious Concrete: The Pervious Concrete, including any formwork requirements, placement, jointing and curing, shall be done in accordance with the NRMCA "Pervious Concrete Contractor Certification" guidelines. It is the responsibility of the Contractor to become familiar with the NRMCA document to gain the knowledge required to properly place and finish pervious concrete pavements. The inclusion of the requirements, as set forth in the NRMCA document, becomes an integral part of these specifications.

3.5 Testing: The testing requirements for pervious concrete are generally for permeability and durability. Testing of the fresh pervious concrete is a visual test. The Contractor must have the basic knowledge of what constitutes a proper mix by a visual inspection when the material arrives on the jobsite. Traditional tests for fresh concrete, such as slump and air content, and making cylinders & beams for strength tests are not required for pervious concrete.

3.6 Maintenance: Maintenance of the paving during construction is the Contractor's responsibility. The pervious concrete pavement should be checked periodically for buildup of trash and debris. Trash and debris should be removed from the pavement by hard-vacuum systems as required. The pavement should be pressure-washed with the residue being removed by wet-vacuuming within seven (7) days of requesting final acceptance by the County Engineer.

END OF SECTION 03350

SECTION 04000 - TRAFFIC CONTROL SIGNS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the work orders, plan sheets, or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document:

1. USDOT, Federal Highway Administration, *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration, *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition.*

3. Florida Department of Transportation, *Design Standards for Design, Construction, Maintenance and Utility Operations on the State Highway System*, *Latest Edition*.

4. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, section 700, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication and installation of standard and special traffic control signs (warning, regulatory, and guide). The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the plans and in these specifications.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County for prior approval.

PART 3 - EXECUTION

3.1 UTILITY SPOTS

All street name signs shall be fabricated and installed in accordance with the plans and related documents. Contractor shall contact Sunshine State One Call of Florida (811 or 800-432-4770) at least 48 hours prior to digging or driving posts.

3.2 SIGN INSTALLATION

A. Signs shall be placed at the locations illustrated and/or specified in the plans or related documents. The soil around the post shall be solidly tamped so that the sign will stand vertically.

B. If a sign cannot be placed where indicated due to a conflict, the Contractor shall immediately notify the County for an alternate location.

C. The date when each sign is installed shall be marked in permanent ink on the rear side of each sign.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantity to be paid for will be plan quantity, unless otherwise provided.

4.2 BASIS OF PAYMENT

Price and payment will constitute full compensation for all work specified in this section. Payment for all items relating to traffic control signs will be included in the lump sum Maintenance of Traffic pay item.

END OF SECTION 04000

SECTION 04020 - POST MOUNTED STREET NAME SIGNS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document:

1. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition*.

3. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction, Section 700*, *Latest Edition*.

4. FDOT *Design Standards for design, Construction, Maintenance, and utility operations on the State Highway System*, *Latest Edition*.

5. Escambia County *Standard Details for Street Name Signs, Latest Edition.*

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication and installation of post mounted street name signs as shown or noted on plans. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the work order and in these specifications.

PART 2 - PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense, shall, if requested by the County, furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County Contract Administrator for prior approval.

Sign-blades reflective sheeting and posts shall conform to the details for street name signs.

PART 3 - EXECUTION

3.1 UTILITY SPOTS

All street name signs shall be fabricated and installed in accordance with the plans and related documents. Contractor shall contact Sunshine State One Call of Florida (811 or 800-432-4770) at least 48 hours prior to digging or driving posts.

3.2 SIGN LAYOUT AND LEGEND

Letter shape and width of stroke shall comply with FHWA & MUTCD standards. For street name signs, lettering, border and blade dimensions shall be consistent with the County's standard detail for street name signs.

3.3 SIGN INSTALLATION

A. Signs shall be placed at the typical locations shown in the plans. The soil around the post shall be solidly tamped so that the sign will stand vertically.

B. If a sign cannot be placed where indicated due to a conflict, the Contractor shall immediately notify the County for an alternate location.

C. The Contractor shall submit a *Fabricate, Install, and Removal Daily Report Sheet* (Exhibit D) of each sign installation placed for inspection by the County. Contractor shall repair or replace signs deemed unacceptable by the County, at no expense to the County.

3.4 REMOVAL OF SIGNS AND MARKERS

A. Existing metal street name signs and painted concrete street name markers specified for removal shall be removed from the site, delivered, and unloaded, as directed by the County.

B. Holes created by the removal of the signs and markers shall be filled with clean soil, which shall be firmly hand tamped to match the level of the surrounding ground.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be:

1. The num ber and type of street name sign assemblies plus the number and type of auxiliary signs of each designated class complete.

2. The number of existing metal street name signs and concrete markers removed, relocated, modified, and placed on specified supports, of each designated class of assembly complete.

3. The number of each existing sign panel removed, complete.

4.2 BASIS OF PAYMENT

Price and payment will be f ull compensation for furnishing and i nstallation of all materials necessary to complete the signs in accordance with the details shown in the plans; including sign panels complete with sheeting, painting, and message; sign posts and supports, footings, excavation, etc.; and all other work specified in this Section, including all incidentals necessary for the complete item.

END OF SECTION 04020

SECTION 04030 – SPAN MOUNTED STREET NAME SIGNS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following document.

1. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

2. USDOT, Federal Highway Administration *Standard Alphabets for Highway Signs and Pavement Markings*, *Latest Edition*.

3. Florida Department of Transportation, *Standard Specifications for Road and Bridge Construction*, *Section 700, Latest Edition*.

4. FDOT *Design Standards for Design, Construction, Maintenance, and Utility Operations on the State Highway System*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the fabrication of span mounted signs. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the work order and in these specifications.

PART 2 – PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County Contract, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements except as defined herein. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material, the County may remove and replace the same and deduct the cost of the work from the contract amount.

If the Contractor chooses to use material other than specified herein, a sample of the material with supporting manufacturer's literature and specifications must be submitted to the County for prior approval.

2.2 SIGN BLADES

1. 0.125 gauge, 5052-H38 domestic aluminum alloy, 18" in height by various lengths.

2. 0.50' radius rounded corners free of sharp edges.

3. Color and corrosion resistance per Alodine 1200 F treatment or approved equivalent.

2.3 SIGN FACING

The sign facing and legend may be fabricated by any of the following methods and materials:

A. Green retro-reflectivity ink silk-screened onto white Diamond grade material.

B. Green electronic cuttable prismatic sheeting film over white Diamond grade material.

PART 3 – EXECUTION

3.1 GENERAL

All street name signs shall be fabricated in accordance with the plans and related documents.

3.2 SIGN LAYOUT & LEGEND

Letter shape and width of stroke shall comply with FHWA & MUTCD standards except as modified below for street names:

A. SIGN LAYOUT

1. Left and right margins shall be at least 2 inches.

2. Border width shall be 1" with 2" radius at all corners.

3. Arrows shall be 4" in height and 8" in length and placed 2" above the lower border.

4. Prefixes and suffixes shall be placed 3" below the upper border.

5. Sign lengths shall be in 6” increments as determined by the legend. Minimum length shall be 48 inches.

B. LETTERS

1. Letters shall be FHWA Series “C”, upper and lower case. However, Clearview font should be available upon request.

2. Street Names: Initial letters shall be 12” upper case and subsequent letters shall be 9” lower case. Names shall be centered between the upper and lower borders.

3. Prefixes and suffixes: Initial letters shall be 4” upper case and subsequent letters shall be 3” lower case.

4. Suffixes “nd”,"rd”. “st”, and “th” associated with numbered street names shall be 4” in height and positioned in the upper portion of the primary street name field.

3.3 SIGN INSTALLATION

A. Signs shall be placed at the typical locations shown in the plans.

B. If a sign cannot be placed where indicated on the plans due to a conflict, the Contractor shall immediately notify the County for an alternate location.

3.4 REMOVAL OF SIGNS

Existing metal street name signs specified for removal shall be removed from the site, delivered, and unloaded, as directed by the Engineer.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The quantities to be paid for will be the number of square- feet of overhead signs span wire mounted, complete.

4.2 BASIS OF PAYMENT

Price and payment will be full compensation for furnishing and installation of all materials necessary to complete the signs in accordance with the details shown in the plans; including sign panels complete with sheeting, painting, and message; and all other work specified in this Section, including all incidentals necessary for the complete item.

END OF SECTION 04030

SECTION 04040 – PAVEMENT MARKINGS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of this contract, all materials and work shall conform to the applicable requirements in the following documents:

1. Florida Department of Transportation *Roadway and Traffic Design Standards*, Indices 17344 through 17359, *Latest Edition*.

2. Florida Department of Transportation *Standard Specifications for Road and Bridge Construction*, Sections 701, 705, 706, 710, 711, 970, 971, and 993, *Latest Edition*.

3. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*.

1.2 DESCRIPTION OF WORK

The work under this section includes the installation and removal of temporary and permanent pavement markings, textured pavement, reflective markers, galvanized posts, flex posts, delineators, wheel stops, and audible and vibratory pavement markings. The Contractor shall furnish all labor, materials, tools, supplies, equipment, and machinery necessary to fully complete the work shown in the plans and in these specifications. Pavement marking notes on plan sheets shall take precedence over and modify conflicting Technical Specifications.

PART 2 – PRODUCTS

2.1 MATERIALS

All materials shall be new and of good quality unless otherwise specified. The Contractor, at his own expense and if requested by the County, shall furnish samples of material and/or shall certify that the material meets all FDOT requirements. All material or work that has been rejected shall be remedied by the Contractor at his own expense and without delay. If the Contractor fails to promptly remove and/or dispose of rejected material and replace the same, the County may remove and replace the same and deduct the cost of the work from the contract amount.

2.2 TEMPORARY PAVEMENT MARKINGS

Materials for temporary pavement marking shall meet all requirements of FDOT Specs, Section 710, *Latest Edition.*

2.3 PERMANENT PAVEMENT MARKINGS

Materials for permanent pavement markings shall meet all requirements of FDOT Specs, Section 711, *Latest Edition*.

2.4 REFLECTIVE PAVEMENT MARKERS

Materials for reflective pavement markers shall meet all requirements of FDOT Specifications, Sections 706, *Latest Edition*.

2.5 OBJECT MARKERS AND DELINEATORS

Materials for object markers shall meet all requirements of FDOT Specifications, Sections 705, *Latest Edition*.

2.6 AUDIBLE AND VIBRATORY PAVEMENT MARKINGS

Materials for audible and vibratory pavement markings shall meet all requirements of FDOT Specifications, Sections 701, *Latest Edition*.

PART 3 – EXECUTION

3.1 GENERAL

All pavement markings shall be applied in accordance with FDOT requirements.

3.2 TEMPORARY PAVEMENT MARKINGS

Temporary pavement markings shall be installed at the end of each day on new pavement surfaces and shall be maintained until permanent markings are installed.

3.3 PERMANENT PAVEMENT MARKINGS

Permanent pavement markings, including painted stripes, thermoplastic stripes, and reflective pavement markers, shall be installed as shown in the plans. Materials and installation shall conform to applicable standards in the documents referenced in Section 1.1. Installation of permanent markings on all final asphaltic concrete surfaces shall not be accomplished prior to 14 calendar days, nor later than 30 calendar days, after placement of the final surfaces.

3.4 RETROREFLECTIVITY

The Contractor shall, within thirty days of completion, furnish retroreflectivity

readings certifying the materials meet all FDOT requirements as per Part I, 1.1.B.2, Sections 710 and 711.

PART 4 – MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

The engineer or project manager may specify a lump sum or measurement of quantities.

The quantities to be paid for under this Section will be the length in feet or gross mile of Skip Traffic Stripes, the length in feet or gross mile of Solid Traffic Stripes, the number of directional arrows and pavement messages, painted, the area in square feet or of Reflective Paint (Island Nose), and the area in square feet or the length in feet to Remove Existing Markings. Measurement will be taken as the distance from the beginning of the first painted stripe to the end of the last painted stripe with proper deductions made for unpainted intervals will not be included in pay quantity.

4.2 BASIS OF PAYMENT

Prices and payment will be full compensation for all work specified in this Section, including, all cleaning and preparing of surfaces, furnishing all materials, application, curing and protection of all items, protection of traffic, furnishing of all tools, machines and equipment, and all incidentals necessary to complete the work. Final payment will be withheld until all deficiencies are corrected.

END OF SECTION - 04040

SECTION 04060 - MAINTENANCE OF TRAFFIC

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Specifications Sections, apply to work of this section.

B. Unless otherwise specified on the plan sheets or in other sections of the specifications, all materials and work shall conform to the applicable requirements in the following documents:

1. *Florida Department of Transportation Design Standards*, *Latest Edition*.

2. *Florida Department of Transportation Standard Specifications for Road and Bridge Construction*, Section 102, *Latest Edition*.

3. USDOT, Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Latest Edition*, Part 6 Temporary Traffic Controls.

4. *FDOT Minimum Specifications for Traffic control and Devices*, *Latest Edition*.

1.2 SUMMARY OF WORK

The work under this section includes the maintenance of traffic within the limits of the project for the duration of construction.

PART 2 – PRODUCTS - Not Used.

PART 3 - EXECUTION

3.1 RESPONSIBILITIES OF CONTRACTOR

A. Control and maintain traffic and provide for the safety of the work area in accordance with Maintenance of Traffic (MOT) Plan included in the contract documents. Contractor shall comply with all aspects of said plan. Conduct operations in a manner that will not interrupt pedestrian and vehicle traffic except as approved by the County Engineer/Traffic Division. Confine the work area to the smallest area practical to allow the maximum use of the street and sidewalk and to reduce any hazard to vehicles and pedestrians to a minimum.

B. Maintain access to properties that adjoin the work. Contact property owners

and assure that access is coordinated prior to commencing work that may block access.

C. Furnish all labor, materials, tools, supplies, equipment, and machinery needed to fully comply with the specifications described on the plan sheets and in this Section. At all times, the Contractor shall use workers and traffic control devices necessary to comply with all applicable provisions contained in the reference documents listed in Section 1.1.

D. The Contractor shall notify the agencies and media listed below in writing, 48 hours in advance, of any work within the road right-of-way that may interfere with vehicle and/or pedestrian traffic.

1. WCOA Radio – Tel: 478-6011; Fax: 478-3971

2. Pensacola News Journal Tel: 435-8500; Fax: 435-8633; Email: news@pensacolanewsjournal.com

3. Escambia County Emergency Management Tel: 471-6315; Fax: 471-6322; Email: bob_boschen@co.escambia.fl.us

4. Escambia County Engineering Tel: 595-3440

5. Escambia County Sheriff Tel: 436-9630; Fax: 436-9128; Email: traffic@escambiaso.com

6. Florida Highway Patrol Tel: 484-5000; Fax: 393-3405; Email: stevepreston@flhsmv.gov

7. Escambia County School District Tel: 469-5591; Fax: 469-5661; Email: transportation@escambia.k12.fl.us and rdoss@escambia.k12.fl.us

8. Escambia County Administration Tel: 595-4900; Fax: 595-4908; Email: Cheryl_Lively@co.escambia.fl.us

9. Escambia County Area Transit Tel: 595-3228; Fax: 595-3222; Email: Ted_Woolcock@co.escambia.fl.us

3.2 PENALTIES AND SUSPENSION OF WORK

The County may verbally direct the Contractor to immediately suspend work if appearance of violation of safety regulations is found. In such an event, Contractor shall immediately stop work and secure any potential hazards from the public until the potential violation is confirmed and/or corrected to satisfaction of the County. Law enforcement officers may be called to assist the County in suspending work if the Contractor is not responsive. Suspension of work for violation of safety

or additional payment.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

A. Maintenance of Traffic: Where the plans require the use of trucks and truck mounted impact attenuators, these items will not be paid for separately but shall be included in the cost of Maintenance of Traffic. Only use those attenuators that have been tested by a facility approved by the Engineer and certified as meeting the requirements as specified in NCHRP 350 and that have been properly maintained.

B. Law Enforcement Services: The quantity to be paid for will be at the Contract unit price per hour for the actual number of officers on the project site. Payment will be made only for those off-duty law enforcement officers specified in the MOT and authorized by the County.

C. When the plans show more than one detour facility is included in the proposal, payment will be made under Maintenance of Traffic.

D. Materials for Driveway Maintenance: The quantity to be paid for will be, in square yards, of all materials authorized by the County, acceptably placed and maintained for driveway maintenance. The quantity will be determined by in place measurement.

4.2 BASIS OF PAYMENT

A. MAINTENANCE OF TRAFFIC (GENERAL WORK): Price and payment will be full compensation for all work and costs specified under this Section except as may be specifically covered for payment under other items.

B. LAW ENFORECEMENT: Prices and payment will be considered full compensation for the services of the off-duty law enforcement officer, including a marked law enforcement vehicle and all other direct and indirect costs.

C. SPECIAL DETOURS: Price and payment will be full compensation for providing all detour facilities shown on the plans and all costs incurred in carrying our all requirements of this Section for general maintenance of traffic within the limits of the detour, as shown on the plans.

END OF SECTION 04060

SECTION 04090 – CONSTRUCTION OF TRAFFIC SIGNALS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Unless otherwise specified by the County, or in other sections of this specification, all work shall conform with the applicable requirements in the following documents:

1. Florida Department of Transportation, *Design Standards for Design, Construction,* Maintenance and Utility Operations on the State Highway System, *Latest Edition*.

2. FDOT, *Standard Specifications for Road and Bridge Construction*, *Latest Edition*.

3. FDOT, *Minimum Specifications for Traffic Control Signals and Devices, Latest Edition.*

4. United States Department of Transportation (USDOT), Federal Highway Administration, *Manual on Uniform Traffic Control Devices for Streets and Highways*, *Millennium Edition*.

5. *National Electric Code*, including latest revisions.

1.2 DESCRIPTION OF WORK

The work under this section involves the installation and modification of traffic signal equipment. Work will be initiated through the issuance of Work Orders that will identify a specific scope and location.

PART 2 - PRODUCTS

2.1 CONTRACTOR-FURNISHED PARTS AND EQUIPMENT

A. The Contractor shall furnish all transportation, plant, labor, materials, safety signs, supplies, equipment, and other facilities and things necessary to fully complete the work described in this specification.

B. The requirements and procedure described in Sections 603-2, 603-3, 603-5, 603-6, 603-7, and 603-8 of the FDOT *Standard Specifications for Road and Bridge Construction, Latest Edition* shall apply.

2.2 COUNTY-FURNISHED EQUIPMENT INSTALLED BY CONTRACTOR

Where the plans include installation of County-furnished equipment, the County will turn over such equipment to the Contractor when the construction progress allows or as designated in the plans. The County will bear the costs of correcting any defects in the equipment found by the Contractor. The Contractor will maintain the equipment in proper operational condition after pick-up at no cost to the County until either final acceptance or the equipment is returned to the County.

2.3 REMOVED PARTS AND EQUIPMENT

A. Equipment that is removed and suitable for reuse shall be delivered to the County as indicated on the construction plans. Such equipment shall be tagged as to the location from which it was removed.

B. Parts and equipment that are removed and not suitable for reuse, but have salvage value, shall be delivered to the Road Department facility, 601 North Hwy 297A, Cantonment.

C. Parts and equipment that are removed, not suitable for reuse, and without salvage value, shall be properly disposed by the Contractor, at his expense.

PART 3 - EXECUTION

3.1 QUALIFICATIONS

A. The Contractor shall have a sufficient amount of prior satisfactory experience in the construction of all traffic signal components including closed-loop systems and video detection systems.

B. All persons operating and maintaining signal equipment shall be fully trained and qualified. The Contractor shall have all work performed under the direct, on-site, supervision of a person certified at the “Traffic Signal, Level II” level, or higher, by the International Municipal Signal Association (I.M.S.A.). The Contractor shall furnish a copy of the certificate issued by the I.M.S.A. for each technician to the Contract Manager before execution of the contract.

3.2 OPERATIONS

A. The Contractor shall replace entire sidewalk slabs and driveway slabs, at the Contractor’s expense, if they are damaged.

B. All public land corners and monuments encountered shall be protected by the Contractor. Corners and monuments which conflict with the work and in danger of disturbance shall be properly referenced by a Florida registered surveyor prior to beginning work at the site. The Contractor

shall assume all costs associated with restoration of corners and monuments.

C. The Contractor shall coordinate and perform service transfers and adjustments with Gulf Power Company.

D. The Contractor shall remove all surplus materials from the right-of-way within 24 hours.

3.3 REPORTS

A. The Contractor shall test each new ground rod and ground rod assembly in accordance with FDOT standards. Record test results and certify accuracy on a Traffic Signal Resistance Data Sheet (re: Appendix "A"). Furnish the original certified data sheet to the Contract Manager.

B. Contractor shall test each new loop assembly in accordance with FDOT standards. Record test results and certify accuracy on a Traffic Signal Resistance Data Sheet (re: Appendix "A"). Furnish the original certified data sheet to the Contract Manager.

3.4 COMPLETION TIME

The Contractor shall complete work according to the schedule specified in the Work Order. Typically, completion time will be specified according to the representative schedule provided below.

A. Construct school zone flashing beacon assembly (pedestal-mount): complete within 60 days.

B. Construct new multi-phase traffic signal: Order equipment from vendors within 10 business days from date of Work Order. Complete installation within 30 days upon receipt of all equipment from vendors.

C. Install signal head and/or cable to create a left-turn phase: complete within 30 days.

D. Install new controller assembly: Order equipment from vendor within 5 business days from date of Work Order. Complete installation within 30 days upon receipt from vendor.

E. Install pedestrian detector station with or without signals: complete within 30 days.

F. Install new loop assembly: complete within 10 business days.

3.5 INSPECTION AND ACCEPTANCE OF WORK

Acceptance procedures described in Sections 611-2, 611-3, and 611-4 of the FDOT *Standard Specifications for Road and Bridge Construction, Latest Edition*, shall apply unless otherwise specified in the Work Order.

PART 4 - MEASUREMENT/PAYMENT

4.1 METHOD OF MEASUREMENT

Measurement and payment of all items will be made in accordance with the current Construction and Response Maintenance Contract on file with the Escambia County Office of Purchasing.

Pensacola, FL 32505

RE: Notice of Final Agency Action – Determination of Qualification
General Environmental Resource Permit
Project Number: GEN-033-284800-1
Permit Name: Motley Court Gulley Improvements

Dear D. Joy Jones:

The District has received your notice of intent to use a General Environmental Resource Permit. Based upon the submitted information, the proposed activity qualifies for a General Environmental Resource Permit pursuant to Chapter 62-330, Florida Administrative Code (F.A.C.). The proposed activity is subject to the general conditions in Rule 62-330.405, F.A.C. (see attached Exhibit A) and the specific conditions (see attached Exhibit B) if any. Deviations from these conditions may subject you to enforcement action and possible penalties. You are responsible for conducting construction in a manner that satisfies all criteria.

Please be advised that the District has not published a notice in the newspaper advising the public that this activity has qualified for the use of a General Environmental Resource Permit. Publication, using the District form, notifies the public of their right to challenge the issuance of this permit. If proper notice is given by publication, third parties have a 21-day time limit to file a petition opposing the issuance of the permit. If you do not publish, a party's right to challenge the issuance of the permit extends for an indefinite period of time. If you wish to have certainty that the period for filing such a challenge is closed, then you may publish, at your own expense, such a notice in a newspaper of general circulation. A copy of the form of the notice and a list of newspapers of general circulation is attached for your information. If you do publish a notice, please submit a copy of the published notice to the District for our records.

This verification of qualification to use a General Environmental Resource Permit does not eliminate the need for obtaining all necessary permits or approvals from other agencies.

GEORGE ROBERTS, Chair, Panama City
JERRY PATE, Vice Chair, Pensacola
JOHN W. ALTER, Secretary-Treasurer, Malone
GUS ANDREWS, DeFuniak Springs
JON COSTELLO, Tallahassee

NORTHWEST FLORIDA WATER MANAGEMENT DISTRICT
GENERAL ENVIRONMENTAL RESOURCE PERMIT

PERMIT NO: GEN-033-284800-1 **DATE ISSUED:** December 11, 2018
PROJECT NAME: Motley Court Gulley Improvements

A PERMIT AUTHORIZING:
The use of Section 62-330.451, F.A.C. – General Permit to Counties, Municipalities, and other Agencies to Conduct Stormwater Retrofit Activities. The retrofit improvements will serve an existing outfall that is experiencing severe erosion beginning at the north end of Motley Court extending north approximately 1,700 feet towards Clear Creek in Escambia County. The retrofit activities will include the construction, operation, and maintenance of three dry detention with filtration (bottom sand filters) ponds and associated conveyance pipes. The improvements appear to provide a net benefit to the overall project site by preserving the natural runoff patterns for the project area while providing a permanent erosion control solution for the receiving waters. The proposed project appears to meet the criteria for the requested General Permit. The proposed improvements are in accordance with the approved plans prepared by Escambia County Public Works.

Escambia County

ISSUED TO:
Escambia County
3363 W. Park Place
Pensacola, FL 32505

Permittee agrees to hold and save the Northwest Florida Water Management District and its successors harmless from any and all damages, claims, or liabilities which may arise from permit issuance. Said application, including all plans and specifications attached thereto, is by reference made a part hereof.

The use of a General Environmental Resource permit does not convey to permittee any property rights or any rights or privileges other than those specified herein, nor relieve the permittee from complying with any law, regulation or requirement affecting the rights of other bodies or agencies. All structures and works installed by permittee hereunder shall remain the property of the permittee.

This permit may be revoked, modified or transferred at any time pursuant to the appropriate provisions of Chapter 373, Florida Statutes:

Activities conducted under this permit are subject to the following conditions:

See conditions on attached “Exhibit A”, dated December 11, 2018

AUTHORIZED BY: Northwest Florida Water Management District
Division of Resource Regulation

By: _____
Andrew Joslyn
ERP Bureau Chief

"EXHIBIT A"
CONDITIONS FOR ISSUANCE OF PERMIT NUMBER GEN-033-284800-1
Motley Court Gulley Improvements
DATED December 11, 2018

1. The general permit is valid only for the specific activity indicated. Any deviation from the specified activity and the conditions for undertaking that activity shall constitute a violation of the permit and may subject the permittee to enforcement action and revocation of the permit under Chapter 373, F.S.

2. This general permit does not eliminate the necessity to obtain any required federal, state, local and special district authorizations prior to the start of any construction, alteration, operation, maintenance, removal or abandonment authorized by this permit.

3. This general permit does not convey to the permittee or create in the permittee any property right, or any interest in real property, nor does it authorize any entrance upon or activities on property which is not owned or controlled by the permittee, or convey any rights or privileges other than those specified in the general permit.

4. The general permit does not relieve the permittee from liability and penalties when the permitted activity causes harm or injury to: human health or welfare; animal, plant or aquatic life; or property. It does not allow the permittee to cause pollution that violates state water quality standards.

5. Section 253.77, F.S., provides that a person may not commence any excavation, construction, or other activity involving the use of state-owned or other lands of the state, the title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund without obtaining the required consent, lease, easement, or other form of authorization authorizing the proposed use. Therefore, the permittee is responsible for obtaining any necessary authorizations from the Board of Trustees prior to commencing activity on state-owned lands.

6. The authorization to conduct activities under a general permit may be modified, suspended or revoked in accordance with Chapter 120, F.S., and Section 373.429, F.S.

7. This permit shall not be transferred to a third party except pursuant to Rule 62-330.340, F.A.C. The permittee transferring the general permit shall remain liable for any corrective actions that may be required as a result of any permit violations prior to sale, conveyance, or other transfer of ownership or control of the permitted project, activity, or the real property at which the permitted project or activity is located.

8. Upon reasonable notice to the permittee, Agency staff with proper identification shall have permission to enter, inspect, sample and test the permitted system to ensure conformity with the plans and specifications approved by the permit.

9. The permittee shall maintain any permitted project or activity in accordance with the plans submitted to the Agency and authorized in this general permit.

10. A permitee's right to conduct a specific activity under this general permit is authorized for a duration of five years.

11. Activities shall be conducted in a manner that does not cause or contribute to violations of state water quality standards. Performance-based erosion and sediment control best management practices shall be implemented and maintained immediately prior to, during, and after construction as needed to stabilize all disturbed areas, including other measures

specified in the permit to prevent adverse impacts to the water resources and adjacent lands. Erosion and sediment control measures shall be installed and maintained in accordance with the *State of Florida Erosion and Sediment Control Designer and Reviewer Manual (Florida Department of Environmental Protection and Florida Department of Transportation June 2007)*, available at www.dep.state.fl.us/water/wetlands/docs/erp/FLErosionSedimentManual_6_07.pdf, and the *Florida Stormwater Erosion and Sedimentation Control Inspector's Manual (Florida Department of Environmental Protection, Nonpoint Source Management Section, Tallahassee, Florida, July 2008)*, available at www.dep.state.fl.us/water/nonpoint/docs/erosion/erosion-inspectors-manual.pdf.

12. Unless otherwise specified in the general permit, temporary vehicular access within wetlands during construction shall be performed using vehicles generating minimum ground pressure to minimize rutting and other environmental impacts. Within forested wetlands, the permittee shall choose alignments that minimize the destruction of mature wetland trees to the greatest extent practicable. When needed to prevent rutting or soil compaction, access vehicles shall be operated on wooden, composite, metal, or other non-earthen construction mats. In all cases, access in wetlands shall comply with the following:
    a. Access within forested wetlands shall not include the cutting or clearing of any native wetland tree having a diameter 4 inches or greater at breast height;
    b. The maximum width of the construction access area shall be limited to 15 feet;
    c. All mats shall be removed within 72 hours after the work commences; and
    d. Areas disturbed for access shall be restored to natural grades immediately after the maintenance or repair is completed.

13. Barges or other work vessels used to conduct in-water activities shall be operated in a manner that prevents unauthorized dredging, water quality violations, and damage to submerged aquatic communities.

14. The construction, alteration, or use of the authorized project shall not adversely impede navigation or create a navigational hazard in the water body.

15. Except where specifically authorized in a general permit, activities must not:
    a. Impound or obstruct existing water flow, cause adverse impacts to existing surface water storage and conveyance capabilities, or otherwise cause adverse water quantity or flooding impacts to receiving water and adjacent lands;
    b. Cause an adverse impact to the maintenance of surface or ground water levels or surface water flows established pursuant to Section 373.042, F.S., or a Works of the District established pursuant to Section 373.086, F.S.; or

16. If any prehistoric or historic artifacts, such as pottery or ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial or American settlement are encountered at any time within the project site area, work involving subsurface disturbance in the immediate vicinity of such discoveries shall cease. The permittee or other designee shall contact the Florida Department of State, Division of Historical Resources, Compliance and Review Section, at (850) 245-6333 or (800) 847-7278, as well as the appropriate permitting agency office. Such subsurface work shall not resume without verbal or written authorization from the Division of Historical Resources. If unmarked human remains are encountered, all work shall stop immediately and notification shall be provided in accordance with Section 872.05, F.S.

17. The activity must be capable, based on generally accepted engineering and scientific principles, of being performed and of functioning as proposed, and must comply with any applicable District special basin and geographic area criteria.

18. The permittee shall comply with the following when performing work within waters accessible to federally- or state-listed aquatic species, such as manatees, marine turtles, smalltooth sawfish, and Gulf sturgeon:
    a. All vessels associated with the project shall operate at “Idle Speed/No Wake” at all times while in the work area and where the draft of the vessels provides less than a four-foot clearance from the bottom. All vessels will follow routes of deep water whenever possible.
    b. All deployed siltation or turbidity barriers shall be properly secured, monitored, and maintained to prevent entanglement or entrapment of listed species.
    c. All in-water activities, including vessel operation, must be shutdown if a listed species comes within 50 feet of the work area. Activities shall not resume until the animal(s) has moved beyond a 50-foot radius of the in-water work, or until 30 minutes elapses since the last sighting within 50 feet. Animals must not be herded away or harassed into leaving. All on-site project personnel are responsible for observing water-related activities for the presence of listed species.
    d. Any listed species that is killed or injured by work associated with activities performed shall be reported immediately to the Florida Fish and Wildlife Conservation Commission (FWC) Hotline at 1(888)404-3922 and ImperiledSpecies@myFWC.com.
    e. Whenever there is a spill or frac-out of drilling fluid into waters accessible to the above species during a directional drilling operation, the FWC shall be notified at imperiledspecies@myfwc.com with details of the event within 24 hours following detection of the spill or frac-out.

19. The permittee shall hold and save the Agency harmless from any and all damages, claims, or liabilities which may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment or use of any activity authorized by the general permit.

20. The permittee shall immediately notify the Agency in writing of any submitted information that is discovered to be inaccurate.

NOTICE OF RIGHTS

Northwest Florida Water Management District
152 Water Management Drive, Havana, FL 32333-4712
(850) 539-5999 Fax (850) 539-2693
www.nwfwater.com

The following information addresses procedures to be followed if you desire an administrative hearing or other review of agency action.

PETITION FOR FORMAL ADMINISTRATIVE PROCEEDINGS

Any person whose substantial interests are or may be affected by the action described in the enclosed Notice of Agency Action, may petition for an administrative hearing in accordance with the requirements of section 28-106.201, Florida Administrative Code, or may choose to pursue mediation as an alternative remedy under section 120.573, Florida Statutes, before the deadline for filing a petition. Pursuit of mediation will not adversely affect the right to administrative proceedings in the event mediation does not result in a settlement. Petitions for an administrative hearing must be filed with the Agency Clerk of the Northwest Florida Water Management District, 81 Water Management Drive, Havana, Florida 32333-9700 by the deadline specified in the attached cover letter. Failure to file a petition within this time period shall constitute a waiver of any rights such person may have to request an administrative determination (hearing) under section 120.57, Florida Statutes, concerning the subject permit application. Petitions which are not filed in accordance with the above provisions are subject to dismissal.

DISTRICT COURT OF APPEAL

A party who is adversely affected by final agency action on the permit application and who has exhausted available administrative remedies is entitled to judicial review in the District Court of Appeal pursuant to section 120.68, Florida Statutes. Review under section 120.68, Florida Statutes, is initiated by filing a Notice of Appeal in the appropriate District Court of Appeal in accordance with Florida Rule of Appellate Procedure 9.110.

SECTION 28-106.201, FLORIDA ADMINISTRATIVE CODE, INITIATION OF PROCEEDINGS

(1) Unless otherwise provided by statute, and except for agency enforcement and disciplinary actions that shall be initiated under Rule 28-106.2015, F.A.C., initiation of proceedings shall be made by written petition to the agency responsible for rendering final agency action. The term "petition" includes any document that requests an evidentiary proceeding and asserts the existence of a disputed issue of material fact. Each petition shall be legible and on 8 1/2 by 11 inch white paper. Unless printed, the impression shall be on one side of the paper only and lines shall be double-spaced.

(2) All petitions filed under these rules shall contain:

(a) The name and address of each agency affected and each agency's file or identification number, if known;

(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;

(c) A statement of when and how the petitioner received notice of the agency decision;

(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;

(e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

(3) Upon receipt of a petition involving disputed issues of material fact, the agency shall grant or deny the petition, and if granted shall, unless otherwise provided by law, refer the matter to the Division of Administrative Hearings with a request that an administrative law judge be assigned to conduct the hearing. The request shall be accompanied by a copy of the petition and a copy of the notice of agency action.

Rulemaking Authority 14.202, 120.54(3), (5) FS. Law Implemented 120.54(3) FS. History–New 4-1-97, Amended 9-17-98, 1-15-07, 2-5-13.

NOTICING PUBLICATION INFORMATION

The District's action regarding the issuance or denial of a permit, a petition or qualification for an exemption only becomes closed to future legal challenges from members of the public ("third parties"), if 1) "third parties" have been properly notified of the District's action regarding the permit or exemption, and 2) no "third party" objects to the District's action within a specific period of time following the notification.

Notification of "third parties" is provided through publication of certain information in a newspaper of general circulation in the county where the proposed activities are to occur. Publication of notice informs "third parties" of their right to have a 21-day time limit in which to file a petition opposing the District's action. However, if no notice to "third parties" is published, there is no time limit to a party's right to challenge the District's action. The District has not published a notice to "third parties" that it has taken final action on your application. If you want to ensure that the period of time in which a petition opposing the District's action regarding your application is limited to the time frame state above, you may publish, at your own expense, a notice in a newspaper of general circulation. A copy of the Notice of Agency Action the District uses for publication is attached. You may use this format or create your own, as long as the essential information is included.

If you do decide to publish a Notice of Final Agency Action, please provide the District a copy of the Proof of Publication when you receive it. That will provide us notice that action on this permit application is closed after the 21 days following publication.

Notice of Final Agency Action Taken by the
Northwest Florida Water Management District

Notice is given that Environmental Resource permit number GEN-033-284800-1 was issued on December 11, 2018 to D. Joy Jones
Escambia County for the construction of a new surface water management system designed as a retrofit improvement to provide additional treatment to Motley Court with an emphasis to reduce gulley erosion in central Escambia County. The retrofit activities will consist of the construction, operation, and maintenance of three dry detention with filtration (bottom sand filters) ponds with the assistance of underdrains and associated conveyance pipes. The existing drainage flows northward from the Motley Court Subdivision eventually to an eroded gulley and discharges to Clear Creek. The improvements will provide a net benefit to the surrounding area by preserving the natural runoff patterns for the project area while providing a permanent erosion control solution for the receiving waters of Clear Creek. The retrofit activities appear to meet or exceed the requirements of Section 62-330.451, F.A.C. General Permit to Counties, Municipalities, and other Agencies to Conduct Stormwater Retrofit Activities. The project is located at Northernmost end of Motley Court extending northward towards 921 Crooked Oaks Drive, Escambia County.

The file containing the application for this permit is available for inspection Monday through Friday (except for legal holidays), 8:00 a.m. to 5:00 p.m. at the Northwest Florida Water Management District's ERP Office, 180 E. Redstone Avenue, Crestview, FL 32539

A person whose substantial interests are affected by the District permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57 F.S., or may choose to pursue mediation as an alternative remedy under Section 120.573, Florida Statutes, and Rules 28-106.111 and 28-106.401-404, Florida Administrative Code. Petitions must comply with the requirements of Florida Administrative Code, Chapter 28-106 and be filed with (received by) the District Clerk located at District Headquarters, 81 Water Management Drive, Havana, FL 32333-4712. Petitions for administrative hearing on the above application must be filed within twenty-one (21) days of publication of this notice or within twenty-six (26) days of the District depositing notice of this intent in the mail for those persons to whom the District mails actual notice. Failure to file a petition within this time period shall constitute a waiver of any right(s) such person(s) may have to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., concerning the subject permit. Petitions which are not filed in accordance with the above provisions are subject to dismissal.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the District's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the District on the application have the right to petition to become a party to the proceedings, in accordance with the requirements set forth above.

BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA

EASEMENT

Easement Number 33235

THIS EASEMENT, made and entered into this _____ day of _____ 20__, between the **BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA**, acting pursuant to its authority set forth in Section 253.03, Florida Statutes, hereinafter referred to as "GRANTOR", and **ESCAMBIA COUNTY, FLORIDA**, a political subdivision of the State of Florida, acting by and through its duly authorized Board of County Commissioners, hereinafter referred to as "GRANTEE".

WHEREAS, GRANTOR is the owner of the hereinafter described real property, which is managed by the University of West Florida under Lease Number 2722 (“managing agency”); and

WHEREAS, GRANTEE desires an easement across the hereinafter described real property for erosion control and stormwater improvements; and

WHEREAS, the managing agency has agreed to the proposed use of the land subject to this easement.

NOW THEREFORE, GRANTOR, for and in consideration of mutual covenants and agreements hereinafter contained, has granted, and by these presents does grant unto GRANTEE, a non-exclusive easement across the following described real property in Escambia County, Florida, to-wit:

(See Exhibit "A" Attached)(the “Easement Area”)

subject to the following terms and conditions:

1. **DELEGATIONS OF AUTHORITY**: GRANTOR'S responsibilities and obligations herein shall be exercised by the Division of State Lands, State of Florida Department of Environmental Protection.

2. **TERM**: The term of this easement shall be for a period of fifty (50) years commencing on _____ and ending on _____, unless sooner terminated pursuant to the provisions of this easement.

3. **USE OF PROPERTY AND UNDUE WASTE**: This easement shall be limited to erosion control and stormwater improvements, upon and across the Easement Area during the term of this easement. This easement shall be non-exclusive. GRANTOR retains the right to engage in any activities on, over, below or across the Easement Area which do not unreasonably interfere with GRANTEE'S exercise of this easement and further retains the right to grant compatible uses to third parties during the term of this easement.

GRANTEE shall dispose of, to the satisfaction of GRANTOR, all brush and refuse resulting from the clearing of the Easement Area for the uses authorized hereunder. If timber is removed in connection with clearing this easement, the net proceeds derived from the sale of such timber shall accrue to GRANTOR. GRANTEE shall take all reasonable precautions to control soil erosion and to prevent any other degradation of the Easement Area and adjacent land during the term of this easement. GRANTEE shall not remove water from any source on this easement including, but not limited to, a water course, reservoir, spring, or well, without the prior written approval of GRANTOR. GRANTEE shall clear, remove and pick up all debris including, but not limited to, containers, papers, discarded tools and trash foreign to the work locations and dispose of the same in a satisfactory manner as to leave the work locations clean and free of any such debris. GRANTEE, its agents, successors, or assigns, shall not dispose of any contaminants including, but not limited to, hazardous or toxic substances, chemicals or other agents produced or used in GRANTEE'S operations on this easement or on any adjacent state land or in any manner not permitted by law. GRANTEE shall be liable for all costs associated with any cleanup of the Easement Area and adjacent land which is a result of GRANTEE'S operations and use of the Easement Area.

Upon termination or expiration of this easement GRANTEE shall restore the Easement Area to substantially the same condition it was upon the Effective Date. GRANTEE agrees that upon termination or expiration of this easement all authorization granted hereunder shall cease and terminate. If the Easement Area is under lease to another agency, GRANTEE shall obtain the consent of such agency prior to engaging in any use of the Easement Area.

4. **ASSIGNMENT**: This easement shall not be assigned in whole or in part without the prior written consent of GRANTOR. Any assignment made either in whole or in part without the prior written consent of GRANTOR shall be void and without legal effect.

5. **RIGHT OF INSPECTION**: GRANTOR or its duly authorized agents, representatives or employees shall have the right at any and all times to inspect this easement and the works of GRANTEE in any matter pertaining to this easement.

6. **NON-DISCRIMINATION**: GRANTEE shall not discriminate against any individual because of that individual's race, color, religion, sex, national origin, age, handicaps, or marital status with respect to any activity occurring within this easement or upon lands adjacent to and used as an adjunct of this easement.

7. **LIABILITY**: GRANTOR does not warrant or represent that Easement Area is safe or suitable for the purpose for which GRANTEE is permitted to use it, and GRANTEE and its agents, representatives, employees, and independent contractors assume all risks in its use. GRANTEE hereby covenants and agrees to investigate all claims of every nature at its own expense and to indemnify, protect, defend, save and hold harmless GRANTOR and the State of Florida, its officers, agents and employees from any and all damages, claims, costs, expense, including attorney's fees, demands, lawsuits, causes of action or liability of any kind or nature arising out of all personal injury or damages attributable to the negligent acts or omissions of GRANTEE and its agents, officers, and employees. GRANTEE shall contact GRANTOR regarding the legal action deemed appropriate to remedy such damage or claims. The GRANTEE shall maintain a program of insurance covering its liabilities as prescribed by Section 768.28, F.S. Nothing herein shall be construed as a waiver of sovereign immunity enjoyed by any party hereto, as provided in Section 768.28, Florida Statutes, as amended from time to time, or any other law providing limitations on claims, nor shall it be construed as a waiver of any defense the parties may have under such statute, nor as consent to be sued by third parties. In the event GRANTEE subcontracts any part or all of the work performed in the Easement Area, the GRANTEE shall require each and every subcontractor to identify the GRANTOR as an additional insured on all insurance policies required by the GRANTEE. Any contract awarded by GRANTEE for work in the Easement Area shall include a provision whereby the GRANTEE's subcontractor agrees to indemnify, pay on behalf, and hold the GRANTOR harmless for all injuries and damages arising in connection with the GRANTEE's subcontract.

8. **COMPLIANCE WITH LAWS**: GRANTEE agrees that this easement is contingent upon and subject to GRANTEE obtaining all applicable permits and complying with all applicable permits, regulations, ordinances, rules, and laws of the State of Florida or the United States or of any political subdivision or agency of either.

9. **ARCHAEOLOGICAL AND HISTORIC SITES**: Execution of this easement in no way affects any of the parties' obligations pursuant to Chapter 267, Florida Statutes. The collection of artifacts or the disturbance of archaeological and historic sites on state-owned lands is prohibited unless prior authorization has been obtained from the State of Florida Department of State, Division of Historical Resources.

10. **PROHIBITIONS AGAINST LIENS OR OTHER ENCUMBRANCES**: Fee title to the lands underlying this easement is held by GRANTOR. GRANTEE shall not do or permit anything to be done which purports to create a lien or encumbrance of any nature against the real property of GRANTOR including, but not limited to, mortgages or construction liens against the real property described in Exhibit "A" or against any interest of GRANTOR therein.

11. **PARTIAL INVALIDITY**: If any term, covenant, condition or provision of this easement shall be ruled by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

12. **SOVEREIGNTY SUBMERGED LANDS**: This easement does not authorize the use of any lands located waterward of the mean or ordinary high water line of any lake, river, stream, creek, bay, estuary, or other water body or the waters or the air space there above.

13. **ENTIRE UNDERSTANDING**: This easement sets forth the entire understanding between the parties and shall only be amended with the prior written approval of GRANTOR.

14. **TIME**: Time is expressly declared to be of the essence of this easement.

15. **RIGHT OF AUDIT**: GRANTEE shall make available to GRANTOR all financial and other records relating to this easement and GRANTOR shall have the right to audit such records at any reasonable time during the term of this easement. This right shall be continuous until this easement expires or is terminated. This easement may be terminated by GRANTOR should GRANTEE fail to allow public access to all documents, papers, letters or other materials made or received in conjunction with this easement, pursuant to Chapter 119, Florida Statutes.

16. **PAYMENT OF TAXES AND ASSESSMENTS**: GRANTEE shall assume full responsibility for and shall pay all liabilities that accrue to the Easement Area or to the improvements thereon including any and all drainage and special assessments or taxes of every kind and all mechanic's or materialman's liens which may be hereafter lawfully assessed and levied against this easement.

17. **AUTOMATIC REVERSION**: This easement is subject to an automatic termination and reversion to GRANTOR when, in the opinion of GRANTOR, this easement is not used for the purposes outlined herein, and any costs or expenses arising out of the implementation of this clause shall be borne completely, wholly and entirely by GRANTEE, including attorneys' fees.

18. **RECORDING OF EASEMENT**: GRANTEE, at its own expense, shall record this fully executed easement in its entirety in the public records of the county within which the easement site is located within fourteen days after receipt, and shall provide to the GRANTOR within ten days following the recordation a copy of the recorded easement in its entirety which

contains the O.R. Book and Pages at which the easement is recorded. Failure to comply with this paragraph shall constitute grounds for immediate termination of this easement agreement at the option of the GRANTOR.

19. **GOVERNING LAW**: This easement shall be governed by and interpreted according to the laws of the State of Florida.

20. **SECTION CAPTIONS**: Articles, subsections and other captions contained in this easement are for reference purposes only and are in no way intended to describe, interpret, define or limit the scope, extent or intent of this easement or any provisions thereof.

LEGAL DESCRIPTION (AS WRITTEN)

A PORTION OF THOSE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4558, PAGE 1460 OF THE PUBLIC RECORDS OF ESCAMBIA COUNTY, FLORIDA, LYING IN SECTION 23, TOWNSHIP 1 NORTH, RANGE 30 WEST, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHEAST CORNER OF LOT 32, BLOCK C, BOULDER CREEK FIRST ADDITION AS RECORDED IN PLAT BOOK 14, PAGE 6 OF THE PUBLIC RECORDS OF ESCAMBIA COUNTY, FLORIDA, MARKED BY A 4 INCH SQUARE CONCRETE MONUMENT.

FROM SAID POINT OF COMMENCEMENT, RUN ALONG A SOUTHERLY EXTENSION OF THE EAST LINE OF SAID LOT 32, SOUTH 03 DEGREES 53 MINUTES 37 SECONDS WEST, A DISTANCE OF 30.00 FEET TO THE NORTH LINE OF THE SOUTH HALF OF SAID SECTION;

THENCE LEAVING SAID SOUTHERLY EXTENSION, ALONG SAID NORTH LINE, RUN SOUTH 87 DEGREES 08 MINUTES 21 SECONDS EAST, A DISTANCE OF 45.01 FEET TO THE EAST LINE OF A 30 FOOT RIGHT OF WAY (UNOPENED AND UNMAINTAINED) AND THE POINT OF BEGINNING;

FROM SAID POINT OF BEGINNING, LEAVING SAID NORTH LINE, ALONG SAID EAST LINE, RUN NORTH 03 DEGREES 53 MINUTES 37 SECONDS EAST, A DISTANCE OF 1,308.58 FEET TO THE SOUTHWEST CORNER OF LOT 35, ACCORDING THE SUBDIVISION PLAT THEREOF RECORDED IN DEED BOOK 102, PAGE 111 OF SAID PUBLIC RECORDS AND THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 23;

THENCE LEAVING SAID EAST LINE, ALONG SAID NORTH LINE, RUN SOUTH 87 DEGREES 07 MINUTES 38 SECONDS EAST, A DISTANCE OF 135.02 FEET;

THENCE LEAVING SAID NORTH LINE, RUN SOUTH 03 DEGREES 53 MINUTES 37 SECONDS WEST, A DISTANCE OF 1,308.55 FEET TO THE NORTH LINE OF THE SOUTH 1/2 OF SAID SECTION;

THENCE ALONG SAID NORTH LINE, RUN NORTH 87 DEGREES 08 MINUTES 21 SECONDS WEST, A DISTANCE OF 135.02 FEET TO THE POINT OF BEGINNING, CONTAINING 4.055 ACRES, MORE OR LESS.

SUBJECT: Report of Geotechnical Exploration
Motley Court Gully Restoration
Escambia County, Florida
LMJ File #: 18-271

Dear Allen:

This letter forwards the results of our Geotechnical Exploration for the proposed **Motley Court Gully Restoration** project in Escambia County, Florida. The purpose of this exploration was to determine the general subsurface conditions at the boring locations and use this information to provide discussion and recommendations for the proposed gully restoration project. Our exploration consisted of five hand auger/probe borings, classification of the soil samples, laboratory testing of selected soil samples and analysis by our engineering staff.

Project and Site Description

The site is the existing gully beginning at the north end of Motley Court extending north approximately 1,700 feet towards the existing creek bed. The gully is washed out, heavily wooded, and overgrown with vegetation. Reportedly, the project is planned to include rebuilding the area the length of the gully to include stepped down sediment basins with control structures consisting of drawdown inlets and piping between the basins. Should this information change or be incorrect, the geotechnical engineer should be notified and changes to our recommendations may be needed.

Subsurface Exploration

To examine the subsurface conditions at the site, LMJ drilled five hand auger/probe borings to a depth of 10 feet below existing grades along the side of the gully. Each sample was removed from the auger sampler, classified in the field by the driller, and packaged for visual classification and laboratory testing by our engineering staff. A probe rod was used to roughly estimate the density of the soil at each boring location.

Subsurface Conditions

The boring locations are shown in the attached **Figure #1** and should be considered approximate. The borings were located in the field by measuring from existing survey markers along the edge of the existing gully. The subsurface conditions encountered in the borings are shown in the attached **Figure #2**. Boundaries between soil layers and soil depths should be considered approximate as the actual transition between soil layers may be gradual. A generalized summary of the conditions encountered in the borings is included below. For a detailed description of the conditions encountered in the borings, the reader is directed to **Figure #2**.

The borings generally encountered surficial brown silty sand underlain by layers of tan, brown, gray, orange, and white silty sand with layers of slightly silty sand, sand, clay, and some iron rock to the final boring depth of 10 feet. Boring A-3 was terminated at 7 feet due to iron rock. The soils were generally loose at the surface becoming medium dense and dense to the final boring depth. Borings A-1 and A-3 encountered very loose conditions beginning at 1-2 feet.

Groundwater was not encountered in most of the borings at the time of drilling. Boring A-3 encountered a perched groundwater level at 7 feet and boring A-5 encountered a possible perched groundwater level at 2.5 feet. Groundwater levels will vary with the amount of local rainfall, changes in site drainage characteristics, and may be different at other times.

Basis of Recommendations

Recommendations rendered herein are based on assumed and/or design information available at the time of this report, the subsurface conditions encountered in the test borings, commonly accepted Geotechnical Engineering principles and practices, and our experience with similar soil and groundwater conditions. Should final project design information differ from the design information used in this report, or should any soil conditions not discussed in this report be encountered during construction, our office should be notified and retained so that this report can be modified as needed.

Regardless of the care exercised in performing a Geotechnical Exploration, the possibility always exists that soil and/or groundwater conditions will differ from those encountered at the specific boring locations. In addition, construction operations may alter the soil conditions. Therefore, it is recommended that a representative from Larry M. Jacobs & Associates, Inc. (LMJ) be involved during the construction of this project.

General Comments

The soil conditions encountered in the borings are suitable for excavation and construction of the sediment basins if the recommendations in this report are followed. The borings generally encountered layers of silty sand with interbedded layers of clay, sand, slightly silty sand and iron rock. The main geotechnical concerns for this project are generally the moisture sensitive and wet soils with respect to compaction requirements, and the layers of iron rock and sand which could be a source of perched groundwater. The contractor should anticipate encountering areas of wet uncompactable soils, unsuitable layers of iron rock or clay, as well as perched groundwater conditions which could flow into excavations. Proposed pipes and inlet structures should be properly bedded on firm undisturbed suitable soils or compacted backfill material. Erosion control measures to protect exposed soils during and after construction should be implemented. The following sections provide recommendations and discussion of groundwater, existing moisture sensitive soil conditions, fill placement, and pipe and inlet bedding and backfill, and sediment basin berm construction.

Groundwater Discussion

Perched groundwater was encountered in two of the borings (A-3 and A-5) and should be anticipated throughout the project area. Perched groundwater could be present and flowing in sand seams, root holes, and on top of confining layers such as iron rock or hard pan type soils. Some ditching/drainage may be needed if perched water conditions are present at the time of construction.

Existing Moisture Sensitive Soil Conditions Discussion

The borings encountered silty sand and slightly clayey soils which are moisture sensitive and difficult to compact when wet. Laboratory tests showed some of the soil layers in the borings were wet or moist and likely above optimum moisture content. Existing soils planned for reuse on the project may require onsite or offsite drying in order to be reused as compacted fill or backfill. Construction traffic should be avoided where practical on wet subgrades as this can make pumping areas spread and worsen. We recommend obtaining unit rates for removal and replacement of uncompactable soils using imported fill and another rate for using onsite materials as backfill, and we recommend establishing a contingency budget for this purpose.

Fill Recommendations

Any imported fill for sediment basin berms and backfill for pipes and inlets should be silty sand (SM) free of significant organic content, debris or other deleterious materials. Suitable and compactible native soils that are free of significant organic content, roots, debris, and iron rock are also suitable as fill. Fill should be compacted to a minimum soil density of 95% of the Modified Proctor Test (ASTM D1557). Density tests are recommended for each 12-inch increment of fill or fraction thereof. Note that layers of iron rock and clay were encountered in the borings and were exposed along the existing gully. Iron rock and clay should not be reused as fill or backfill materials. Small layers of clay or gravel sized pieces of iron rock that is mixed into the existing silty sand is acceptable.

Pipe and Inlet Bedding and Backfill

The proposed inlets and piping can be placed on firm undisturbed soils where encountered or on compacted subgrade or gravel in loose or disturbed areas. We recommend that a representative from our office evaluate the pipe and inlet undisturbed subgrade areas by probing. Borings A-1 and A-3 encountered very loose conditions which may require compaction of the subgrade. Compaction of any loose or disturbed areas should be verified using in-place density testing. Where loose conditions are encountered, we recommend compacting the bottom of the excavation for a minimum depth of 12 inches to a minimum of 95% of the Modified Proctor Test (ASTM D1557) density using a jumping jack tamper. Root mass, stumps, or unsuitable soils and materials should be removed from below all pipes and structures.

If the soils at the bottom of pipe and inlet excavations and trenches are too wet to be compacted in place, they should be undercut for a minimum depth of 12 inches and backfilled with compactable fill as described in the previous section of this report. If seepage is present or if moisture is a concern, we recommend bedding pipes with 12 inches of crushed stone compacted until firm and non-yielding. Backfill along the sides and above pipes and inlets should be placed, compacted, and compaction verified as previously described. Backfill should be compacted to a minimum of 95% of the Modified Proctor Test (ASTM D1557) density in maximum 6-inch lifts using hand operated equipment under and around the proposed inlets, and piping and above the piping to final subgrade. We recommend installing utilities in sections that can be backfilled in a timely manner if inclement weather is anticipated, and utility trenches should not be left exposed to rainfall.

Earthwork Quality Control Testing

Compaction of general fill material should be tested at a minimum frequency of one test per 2,000 square feet on every 12-inch increment of fill placed. Compaction of backfill should be tested on every 12-inch increment at a minimum frequency of 1 test per 75 linear feet along the proposed pipes and every other lift for backfill around inlets. Compaction testing for pipes should be verified at the bottom of the utility excavation, at the springline of the pipe, and on each 12-inch increment of backfill over the pipe.

Sediment Basin Berm Construction Recommendations

Sediment basin berms can be constructed with suitable on-site soils consisting of slightly silty sand and silty sand. Basin berms should be constructed in benched lifts compacted to a minimum soil density of 95% of the Modified Proctor Test (ASTM D1557). Existing sand, if encountered, could be used in the berms if buried deep in the berm or mixed with a higher fines content silty sand. Large pieces of iron rock should not be used in the berm construction. Clean sand layers and/or iron rock placed in a berm could create a flowpath for water and cause the berm to fail.

Erosion of the berms is a concern and we recommend sodding the berm slopes with deeply rooted sod. Higher fines soils which are properly compacted have less erosion potential and should be used on the top of any berms to reduce the chance of berm failure if overtopped. We recommend typical design slopes for the berm construction for the soil types encountered in the borings to be a minimum of 3H:1V. Steeper slopes near 2H:1V, if required, could be allowed in areas that are not susceptible to erosion and can be well maintained with erosion control/sodding. Note that seepage through a slope could cause the slope to become unstable and cause failure of the slope. We do not recommend steeper slopes (2H:1V) for slopes into existing soils due to the possibility of seepage.

We hope that this letter provides sufficient information for your current requirements. If you have any questions or comments, please do not hesitate to call.

Sincerely,

LARRY M. JACOBS & ASSOCIATES, INC.

APPENDIX D

Armormax 75 HPTRM - Project-specific Details

January 16, 2019

RE: **Motley Court Gulley Restoration**
High Performance Turf Reinforcement Mat (HPTRM)
And Geotextile

To Whom It May Concern,

We want to thank you for considering the use of Propex products and solutions for stabilization and erosion control on the above referenced project. We understand the project to include erosion protection of the canal banks. It is also understood that the canal banks have proposed side slopes at a gradient of approximately 4 Horizontal : 1 Vertical (4H:1V) or flatter.

We would like to submit the following information in order to utilize the *ARMORMAX® Engineered Earth Armoring Solutions™* to mitigate surficial erosion. *ARMORMAX 75* consists of *PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM)* secured permanently with *ARMORMAX Engineered Earth Anchors™ (EEA™). ARMORMAX Engineered Earth Anchors™ (EEA™)* are pre-assembled, which reduces installation time and costs.

We are suggesting the installation of *ARMORMAX 75* with 3 ft. long type B1 anchors at a horizontal spacing of 4 ft. and a vertical spacing of 5 ft. along with 2.0 ft. long securing pins at a horizontal spacing of 2 ft. and a vertical spacing of 2.5 ft. We also suggest using GEOTEX® 601 nonwoven geotextile to underlay the ARMORMAX 75 from the lower termination trench at the toe of the slope up to 1 ft. above the Normal Water Level (NWL). The nonwoven geotextile will assist with sediment control in areas where vegetation performance may be affected by fluctuating water levels.

ANTIOXIDANT PERFORMANCE

HPTRMs are very stable materials, but their susceptibility to UV degradation is dependent upon the type, quality, and amount of the Ultraviolet (UV) inhibitor utilized during manufacturing. HPTRMs are typically composed of polymer resin and an additive package. The additive package, such as Carbon Black or Hindered Amine Light Stabilizers (HALS), can be a combination of colorant and antioxidant that work in concert to protect the polymer against degradation. While UV radiation is the main source of degradation to the polymer, visible light and infrared (IR) light can degrade the colorant or antioxidant, causing the additive package to be ineffective and the polymer to degrade prematurely. The rate of degradation must be fully understood in order to have confidence in long term performance.

ASTM D-4355

The durability and long term performance of the HPTRM is tested per ASTM D-4355 in order to quantify the rate of degradation after an established amount of exposure. D-4355 utilizes a xenon arc in order to reproduce the entire spectrum of sunlight, from 250 nm to 800 nm including UV light, visible light, and IR light. Other test methods, such as ASTM D-7238, only reproduce UV light, from 295 to 400 nm. This results in the total radiation exposure for each test to be very different, with D-7238 only producing 68.3 W/m2 and D-4355 producing 517.8 W/m2. While D-7238 focuses the radiation on only the polymer, D-4355 exposes the entire material to radiation in order to simulate real world conditions.

By definition, an HPTRM is a synthetic textile utilized within the soil surface like a geotextile, however the function and required durability of an HPTRM is greatly different from that of a standard geotextile. Due to their lack of exposure, geotextiles only require a testing duration per ASTM D-4355 of 500 hours. HPTRMs, while intended to be vegetated, are also designed to be exposed. Whether seed or sod is used, no project can be guaranteed to maintain 100% vegetative coverage over the entire design life. It has also been found that even if the vegetative coverage is maintained, the thermal fluctuation in the HPTRM caused by regional temperature change can induce oxidation and reduce the durability of the material. Therefore, HPTRM designs should require more durability than standard geotextiles, having

Please note that the information presented herein is general information only. It is for conceptual use only and not intended to be used for construction. While every effort has been made to ensure its accuracy, this information should not be used for a specific application without independent professional examination and verification of its suitability, applicability, and accuracy. This engineering document is protected by the Copyright Act, 17 U.S.C. §101 et seq. and may be used ONLY with the express written permission of Propex in connection with Propex products. Any copying, distributing, and/or creation of a derivative work without permission of Propex is prohibited and is subject of actual damages, statutory damages and attorney's fees under the Copyright Act.

the test duration per ASTM D-4355 increased to a minimum of 3,000 hours and provided by a third party independent testing agency. ASTM D-4355 has been used by all of the permanent erosion control product manufacturers for over 20 years to specify the durability of HPTRMs and over 40 years to specify the durability of geotextiles.

FIELD PERFORMANCE

In addition to laboratory testing, field samples of Propex HPTRMs are evaluated in order to correlate results from ASTM D-4355 to real world exposure for a better understanding of the material's design life. In 2015, samples of *PYRAMAT 75* were taken from the Bell Road Channel in Scottsdale, Arizona to determine the retained tensile strength after 13 years of exposure. With minimal vegetation established, the majority of the HPTRM was exposed in a severe environment having the highest solar radiation in the continental United States of 21.70 MJ/m2-day. The results showed an average retained tensile strength of 79% when compared to independent third party test results. Using this field retained tensile strength and both our independent and internal test results for UV resistance we can begin to anticipate the functional longevity of *PYRAMAT 75* as shown in Figure 1.

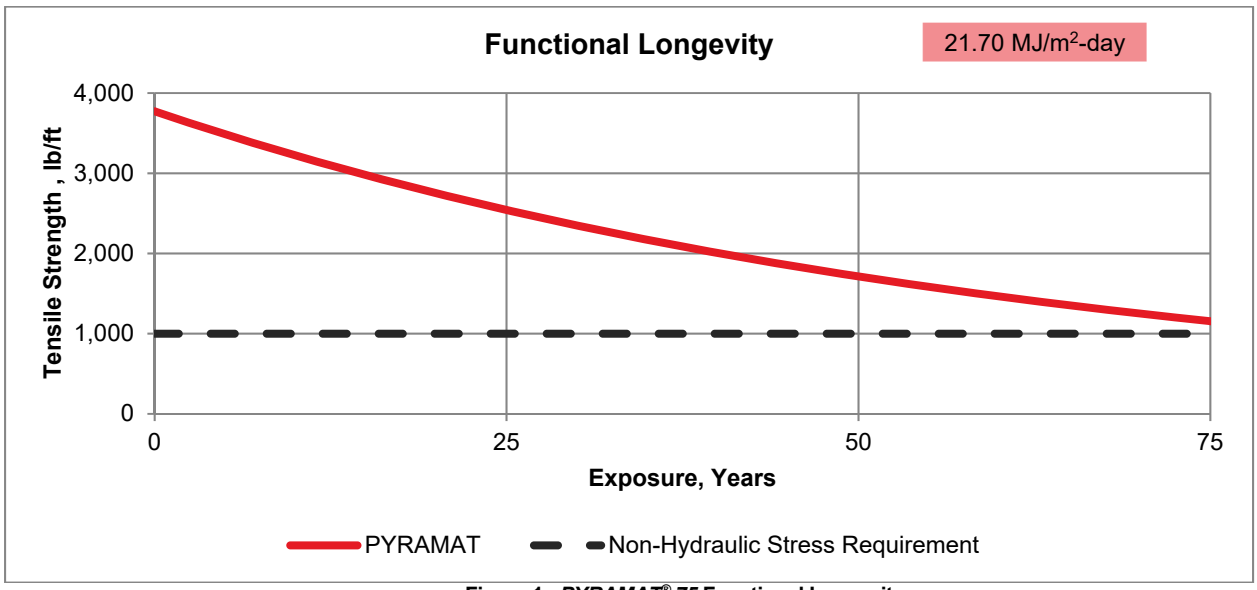

Figure 1 - *PYRAMAT® 75* Functional Longevity

MANUFACTURING QUALITY AND TESTING

Over the past 20 years, Propex has utilized a MQC program to establish internal testing frequencies, set property requirements, and rectify any deficient test results in order to successfully provide over 10 million square yards of HPTRM. Propex proudly manufactures PYRAMAT 75 in Ringgold, GA, controlling the entire process from pellets of resin to the packaging of the HPTRM. Propex HPTRMs are subjected to internal and external testing per ASTM D-4355 on an annual basis for 3,000 and 6,000 hours of exposure (Table 1).

Table 1 - Independent and Internal Test Results

Property	Test Method	*PYRAMAT®* 75
Tensile Strength (Published)	ASTM D-6818	4,000 x 3,000 lb/ft
UV Resistance @ 500 Hours	ASTM D-4355	>95%
UV Resistance @ 1,000 Hours	ASTM D-4355	>95%
UV Resistance @ 3,000 Hours	ASTM D-4355	>90%
UV Resistance @ 6,000 Hours	ASTM D-4355	>90%

PROVEN RESULTS

ARMORMAX has been in the marketplace for over a decade. *ARMORMAX* installations have totaled over 700,000 square yards on applications such as pond banks, levees, canal banks, slopes and channels. The Project Reference list can be found in the appendix of this submittal along with *ARMORMAX* case studies. *ARMORMAX* provides excellent UV Resistance that has been both field and laboratory tested. *ARMORMAX* is also cost-effective and easy to install.

ARMORMAX has been tested and proven to withstand Wave Overtopping Simulations. The Wave Overtopping Simulations, performed by Colorado State University (CSU) and overseen by the U.S. Army Corps of Engineers (USACE), replicated overtopping events corresponding with an incident significant wave height of 8.0 ft. impinging on a seaward-side levee with a slope gradient of 4H:1V. Average wave overtopping discharges of 2, 3, and 4 cfs/ft. were utilized in the testing to account for the change in levee freeboard.

Enclosed please find additional product information for *ARMORMAX 75* and *GEOTEX 601.* Should you have any questions or concerns regarding the analysis or the contents herein, please do not hesitate to contact me by phone at (423) 553-2199 or by email at matt.patton@propexglobal.com.

ARMORMAX®

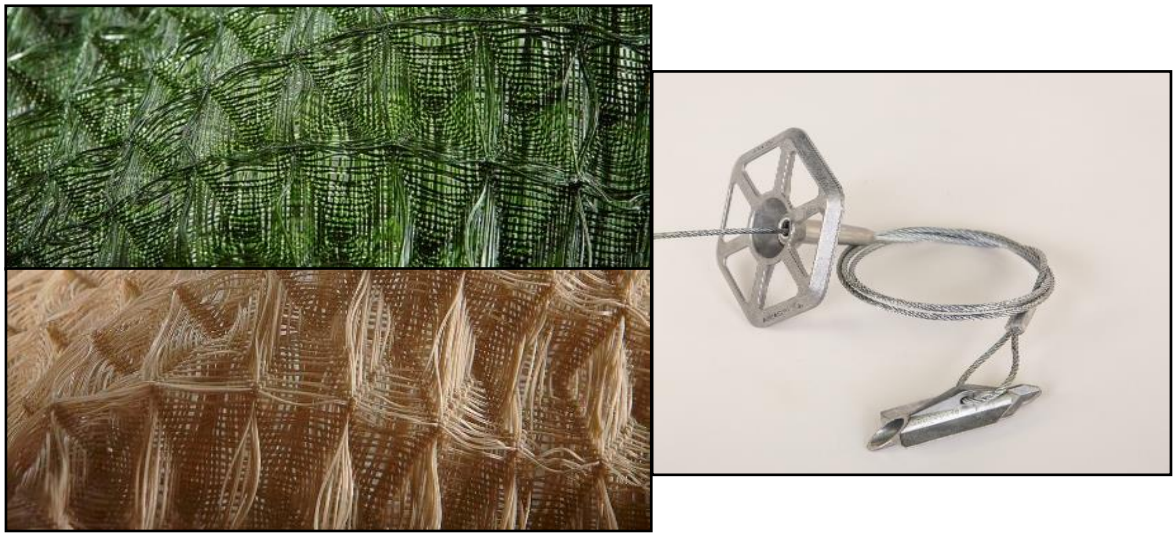
Engineered Earth Armoring System

Product Data

ARMORMAX® 75

For Erosicon Control

The ARMORMAX® 75 for Erosion Control is an Engineered Earth Armoring Solution™ used for permanent erosion protection in vegetated and unvegetated applications. It is composed of two components: PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM) and Type B1 Enginnered Earth Anchors. ARMORMAX® 75 is available in green or tan to provide for an aesthetically pleasing solution with proven performance. The anchor component is specifically designed and tested for compatibility and performance with PYRAMAT® 75 HPTRM to provide a system solution. Propex offers several anchor options to provide the ARMORMAX® 75 system designed for specific challenges and needs. The expected design life of ARMORMAX® 75 is up to 75 years because of its superior UV resistance, resistance to corrosion, strength, and durability in the most demanding environments.



The PYRAMAT® 75 HPTRM component of ARMORMAX® 75 values listed below[1] while manufactured at a Propex facility having achieved ISO 9001:2008 certification. Propex also performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP).

The Type B1 Anchor model is used for permanent erosion protection applications and has a working load of up to 500 lbs. The Type B1 Anchor consists of an aluminum anchor head, galvanized steel cable, aluminum ferrules, aluminum load-locking mechanism, and an aluminum top plate. The bullet nose design of the anchor head allows the anchor to penetrate PYRAMAT® 75 HPTRM resulting in minimal installation damage. The Type B1 Anchor is also designed with a recessed cavity so the top of the cable can be cut below the surface being protected.

GEOTEX® Nonwoven

Product Data

GEOTEX® 601

GEOTEX® 601 is a polypropylene, staple fiber, needle-punched nonwoven geotextile produced by Propex, and will meet the following Minimum Average Roll Values (MARV) when tested in accordance with the methods listed below. The fibers are needled to form a stable network that retains dimensional stability relative to each other. The geotextile is resistant to ultraviolet degradation and to biological and chemical environments normally found in soils.

GEOTEX® 601 conforms to the property values listed below[1]. Propex performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP). This product is NTPEP tested for AASHTO standards.

		MARV[2]	
PROPERTY	TEST METHOD	ENGLISH	METRIC
ORIGIN OF MATERIALS			
% U.S. Manufactured		100%	100%

ARMORMAX® 75 ON A SLOPE FOR EROSION CONTROL (NON-STRUCTURAL APPLICATION) GENERAL INSTALLATION GUIDELINES

GENERAL NOTES

1. ARMORMAX® 75 is an engineered solution used for permanent erosion protection or surficial slope stability in vegetated and unvegetated applications. It is composed of two components: PYRAMAT® 75 High Performance Turf Reinforcement Mat (HPTRM) and Engineered Earth Anchors. ARMORMAX® 75 is available in green or tan to provide for an aesthetically pleasing solution with proven performance.
   - 1.1. PYRAMAT® 75 HPTRM is a three-dimensional, lofty, woven polypropylene geotextile that is available in green or tan which is specially designed for erosion control applications on steep slopes and vegetated waterways. The matrix is composed of polypropylene monofilament yarns featuring X3® technology woven into a uniform configuration of resilient pyramid-like projections. The material exhibits very high interlock and reinforcement capacity with both soil and root systems, demonstrates superior UV resistance, and enhances seedling emergence.
   - 1.2. The Type B1 Anchor model is used for permanent erosion protection applications and has a working load of up to 500 lbs. The Type B1 Anchor consists of an aluminum anchor head, galvanized steel cable, aluminum ferrules, aluminum load-locking mechanism, and an aluminum top plate. The bullet nose design of the anchor head allows the anchor to penetrate HPTRM resulting in minimal installation damage. The Type B1 Anchor is also designed with a recessed cavity so the top of the cable can be cut below the surface being protected.
2. The 12", 18", and 24" Securing Pins are composed of a wire, mushroomed at the top. A washer is then placed on the wire and the wire is crimped or swedged about 3-1/2" below the top so the washer will not slide off. The end of the wire is cut at a 45 degree angle for easy penetration of the soil. These Pins with washers conform to industry standards for erosion control pins with washers.
3. GEOTEX® 601 nonwoven geotextile should be used to underlay ARMORMAX® 75 to assist with sediment control from the termination trench at the toe of the slope up to 1' above the expected Normal Water Level (NWL).

Vegetation Establishment

4. Prepare seedbed by loosening 50 to 75 mm (2 to 3 in) of soil above final grade. Select and apply soil amendments and fertilizer to scarified surface prior to installation of the ARMORMAX® 75. A site specific soil test should be performed to help determine what soil amendments, such as lime and fertilizer, need to be incorporated into the soil to promote healthy vegetation.
5. Upon installation of the ARMORMAX® 75, sod should be placed atop the ARMORMAX® 75 using sod staples.
6. Irrigate as necessary to establish and maintain vegetation until 90% of vegetation has established and has reached a height of 2 inches. Frequent, light irrigation will need to be applied to seeded areas if natural rain events have not occurred within two weeks of seeding. When watering seeded areas, use a fine spray to prevent erosion of seeds or soil. Do not over irrigate.

BEFORE INSTALLATION BEGINS

7. Coordinate with a Propex Representative: A pre-construction meeting is suggested with the construction team and a representative from Propex. This meeting should be scheduled by the contractor with at least a two week notice.
8. Gather the Tools Needed: Tools that you will need to install ARMORMAX® 75 include a pair of industrial shears to cut PYRAMAT® 75, tape measure, percussion hammer (sized appropriately for the anchors), ground rod driver compatible with the percussion hammer, drive steel compatible with the anchor, setting tool to set and load-lock theanchor, and wire cutters to cut the cable tendon of the anchor. If anchors will be load tested during construction, additional testing equipment may be necessary. Consult the "Anchor Load Test Manual" from Propex for further guidance. Available for purchase from Propex are drive steel, setting tools, and wire cutters.
9. Determine how to Establish Vegetation: The method of vegetation establishment should be determined prior to the start of installation. Different vegetation establishment methods require different orders of installation. Refer to Establish Vegetation for further guidance.
10. Please consult the Propex Website for the most up to date installation guidelines.

ARMORMAX

ARMORMAX® 75 INSTALLATION DETAILS FOR SLOPES

Date:	Drawn By:	Scale:
01/14/2019	J. HILL	NTS

*ALL DIMENSIONS ARE TO BE VERIFIED BY ENGINEER OF RECORD

Thank you for purchasing ARMORMAX® for Erosion Control or Slope Stability by Propex Operating Company, LLC (Propex). This document provides installation and maintenance guidelines for ARMORMAX used as slope armoring to improve earthen slope resiliency and slope stability. ARMORMAX provides permanent erosion protection of an earthen slope, promotes vegetation, and improves slope stability, consists of two components:

- PYRAMAT® - High Performance Turf Reinforcement Mat (HPTRM)
- Engineered Earth Anchor (Anchor)

Temporary securing pins (pins) are used during installation to hold ARMORMAX in place while installing anchors. Pins also promote vegetation establishment keeping ARMORMAX in intimate contact with the soil.

ARMORMAX is an Engineered Earth Armoring Solution ™ with a unique design for each specific project. While Propex has made every effort to ensure general validity, this information should not be used for a specific application without independent professional examination and verification of its suitability, applicability, and accuracy. The information provided herein is for general information only, and is intended to present installation guidance. Project specific contract documents take precedence when pin and anchor placements are different than what is represented in this document. Depending upon the critical nature of the structure to be armored, work restrictions may be in place such as limiting work based on growing seasons, weather patterns, etc. Work should be performed under the provisions set forth for the specific project. Propex Engineering Services is available for support during installation to consult for solving constructability issues encountered in specific applications. Please feel free to contact our Engineering Serivces team at GeoEngineering@propexglobal.com.

BEFORE INSTALLATION BEGINS

- *Coordinate with a Propex Representative:* A pre-construction meeting is suggested with the construction team and a representative from Propex. This meeting should be scheduled by the contractor with at least a two week notice.
- *Gather the Tools Needed:* Tools that you will need to install ARMORMAX include a pair of industrial shears, tape measure, percussion hammer (sized appropriately for the anchors), ground rod driver compatible with the percussion hammer, drive steel compatible with the anchor, setting tool to set and load-lock the anchor, and wire/bolt cutters to cut the cable tendon of the anchor. If anchors will be load tested during construction, additional testing equipment may be necessary. Consult the "Anchor Load Test Manual" from Propex for further guidance. Available for purchase from Propex are drive steel, JackJaw® Setting Tools, wire cutters, and a gas powered anchor driver.
- *Determine how to Establish Vegetation:* The method of vegetation establishment should be determined prior to the start of installation.
- Different vegetation establishment methods require different orders of installation. Refer to *VEGETATION ESTABLISHMENT* for further guidance.

INSTALLATION OF ARMORMAX ON SLOPES

PREPARE THE SITE

It is recommended during all stages of site preparation that disturbed soils remain unprotected for not more than a single day. Depending on project size this may require progressive site preparation during installation.

1. Grade and compact the area on the slope where ARMORMAX will be installed. The slope surface should be uniform and smooth, having all rocks, clods, vegetation or other objects removed so that during *ARMORMAX* LAYDOWN, ARMORMAX comes in direct, intimate contact with the slope surface.
2. Prepare the area to be armored with ARMORMAX by loosening the topsoil to promote better vegetation establishment. This may be accomplished with a rotary tiller on slopes 3:1 or flatter. For slopes greater than 3:1, prepare topsoil in a safe manner.

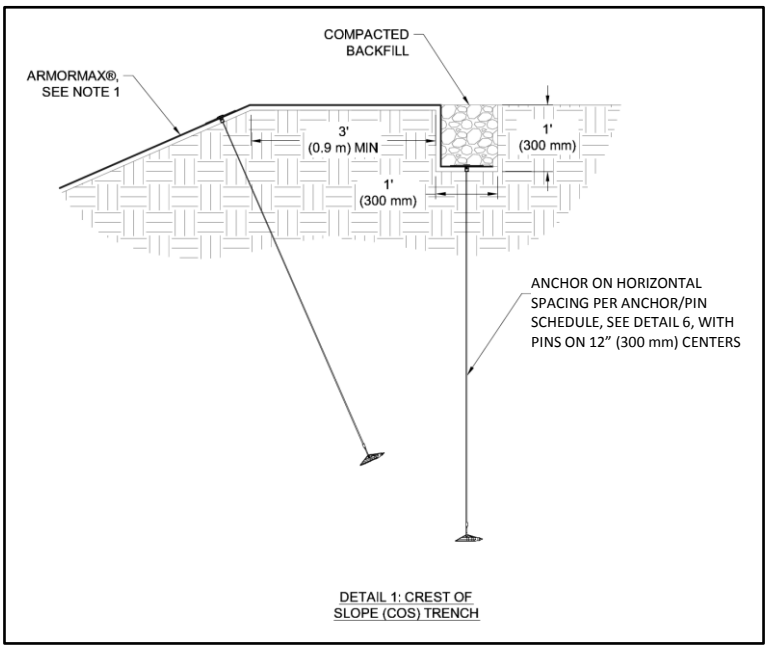

Figure 1: Crest of Slope (COS) Trench

3. Excavate a Crest of Slope (COS) trench 12 in x 12 in (300 mm x 300 mm) minimum at a distance of 3 ft (900 mm) from the crest of the slope. (Figure 1).

4. Excavate a Toe of Slope (TOS) trench 12 in x 12 in (300 mm x 300 mm) minimum at a minimum distance of 5 ft (1.5 m) from the toe of the slope. (Figure 2)

5. If seeding, refer to *VEGETATION ESTABLISHMENT* for additional considerations during site preparation.

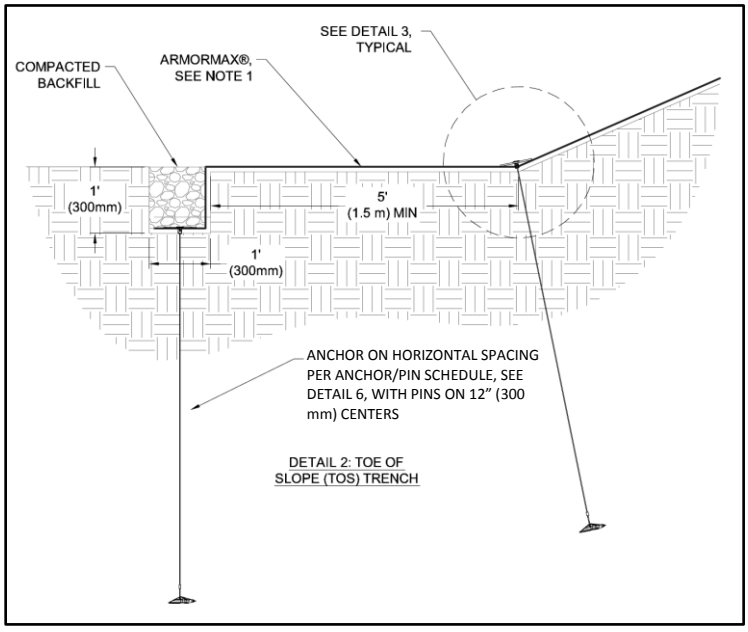

Figure 2: Toe of Slope (TOS) Trench

ARMORMAX LAYDOWN

1. Begin the *ARMORMAX* **LAYDOWN** process by starting with the downstream / downwind end of the site. To ensure proper anchoring of the overlapped areas the proceeding roll width must be laid out before the current roll width can be anchored with exception to the final roll width. For straight sections of a slope, ARMORMAX panel lengths should be long enough to construct COS and TOS trenches while also covering the surface of the slope being armored (Figure 12). Panel edges should rest approximately perpendicular to the slope center line. For best results, panels of ARMORMAX should be continuous and free from seams or roll end overlaps that are parallel to the centerline of the slope. Panel edge overlapping should follow a pattern of placing each proceeding panel's edge overtop the previous panel edge, shingling the panels in the direction of the water flow or prevailing wind.

2. Starting at the COS trench, lay ARMORMAX roll so that the roll ends points towards the crest of the slope (Figure 3), with a 3 inch (75 mm) overlap created at adjacent panel edge locations. Ensure that adjacent panel edges maintain a minimum 3 inch overlap during *ARMORMAX* **LAYDOWN** (Figure 8).

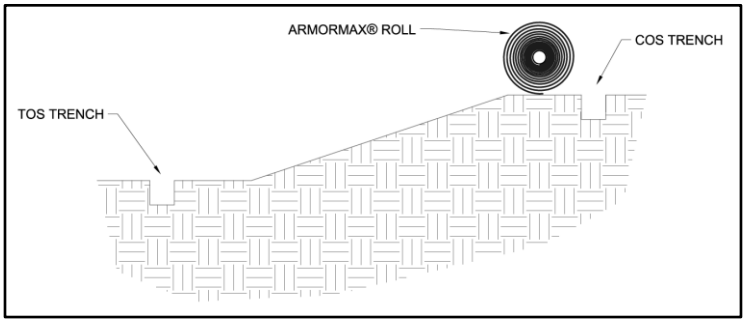

Figure 3: Crest of Slope (COS) Trench Alignment

3. Secure ARMORMAX with pins and Secondary anchors in the COS trench. Pins should be made of steel with a 0.20 in (5 mm) minimum diameter, having a 1.5 in (38mm) diameter washer at the head, and a length between 12 and 24 in (300-600 mm) with sufficient ground penetration to resist pullout (Figure 4). Longer pins may be required for looser soils. Heaver metal stakes may be required in rocky soils. Suggested placement of pins and Secondary anchors for the COS trench is along the bottom of the trench with pins on 12 in (300 mm) centers in between Secondary anchors on 4 ft (1.2 m) centers. Secondary anchors should also be installed on panel edge overlaps in the COS trench.

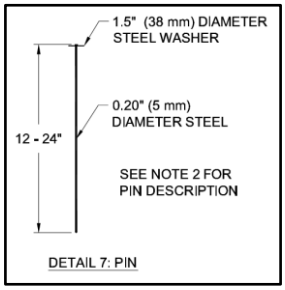

Figure 4: Securing Pin

4. Backfill and compact the COS trench in the location of the first ARMORMAX panel only (Figure 5).

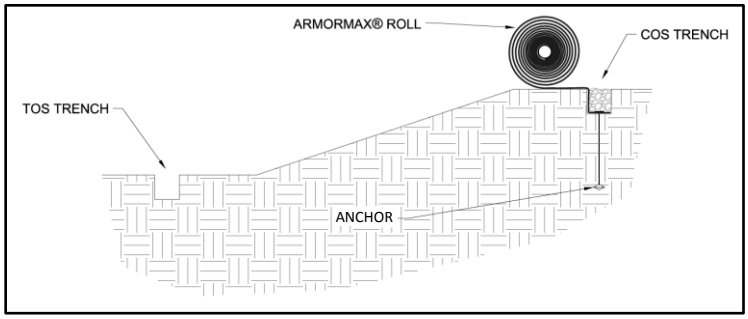

Figure 5: Crest of Slope (COS) Trench Placement

5. Unroll the ARMORMAX roll on the slope surface in the area to be armored (Figure 6). Ensure that ARMORMAX has intimate contact with the ground and all irregular surfaces beneath ARMORMAX are removed.

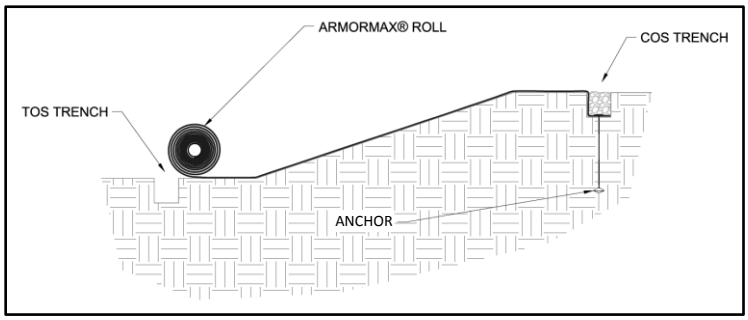

Figure 6: Placement of ARMORMAX across Slope

6. Secure ARMORMAX panels in place using pins, Primary anchors, and anchors across the slope surface according to the project's engineered design. Pin and anchor placement should reflect a staggered checkerboard pattern across the slope surface for best results (Figure 7 and Figure 8).

   - The leading edge of the first ARMORMAX panel should be secured on the Slope Armoring Edge (SAE) with pins on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis.
   - Roll edges shall be overlapped a minimum of 3 in (75 mm) with pins placed on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis (Figure 8).
   - Roll ends shall be overlapped a minimum of 6 in (150 mm) with upstream / upwind panel on top. Secure roll end overlaps with two rows of pins staggered 6 in (150 mm) apart on 12 in (300 mm) centers and with one row of anchors on intervals based on the slope stability analysis (Figure 9)
   - For slope lengths greater than 45 ft (13.7 m), install simulated check slots. This method includes placing two rows of pins 12 in (300 mm) apart on 12 in (300 mm) centers and one row of anchors between the rows of pins on 4 ft (1.2 m) centers at 45 ft (13.7 m) maximum intervals or across the midpoint of the slope for slope lengths less than 60 ft (18.2 m) (Figure 10).
   - At the break in slope interface towards the TOS, it is suggested that anchors be installed on intervals based on the slope stability analysis (Figure 11).

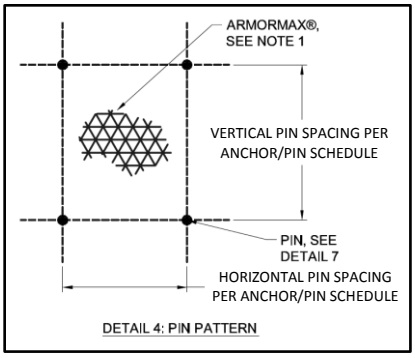

Figure 7: Example Pin Pattern

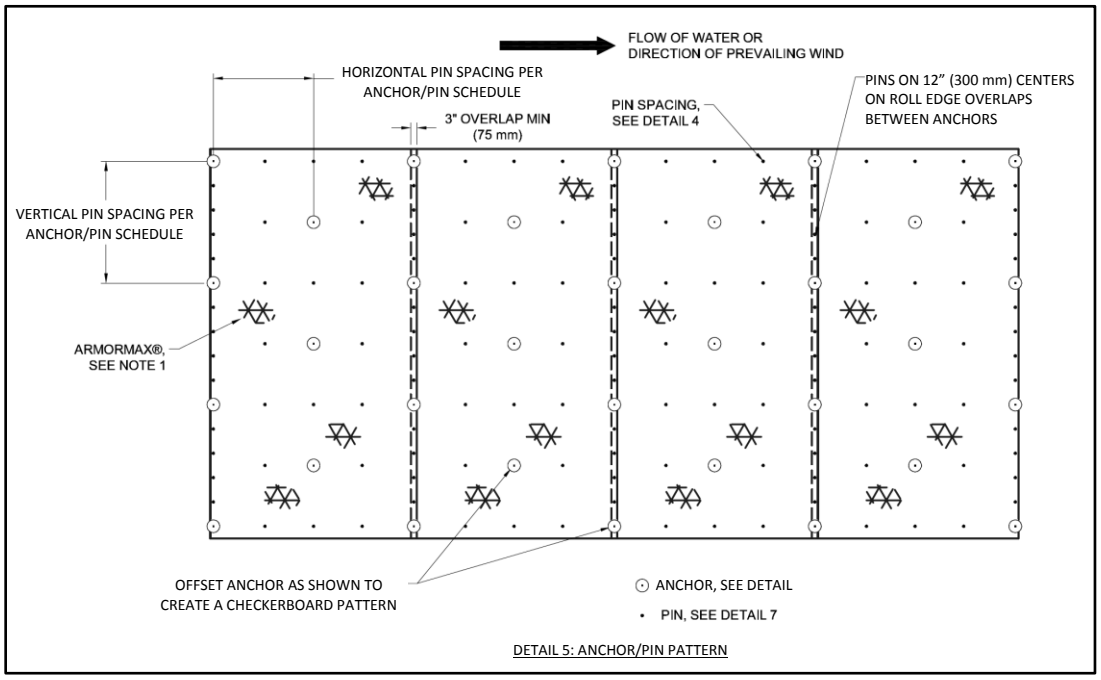

Figure 8: Example of Anchor Pattern - 0.5 Anchors/yd^2

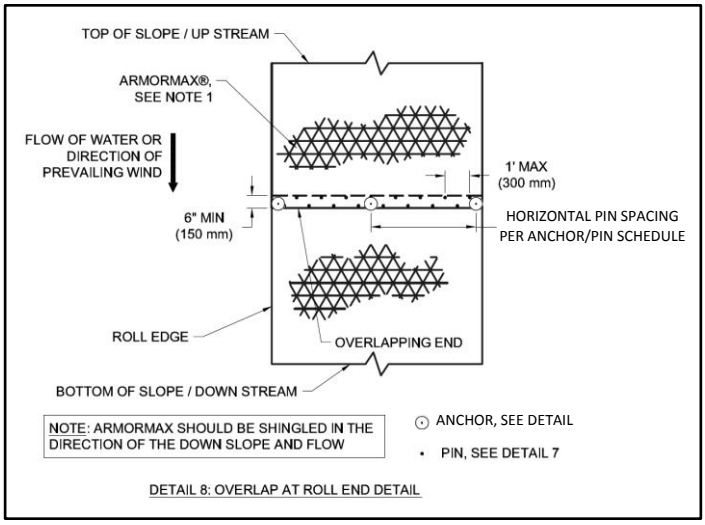

Figure 9: Roll End Overlap

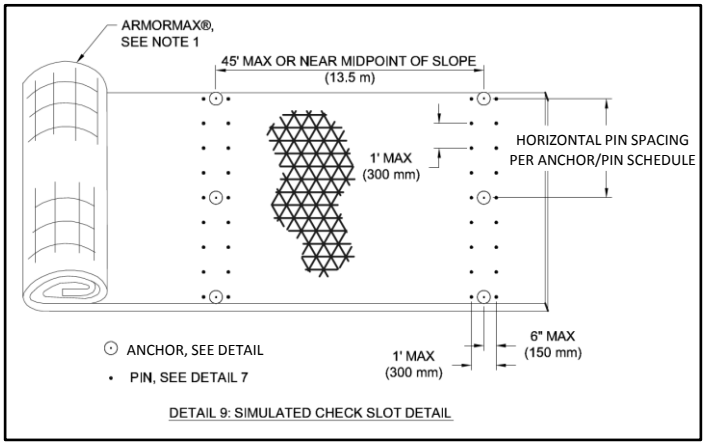

Figure 10: Simulated Check Slot

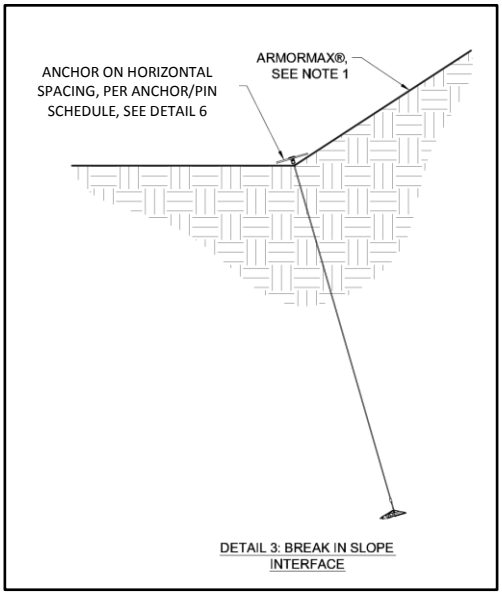

Figure 11: Break in Slope Interface

7. Secure ARMORMAX with pins and anchors in the TOS trench. Suggested placement of pins and anchors for the TOS trench is along the bottom of the trench with pins on 12 in (300 mm) centers in between anchors on 4 ft (1.2 m) centers (Figure 12).

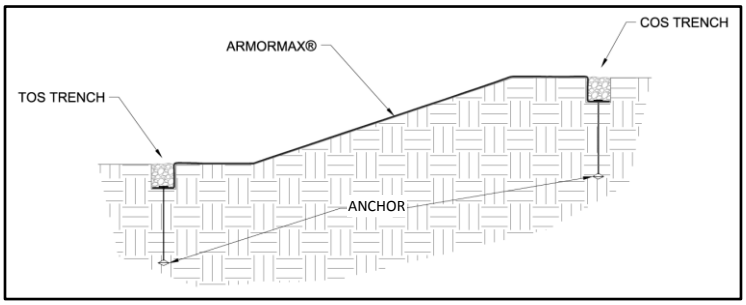

Figure 12: Crest of Slope (COS) Trench and Toe of Slope (TOS) Trench Complete

8. Backfill and compact the TOS trench. (Figure 12)

9. Continue to work down the length of the slope by repeating steps 1 through 8 overlapping each adjacent ARMORMAX panel by 3 inches (75 mm) (Figure 8). The last ARMORMAX panel should terminate on the Slope Armoring Edge (SAE) with pins on 12 in (300 mm) centers in between anchors on intervals based on the slope stability analysis. At a minimum, ARMORMAX panels should be pinned entirely across the slope surface, pins and anchors should be installed in the trenches, and the trenches should be backfilled and compacted at the end of each day to minimize rework in the case of a major rain event. Specific project conditions may warrant further evaluation of installation order for ease. An example elevation view (Figure 13) of a slope armored with ARMORMAX can be seen below for overall reference. Consult Propex Engineering Services at (800) 621-1273with any questions that you may have.

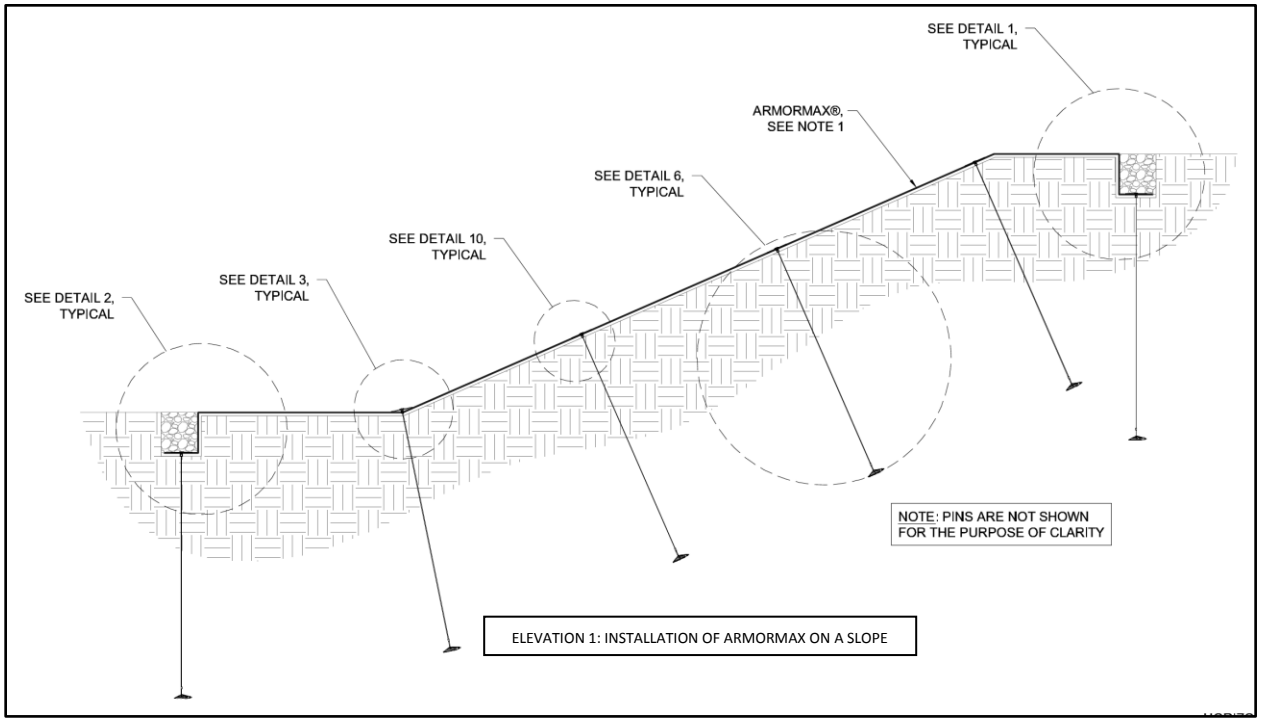

Figure 13: Completed Slope Isometric View

INSTALL ANCHORS

The ARMORMAX anchor typically consists of an anchor head, a flexible cable tendon, and a load bearing plate. For quality control purposes and warranty claims, anchors should be delivered to the jobsite fully assembled and ready for installation.

Anchors are to be installed in locations specified for the project, and are typically installed in conjunction with *ARMORMAX LAYDOWN*. There are several options available from Propex for different types of anchors. For optimal performance with the greatest risk reduction, it is important to select the proper anchor and perform the installation in accordance with the pattern designed for required resiliency and long term durability of the slope. Understanding the mechanics behind installing the anchor component of ARMORMAX will result in a quality ARMORMAX installation.

TYPE B1 & B2 ANCHOR

The installation of either Type B1 or Type B2 Anchor (Figure 14) is described below. The tools that you will need are a percussion hammer, a ground rod driver and drive steel compatible with the anchor and percussion hammer, a JackJaw setting tool, and wire cutters.

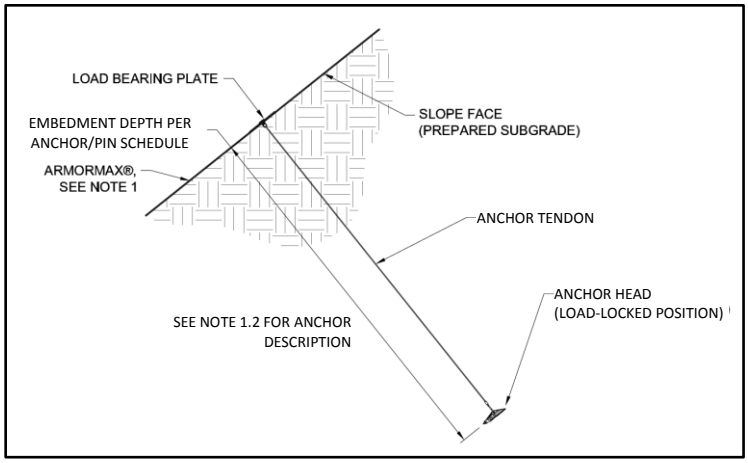

Figure 14: Anchor Detail

1. Use one piece drive steel or assemble segmental drive steel to the appropriate length in order to drive the anchor to the specified embedment depth.

2. Insert the tapered end of the drive steel into the hollow cavity of the anchor head. Position the anchor head/ drive steel tip above the ground at the drive location (Figure 15 and Figure 16).

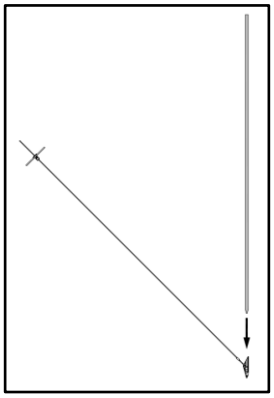

Figure 15: Insert Drive Steel into Anchor

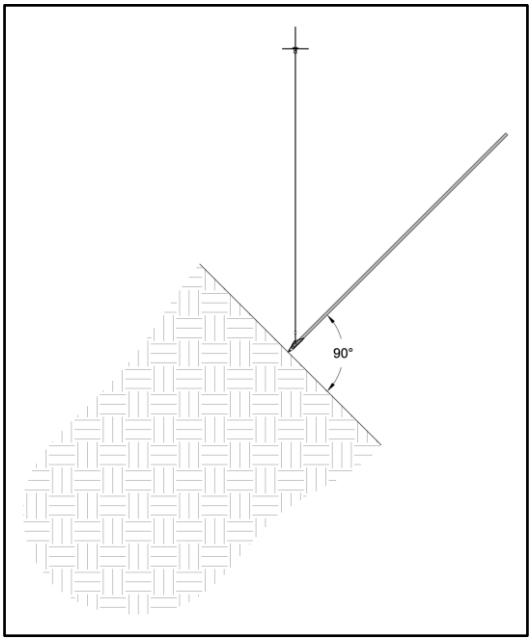

Figure 16: Position Anchor Head / Drive Steel Tip

3. Using a percussion hammer, guide the drive steel into the ground perpendicular to the slope surface at a smooth pace. Continue driving until the desired embedment depth is reached (Figure 17).

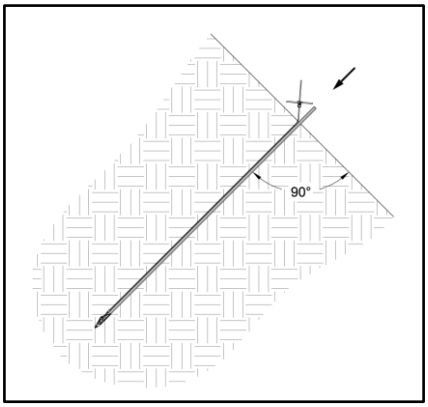

Figure 17: Drive Steel to Drive the Anchor into the Ground

4. Remove the drive steel from the ground. (Figure 18) Depending on soil conditions, this may require the use of a setting tool or leverage device.

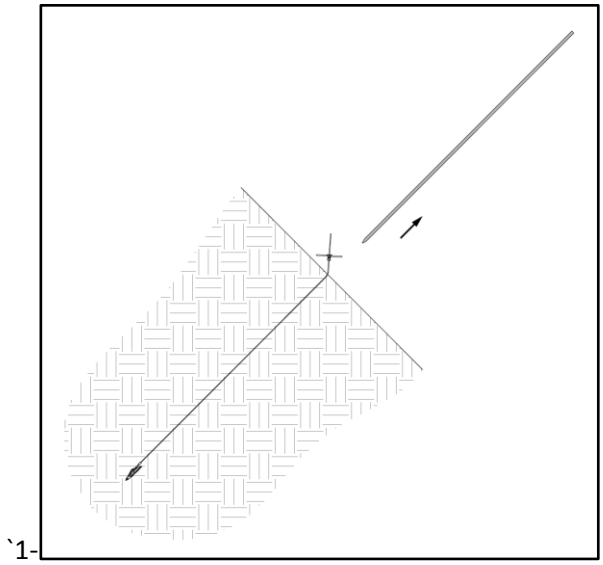

Figure 18: Remove Drive Steel from Ground

5. Slide the load bearing plate down the anchor tendon towards the slope surface using your hands (Figure 19).

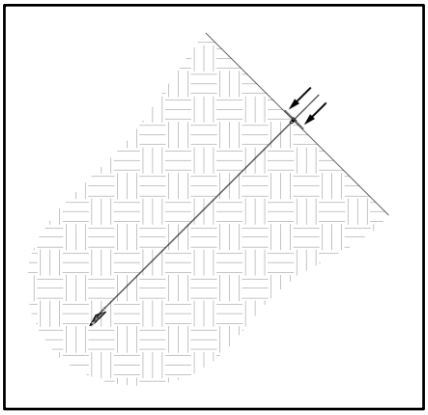

Figure 19: Slide Plate

6. Once the plate is close to the slope surface, place the JackJaw Setting Tool on the anchor plate and place the top of the anchor tendon into the grips, keeping the anchor tendon perpendicular to the slope surface (Figure 20). With gentle force, slowly start to press down on the JackJaw lever – towards the slope surface - causing the anchor tendon to start to move out of the ground (displace). During this step, the anchor head will turn in the ground – a process known as "anchor setting". The change in embedment depth to set a Type B1 Anchor can be up to 6 inches and up to 8 inches for Type B2 depending on soil conditions. When the anchor is set, there will be a noticeable change in the amount of force needed to displace the anchor any further. This is a good indication that the anchor head is now perpendicular to the anchor tendon and the anchor is ready to be load-locked.

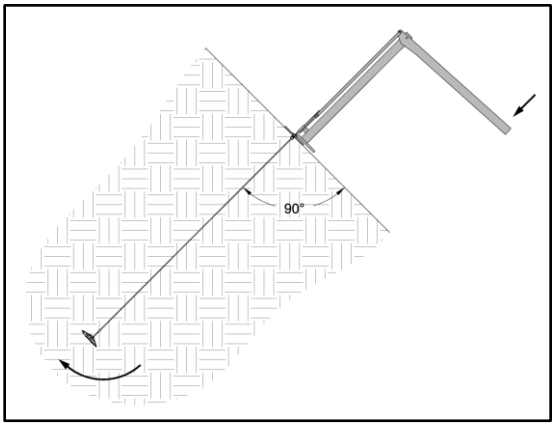

Figure 20: Use JackJaw Setting Tool to Set Anchor

7. To load-lock an anchor, continue to apply tension to the anchor tendon using the JackJaw Setting Tool creating a slight depression on the slope surface. Visually, anchors across ARMORMAX will look similar to buttons across a mattress top when anchors have been properly load-locked.

8. Conduct anchor load tests when required for quality assurance during installation. Refer to the document entitled "Anchor Load Test Manual" by Propex for further details.

9. Once anchors have been load-locked, cut off the excess anchor tendon flush to the plate at the slope surface using wire cutters (Figure 21 and Figure 22).

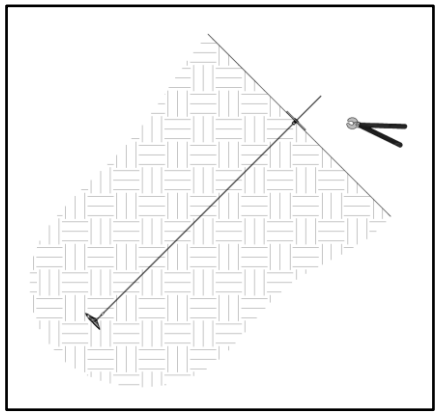

Figure 21: Trim Extra Cable Flush to Plate

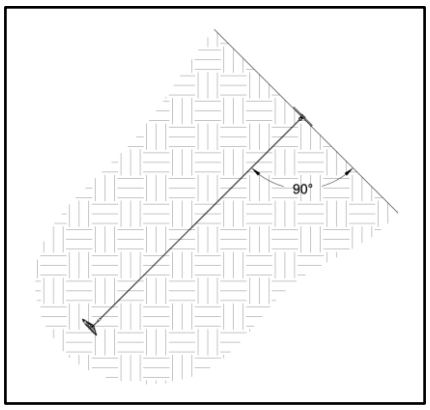

Figure 22: Complete Anchor Installation

VEGETATION ESTABLISHMENT

Vegetation can be established with ARMORMAX by broadcast seeding, hydraulic seed application (hydroseeding), or sodding. Seed application rate, seed type, sod type, and irrigation rate should be selected based on local or site specific knowledge and time of year. For best results, consider having a site specific soil test performed to help determine what soil amendments, such as lime and fertilizer, need to be incorporated into the soil to promote healthy vegetation.

Irrigate as necessary to establish and maintain vegetation until 75% of vegetation has established and has reached a height of 2 inches. Frequent, light irrigation will need to be applied to seeded areas if natural rain events have not occurred within two weeks of seeding. While watering seeded areas use a fine spray to prevent erosion of seeds or soil. Do not over irrigate. Proper irrigation guidance is provided under the Maintenance portion of this document.

PROJECT SPECIFIC CONSIDERATIONS

1. For applications that require special transitions (i.e. connections to riprap, concrete, T-walls, etc.), refer to the project specific drawings or consult with Propex Engineering Services at (800) 621-1273.

2. A deeper terminal trench and/or hard armoring may be required when slopes have severe scour potential at the toe location.

3. For installing ARMORMAX panels around curved sections of a slope, trim panels at an angle so that no more than two layers of ARMORMAX overlap at any point in time. Additional pins and anchors may be needed to secure panel edges towards the toe of the slope depending upon the radius of the curved slope. Install pins or anchors as necessary to securely fasten ARMORMAX to the ground.

4. Allowable Vehicle Traffic:

   A. If using equipment on ARMORMAX, it should be of the rubber-tired type and should avoid sharp turns. Tracked equipment is not permitted to drive over the ARMORMAX without vegetation at any time.

   B. Avoid any traffic over ARMORMAX if loose or wet soil conditions exist.

5. Disturbed areas should be reseeded. If ruts or depressions develop for any reason, rework soil until smooth and reseed such areas.

SHORT-TERM AND LONG-TERM MAINTENANCE OF ARMORMAX

The purpose of this section is to provide some general guidelines for performing short-term and long-term maintenance of ARMORMAX with respect to maintaining vegetation reinforced with ARMORMAX, and patching of ARMORMAX (in the event it needs to be removed or replaced). These procedures are to be considered minimum guidelines for proper maintenance, and further maintenance techniques may be appropriate considering local practices and procedures.

ARMORMAX PROTECTED SLOPES

For ARMORMAX to be most effective, it is important to ensure that it is properly maintained both during construction and after construction. Identifying trouble areas is easy with ARMORMAX, and it can make identifying potential threats much simpler and manageable. Look for areas with sparse, dying, or no vegetation as these are obvious signs that ARMORMAX is losing intimate contact with the slope surface. If loss of ground surface occurs, ARMORMAX will need to be removed and reinstalled as described in *PATCHING AND REPAIRS* section after the eroded area is backfilled with compacted soil that is similar to material of the slope. After ARMORMAX is reinstalled, re-establish vegetation on the newly installed ARMORMAX and disturbed areas. Monitor the sites to determine if frequent watering may be required to establish vegetation.

To minimize exposure to unwanted maintenance and repair, ARMORMAX armored slopes should be free of unauthorized vehicular traffic. Routine maintenance and slope inspections should be performed with rubber tired vehicles. Tracked equipment such as skid steers, excavators, or dozers should only be allowed to traffic over ARMORMAX in times of emergency after vegetation establishment is complete. Failure to control unauthorized traffic can result in ARMORMAX being damaged resulting in erosion below ARMORMAX during storm events. In addition, routine mowing maintenance should be used to keep the protected area free of unwanted brush, saplings, and trees. Selective herbicides that target only the unwanted plants can be used as long as the vegetation established with ARMORMAX is not impaired. Failure to control the sapling and tree growth can result in the trees being uprooted during a flood.

MAINTAINING VEGETATION

Good vegetative cover will ensure maximum performance of ARMORMAX. Vegetative cover care starts before a project is complete and is ongoing until all ARMORMAX is installed. Vegetative cover should be given every opportunity to grow and establish well. This will require that a contractor periodically fertilize, water, and mow the grasses as needed until a project is complete in the short-term, with the owner of the slope fulfilling the maintenance of the slope in a similar fashion for the long-term. For the entire lifecycle of ARMORMAX, every effort must be made to prevent unauthorized encroachments, grazing, vehicle traffic, the misuse of chemicals, or burning during inappropriate seasons.

1. After the installation of vegetation is complete, immediately water and soak the entire area using a fine spray to prevent erosion and loss of seeds. A suggested amount of water is identified below. Prior to installation if using sod, the sod pads in storage should be kept moist at all times and not stored for more than 24 hours from site arrival to installation. Warmer weather will necessitate more frequent applications than listed below.

    A. For each reach/segment of installed vegetation, watering shall be conducted immediately after each installation or the day's work.

    B. For initial vegetation establishment, water vegetation in a manner consistent with best practices for vegetation type and location.

    C. Establish a watering schedule and follow until vegetation is well established and will thrive in the absence of manual watering.

    D. Avoid excessive application of water, so that surface runoff does not occur. Runoff should be prohibited. However, additional watering may be required for repaired or damaged areas.

2. Fertilizer should be applied as needed to address any nutrient deficiencies revealed in soil testing.

3. Implement best practices for mowing over ARMORMAX. While ARMORMAX is designed to withstand non-hydraulic stresses such as mowing, there are procedures to minimize exposure to unwanted damage.

   A. Immediately after installation, signage and post shall be installed stating that "Vehicles and Pedestrians are Prohibited from Access" on the slopes and the newly installed vegetation. Signage shall be posted every 1,500 lineal feet.

   B. Vegetated areas should be mowed to a height no less than 6 inches and no greater than 12 inches from natural ground after a period of 60 days of growth. The excessive grass clippings created from mowing shall be evenly spread on the slope section outside of the armored area. Periodic and final grass mowing should be performed until final inspection and acceptance of slope work. Monitor the vegetated areas throughout winter months and generate reports as needed, noting any issues that should be addressed. Minimum mowing heights will depend on the vegetation density and should be as follows:

      i. 6" with 0 – 30% vegetation establishment
      ii. 4" with 30 – 70% vegetation establishment
      iii. 3" with 70 – 100% vegetation establishment

   C. To prevent damage to the newly established vegetation, the mowing tractor should be fitted with 3-rib agriculture tires. Note that tractors with 8-foot flail mowers provide best results. Tractors with 15-foot brush hogs should avoid sharp turns up the slope to prevent damage to vegetation.

   D. Mowing should not take place for a minimum of 48 hours after a rainfall event of 2 inches or more to minimize the potential for rutting and/or damage to the slope surface. Maintenance mowing of the slope should be done on a consistent basis to prevent vegetation growing to more than 3 feet in height. This will minimize thatch thickness and potential damage to ARMORMAX. If turn-around pads are present, operate mowing equipment utilizing the turn-around pads to the fullest extent. The mowing blade height over ARMORMAX should be a minimum of 8 inches. However, should vegetation grow to more than 3 feet in height, the mowing blade height for the condition should be a minimum of 12 inches.

4. Some special circumstances may exist. When mowing the crown of a slope with a crown or crest equal to or exceeding 20%, it should be mowed with an articulating arm mower to minimize the potential for the mower blades to catch ARMORMAX at the slope surface. The articulating arm mower should be level on the surface with the articulating arm extending over the crown. **Pay close attention to areas where the slope changes.** The mower blades should be set at a minimum height of 8 inches. If ARMORMAX is damaged by the mowing blades at any time, mowing should stop immediately and further direction should be obtained to continue activity. Repair the damaged area as described in the *PATCHING AND REPAIRS* section below.

5. ARMORMAX protected slopes are not as susceptible to animal burrowing due the tenacity of the ARMORMAX; however, inspections to detect the presence of burrowing animal activity are generally most effective immediately after the slope has been mowed. Animal burrows that are identified should be thoroughly excavated and inspected, backfilled with compacted soil that is similar to material of the slope, and vegetation re-established. This will avoid the possibility of water piping through unfilled portions of the burrows. Should ARMORMAX be damaged, it is to be repaired as described *PATCHING AND REPAIRS* section below.

PATCHING AND REPAIRS

ARMORMAX may require localized repair at times. For emergency repairs, an adequate supply of ARMORMAX should be maintained in inventory with the necessary tools to install. This will allow for a timely, initial repair of the system.

1. In order to identify areas in need of repair, the site should be patrolled immediately after mowing and after rain events of 2 inches or more. When patrolling look for areas of sparse vegetation, exposed edges of ARMORMAX, and areas where direct contact between ARMORMAX and the slope surface is compromised. ARMORMAX should be rated as *Acceptable, Minimally Acceptable*, or *Unacceptable* during inspection.

A. *Acceptable* (A) - The rated area is in satisfactory, acceptable condition, and will function as designed and intended during the rain event. ARMORMAX has no exposed edges, is installed tightly by maintaining direct contact to the slope surface with no rilling beneath, and has over 90% vegetation cover. There is no noticeable damage present.

B. *Minimally Acceptable* (M) - The rated area has a minor deficiency that needs to be corrected. The minor deficiency will not seriously impair the functioning of the area during the next rain event; however, the overall reliability of the project will be lowered because of the minor deficiency. ARMORMAX has 75% vegetation cover with un-vegetated patches as large as one square yard. Edges of ARMORMAX are exposed with noticeable damage. Minimal erosion has occurred underneath ARMORMAX.

C. *Unacceptable* (U) - The rated area is unsatisfactory. The deficiency is so serious that the area will not adequately function in the next rain event. ARMORMAX has been physically torn, ripped, or lifted from the slope surface. Less than 75% vegetation cover is present with un-vegetated patches being greater than 1 square yard, and there is evidence that erosion is occurring beneath ARMORMAX.

2. Repair any raised or exposed edges of ARMORMAX by driving existing and additional pins or anchors along the edges as necessary to securely fasten to the ground. Inspect areas where the vegetation is not growing on top of ARMORMAX. Many times this is an indicator that ARMORMAX has lost contact with the ground beneath. Check for voids beneath ARMORMAX and fill any holes, gullies, etc. with compacted fill material if possible. Replace ARMORMAX as described below.

3. To repair ARMORMAX, cut out and remove damaged areas in a square configuration a minimum size of 2 ft by 2 ft. Remove all vegetation and debris atop of ARMORMAX. Loosen the top 1 to 2 in of soil in the patch area then seed. The subgrade of area to be patched shall be prepared to be smooth and uniform and transition smoothly into the in-situ area. Cut a square ARMORMAX patch a minimum of 12 in greater than the damaged area for all four sides of the patch. Overlap the patch area in all directions a minimum of 12 in. The patch overlaps shall be tucked under the existing damaged ARMORMAX material (Figure 23 and Figure 24).

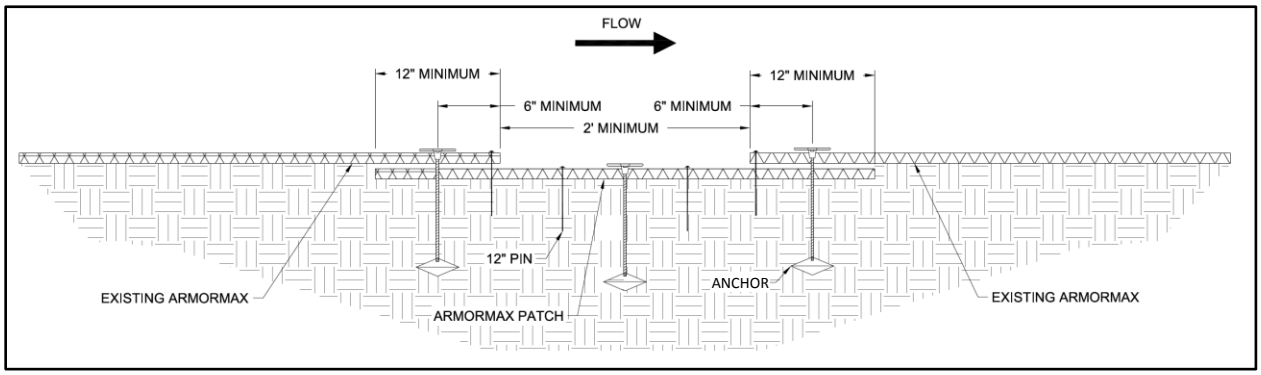

Figure 23: ARMORMAX Patch Cross Section

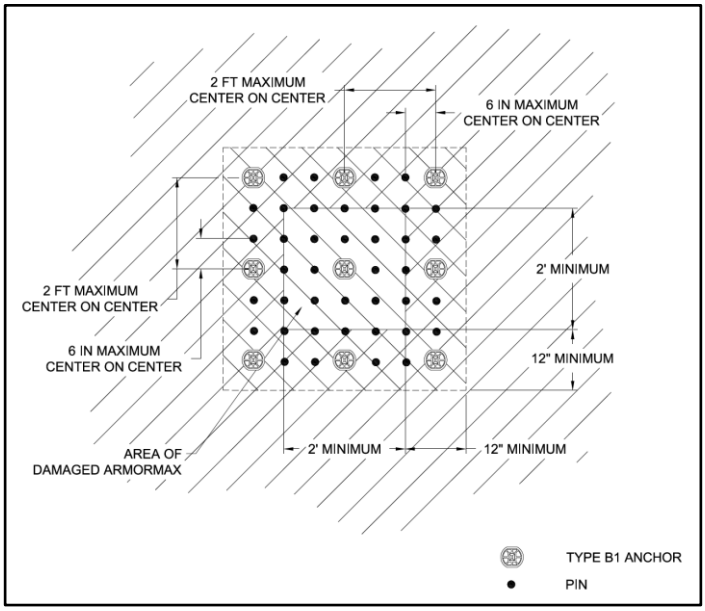

Figure 24: ARMORMAX Patch Plan View

4. Install anchors on 2 ft (600 mm) (max) centers, and pins on 6 in (150 mm) (max) centers. For larger areas of damage, anchors should be installed to match existing anchor pattern and type. Once ARMORMAX is in place, vegetate per project specifications.

SUMMARY

Maintenance should consist of watering and weeding, repair of all erosion, and any re-seeding as necessary to establish a uniform stand of vegetation during construction and beyond. A minimum of 70% of the armored area should be covered with no bare or dead spots greater than 10 ft^2 (1 m^2). Establishing vegetation should not be mowed prior to 70% vegetative density and a minimum grass growth of 4 in (100 mm). Throughout the duration of the project, the contractor should be responsible for mowing to facilitate growth and should not let the vegetation in the armored areas exceed 18 in (450 mm). In addition, the Contractor should water all grassed areas as often as necessary to establish satisfactory growth and to maintain its growth throughout the duration of the project. After the project is complete, it is the responsibility of the Owner to maintain and upkeep all ARMORMAX installed areas for long term performance and best results as described herein for superior slope armoring.

Statement of Work

Purpose

The purpose of this agreement is for the United States Department of Agriculture, Natural Resources Conservation Service, hereinafter referred to as the "NRCS", to provide technical and financial assistance to Escambia County Board of County Commissioners, hereinafter referred to as the "Sponsor", for EWP Project # 5073 (Hurricane Harvey) in Escambia County, Florida for implementation of recovery measures, that, if left undone, pose a risk to life and/or property.

Objectives

The design and installation of EWP measures as detailed in the individual Damage Survey Report (DSR) and described here:

DSR No. ESC-HAR-001 – Grade Stabilization of Motley Court Gully = $761,094

Total Estimated Construction Cost = $761,094

Budget Narrative

A. The estimated costs for the Project:

1. Total Estimated Project Budget: $837,203.40

The budget includes:

Financial Assistance (FA) Costs:
Construction Costs (75% NRCS $570,820.50 + 25% Sponsor $190,273.50): $761,094

Technical Assistance (TA) Costs:
100% NRCS (10.0% of total construction cost): $76,109.40

2. NRCS pays up to 75 percent of eligible construction costs, and Sponsor pays 25 percent of construction costs. NRCS will contribute up to 10.0 percent of the total construction cost for design services, contract administration and construction management costs. It is possible that technical and administrative costs will exceed this amount, requiring the Sponsor to contribute resources to complete technical and administrative work.

3. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for financial assistance (FA) and one for technical assistance (TA). FA costs are associated with construction activities; TA costs are associated with services. These expenditures shall be accounted for separately in order for expenses to be eligible for reimbursement.

4. NRCS will provide FA for actual costs as reimbursement to the Sponsor for approved on-the-ground construction costs, subject to above limits. If costs are reduced, reimbursement will be reduced accordingly. Construction costs are associated with the installation of the project measures including labor, equipment and materials.

5. NRCS will provide TA reimbursement to the Sponsor for technical and administrative costs directly charged to the project, subject to the above limits. If costs are reduced, reimbursement will be reduced accordingly. These costs include

a. engineering costs include, but not limited to, developing a project design that includes construction drawings and specifications, an operation and maintenance plan, a quality assurance/inspection plan and an engineer's estimate of the project installation costs in addition to providing necessary quality assurance during construction.

b. contract administration costs include, but not limited to, soliciting, evaluating, awarding and administering contracts for construction and engineering services, including project management, verifying invoices and record keeping.

6. The Sponsor will contribute funds toward the total construction costs in either direct cash expenditures, the value of non-cash materials or services, or in-kind contributions. The value of any in-kind contribution shall be agreed to in

writing prior to implementation.

Responsibilities of the Parties:

A. Sponsor will—

1. Accomplish construction of the EWP project measures by contracting, in-kind construction services, or a combination of both.

2. Ensure and certify by signing this agreement that its cost share obligation is from a non-Federal source.

3. Designate a project liaison to serve between the Sponsor and NRCS and identify that person's contact information with this executed agreement. Any change in the project liaison during the terms of this agreement must be immediately communicated to NRCS.

4. Appoint a contracting officer and an authorized representative who will have authority to act for the contracting officer, listing their duties, responsibilities, and authorities. Furnish such information in writing to the NRCS State Conservationist.

5. Comply with the terms and conditions of this agreement and the attached general terms and conditions except those that are not applicable to State and local governments.

6. Acquire and provide certification to NRCS that real property rights (land and water), permits and licenses in accordance with local, state, and Federal laws necessary for the installation of EWP project measures have been obtained at no cost to NRCS prior to construction. This includes any rights associated with required environmental mitigation. Sponsors shall provide such certification on Form NRCS-ADS-78, Assurances Relating to Real Property Acquisition. Sponsors shall also provide an attorney's opinion supporting this certification. Costs related to land rights and permits are the Sponsor's responsibility and ineligible for reimbursement.

7. Accept all financial and other responsibility for excess costs resulting from their failure to obtain, or their delay in obtaining, adequate land and water rights, permits and licenses needed for the Project.

8. Provide the agreed-to portion of the actual, eligible and approved construction cost. These costs may be in the form of cash, in-kind construction services, or a combination of both. Final construction items that are eligible construction costs will be agreed upon during the pre-design conference. These costs consist of costs from contracts awarded to contractors and eligible Sponsor in-kind construction costs for materials, labor, and equipment. The Sponsor shall provide NRCS documentation to support all eligible construction costs.

9. Be responsible for 100 percent of all ineligible construction costs and 100 percent of any unapproved upgrade to increase the level of protection over and above that described in the DSR.

10. Account for and report FA and TA expenditures separately in order for expenses to be eligible for reimbursement. NRCS funding for this project is provided to the Sponsor in two separate NRCS funding accounts, one for TA and one for FA, requiring this separation.

11. Contract for services and construction in accordance with the Code of Federal Regulations (CFR), 2 CFR § 200.317 through 200.326, applicable State regulations, and the Sponsor's procurement regulations, as appropriate. (See general terms and conditions attached to this agreement for a link to the CFR.) In accordance with 2 CFR § 200.326, contracts must contain the applicable provisions described in Appendix II to Part 200. Davis-Bacon Act would not apply under this Federal program legislation.

12. The contracts for design services and construction described in this Agreement shall not be awarded to the Sponsor or to any firm in which any Sponsor's official or any member of such official's immediate family has direct or indirect interest in the pecuniary profits or contracts of such firms. Reference 2 CFR § 200.318 regarding standards of conduct covering conflicts of interest and governing the performance of its employees engaged in the selection, award, and administration of contracts.

13. Any costs (construction or technical and administrative services) incurred prior to the Sponsor and NRCS signing this agreement are ineligible and will not be reimbursed.

14. For contracts, provide NRCS a copy of solicitation notice, bid abstract, and notice of contract award, or other basis of cost and accomplishment.

15. For in-kind construction services (materials, labor, and/or equipment supplied by the Sponsor), develop a Plan of Operations describing the construction services to be performed including estimated quantities and values. The Plan of Operations shall be concurred in by NRCS at the pre-design conference. In-kind construction services for equipment shall not exceed published FEMA equipment rates unless otherwise documented and concurred in advance by NRCS.

16. The following documentation is required to support the Sponsor's request for reimbursement of in-kind construction services:

a. Invoices covering actual costs of materials used in constructing the eligible EWP project measures.
b. Records documenting the type, quality, and quantities of materials actually used in constructing the eligible EWP project measures.
c. Daily time records for each employee showing name, classification, wage rate, hours, and dates actually employed for constructing the eligible EWP project measures.
d. Equipment operating records showing the type and size of equipment, hourly rate, actual hours of operation and dates used to install the eligible EWP project measures. Equipment idle time is not eligible in-kind construction services, even if on the job site, and should not be included in the equipment operating records.

17. Within thirty (30) calendar days of signing the project agreement, hold a pre-design conference with the Sponsor, Sponsor's design engineer, and NRCS. The design conference shall set forth design parameters concurred by both the Sponsor and NRCS. During the pre-design conference, NRCS will determine the eligible construction costs.

18. Within fourteen (14) calendar days of the pre-design conference submit to NRCS a schedule with time lines of major items to be completed. Milestones shall include, but not limited to, obtaining land rights, obtaining permits, completing any necessary surveys, completing draft engineering plans and specifications for NRCS review, completing final engineering plans and specifications, completing quality assurance plan, solicit bids, award contract, issue notice to proceed, and complete construction.

19. Prior to commencement of work and/or solicitation of bids, submit for NRCS review, the preliminary design, construction specifications, and engineering drawings prepared in accordance with standard engineering principles and design parameters set forth in the pre-design conference.

20. Upon receiving comments from NRCS, prepare the final design, construction specifications, and engineering drawings in accordance with standard engineering principles that comply with NRCS programmatic principles and design parameters set forth in the pre-design conference. One set of the final plans and specifications shall be submitted to NRCS for final review and concurrence prior to solicitation of bids and/or commencement of work. The final construction plans and specifications shall be signed and sealed by a licensed Professional Engineer registered in the State of Florida (Not required for debris removal only sites). A copy of the signed and seal plans and specifications shall be provided to NRCS.

21. Prior to commencement of work and/or solicitation of bids, submit for NRCS review and concurrence a Quality Assurance Plan (QAP). The QAP shall outline technical and administrative expertise required to ensure the EWP project measures are installed in accordance with the plans and specifications, identify individuals with the expertise, describe items to be inspected, list equipment required for inspection, outline the frequency and timing of inspection (continuous or periodic), outline inspection procedures, and record keeping requirements. A copy of the final QAP shall be provided to NRCS prior to commencement of construction.

22. Provide construction inspection in accordance with the QAP.

23. Prepare and submit for NRCS concurrence an Operation and Maintenance (O&M) Plan, if applicable (Not required for debris removal only sites) , prior to commence of work. The O&M Plan shall describe the activities the Sponsor will do to ensure the project performs as designed. Upon completion of the project measures, the Sponsor shall assume responsibility for O&M.

24. Provide copies of site maps to appropriate Federal and State agencies for environmental review. Sponsor will notify NRCS of environmental clearance, modification of construction plans, or any unresolved concerns as well as copies of all permits, licenses, and other documents required by Federal, state, and local statutes and ordinances prior to solicitation for installation of the EWP project measures. All modifications to the plans and specifications shall be reviewed and concurred on by NRCS.

25. Ensure that any special requirements for compliance with environmental and/or cultural resource laws are incorporated into the project.

26. The Sponsor must secure at its own expense all Federal, State, and local permits and licenses necessary for completion of the work described in this agreement as well as any necessary natural resource rights and provide copies of all permits and licenses obtained to NRCS.

27. Will arrange and pay for any necessary location, removal, or relocation of utilities. EWP program regulations prohibit NRCS from reimbursing the Sponsor or otherwise paying for any such costs; nor do the costs qualify as a Sponsor cost-share contribution.

28. Ensure that technical and engineering standards and specifications of NRCS are adhered to during construction of the Project, as interpreted by NRCS Government Representative (GR). Provide NRCS Program/Technical Contact and GR progress reports every 2 weeks after execution of the agreement. Progress reports should include work accomplished for the period, technical on-site inspections, work planned, results of material tests, deficient work products and/or tests with corrective actions taken, modifications anticipated, technical problems encountered, contractual issues and other relevant information.

29. Ensure that all contractors on NRCS assisted projects are performing their work in accordance with OSHA regulations and the Contract Work Hours and Safety Standards Act (40 USC 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). The Sponsor is responsible for periodically checking the contractor's compliance with safety requirements.

30. Arrange for and conduct final inspection of completed project with NRCS to determine whether all work has been performed in accordance with contractual requirements. Provide a Professional Engineer (PE) certification that the Project was installed in accordance with approved plans and specifications. For debris removal only sites, certification does not need to be from a PE.

31. Provide PE-certified as-built drawings and quantities for the project. A copy of the as-built drawings will be submitted to the NRCS Program/Technical Contact. For debris removal only sites, as-built drawings do not need to be certified by a PE.

32. Pay the contractor(s) for work performed in accordance with the agreement and submit a SF-270, "Request for Advance or Reimbursement" to the NRCS Program/Technical Contact with all documentation to support the request. Payments can be requested as frequently as monthly. Final payment request shall be submitted within 90 calendar days of completion of the EWP project measures. Payments will be withheld until all required documentation is submitted and complete.

a. The required supporting documentation for reimbursement of construction costs include invoices and proof of payment to the contractor showing the items and quantities installed and certified by the engineer of record along with any supporting documentation such as quantity calculations, rock weight tickets, etc.

b. The required supporting documentation for reimbursement of in-kind construction expenses will include employee time sheets, employee hourly rate, equipment operating logs, equipment hourly rate, and material quantities and invoices.

c. The required documentation for reimbursement of technical and administrative services will be invoices and proof or payment to consultants and/or employee time sheets along with the employee's hourly rate, hours worked, and date work was performed.

33. Ensure that information in the System for Award Management (SAM) is current and accurate until the final financial report (SF-425) under this award or final payment is received, whichever is later.

34. Take reasonable and necessary actions to dispose of all contractual and administrative issues arising out of the contract(s) awarded under this Agreement. This includes, but is not limited to disputes, claims, protests of award, source evaluation, and litigation that may result from the Project. Such actions will be at the expense of the Sponsor, including any legal expenses. The Sponsor will advise, consult with, and obtain prior written concurrence of NRCS on any litigation matters in which NRCS could have a financial interest.

35. Sponsor must indemnify and hold NRCS harmless to the extent permitted by State law for any costs, damages, claims, liabilities, and judgments arising from past, present, and future acts or omissions of the Sponsor in connection with its acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement. Further, the Sponsor agrees that NRCS will have no responsibility for acts and omissions of the Sponsor, its agents, successors, assigns, employees, contractors, or lessees in connection with the acquisition and management of the Emergency Watershed Protection Program pursuant to this agreement that result in violation of any laws and regulations that are now or that may in the future become applicable.

36. Retain all records dealing with the award and administration of the contract(s) for 3 years from the date of the Sponsor's submission of the final request for reimbursement or until final audit findings have been resolved, whichever is longer. If any litigation is started before the expiration of the 3-year period, records are to be retained until the litigation is resolved or the end of the 3-year period, whichever is longer. Make such records available to the Comptroller General of the United States or his or her duly authorized representative and accredited representatives of the Department of

Agriculture or cognizant audit agency for the purpose of making audit, examination, excerpts, and transcriptions.

37. Be liable to the NRCS for damages sustained by the NRCS as a result of the contractor failing to complete the work within the specified time. The damages will be based upon the additional costs incurred by the NRCS resulting from the contractor not completing the work within the allowable performance period. These costs include but are not limited to personnel costs, travel, etc. The NRCS will have the right to withhold such amount out of any monies that may be then due or that may become due and payable to the Sponsor. This liability is not applicable to the extent that the contract performance time is extended by court judgment unless such judgment results from actions of the Sponsor not concurred in by NRCS.

38. Take necessary legal action, including bringing suit, to collect from the contractor any monies due in connection with the contract, or upon request of NRCS, assign and transfer to NRCS any or all claims, demands, and causes of action of every kind whatsoever that the Sponsor has against the contractor or his or her sureties.

39. Submit requests for a time extension to the agreement (if necessary) in writing no less than forty-five (45) days prior to the expiration date of the agreement. Submit the written, signed request to the NRCS Program/Technical Contact.

B. NRCS will—

1. Assist Sponsor in establishing design parameters; determine eligible construction costs during the pre-design conference.

2. Designate a Government representative (GR) to serve as liaison with the Sponsor and identify that person's contact information with this executed agreement.

3. Review, comment and concur in preliminary and final plans, specifications, O&M Plan, Plan of Operations (if required) and QAP.

4. Make periodic site visits during the installation of the EWP project measures to review construction progress, document conformance to engineering plans and specifications, and provide any necessary clarification on the Sponsor's responsibilities.

5. Upon notification of the completion of the EWP project measures, NRCS shall promptly review the performance of the Sponsor to determine if the requirements of this agreement and fund expenditures as agreed have been met.

6. Make payment to the Sponsor covering NRCS' share of the cost upon receipt and approval of Form SF-270 and supporting documentation, withholding the amount of damages sustained by NRCS as provided for in this agreement. In the event there are questions regarding the SF 270 and supporting documentation, NRCS will contact the Sponsor in a timely manner to resolve concerns.

SPECIAL PROVISIONS

A. The furnishing of financial, administrative, and/or technical assistance above the original funding amount by NRCS is contingent on there being sufficient unobligated and uncommitted funding in the Emergency Watershed Protection Program that is available for obligation in the year in which the assistance will be provided. NRCS may not make commitments in excess of funds authorized by law or made administratively available. Congress may impose obligational limits on program funding that constrains NRCS's ability to provide such assistance.

B. In the event of default of a construction contract awarded pursuant to this agreement, any additional funds properly allocable as construction costs required to ensure completion of the job are to be provided in the same ratio as construction funds are contributed by the parties under the terms of this agreement. Any excess costs including interest resulting from a judgment collected from the defaulting contractor, or his or her surety, will be prorated between the Sponsor and NRCS in the same ratio as construction funds are contributed under the terms of the agreement.

C. Additional funds, including interest properly allocable as construction costs as determined by NRCS, required as a result of decision of the CO or a court judgment in favor of a claimant will be provided in the same ratio as construction funds are contributed under the terms of this agreement. NRCS will not be obligated to contribute funds under any agreement or commitment made by the Sponsor without prior concurrence of NRCS.

D. The State Conservationist may make adjustments in the estimated cost to NRCS set forth in this agreement for constructing the EWP measures. Such adjustments may increase or decrease the amount of estimated funds that are related to differences between such estimated cost and the amount of the awarded contract or to changes, differing site conditions, quantity variations, or other actions taken under the provisions of the contract. No adjustment will be made to change the cost sharing assistance provided by NRCS as set forth in this agreement, nor reduce funds below the amount required to carry out NRCS' share of the contract.

E. Except for item D. above, this document may be revised as mutually agreed through a written amendment duly executed by authorized officials of all signatory parties to this agreement.

F. NRCS, at its sole discretion, may refuse to cost share should the Sponsor, in administering the contract, elect to proceed without obtaining concurrence as set out in this agreement.

G. Once the project is completed and all requests for reimbursement submitted, any excess funding remaining in the agreement will be de-obligated from the agreement.

H. If inconsistencies arise between the language in the Statement of Work (SOW) in the agreement and the general terms and conditions, the language in the SOW takes precedence.

Expected Accomplishments and Deliverables

The following accomplishments and deliverable will be provided to NRCS.

1. One copy of the final engineering plans, specifications signed and sealed by a licensed professional engineer (if applicable), including engineer's cost estimate, and approved Plan of Operations (if applicable).
2. Signed NRCS-ADS-78 supported by an attorney's opinion.
3. One copy of the quality assurance plan.
4. One copy of the operation and maintenance plan (if applicable).
5. One copy of the notice of solicitation, bid abstract, and notice of award.
6. Certification that the project was installed in accordance with the plans and specifications.
7. As-built drawings of final construction signed by a licensed professional engineer within 30 days of completion of construction.
8. Quantities of the units of work applied for each site within 45 days of completion of construction.

Resources Required

No resources other than funding.

Milestones

Milestones shall include, but not limited to, the following items:

1. Pre-design conference within 30 days of signing agreement.
2. Submit to NRCS a schedule with time lines of major items to be completed within 14 days of the pre-design conference.
3. Acquire needed real property rights and permits (signed NRCS-ADS-78 supported by an attorney's opinion) prior to start of construction.
4. Obtain permits.
5. Complete any necessary surveys.
6. Complete draft engineering plans and specifications for NRCS review.
7. Complete final engineering plans and specifications.
8. Complete quality assurance plan and operation and maintenance plan (if applicable).
9. Solicit bids.
10. Award contract.
11. Manage construction contract and provide quality assurance as described in the QAP.
12. Provide final inspection.
13. Complete as-built drawings.
14. Submit final payment.

GENERAL TERMS AND CONDITIONS

Please reference the below link(s) for the General Terms and Conditions pertaining to this award:

NATURAL RESOURCES CONSERVATION SERVICE U.S. DEPARTMENT OF AGRICULTURE

GENERAL TERMS AND CONDITIONS GRANTS AND COOPERATIVE AGREEMENTS

I. APPLICABLE REGULATIONS

a. The recipient, and recipients of any subawards under this award, agree to comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 25, "Universal Identifier and System of Award Management" (2) 2 CFR Part 170, "Reporting Subaward and Executive Compensation Information" (3) 2 CFR Part 180, "OMB Guidelines To Agencies On Governmentwide Debarment And Suspension (Nonprocurement)" (4) 2 CFR Part 182, "Governmentwide Requirements for Drug-Free Workplace (Financial Assistance)" (5) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles, And Audit Requirements for Federal Awards"

b. The recipient, and recipients of any subawards under this award, assure and certify that they have and/or will comply with the following regulations, as applicable. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 175, "Award Term for Trafficking in Persons" (2) 2 CFR Part 417, "Nonprocurement Debarment and Suspension" (3) 2 CFR Part 418, "New Restrictions on Lobbying" (4) 2 CFR Part 421, "Requirements for Drug-Free Workplace (Financial Assistance)"

c. Allowable project costs will be determined in accordance with the authorizing statute, the purpose of the award, and to the extent applicable to the type of organizations receiving the award, regardless of tier. The following portions of the Code of Federal Regulations are hereby incorporated by reference. The full text of Code of Federal Regulations references may be found at https://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR and http://www.ecfr.gov/.

(1) 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles And Audit Requirements For Federal Awards" (2) 48 CFR Part 31, "Contract Cost Principles and Procedures"

II. UNALLOWABLE COSTS

The following costs are not allowed:

a. Costs above the amount authorized for the project b. Costs incurred after the expiration of the award including any no-cost extensions of time c. Costs that lie outside the scope of the approved project and any amendments thereto d. Compensation for injuries to persons or damage to property arising from project activities

This list is not exhaustive. For general information about the allowability of particular items of costs, please see 2 CFR Part 200, "Subpart E – Cost Principles", or direct specific inquiries to the NRCS administrative contact identified in the award.

III. CONFIDENTIALITY

a. Activities performed under this award may involve access to confidential and potentially sensitive information about governmental and landowner issues. The term "confidential information" means proprietary information or data of a personal nature about an individual, or information or data submitted by or pertaining to an organization. This information must not be disclosed without the prior written consent of NRCS.

b. The recipient's personnel will follow the rules and procedures of disclosure set forth in the Privacy Act of 1974, 5 U.S. C. Section 552a, and implementing regulations and policies with respect to systems of records determined to be subject to the Privacy Act. The recipient's personnel must also comply with privacy of personal information relating to natural resources conservation programs in accordance with section 1244 of Title II of the Farm Security and Rural Investment Act of 2002 (Public Law 107-171).

c. The recipient agrees to comply with NRCS guidelines and requirements regarding the disclosure of information protected under Section 1619 of the Food, Conservation, and Energy Act of 2008 (PL 110-246), U.S.C. 8791.

d. The recipient agrees to comply with the "Prohibition Against Certain Internal Confidentiality Agreements:"

1. You may not require your employees, contractors, or subrecipients seeking to report fraud, waste, or abuse to sign or comply with internal confidentiality agreements or statements prohibiting or otherwise restricting them from lawfully reporting that waste, fraud, or abuse to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information. 2. You must notify your employees, contractors, or subrecipients that the prohibitions and restrictions of any internal confidentiality agreements inconsistent with paragraph (1) of this award provision are no longer in effect. 3. The prohibition in paragraph (1) of this award provision does not contravene requirements applicable to any other form issued by a Federal department or agency governing the nondisclosure of classified information. 4. If NRCS determines that you are not in compliance with this award provision, NRCS: a. Will prohibit your use of funds under this award, in accordance with sections 743 and 744 of Division E of the Consolidated Appropriations Act, 2016, (Pub. L. 114-113) or any successor provision of law; b. May pursue other remedies available for your material failure to comply with award terms and conditions.

IV. PRIOR APPROVAL REQUIREMENTS

The following are the most common situations requiring prior approval. However, the recipient is also bound by any other prior approval requirements of the applicable administrative provisions and Federal cost principles.

a. Purpose or Deliverables.—When it is necessary for the recipient to modify the purpose or deliverables, the recipient must submit a written request and justification for the change along with the revised purpose or deliverables of the award to the NRCS administrative contact. The request should contain the following: 1. Grant or agreement number 2. Narrative explaining the requested modification to the project purpose or deliverables 3. A description of the revised purpose or deliverables 4. Signatures of the authorized representative, project director, or both

b. Subaward/contractual Arrangement.—The recipient must submit a justification for the proposed subaward/contractual arrangements, a statement of work to be performed, and a detailed budget for the subaward/contract to the NRCS administrative contact. Subaward/contractual arrangements disclosed in the application do not require additional postaward approval.

c. Absence or Change in Project Leadership.—When a project director or the person responsible for the direction or management of the project—

1. Relinquishes active direction of the project for more than 3 consecutive months or has a 25 percent or more reduction in time devoted to the project, the grantee must notify the NRCS administrative contact in writing, identifying who will be in charge during the project director's absence. The notification must include the qualifications and the signature of the replacement, signifying his or her willingness to serve on the project.

2. Severs his or her affiliation with the grantee, the grantee's options include— i. Replacing the project director. The grantee must request written approval of the replacement from the NRCS administrative contact and must include the qualifications and the signature of the replacement signifying his or her willingness to serve on the project. ii. Subcontracting to the former project director's new organization. The grantee must request approval from the administrative contact to replace the project manager and retain the award, and to subcontract to the former project director's new organization certain portions of the project to be completed by the former project director. iii. Relinquishing the award. The grantee must submit to the NRCS administrative contact a signed letter by the grantee and the project director that indicates that the grantee is relinquishing the award. The letter must include the date the project director is leaving and a summary of progress to date. A final Standard Form (SF) 425 reflecting the total amount of funds spent by the recipient must be attached to the letter.

3. Transfers the award to his or her new organization, the authorized organization's representative at the new organization must submit the following to the NRCS administrative contact as soon as the transfer date is firm and the amount of funds to be transferred is known: i. The forms and certifications included in the application package ii. A project summary and work statement covering the work to be completed under the project (deliverables and objectives must be the same as those outlined in the approved proposal) iii. An updated qualifications statement for the project director showing his or her new organizational affiliation iv. Any cost-sharing requirements under the original award transfer to the new institution; therefore, cost-sharing information must be included in the proposal from the new organization

Note: The transfer of an award from one organization to another can take up to 90 calendar days to accomplish, which may result in a delay in the project director resuming the project at the new organization.

d. Budget Revisions.—Budget revisions will be in accordance with 2 CFR Part 200.308.

e. No-Cost Extensions of Time.—When a no-cost extension of time is required, the recipient must submit a written request to the NRCS administrative contact no later than 30 calendar days before the expiration date of the award. The request must contain the following: The length of additional time required to complete the project and a justification for the extension A summary of progress to date An estimate of funds expected to remain unobligated on the scheduled expiration date A projected timetable to complete the portions of the project for which the extension is being requested Signature of the grantee and the project director A status of cost sharing to date (if applicable)

Note: An extension will not exceed 12 months. Requests for no-cost extensions received after the expiration of the award will not be granted. V. PAYMENTS

a. Payment by NRCS to the entity will be made monthly or quarterly (whichever is mutually agreed upon by both parties) on a reimbursable or advanced basis upon completion of work outlined herein. Payment will be executed upon the submission of a properly executed form SF-270 with supporting documentation. The SF-270 must cite the agreement number, remittance address, and billing period. The SF-270 must be sent to the NRCS administrative contact at the email address identified in block 8 of the Notice of Grant/Agreement Award.

b. Unless otherwise specified in the award, the recipient must receive payments through electronic funds transfers.

c. Recipients requesting advances should request payments in amounts necessary to meet their current needs pursuant to procedures contained in the Federal administrative provisions and 31 CFR Part 205.

d. The method of payment between the recipient and its contractors will be in accordance with the policies and procedures established by the recipient except that the contractors may not use the USDA Office of Financial Management/National Finance Center method to request payments. If the grantee makes advance payments to contractors, the grantee must ensure that the timing of such payments is designed to minimize elapsed time between the advance payment and the disbursement of funds. Payment requests from the grantee's contractors will not be sent to NRCS for review or approval.

e. Accounting records for all costs incurred under this award must be supported by source documentation. Such documentation includes, but is not limited to, canceled checks, paid bills, payroll records, and subaward documents. Labor cost charges to this award must be based upon salaries actually earned and the time actually worked on this award. All project costs must be incurred within the approved project period of this award, including any approved no-cost extension of time. Costs that cannot be supported by source documentation or that are incurred outside of the approved project period and budget may be disallowed and may result in award funds being returned to the Federal Government by the recipient.

VI. ACCRUALS

a. Recipients must submit an accrual estimate to the NRCS Program/Technical no later than 15 calendar days prior to the end of the quarter (submit by March 15, June 15, September 15 and December 15th). b. An accrual represents the value of goods or services provided to NRCS for which you have not requested payment. The quality and completeness of NRCS audited financial statements depends on your continuing cooperation and timely information. c. At a minimum, the signed accrual statement should include, "Under agreement number ____, at the close of the quarter ending ____, we have provided or anticipate providing goods or services that we have not requested payment for in the amount of $_____." Include the name and title of the person preparing the accrual estimate.

VII. FINANCIAL REPORTING

a. Recipients must submit a Federal Financial Report (FFR), SF 425 and 425A, in accordance with the following schedule:

Quarterly Schedule Report Due Date October 1 to December 31 January 31 January 1 to March 31 April 30 April 1 to June 30 July 31 July 1 to September 30 October 31

Reports must be submitted on an accrual accounting basis. Failure to submit reports in accordance with the above schedule may result in suspension or termination of award.

b. A final Report must be submitted no later than 90 calendar days after the completion of the award. For final FFRs, reporting end date must be the end date of the project or agreement period. The reports should be submitted to the NRCS administrative contact identified in award notifications.

VIII. PERFORMANCE MONITORING AND REPORTING

a. The recipient is responsible for monitoring day-to-day performance and for reporting to NRCS. If the project involves subaward arrangements, the recipient is also responsible for monitoring the performance of project activities under those arrangements to ensure that approved goals and schedules are met.

b. Every 6 months the recipient must submit a written progress report. Each report must cover— 1. A comparison of actual accomplishments with the goals and objectives established for the reporting period and, where project output can be quantified, a computation of the costs per unit of output.

2. The reasons why goals and objectives were not met, if appropriate.

3. Additional pertinent information including, where appropriate, analysis and explanation of cost overruns or high unit cost.

c. The recipient must submit a final performance report within 90 calendar days after completion of project.

IX. AUDIT REQUIREMENTS

The recipient is responsible for complying with audit requirements in accordance with 2 CFR 200, Subpart F. A non-Federal entity that expends $750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single or program-specific audit conducted for that year.

X. SPECIAL PROVISIONS

a. The recipient assures and certifies that it will comply with the minimum-wage and maximum- hour provisions of the Federal Fair Labor Standards Act.

b. Employees of NRCS will participate in efforts under this agreement solely as representatives of the United States. To this end, they may not participate as directors, officers, employees, or otherwise serve or hold themselves out as representatives of the recipient. They also may not assist the recipient with efforts to lobby Congress or to raise money through fundraising efforts. Further, NRCS employees must report to their immediate supervisor any negotiations with the recipient concerning future employment and must refrain from participation in efforts regarding such parties until approved by the agency.

c. Employees of the recipient will not be considered Federal employees or agents of the United States for any purposes under this agreement.

XI. PATENTS, INVENTIONS, COPYRIGHTS, AND ACKNOWLEDGMENT OF SUPPORT AND DISCLAIMER

a. Allocation of rights of patents, inventions, and copyrights must be in accordance with 2 CFR Part 200.315. This regulation provides that small businesses normally may retain the principal worldwide patent rights to any invention developed with USDA support.

b. In accordance with 37 CFR Section 401.14, each subject invention must be disclosed to the Federal agency within 2 months after the inventor discloses it in writing to contractor personnel responsible for patent matters. Invention disclosure statements pursuant to 37 CFR Section 401.14(c) must be made in writing to:

Acquisitions Division Grants and Agreements Services Branch 1400 Independence Avenue, SW. Room 6823 South Building Washington, DC 20250

c. USDA receives a royalty-free license for Federal Government use, reserves the right to require the patentee to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must manufacture it domestically.

d. The following acknowledgment of NRCS support must appear in the publication of any material, whether copyrighted or not, and any products in electronic formats (World Wide Web pages, computer programs, etc.) that is substantially based upon or developed under this award:

• "This material is based upon work supported by the Natural Resources Conservation Service, U.S. Department of Agriculture, under number [recipient should enter the applicable award number here]."

In addition, all publications and other materials, except scientific articles or papers published in scientific journals, must include the following statement:

• "Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the U.S. Department of Agriculture."

e. All publications printed with Federal Government funds will include the most current USDA nondiscrimination statement, available from the Public Affairs Division, Civil Rights Division, or on the USDA and NRCS home pages. If the material is too small to permit the full nondiscrimination statement to be included, the material must, at a minimum, include the statement:

• "USDA is an equal opportunity provider and employer." Any publication prepared with funding from this agreement must include acknowledgement to USDA, Natural Resources Conservation Service."

The recipient is responsible for ensuring that an acknowledgment of NRCS is made during news media interviews, including popular media such as radio, television, and news magazines, that discuss in a substantial way work funded by this award.

XII. COST-SHARING REQUIREMENTS

a. If the award has specific cost-sharing requirements, the cost-sharing participation in other projects may not be counted toward meeting the specific cost-share requirement of this award, and must come from non-Federal sources unless otherwise stated in the applicable program announcement.

b. Should the recipient become aware that it may be unable to provide the cost-sharing amount identified in this award, it must— 1. Immediately notify the NRCS administrative contact of the situation. 2. Specify the steps it plans to take to secure replacement cost sharing. 3. Indicate the plans to either continue or phase out the project in the absence of cost sharing.

c. If NRCS agrees to the organization's proposed plans, the recipient will be notified accordingly. If the organization's plans are not acceptable to NRCS, the award may be subject to termination. NRCS modifications to proposed cost sharing revisions are made on a case-by-case basis.

d. Failure by the recipient to notify NRCS in accordance with paragraph (b) above may result in the disallowance of some or all the costs charged to the award, the subsequent recovery by NRCS of some of the NRCS funds provided under the award, and possible termination of the award, and may constitute a violation of the terms and conditions of the award so serious as to provide grounds for subsequent suspension or debarment.

e. The recipient must maintain records of all project costs that are claimed by the recipient as cost sharing as well records of costs to be paid by NRCS. If the recipient's cost participation includes in-kind contributions, the basis for determining the valuation for volunteer services and donated property must be documented.

XIII. PROGRAM INCOME

Income derived from patents, inventions, or copyrights will be disposed of in accordance with the recipient's own policies. General program income earned under this award during the period of NRCS support must be added to total project funds and used to further the purpose and scope of this award or the legislation under which this award is made.

XIV. NONEXPENDABLE EQUIPMENT

Recipients purchasing equipment or products with funds provided under this award are encouraged to use such funds to purchase only American-made equipment and products. Title to nonexpendable equipment purchased with award funds will vest in the recipient upon completion of the award project and acceptance by NRCS of required final reports. When equipment is no longer needed by the recipient and the per-unit fair market value is less than $5,000, the recipient may retain, sell, or dispose of the equipment with no further obligation to NRCS. However, if the per-unit fair market value is $5,000 or more, the recipient must submit a written request to the NRCS administrative contact for disposition instructions.

XV. LIMIT OF FEDERAL LIABILITY

The maximum financial obligation of NRCS to the recipient is the amount of funds indicated in the award as obligated by NRCS. However, in the event that an erroneous amount is stated on the approved budget, or any supporting document relating to the award, NRCS will have the unilateral right to make the correction and to make an appropriate adjustment in the NRCS share of the award to align with the Federal amount authorized.

XVI. MODIFICATIONS AND TERMINATIONS

NRCS may amend or modify the award through an exchange of correspondence between authorized officials of the recipient and NRCS. The award is subject to termination if NRCS determines that the recipient has failed to comply with the terms and conditions of the award. In the event that the award is terminated, the financial obligations of the parties

will be those set forth in 2 CFR Part 200.339.

XVII. AWARD CLOSEOUT

Award closeout is the process by which NRCS determines that all required project activities have been performed satisfactorily and all necessary administrative actions have been completed.

QUALITY ASSURANCE PLAN
Emergency Watershed Protection Program
Motley Court Gulley Improvements Project
Escambia County, Florida

The Quality Assurance Plan (QAP) outlines the responsibilities of the Escambia County to ensure that the works of improvement are installed in accordance with the plans and specifications. Escambia County will designate a person to fulfill the inspection responsibilities.

I. ITEMS OF WORK TO BE INSPECTED

The work to be accomplished under this contract consists of clearing and grubbing, excavation, earth-fill, installing drainage inlets and outlets, structure removal, placing concrete, installing sand cement bag riprap, and vegetative measures.

The intensity of the inspection of these items will vary from periodic to continuous. The intensity of the inspection will depend on the complexity of the work item and what the damaging results would be should that portion of the installation fail.

The timing and intensity of the required inspection is shown in Table 1. Support personnel should be provided as needed to assist the assigned inspector.

Other type work items may be encountered during construction. The intensity of the inspection will be determined by the Inspector or Engineer.

A. Clearing and Grubbing

Very limited inspection will be required on clearing and grubbing. The inspector will check the site to verify that the item was completed in accordance with the plan and specifications.

B. Excavating and/or Backfilling

Excavating and/or backfilling operations will require periodic inspection. The inspector shall be on-site in situations where the excavation or backfill is set to a grade that is critical for the installation of structural measures. The inspector shall be on-site to ensure that unsuitable foundation material is removed prior to installation of pipes and inlets. The inspector shall be on-site to ensure the earth-fill is of suitable material and to make sure the earth-fill has sufficient moisture content and is compacted in accordance with the plans and specifications.

Compaction tests shall be performed for those items where the Class “A” compaction is suspect. However, compaction tests will be required for each stilling basin concrete apron (minimum of one per basin). The test shall be performed by a testing lab approved by the engineer.

The inspector shall ensure final earth-fill elevations in the asphalt removal area does not divert storm runoff from its present route.

The quantity of earth-fill material will not be measured.

C. Pipe

The inspector shall check the quality of pipe materials prior to installation to

ensure it meets the plans and specifications. Special care should be used in checking the material, length of pipe, pipe gage, coating, and diameter.

Continuous inspection will be required when the pipe inverts are set so that the system will function properly. Continuous inspection will be required while laying the pipe, installing connecting bands and gaskets, and backfilling around the pipe. It is critical the pipe is bedded properly and backfill operations are performed in a manner to not lift the pipe off its bedding.

D. Concrete Inlets

The inspector shall obtain shop drawings for each inlet, check the drawings, and then forward a checked copy to the engineer for review and approval prior to its installation.

The inspection effort will be to verify the inlet is the correct size, grate material, and the pipe opening and slot is located at the correct elevation and orientation.

The inspector shall check that the pipe is properly grouted into the inlet such that leakage will not occur.

The inspector shall check that, if a skimmer is required, it is installed according to the plans.

Inspect and check the elevation of the subbase of the inlets before they are installed.

E. Concrete

The inspector shall inspect all necessary forms prior to placement of concrete to ensure planned grades are met. Continuous inspection will be required during placement of all concrete to ensure allowed delivery times are not exceeded and concrete slump meets specifications.

The quantity of concrete will be computed to the neat lines and grades as planned.

F. Geotextiles

This item includes filter fabrics, high performance turf management systems, and geotextile fabric as specified in the contract documents. The inspection effort for this item will be to ensure proper material and installation of the geotextile. The inspector will need to check the geotextile to ensure that the type specified is installed. The inspector will record the type, weight, and manufacturer of the geotextile. The inspector will determine and stake the area to be covered by the geotextile.

The quantity of geotextile will not be measured.

G. Structure Removal

Inspection effort required will be to verify the inlets, pipe, and concrete are removed from the designated areas. Inspection will also be required to verify the existing fish cleaning table and appurtenances within the work area is removed and re-installed according to the specification. The engineer will consult with the

landowner on where it will be installed.

H. Rip-Rap Installation

Periodic inspection will be required to ensure that rip rap placement is completed in the prescribed locations in reasonable conformance to design line and grade. Inspection will be necessary to verify depths of rip rap and that underlying geotextile fabric is in place.

The inspector shall check that the rip-rap is installed according to the details in the plans.

I. Vegetative Measures

Periodic inspection will be required on all areas to be vegetated. The inspector will need to stake all areas to be vegetated and the type of vegetative requirement at each area. Inspection will require that the sod be checked as to the quality and type specified. The quantity and type of seed, fertilizer and lime will be verified by the inspector. Vegetated areas will be measured and the inspector will need to compute quantities.

Table 1

Item	Inspector	Engineer

II. INSPECTOR SKILLS NEEDED TO PERFORM THE REQUIRED INSPECTIONS

A. Ability to manage an inspection program effectively.

B. Must understand the design concepts of the job to ensure that it is installed properly and functions properly.

C. Must be familiar with quality assurance and inspection needed for installation of earth-fill, concrete inlets, pipes, geotextiles and other materials used in the work.

D. Ability to establish and maintain effective working relationships and clear communications with the contractor and others involved or affected by the project.

E. Thorough understanding of all contract provisions.

F. Ability to recognize potential safety hazards and take the necessary actions to avoid them to the extent possible.

G. Ability to anticipate potential conflicts of work activities with existing utilities and fixed improvements and to take the necessary actions to resolve them in the most efficient manner.

H. Ability to administer contract to include preparation of contract modifications and pay estimates on a timely basis.

III. STAFF NEEDED TO PERFORM REQUIRED INSPECTIONS

One Inspector shall be available to inspect the construction progress at critical points during construction as shown in Table 1. The Inspector will ensure overall compliance with plans and specifications and recommend needed modifications

The Inspector will be needed for the duration of the contract. In addition, one additional person will be needed to be on call to fill in if the Inspector is absent from work.

The Escambia County Engineer will periodically check on construction and review all requested modifications.

IV. TESTING EQUIPMENT AND FACILITIES NEEDED

No testing equipment nor facilities will be needed by the Inspector. Concrete slump tests, concrete temperature, and required compaction tests will be performed by the contractor.

Compaction test will be performed by a testing lab approved by the engineer.

The inspector will need equipment such as a survey level, rod, and measuring tape to check the contractors work.

V. NAMES OF QUALIFIED PERSONNEL

Escambia County will be responsible for assigning a qualified person to inspect the construction of the works of improvement

Escambia County will provide a project engineer to make reviews by visiting the work site and/or by verbal communications with the Inspector to assist on problems that may develop requiring changes in the design and to gain familiarity in case of contractual problems with the contractor. DRMP will represent Escambia County.

VI. DOCUMENTATION AND REPORTS TO BE PREPARED

A daily job diary shall be kept by the Inspector and entries shall be made daily for the duration of the contract.

Survey notes documenting the installation and measurements shall be recorded in a bound field book. Quantity computations for all materials shall be recorded including measurements. The computations shall be checked and initialed by a second person.

Photos and/or slides shall be taken throughout the term of the contract. Photos shall be a size of 3" x 5".

Color slides are the preferred documentation. The photos and/or slides retained shall be logged clearly identifying the job and what the picture is about. The log and photos and/or slides shall be submitted along with the as-builts.

At the completion of the job, the Inspector shall furnish to the Escambia County Engineer a certification that the job was installed as planned and meets all specifications. The engineer shall also furnish a set of record drawings and a list of the items installed along with the final installed quantity of each. The engineering drawings shall be kept up to date during construction and the final record drawings shall be checked by the Escambia County project engineer.

The above listed documentation shall be completed and mailed to the Escambia County Engineer within 10 work days of the completion of the work.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-15650 **County Administrator's Report 10. 18.**
BCC Regular Meeting **Budget & Finance Consent**
Meeting Date: 05/16/2019
Issue: Contract Renewal for Pharmaceutical Supplies for Escambia County
From: Paul Nobles, Purchasing Manager
Organization: Asst County Administrator - Lovoy
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Contract Renewal for Pharmaceutical Supplies for Escambia County - Paul Nobles, Purchasing Manager, Office of Purchasing

That the Board approve the utilization of the first of two possible one-year renewal periods, as outlined in Section 2, Term of the Agreement, Relating to Pharmaceutical Supplies with Bound Tree Medical, LLC, per PD 14-15.084, Pharmaceutical Supplies for Escambia County, retroactive to January 7, 2019. The original Agreement was approved by the Board on January 7, 2016.

[Funding: Fund 408, Emergency Medical Services, Cost Center 330302, EMS Operations, Object Code 55201, Operating Supplies]

BACKGROUND:

The Invitation to Bid PD 14-15084 Pharmaceutical Supplies for Escambia County was advertised in the Pensacola News Journal on August 17, 2015 per the Purchasing Policy for utilization of Cooperative Purchase Agreements- PP120. One bid and one "no-bid" were received on September 16, 2016 for the multiple award Contract for the purchase of Pharmaceutical Supplies for Escambia County.

BUDGETARY IMPACT:

Fund 408, Emergency Medical Services, Cost Center 330302, EMS Operations, Object Code 55201, Operating Supplies

LEGAL CONSIDERATIONS/SIGN-OFF:

Original Signed Agreement

AGREEMENT FOR PHARMACEUTICAL SUPPLIES PD 14-15.084

THIS AGREEMENT is made this 7th day of January, 2016, by and between Escambia County, Florida, a political subdivision of the State of Florida (hereinafter referred to as "County"), whose mailing address is 221 Palafox Place, Pensacola, Florida 32502, and Bound Tree Medical, LLC (hereinafter referred to as "Contractor"), a foreign for profit limited liability company authorized to conduct business in the State of Florida, whose federal identification number is 31-1739487 and whose principal address is 5000 Tuttle Crossing Boulevard, Dublin, OH 43016.

WITNESSETH:

WHEREAS, on August 17, 2015, the County issued an Invitation to Bid (PD 14-15.084) seeking vendors to provide pharmaceutical supplies; and

WHEREAS, the Contractor was the most responsive and responsible bidder proposing to provide such supplies; and

WHEREAS, the County desires to enter into an agreement with the Contractor for the provision of providing such supplies as set forth herein.

NOW, THEREFORE, in consideration of the mutual terms and conditions, promises, covenants and payments hereinafter set forth, the County and the Contractor agree as follows:

1. Recitals. The recitals contained in the preamble of this Agreement are declared to be true and correct and are hereby incorporated into this Agreement.

2. Term. This Agreement shall commence upon the date last executed by the parties hereto and continue for a term of three (3) years. Upon mutual agreement of the parties, the Agreement may be renewed for two additional one (1) year periods for a total of five (5) years.

After all options to renew have been exhausted and it is determined that interim performance is required, the County may unilaterally extend this Agreement up to an additional six (6) months. The County shall provide written notice of the desire to extend the agreement no later than sixty (60) days prior to the expiration of the last term. The total duration of this Agreement shall not exceed the duration of 5.5 years.

3. Scope. Contractor agrees to perform in accordance with the terms and conditions as outlined in Escambia County's Invitation to Bid for Pharmaceutical Supplies, Specification No. P.D. 14-15.084, attached hereto as **Exhibit "A"**. In the event of a conflict between the terms of the Exhibit referenced above and this Agreement, the terms of this Agreement shall prevail. The items specified on the bid form are sample items, and the bid form is not intended to serve as an inclusive listing of all items available for purchase under the subject agreement.

4. Compensation. County shall pay Contractor for items in accordance with the Contractor's Bid Form, dated September 14, 2015, attached hereto as **Exhibit "B"**. Items that are not listed on the bid form shall be available at the currently published Bound Tree Medical Emergency Medical Product Catalog list price less any applicable discount.

5. Purchase Orders. The County shall issue written purchase orders to the Contractor on an as-needed basis. The items shall be described in detail and the time frame in which delivery needs to be accomplished will be stated in the purchase order. No minimum quantity is guaranteed during the term of this agreement, and only those ordered pursuant to a purchase order may be compensated.

6. Method of Payment/Billing. Contractor may request payment from County by the submission of a properly executed original invoice. Invoices shall reflect the amount due and owing for the value of items received and accepted with appropriate supporting documentation. The County agrees it shall make its best efforts to pay Contractor within thirty (30) days of receipt and approval of Contractor's invoice. Payments under this agreement and interest on any late payments shall be governed by and construed in accordance with the Florida Prompt Payment Act, §§218.70, et seq., Florida Statutes, as amended.

7. Termination. This Agreement may be terminated by County immediately for cause or for convenience upon providing thirty (30) days written notice to Contractor. This Agreement may be terminated for cause by the Contractor upon providing ninety (90) days written notice to the County. In the event of termination by either party as provided herein, the Contractor shall be paid for materials purchased through the date of termination.

8. Indemnification. The Contractor agrees to save harmless, indemnify, and defend County and its agents, officers and employees from any and all claims, suits, actions, damages, liabilities, expenditures or causes of action of any kind, losses, penalties, interest, demands, judgments, and cost of suit, including attorneys' fees and paralegals' fees, for any expense, damage or liability incurred by any of them, whether for personal injury, death, property damage, direct or consequential damages, or economic loss, including environmental impairment, arising directly or indirectly, on account of or in connection with the Contractor's negligent, reckless, or intentional wrongful misconduct in the performance of this Agreement or by any person, firm, or corporation to whom any portion of the performance of this Agreement is subcontracted to or used by the Contractor or by anyone for whom the Contractor is legally liable. The parties understand and agree that such indemnification by the Contractor relating to any matter, which is the subject of this Agreement, shall extend throughout the term of this Agreement and any statutes of limitation thereafter. The Contractor's obligation shall not be limited by, or in any way to, any insurance coverage or by any provision in or exclusion or omission from any policy of insurance. The Contractor agrees to pay on behalf of Escambia County, as well as provide a legal defense for the County, both of

which will be done only if and when requested by the County, for all claims relating to this Agreement. Such payment on the behalf of the County shall be in addition to any and all other legal remedies available to the County and shall not be considered to be the County's exclusive remedy.

9. Insurance. The Contractor is required to carry the following insurance:

(a) Commercial General Liability, Form CG1, with $1,000,000 per occurrence. Excess or umbrella insurance may be purchased to make up the difference, if any, between the policy limits of the underlying policies.

(b) Florida statutory Workers' Compensation and employers' liability with employer's liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease.

(c) It is understood and agreed by the parties that in the event that the Contractor consists of a joint venture, partnership, or other association of professional or business firms, each such firm shall be required to individually carry the above cited coverages.

(d) Contractor agrees all liability coverage shall be through carriers admitted to do business in the State of Florida. Carriers shall be "A" or other Secure Best Rating with a minimum financial size of "VII", according to the A.M. Best Key Rating Guide Latest Edition. The insurance policies shall be endorsed to provide at least 30 days advance notice of cancellation, nonrenewal or adverse change. Such notices shall be mailed to Escambia County, Office of Purchasing, Post Office Box 1591, Pensacola, Florida 32597.

(e) The Board of County Commissioners and Escambia County shall be endorsed as "additional insureds" on all liability policies (except Workers' Compensation and professional liability). Certificates of Insurance shall be provided to Escambia County, Office of Purchasing, Post Office Box 1591, Pensacola, Florida 32597 prior to commencement of work hereunder. Certificates shall reflect the additional insured status of Escambia County. The Board of County Commissioners and Escambia County shall also be the certificate holders.

10. Independent Contractor Status. In the performance of this Agreement hereunder, Contractor is an independent contractor. Contractor shall not hold itself out as an employee, agent or servant of the County; and Contractor shall not have the power or authority to bind the County in any promise, agreement or representation, other than as specifically provided in this Agreement or as may be expressly provided hereafter in writing by an authorized official of the County.

11. Notice. Any notice, payment or other communication under this Agreement required hereunder or desired by the party giving such notice shall be given in writing

and delivered by hand or through the instrumentality of certified mail of the United States Postal Service or private courier service, such as Federal Express. Unless otherwise notified in writing of a new address, notice shall be made to each party as follows:

To: Bound Tree Medical, LLC	To: Escambia County
Attention: Jeffery Prestell	Attention: County Administrator
5000 Tuttle Creek Crossing Blvd.	221 Palafox Place, Suite 420
Dublin, OH 43016	Pensacola, Florida 32502

Rejection, or other refusal by the addressee to accept, or the inability of the courier service or the United States Postal Service to deliver because of a changed address of which no notice was given, shall be deemed to be receipt of the notice sent. Any party shall have the right, from time to time, to change the address to which notices shall be sent by giving the other party at least ten (10) days prior notice of the address change.

12 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida, and the parties stipulate that venue shall be in the County of Escambia.

13. Public Records. The Contractor acknowledges that this Agreement and any related financial records, audits, reports, plans correspondence, and other documents may be subject to disclosure to members of the public pursuant to Chapter 119, Florida Statutes. In the event the Contractor fails to abide by the provisions of Chapter 119, Florida Statutes, the County may, without prejudice to any other right or remedy and after giving the Contractor seven days written notice, during which period the Contractor still fails to allow access to such documents, terminate the contract.

14. Entire Agreement. This Agreement contains the entire agreement between the parties and supersedes all prior oral or written agreements. Contractor acknowledges that it has not relied upon any statement, representation, prior or contemporaneous written or oral promises, agreements or warranties, except such as are expressed herein. The terms and conditions of this Agreement can only be amended in writing upon mutual agreement of the parties.

15. Compliance with Laws. Contractor agrees to comply with all federal, state and local laws, rules, policies, or guidelines related to the performance of this Agreement, including but not limited to properly registering as a lobbyist for representation of the County with the appropriate governmental entities as well as making all necessary lobbying reports in a timely manner to the proper authorities.

16. Assignment of Agreement. This Agreement, or any interest herein, shall not be assigned, transferred, or otherwise encumbered, under any circumstances, by Contractor without the prior written consent of the County. However, the Agreement

shall run with the Escambia County Board of County Commissioners and its successors.

17. Miscellaneous. If any term or condition of this Agreement shall be invalid or unenforceable, the remainder of the terms and conditions of this Agreement shall remain in full force and effect. This Agreement shall not be more strictly construed against either party hereto by reason of the fact that one party may have drafted or prepared any or all of the terms and provisions hereof.

18. Annual Appropriation. Pursuant to the requirements of Florida law and Article II of Chapter 46, Escambia County Code of Ordinances, the County's performance and obligation to fund this Agreement shall be contingent upon an annual appropriation by the Escambia County Board of County Commissioners.

19. Authority. Each individual executing this Agreement on behalf of a corporate or governmental party represents and warrants that he/she is duly authorized to execute and deliver this Agreement on behalf of said party, in accordance with any a duly adopted action of the governing board of said party in accordance with applicable law, and that this Agreement is binding upon said party in accordance with its terms.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the respective dates under each signature:

SPECIAL ACCOMMODATIONS:
Any person requiring special accommodations to attend or participate, pursuant to the Americans with Disabilities Act, should call the Office of Purchasing, (850) 595-4980 at least five (5) working days prior to the solicitation opening.

NOTICE

It is the specific legislative intent of the Board of County Commissioners that NO CONTRACT under this solicitation shall be formed between Escambia County and the awardee vendor until such time as the contract is executed by the last party to the transaction.

NOTICE

In accordance with Sec. 46-110(e) of the Escambia Code of Ordinances, all bid solicitation documents shall include the following notice to vendors of the local vendor preference policy:

Preference in purchase of commodities and services by means of competitive bid.
Except where federal or state law, or any other funding source, mandates to the contrary, Escambia County may give preference to local businesses in the following manner:

Competitive bid (local price match option). Each formal competitive bid solicitation (i.e. sealed bids) shall clearly identify how the price order of the bids received will be evaluated and determined.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000 and $249,999, and the bid submitted by one or more qualified and responsive local businesses is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000 and $999,999, and the bid submitted by one or more qualified and responsive local businesses is within **three percent (3%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000, and the bid submitted by one or more qualified and responsive local businesses is within **two percent (2%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

In such instances, staff shall first verify whether the lowest non-local bidder and the lowest local bidder are in fact qualified and responsive bidders. Next, the purchasing department shall invite the lowest local bidder in writing to submit a matching offer which shall be submitted in writing to the office of purchasing within five (5) business days thereafter.

If the lowest local bidder does not respond or otherwise submits a written offer that does not fully match the lowest bid from the lowest non-local bidder tendered previously then award shall be made to the lowest overall qualified and responsive non-local bidder.

In the event a local bidder is awarded a contract pursuant to this section, any requests for change orders increasing the cost of the project must be approved by the board of county commissioners.

Effective July 1, 2015, the County may not use a local preference "for a competitive solicitation for **construction services** in which **50 percent or more** of the cost will be paid from state appropriated funds which have been appropriated at the time of the competitive solicitation. For any such solicitation, the County must disclose in the bid package that "any applicable local ordinance or regulation does not include any local preference..." See §255.0991, Florida Statutes.

BOTTOM OF LINE (BOL)

This solicitation may offer a balance of line for Pharmaceutical Supplies for Escambia County. Pricing for BOL items will be determined by a percentage discount off of the supplier's retail price list. This pricing percentage discount offered must be greater than 25%, and must be entered on the BOL Statement located on Page 4 of Bid Form of this Invitation to Bid. The BOL Statement Sheet shall be completed and detailed product information in Excel format shall be submitted with your bid, if items are to be offered. For the purposes of this ITB, detailed product information shall contain all of the information required of the line-item products including the Item Description, Manufacturer, Brand Name, Item Retail Price, (Your) Bid Price, Number of Items per Case and FDA 510(k) or US DOT certification number. BOL items and discounts shall not be considered as part of the basis for award. Escambia County, FL reserves the right to accept or reject any or all balance of line items offered, if determined to be in the best interest of the County. Furthermore, bidder shall not include as BOL items any of the items awarded that are listed on the bid price page section of this ITB. Eligible users may purchase off of the BOL, or may competitively bid any BOL item without Contract Exception. County agencies shall not purchase a BOL item which was awarded as an item of bid to another vendor on this contract.

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(a), FLORIDA STATUTES, ON ENTITY CRIMES

1. This sworn statement is submitted to _____
(print name of the public entity)

by_____
(print individual's name and title)

for_____
(print name of entity submitting sworn statement)

whose business address is

_____

_____

and (if applicable) its Federal Employer Identification Number (FEIN) is:

_____

(If the entity has no FEIN, include the Social Security Number of the Individual signing this sworn statement: _____

2. I understand that a "public entity crime" as defined in Paragraph 287.133(1)(g), **Florida Statutes**, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision or any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in Paragraph 287.133(1)(b), **Florida Statutes**, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), **Florida Statutes**, means:

   a. A predecessor or successor of a person convicted of a public entity crime; or
   b. An entity under the control any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months shall be considered an affiliate.

c. I understand that a "person" as defined in Paragraph 287.133(1)(e), **Florida Statutes**, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into binding contract and which bids or applies to bid on contracts for the provision of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

d. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. **(indicate which statement applies.)**

_____ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. **(attach a copy of the final order)**

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 (ONE) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THOROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

Drug-Free Workplace Form

The undersigned vendor, in accordance with Florida Statute 287.087 hereby certifies that _____ does:
Name of Business

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, employee assistance programs and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in Paragraph 1.

4. In the statement specified in Paragraph 1, notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in a drug assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Paragraphs 1 through 5.

SPECIAL TERMS AND CONDITIONS

The Board of County Commissioners, Escambia County, Florida, invites your company to submit a sealed offer on the item(s) as listed in this solicitation request.

All terms and conditions below are a part of this request, and no offer will be accepted unless all these conditions have been complied with. The County reserves the right to waive informalities in any offer; to reject any or all offers, in whole or in part, and/or to accept the offer(s) that in its judgment is from the lowest and most responsible and responsive offeror(s).

Instructions to Offerors

1. **General Information**

All offers to be considered shall be in the possession of the Office of Purchasing prior to the time of the solicitation closing. Offers may be mailed to 213 Palafox Place, Room 11.101, Pensacola, Florida 32502 or delivered to the Office of Purchasing, 2nd floor, Room 11.101, Matt Langley Bell, III Bldg., 213 Palafox Place, Pensacola, Florida 32502, in a sealed envelope clearly marked:

Specification Number PD 14-15.084, "Pharmaceutical Supplies for Escambia County", Name of Submitting Firm, Time and Date due.
Note: If you are using a courier service; Federal Express, Airborne, UPS, etc., you must mark airbill and envelope or box with Specification Number and Project Name.

Regardless of the method of delivery, each offeror shall be responsible for his offer(s) being delivered on time as the County assumes no responsibility for same. Offers offered or received after the time set for solicitation closing will be rejected and returned unopened to the offeror(s).

The following policy will apply to all methods of source selection:

Conduct of Participants

After the issuance of any solicitation, all bidders/proposers/protestors or individuals acting on their behalf are hereby prohibited from **lobbying** as defined herein or otherwise attempting to persuade or influence any elected County officials, their agents or employees or any member of the relevant selection committee at any time during the **blackout period** as defined herein; provided, however, nothing herein shall prohibit bidders/proposers/protestors or individuals acting on their behalf from communicating with the purchasing staff concerning a pending solicitation unless otherwise provided for in the solicitation or unless otherwise directed by the purchasing manager.

Definitions

Blackout period means the period between the time the bids/proposals for invitations for bid or the request for proposal, or qualifications, or information, or requests for letters of interest, or the invitation to negotiate, as applicable, are received at the Escambia County Office of Purchasing and the time the Board awards the contract and any resulting bid protest is resolved or the solicitation is otherwise canceled.

Lobbying means the attempt to influence the thinking of elected County officials, their agents or employees or any member of the relevant Selection Committee for or against a specific cause related to a pending solicitation for goods or services, in person, by mail, by facsimile, by telephone, by electronic mail, or by any other means of communication.

Sanctions

The Board may impose any one or more of the following sanctions on a nonemployee for violations of the policy set forth herein:

(a) Rejection/disqualification of submittal
(b) Termination of contracts; or
(c) Suspension or debarment as provided in Sec. 46-102 of the Escambia County Code of Ordinances.

This policy is not intended to alter the procedure for Protested Solicitations and Awards as set forth in the Sec. 46-101 of the Escambia County Code of Ordinances.

2. **Bid Surety**

Each offer shall be accompanied by a bid bond, cashier's check or certified check in the amount of **$1,000** of the total offer.

Checks or bonds are to be made payable to Escambia County, Florida. The amount of the bond or check is the amount of liquidated damages agreed upon should the offeror fail or refuse to enter into a contract with the County.

A County warrant in the amount of the bid check(s) of the successful offeror(s) will be returned immediately after the offeror and the County are mutually bound by contract as evidenced by signatures thereto by an authorized representative of both the offeror and the County, and/or the offeror accepts the purchase order by signing the solicitation, offer and award form/acceptance copy of same and returning to the County Purchasing department. Any unsuccessful offeror(s) will have the amounts of his cashier's or certified check returned via county warrant promptly after award.

All offerors agree that any interest earned on any bid surety while in possession of the County, or its agents, shall be retained by the County.

3. **Procurement Questions**

Procurement questions may be directed to Joe Pillitary, CPPO, CPPB, Purchasing Coordinator, (850) 595-4878, Fax (850) 595-4805. Technical questions may be directed to Tamika Williams, (850) 471-6425, Fax (850) 471-6455 no later than 5:00p.m., CDT, September 10, 2015.

4. **Bid Forms**

This Solicitation contains a Solicitation, Offer and Award Form and Bid Form which shall be submitted in a sealed envelope, in duplicate with Original signatures in indelible ink signed in the proper spaces. Responses on vendor forms will not be accepted.
The Offerors Checklist included in this solicitation provides instructions to the offeror on the documentation to be submitted during the procurement process.

5. **F.O.B. Point**

Offers showing other than F.O.B. destination will not be accepted. The prices shall include all costs of packaging, transporting, delivery and unloading **(this includes inside delivery if requested)** to designated point within Escambia County and not to exceed fourteen (14) calendar days.

6. **Emergency Services**

The contractor resulting from this solicitation is for services that are required during **EMERGENCY** situations such as hurricanes, major fires, etc. Time is of the essence during these situations and the vendor awarded this contract should be able to be contacted at any time, day or night. The Bid Form provides for the emergency information to be supplied. Please be sure to include **all** this information when returning your bid.

Contract Information

NOTICE

It is the specific legislative intent of the Board of County Commissioners that NO CONTRACT under this solicitation shall be formed between Escambia County and the awardee vendor until such time as the contract is executed by the last party to the transaction.

7. **Contract Term/Renewal/Termination**

A. The contract resulting from this Solicitation shall commence effective upon execution by both parties and extend for a period of twelve (12) months. The contract may be renewed for additional twelve (12) months periods, up to a maximum thirty-six (36) months upon mutual agreement of both parties. If any such renewal results in changes in the terms or conditions, such changes shall be reduced to writing as an addendum to this contract and such addendum shall be executed by both parties and approved by the Board of County Commissioners.

Renewal of the contract shall be subject to appropriation of funds by the Board of County Commissioners.

B. The initiation County department(s) shall issue release (purchase) orders against the term contract on an "as needed" basis.

C. The contract may be canceled by the awarded vendor, for good cause, upon ninety (90) days prior written notice.

D. The County retains the right to terminate the contract, with or without good cause, upon thirty (30) days prior written notice.

E. In the event of termination by either party as provided herein, the awarded vendor shall be paid for services performed through the date of termination.

8. **Contract Term/Renewal**

The contract resulting from this solicitation shall commence effective upon execution by both parties and extend for a period of twelve (12) months. The County may unilaterally renew the contract for the periods specified on the bid form for thirty-six (36) months. An additional six (6) months extension may also be unilaterally exercised at the County's discretion.

9. **Option to Extend the Term of the Contract**

The County may unilaterally extend the term of this contract by written notice to the contractor at least sixty (60) days before the expiration of any contract term. The exercise of the option shall be for the period specified and for the prices listed on the bid/proposal form. All other terms and conditions of the contract shall apply to the option periods. The total duration of this contract,

including the exercise of all options, shall not exceed 3.5 years.

10. **Interim Extension of Performance**

After all options have been exercised, and it is determined that interim performance is required to allow for the solicitation and award of a new contract, the County may unilaterally extend the contract for a maximum period of six months. Pricing, delivery and all other terms and conditions of the contract shall apply during this period.

11. **Pricing**

All items sold to the county as a result of this award are subject to post sale audit adjustment. In the event an audit indicates offeror has not honored quoted price lists and discounts, offeror will be liable for any and all overage charges.

12. **Price Adjustment**

The contract resulting from this Solicitation may include provisions for twelve month, price adjustments. Written request for price adjustment may be made every twelve (12) months, no less than 30 days prior to the requested effective date. Any increase price adjustment(s) shall be accompanied by written justification attesting that the request is a bonafide cost increase to the vendor. All price adjustments shall be reviewed by the County's designated representative. If an adjustment in price is approved, it shall be accomplished by written amendment to this contract and approved by the Board of County Commissioners.

13. **Purchasing Agreements with other Government Agencies**

The submission of any offer in response to this Solicitation constitutes an offer made under the same terms and conditions, for the same contract price, to other governmental agencies, unless otherwise stipulated by the offeror on the bid/proposal form.

Each governmental agency desiring to accept these offers, and make an award thereof, shall do so independently of any other governmental agency. Each agency shall be responsible for its own purchases and each shall be liable only for materials ordered and received by it, and no agency assumes any liability by virtue of this solicitation.

14. **Termination**

A. The contract may be canceled by the contractor, for good cause, upon ninety (90) days prior written notice.

B. The County retains the right to terminate the contract, with or without good cause, upon thirty (30) days prior written notice.

C. In the event of termination by either party as provided herein, the awarded vendor shall be paid for services performed through the date of termination.

15. **Ordering**

The County will issue release (purchase) orders against the contract on an as needed basis for the supplies or services listed on the bid form.
The County has adopted the Visa Purchasing Card Program. The Visa Purchasing Card may be used for purchases on an as needed basis, for the supplies or sources listed on the bid form, for less than $1000.00 per individual transaction.
The County can issue vouchers for less than $1000.00 against the contract, on an as needed basis, for the supplies or services listed on the bid form.

16. **Term of Offer**

An offer shall constitute an irrevocable offer for a period of ninety (90) days from the solicitation opening date or until the date of award, whichever is earlier, without forfeiting bid bond or check. In the event that an award is not made by the county within ninety (90) days from the solicitation opening date, the offeror may withdraw his offer or provide a written extension of his offer.

17. **Award**

Award shall be made on an "all-or-none total" basis the lowest total of Twenty (20) sample bid items on the form. Indefinite quantity, indefinite delivery contracts and multiple awards may be considered.

18. **Termination**

The purchase order or contract will be subject to immediate termination if either product or service does not comply with specifications as stated herein or fails to meet the county's performance standards. In the event that any of the provisions of the contract are violated by awarded vendor, Escambia County may serve written notice upon the awarded vendor of its intention to terminate the contract. Such notice is to state the reason(s) for such intention to terminate contract. The liability of the vendor for any and all such violation(s) shall not be affected by any such termination and his surety, if any, shall be forfeited.

19. **Termination (Services)**

The Contract Administrator shall notify the Office of Purchasing of unsatisfactory performance and/or deficiencies in service that remain unresolved or recurring. The Office of Purchasing shall notify the contractor, in writing, of such unresolved or recurring deficiencies within five (5) working days of notification by the Contract Administrator.

Upon the third such written notification of unsatisfactory performance and/or deficiencies to the contractor by the Office of Purchasing within a four (4) month period; or the sixth such notification within any contract term, shall result in issuance of written notice of immediate contract termination to the contractor by the Office of Purchasing. Such termination may also result in suspension or debarment of the contractor.

20. **Termination (Public Records Request)**

If the contractor refuses to allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the contractor in conjunction with this agreement then the county may, without prejudice to any right or remedy and after giving the contractor and his surety, if any, seven (7) days written notice, during which period contractor still fails to allow access, terminate the employment of the contractor and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon, owned by the contractor, and may finish the project by whatever method it may deem expedient. In such case, the contractor shall not be entitled to receive any further payment until the project is finished. Reasonable terminal expenses incurred by the county may be deducted from any payments left owing the contractor (excluding monies owed the contractor for subcontract work.)

21. **As Specified**

All items delivered shall meet the specifications herein. Items delivered not as specified will be returned at no expense by Escambia County. The County may return, for full credit, any unused items received which fail to meet the County's performance standards.

22. **Quantity**

Escambia County reserves the right to increase or decrease estimated quantities as required. Estimated quantities are shown on the bid form.
It is understood by all offeror's that these are only estimated quantities and the county is not obligated to purchase any minimum or maximum amount during the life of this contract.

23. **Piggybacking off Other Entities Contracts**

Will not be used without a formal solicitation completed by the Office of Purchasing unless the requirement is waived by the County Administrator.
For purchases utilizing State of Florida Term Contracts meeting the mandatory bid threshold amount of $50,000, other than vehicle and equipment purchases, the provisions of PP-120 "Piggyback" Purchases will apply.
The requirement for solicitation of quotations shall apply to purchases that are below the $50,000 formal bid threshold, established by the County Purchasing Ordinance

Non-Contract Insurance Requirements

24. **Standard Insurance Requirements and Certificates**

This offer contains an extensive insurance requirement. Offerors are encouraged to review these requirements with their insurance agents before submitting offers.

It is not necessary to have this level of insurance in effect at the time of submitting the offer.

A letter from the offeror's insurance carrier will be required as evidence that the offeror will be able to obtain the levels of insurance as required by the contract and indicated on the Sample Certificate of Insurance should your firm be awarded the contract.

County Insurance Required

The contractor shall procure and maintain the following described insurance, except for coverages specifically waived by the County. Such policies shall be from insurers with a minimum financial size of VII according to the latest edition of the AM Best Rating Guide. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Such policies shall provide coverages for any or all claims which may arise out of, or result from, the services, work and operations carried out pursuant to and under the requirements of the contract documents, whether such services, work and operations be by the contractor, its employees, or by subcontractor(s), or anyone employed by or under the supervision of any of them, or for whose acts any of them may be legally liable.

The contractor shall require, and shall be responsible for assuring throughout the time the agreement is in effect, that any and all of its subcontractors obtain and maintain until the completion of that subcontractor' s work, such of the insurance coverages described herein as are required by law to be provided on behalf of their employees and others.

The required insurance shall be obtained and written for not less than the limits of liability specified hereinafter, or as required by law, whichever is greater.

These insurance requirements shall not limit the liability of the contractor.

The County does not represent these types or amounts of insurance to be sufficient or adequate to protect the contractor' s interests or liabilities, but are merely minimums.

Except for workers compensation and professional liability, the contractor' s insurance policies shall be endorsed to name Escambia County as an additional insured to the extent of its interests arising from this agreement, contract or lease.

The contractor waives its right of recovery against the County, to the extent permitted by its insurance policies.

The contractor's deductibles/self-insured retentions shall be disclosed to the County and may be disapproved by the County. They shall be reduced or eliminated at the option of the County. The contractor is responsible for the amount of any deductible or self-insured retention.

Insurance required of the contractor or any other insurance of the contractor shall be considered primary, and insurance of the county, if any, shall be considered excess, as may be applicable to claims obligations which arise out of this agreement, contract or lease.

Workers Compensation Coverage
The contractor shall purchase and maintain workers compensation insurance for all workers compensation obligations imposed by state law and with employers liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease, or a valid certificate of exemption issued by the state of Florida, or an affidavit in accordance with the provisions of Florida Workers Compensation law.

Contractor shall also purchase any other coverages required by law for the benefit of employees.

General and Excess or Umbrella Liability Coverage
The contractor shall purchase and maintain coverage on forms no more restrictive than the latest editions of the commercial general liability policies of the insurance services office.

Minimum limits of $1,000,000 per occurrence for all liability must be provided, with excess or umbrella insurance making up the difference, if any, between the policy limits of underlying policies (including employers liability required in the workers compensation coverage section) and the total amount of coverage required.

General Liability Coverage - Occurrence Form Required
Coverage A shall include bodily injury and property damage liability for premises, operations, products and completed operations, independent contractors, contractual liability covering this agreement, contract or lease, broad form property damage coverages, and property damage resulting from explosion, collapse or underground (x,c,u) exposures.

Coverage B shall include personal injury.

Coverage C, medical payments, is not required.

The contractor is required to continue to purchase products and completed operations coverage, at least to satisfy this agreement, contract or lease, for a minimum of three years beyond the County' s acceptance of renovation or construction projects.

The General Liability policies shall be endorsed to include Escambia County as an additional insured and provide for 30 day notification of cancellation.

Excess or Umbrella Liability Coverage (If utilized to achieve required policy limits.) Umbrella liability insurance is preferred, but an excess liability equivalent may be allowed. Whichever type of coverage is provided, it shall not be more restrictive than the underlying insurance policy coverages. Umbrella coverage shall drop down to provide coverage where the underlying limits are exhausted.

Evidence/Certificates of Insurance
Required insurance shall be documented in certificates of insurance. If and when required by the County, certificates of insurance shall be accompanied by documentation that is acceptable to the County establishing that the insurance agent and/or agency issuing the certificate of insurance has been duly authorized, in writing, to do so by and on behalf of each insurance company underwriting the insurance coverage(s) indicated on each certificate of insurance.

New certificates of insurance are to be provided to the County at least 30 days prior to coverage renewals. Failure of the contractor to provide the County with such renewal certificates may be considered justification for the County to terminate this agreement, contract or lease.

Certificates should contain the following additional information:

1. Indicate that Escambia County is an additional insured on the general liability policy.

2. Include a reference to the project and the Office of Purchasing number.

3. Disclose any self-insured retentions in excess of $1,000.

4. Designate Escambia County as the certificate holder as follows:
   Escambia County
   Attention: Joe Pillitary, CPPO, CPPB
   Office of Purchasing, Room 11.101
   P.O. Box 1591
   Pensacola, FL 32591-1591
   Fax (850) 595-4805

5. Indicate that the County shall be notified at least 30 days in advance of cancellation.

Receipt of certificates or other documentation of insurance or policies or copies of policies by the county, or by any of its representatives, which indicate less coverage than required does not constitute a waiver of the contractor's obligation to fulfill the insurance requirements herein.

If requested by the County, the contractor shall furnish complete copies of the contractor's insurance policies, forms and endorsements, and/or such additional information with respect to its insurance as may be requested.

For commercial general liability coverage the contractor shall, at the option of the County, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage.

SPECIAL ACCOMMODATIONS:
Any person requiring special accommodations to attend or participate, pursuant to the Americans with Disabilities Act, should call the Office of Purchasing, (850) 595-4980 at least five (5) working days prior to the solicitation opening.

NOTICE

It is the specific legislative intent of the Board of County Commissioners that NO CONTRACT under this solicitation shall be formed between Escambia County and the awardee vendor until such time as the contract is executed by the last party to the transaction.

NOTICE

In accordance with Sec. 46-110(e) of the Escambia Code of Ordinances, all bid solicitation documents shall include the following notice to vendors of the local vendor preference policy:

Preference in purchase of commodities and services by means of competitive bid.
Except where federal or state law, or any other funding source, mandates to the contrary, Escambia County may give preference to local businesses in the following manner:

Competitive bid (local price match option). Each formal competitive bid solicitation (i.e. sealed bids) shall clearly identify how the price order of the bids received will be evaluated and determined.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000 and $249,999, and the bid submitted by one or more qualified and responsive local businesses is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000 and $999,999, and the bid submitted by one or more qualified and responsive local businesses is within **three percent (3%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000, and the bid submitted by one or more qualified and responsive local businesses is within **two percent (2%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e.; the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

In such instances, staff shall first verify whether the lowest non-local bidder and the lowest local bidder are in fact qualified and responsive bidders. Next, the purchasing department shall invite the lowest local bidder in writing to submit a matching offer which shall be submitted in writing to the office of purchasing within five (5) business days thereafter.

If the lowest local bidder does not respond or otherwise submits a written offer that does not fully match the lowest bid from the lowest non-local bidder tendered previously then award shall be made to the lowest overall qualified and responsive non-local bidder.

In the event a local bidder is awarded a contract pursuant to this section, any requests for change orders increasing the cost of the project must be approved by the board of county commissioners.

Effective July 1, 2015, the County may not use a local preference "for a competitive solicitation for **construction services** in which **50 percent or more** of the cost will be paid from state appropriated funds which have been appropriated at the time of the competitive solicitation. For any such solicitation, the County must disclose in the bid package that "any applicable local ordinance or regulation does not include any local preference..." See §255.0991, Florida Statutes.

Bound Tree medical

Making Precious Minutes Count...™

To Whom It May Concern, 9/4/2015

In response to your request, Bound Tree Medical is pleased to offer 28% off of the list prices, as well as the specific discounts below from the currently published Bound Tree Medical Emergency Medical Product catalog. As well as 26% off of Pharmaceuticals and IV Solutions as listed on our site www.boundtree.com.

% off Printed Catalog Only		
Standard Catalog Discount- 28%		Monitoring and Diagnostic products- 38%
Covidien Electrodes-53%		Intubation Stylettes Only- 35% *Sun Med Brand Only 50%
Smith's IV Catheters -50%		Suction Products- 35% *Laeradal brand only-25%
Disposable Cervical Collars- 47%		Patient Transport & Handling-32%
Ambu Resuscitation products-40%		Ferno (Excludes Cots, Stair Chairs, Backboards & Stretchers)-26%

% off Website Only		
Pharmaceuticals -26%*		IV Solutions -26%*

*Pharmaceutical and IV Solution pricing will be offered off of the website list price.

In order to provide a percentage off list discount, it is necessary for Bound Tree to exclude certain product categories or manufacturer products. This is largely due to the cost variability of these items as a result of market demand and raw material costs. Products excluded from the percentage off offer include the following:

Manufacturers Excluded		Product Categories Excluded
Abbott		Backboards
CAS		Gloves
Engel		Hot and Cold Packs
Ferno		King Tubes (not kits) and Airways
Junkin Safety		King Vision
Laerdal (Manikins & AHA)		Preventative Maintenance
Nasco		Recertified Equipment
Philips (Equipment)		Rescue Buddies (Charitable item)
Simulaids		Service Contracts
TSG		Thermal Angel
UCAPIT		
Z-Medical (Quik-Clot)		

We are pleased to provide you with a competitive offer for the emergency medical supplies and equipment that you are seeking. Please contact our Bids and Contracts Department at 800-533-0523 with any questions. Thank you.

Sincerely,

Christopher Fyffe

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16135 **County Administrator's Report 10. 19.**
BCC Regular Meeting **Budget & Finance Consent**
Meeting Date: 05/16/2019
Issue: Contract Award for HOME/SHIP Substantial Reconstruction for 1809 W. Bobe Street
From: PAUL NOBLES, Purchasing Manager
Organization: Asst County Administrator - Lovoy
CAO Approval:

RECOMMENDATION:

Recommendation Concerning the Contract Award for HOME/SHIP Substantial Rehabilitation/Reconstruction, for 1809 West Bobe Street - Paul Nobles, Purchasing Manager, Office of Purchasing

That the Board approve and authorize the Chairman or Vice Chairman to sign the Agreement between Escambia County, Florida, Bill Walther Construction, Inc., and Mattie L. Price, homeowner, per the terms and conditions of PD 18-19.036, HOME/SHIP Substantial Rehabilitation/Reconstruction for 1809 West Bobe Street, in the total amount of $115,350 (Base bid of $113,500 plus alternate #1 of $1000 and alternate #2 of $850).

[Funding: Fund 147, 2013 HOME HUD Consortium; Cost Center 370265, 2013 HUD Consortium; Object Code 58301, Other Grants and Aids ($58,805.84);

Fund 147 2014 HOME HUD Consortium; Cost Center 370266, 2014 HUD Consortium; Object Code 58301, Other Grants and Aids ($31,544.16); and

Fund 120, 2018 SHIP Grant Admin; Cost Center 370205, SHIP 2018 Grant Admin; Object Code 58301, Grants and Other Aids ($25,000)]

BACKGROUND:

An Invitation to Bid for project PD 18-19.036, HOME/SHIP Substantial Reconstruction for 1809 W. Bobe Street was advertised in the Pensacola News Journal on March 25, 2019, and was sent to 99 registrants in Vendor Registry. A non-mandatory pre-solicitation conferences was held on April 09, 2019, and was attended by three firms. Bids were received from four firms on April 24, 2019, with

Bill Walther Construction, Inc. being the lowest, most responsive bidder.

Escambia County receives an allocation of HOME Investment Partnerships Program (HOME) funds from the U.S. Department of Housing and Urban Development (HUD). HOME funds may only be used for housing activities such as housing rehabilitation, homebuyer assistance, new constructions of rental or homebuyer housing, or tenant-based rental assistance, and must serve households that are at or below 80% of the area median income. During the HUD annual planning process, the County has allocated a portion of its HOME funding for substantial rehabilitation/reconstruction of owner-occupied housing. Income-eligible owner-occupants that cannot be assisted with moderate repairs under the Community Development Block Grant (CDBG) program or minor repairs under the State Housing Initiatives Partnership (SHIP) program are assisted under the HOME program to bring the house up to code through either a demolition/reconstruction, or a substantial rehabilitation of the housing unit. Homeowners will have a mortgage and note placed on the property according to program terms and must continue to occupy the property as their principle residence, keep taxes current, and maintain property insurance. The County is in a first mortgage position for all HOME substantial rehabilitation/reconstruction projects.

HOME funds also require a non-federal match, which is achieved utilizing SHIP Program funds as outlined in the most recent SHIP Local Housing Assistance Plan (LHAP), which was approved by the Board on May 05, 2016.

BUDGETARY IMPACT:

Funding: Fund 147, 2013 HOME HUD Consortium; Cost Center 370265, 2013 HUD Consortium; Object Code 58301, Other Grants and Aids ($58,805.84); and Fund 147 2014 HOME HUD Consortium; Cost Center 370266, 2014 HUD Consortium; Object Code 58301, Other Grants and Aids ($31,544.16); and Fund 120, 2018 SHIP Grant Admin; Cost Center 370205, SHIP 2018 Grant Admin; Object Code 58301, Grants and Other Aids ($25,000)

LEGAL CONSIDERATIONS/SIGN-OFF:

The Construction Agreement has been reviewed and approved by Kristin Hual, Senior Assistant County Attorney.

PERSONNEL:

All work associated with this recommendation was done in-house and no additional staff was required.

POLICY/REQUIREMENT FOR BOARD ACTION:

This recommendation is in compliance with the Code of Ordinances of Escambia County, FL 1999, Chapter 46, Finance, Article II, Purchases and Contracts.

The project and agreement are in compliance with the HUD Annual Action Plan and the SHIP LHAP, and the property owner meets all eligibility guidelines for assistance under these programs.

IMPLEMENTATION/COORDINATION:

The Office of Purchasing will issue the Agreement and the Purchase Order. NED will have administrative oversight of the project.

Telephone: 850-595-4953
E-Mail: JDLovingood@myescambia.com

SPECIAL ACCOMMODATIONS:
Any person requiring special accommodations to attend or participate, pursuant to the Americans with Disabilities Act, should call the Office of Purchasing (850-595-4980) at least five (5) working days prior to the solicitation opening.

Notice

It is the specific legislative intent of the Board of County Commissioners that NO CONTRACT under this solicitation shall be formed between Escambia County and the awardee Vendor until such time as the contract is executed by the last party to the transaction.

NOTICE

In accordance with Sec. 46-110(e) of the Escambia Code of Ordinances, all bid solicitation documents shall include the following notice to Vendors of the local Vendor preference policy:

Sec. 46-110.-Local Preference in Bidding

a) Legislative Intent:

The Escambia County Board of County Commissioners finds that local businesses are often at a disadvantage when competing with other non-local businesses in that the cost of doing business in Escambia County is higher than other areas of the state and giving local businesses a preference in the procurement of goods and services serves a compelling public purpose for the benefit of the taxpayer and residents of Escambia County as such preference encourages local industry, employment opportunities, and increases the County's overall tax base.

b) "Local Business" Defined:

For the purposes of this section, "Local Business" shall mean a business which meets all of the following criteria:

1. Has had a fixed office or distribution point located in and having a street address within Escambia County of Santa Rosa County for at least one (1) year immediately prior to the issuance of the request for competitive bids by the County. The fixed office or distribution point must be staffed by at least one (1) employee. Post Office boxes are not verifiable and shall not be used for the purpose of establishing a physical address, and

2. Holds any business license required by Escambia County or Santa Rosa County, and

3. Is the principal Offeror who is a single Offeror; a business which is the prime Contractor and not a Sub-Contractor, or a partner, or joint venture submitting an offer in conjunction with other businesses.

c) Certification:

Any Vendor claiming to be a local business as defined above shall so certify in writing to the Escambia County Office of Purchasing. The certification shall provide all necessary information to meet the requirements provided herein. The purchasing agent shall not be required to verify the accuracy of any such certification, and shall have the sole discretion to determine if a Vendor meets the definition of a "Local Business."

d) Preference in Purchase of Commodities and Services by Means of Competitive Bid:

Except where federal or state law, or any other funding source, mandates to the contrary, Escambia County may give preference to local businesses in the following manner:

Competitive Bid (Local Price Match Option): Each formal competitive bid solicitation (i.e. sealed bids) shall clearly identify how the price order of the bids received will be

evaluated and determined.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000.00 and $249,999.99, and the bid submitted by one or more qualified and responsive local businesses is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $50,000.00 and $249,999.99, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **Community Redevelopment Area (CRA)** is within **seven percent (7%)** of the price submitted by the non-local business, then the local business located in a designated CRA with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualifies and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000.00 and $999,999.99, and the bid submitted by one or more qualified and responsive local businesses is within **three percent (3%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount between $250,000.00 and $999,999.99, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **CRA** is within **five percent (5%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000.00, and the bid submitted by one or more qualified and responsive local businesses is within **two percent (2%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

When a qualified and responsive, non-local business submits the lowest price bid amount in excess of $1,000,000.00, and the bid submitted by one or more qualified and responsive local businesses with a fixed office or distribution point located in a designated **CRA** is within **four percent (4%)** of the price submitted by the non-local business, then the local business with the apparent lowest bid offer (i.e., the lowest local bidder) shall have the opportunity to submit an offer to match the price(s) offered by the overall lowest, qualified and responsive non-local bidder.

In such instances, staff shall first verify whether the lowest non-local bidder and the lowest local bidder are in fact qualified and responsive bidders. Next, the purchasing department shall invite the lowest local bidder in writing to submit a matching offer which shall be

submitted in writing to the Escambia County Office of Purchasing within five (5) business days thereafter.

If the lowest local bidder does not respond or otherwise submits a written offer that does not fully match the lowest bid from the lowest non-local bidder tendered previously then award shall be made to the lowest overall qualified and responsive non-local bidder.

In the event a local bidder is awarded a contract pursuant to this section, any requests for change orders increasing the cost of the project must be approved by the Escambia County Board of County Commissioners.

e) Notice:

All bid solicitation documents shall include notice to Vendors of the local preference policy.

f) Waiver of the Application of Local Preference:

The application of local preference to a particular purchase or contract for which the Board of County Commissioners is the awarding authority may be waived upon approval of the Board of County Commissioners.

g) Limitations:

1. The provisions of this section shall apply only to procurements which are above the formal bid threshold as set forth in the Escambia County Purchasing Code.

2. The provisions of this section shall not apply where prohibited by federal or Florida law, or where prohibited under the conditions of any grant.

3. The provisions of this section shall not apply to any purchase exempted from the provisions of the Escambia County Purchasing Code.

4. The provisions of this section shall not apply to contracts made under the Consultants Competitive Negotiation Act (CCNA), F.S. § 287.055.

h) Penalties:

1. Misrepresentation:

A Vendor who misrepresents the local preference status of its firm in a bid or proposal submitted to the County will lose the privilege to claim local preference status for a period of up to one (1) year from the date of the award of the contract or upon completion of the contract, whichever is greater.

2. Failure to Maintain Local Business Preference Qualifications:

Any Vendor that does not maintain its local preference status resulted in the awarded contract shall be in breach of contract and will be subject to termination of the contract, suspension of payments under the contract, and loss of the local preference status on the contract awarded.

3. Lack of Good Faith:

The Contractor or firm may show that it attempted through reasonable and objective means and in good faith to comply with the terms of the contract relating to local businesses but was unable to comply. If the County determines that the Contractor or firm did not act in good faith, all amounts paid to the Contractor or firm under the County contract intended for expenditure with the local business shall be forfeited and recoverable by the County. In addition, the contract may be rescinded and the County may return all or a portion of the goods received and recover all amounts paid under the contract for the goods which were returned.

Effective July 1, 2015, the County **may not** use a local preference for a "competitive solicitation for **construction services** in which **fifty percent (50%) or more** of the cost will be paid from state appropriated funds which have been appropriated at the time of the competitive solicitation." For any such solicitation, the County must disclose in the bid package that "any applicable local ordinance or regulation does not include any local preference…" See §255.0991, Florida Statutes.

ESCAMBIA COUNTY, FLORIDA
INVITATION TO BID
BIDDER'S CHECKLIST
HOME/SHIP Substantial Reconstruction for 1809 West Bobe Street
SPECIFICATION PD 18-19.036

HOW TO SUBMIT YOUR BID:
Please review this document carefully. Offers that are accepted by the County are binding contracts. **Incomplete bids are not acceptable.** All documents and submittals shall be received by the Office of Purchasing on or before the date and hour specified for receipt. Late bids will be returned unopened.

* *Documents submitted with Bids are to be on the forms provided in the Invitation to Bid and photocopies of other required documents.*

THE FOLLOWING DOCUMENTS SHALL BE RETURNED WITH THE BID:
- Solicitation, Offer, and Bid Form. The Bid Form must contain an original signature in indelible ink. Bids with photocopies or scanned signatures will not be accepted.
- Bid Surety (bond, check, etc.)

THE FOLLOWING DOCUMENTS SHOULD BE RETURNED WITH THE BID:
- Sworn Statement Pursuant to Section 287.133(3)(A), Florida Statutes on Entity Crimes.
- Drug-Free Workplace Form.
- Information Sheet for Transactions and Conveyances Corporate Identification.
- Certificate of Authority to do Business from the State of Florida.
- Occupational License.
- Florida Department of Business and Professional Regulation – License(s), Certification(s), and/or Registration(s).

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(A), FLORIDA STATUTES, ON ENTITY CRIMES

1. This sworn statement is submitted to _____
(Print Name of Public Entity)

By _____
(Print Individual's Name and Title)

For _____
(Print Name of Entity Submitting Sworn Statement)

Whose business address is:

_____

_____

And (if applicable) its Federal Employer Identification Number (FEIN) is:

_____

If the entity has no FEIN, include the Social Security Number of the Individual signing this sworn statement: _____

2. I understand that a "public entity crime" as defined in Paragraph 287.133(1)(g), **Florida Statutes**, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in paragraph 287.133(1)(b), **Florida Statutes**, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), **Florida Statutes**, means:

    a. A predecessor or successor of a person convicted of a public entity crime; or

    b. An entity under the control any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

c. I understand that a "person" as defined in Paragraph 287.133(1)(e), **Florida Statutes**, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into binding contract and which bids or applies to bid on contracts for the provision of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

d. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. **Indicate which statement applies.**

_____ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with a convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that is not in the public interest to place the entity submitting this sworn statement on the convicted Vendor list. **(Attach a copy of the final order.)**

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY INDENTIFIED IN PARAGRAPH ONE (1) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

SPECIAL TERMS AND CONDITIONS

The Board of County Commissioners, Escambia County, Florida, invites your company to submit a sealed offer on the item(s) as listed in this solicitation request.

All terms and conditions below are a part of this request, and no offer will be accepted unless all these conditions have been complied with. The County reserves the right to waive informalities in any offer; to reject any or all offers, in whole or in part, and/or to accept the offer(s) that in its judgement is from the lowest, most responsible, and responsive Offeror(s).

Instructions to Offerors

1. General Information

All offers to be considered shall be in the possession of the Office of Purchasing prior to the time of the solicitation closing. Offers may be mailed or delivered to the Office of Purchasing, 2nd Floor, Room 11.101, Matt Langley Bell, III Bldg., 213 Palafox Place, Pensacola, FL 32502, in a sealed envelope clearly marked:

Specification Number PD 18-19.036, "HOME/SHIP Substantial Reconstruction for 1809 West Bobe Street", Name of Submitting Firm, Time and Date due.

Note: If you are using a courier service (FedEx, Airborne, UPS, etc.) you must mark the air-bill and envelope or box with the Specification number and project name.

Regardless of the method of delivery, each Offeror shall be responsible for his offer(s) being delivered on time as the County assumes no responsibility for same. Offers offered or received after the time set for solicitation closing will be rejected and returned unopened to the Offeror(s).

The Following Policy will apply to all methods of source selection:

A. Conduct of Participants

After the issuance of any solicitation, all bidders/proposers/protestors or individuals acting on their behalf are hereby prohibited from **lobbying** as defined herein or otherwise attempting to persuade or influence any elected County officials, their agents or employees or any member of the relevant selection committee at any time during the **blackout period** as defined herein; provided, however, nothing herein shall prohibit bidders/proposers/protestors or individuals acting on their behalf from communicating with the purchasing staff concerning a pending solicitation unless otherwise provided for in the solicitation or unless otherwise directed by the Purchasing Manager.

B. Definitions

Blackout Period means the period between the time the Bids for invitations for bid or the request for proposal, or qualifications, or information, or requests for letters of interest, or the invitation to negotiate, as applicable, are received at the

Escambia County Office of Purchasing and the time the Board awards the contract and any resulting bid protest is resolved or the solicitation is otherwise cancelled.

Lobbying means the attempt to influence the thinking of elected County officials, their agents or employees or any member of the relevant Selection Committee for or against a specific cause related to a pending solicitation for goods or services, in person, by mail, by facsimile, by telephone, by electronic mail, or by any other means of communication.

C. Sanctions

The Board may impose any one or more of the following sanctions on a non-employee for violations of the policy set forth herein:

1) Rejection/Disqualification of Submittal,

2) Termination of Contract; or

3) Suspension or Debarment as Provided in Sec. 46-102 of the Escambia County Code of Ordinances.

This policy is not intended to alter the procedure for Protested Solicitations and Awards as set forth in the Sec. 46-101 of the Escambia County Code of Ordinances.

2. Project Overview

Demolition of existing single-family dwelling and construction of new single-family dwelling per attached plans and written specifications.

A. General Instructions to Bidders

Federal funds are being used to rehabilitate this property. The Federal Compliance Packet must be submitted prior to award of bid. Contractor may not be debarred from participating in Federal programs in order for bid to be awarded.

Labor, overhead, permits, insurance, and profit must be included into each itemized price and not listed as a separate itemized price or listed under "miscellaneous."
All work performed must be inspected (rough and final) and conform to County Ordinances, State Laws, and Florida Building Code.

Escambia County will pay for recording of Notice of Commencement in public records. Energy Sheets will also be provided to the awarded contractor by the County Neighborhood Enterprise Division (NED) for pulling permits.

The Homeowner is responsible for the removal of all belongings/furnishings from the designated work areas prior to the start date. A Notice to Proceed will be issued once the homeowner has vacated the property. The Contractor is not responsible for removal of Homeowner's trash and/or discarded belongings or furnishings. Items left within the unit become the property of the Contractor.

All materials and supplies shall be installed in accordance with the manufacturer's instructions, with all work completed in accordance with industry standards for new construction.

B. Contractor Requirements

The Contractor is responsible for temporary utilities (water and power) during the project and portable toilet. Contractor is also responsible for provision of permit/plan document box on site.

Contractor will furnish the homeowner, c/o Escambia County NED, all manufacturers' and suppliers' written guarantee/warranty documents covering materials and equipment provided through this contract. Contractor will furnish a one-year limited labor and material warranty to cover defects in materials and workmanship occurring from normal use.

For housing projects utilizing SHIP- or HUD-related programs, the awarded firm shall provide the following items to the Office of Purchasing, and the documents shall be current and on file with the proper departments, prior to the issuance of any Purchase Order .

1. Current W9 (less than one year old).
2. County Vendor Information sheet (less than one year old).
3. Worker's Compensation as required by State Law **OR** exemption form.
4. Commercial General Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.
5. Automobile Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.

GL and Auto Liability Certificates must state the following under the Additional Interest:

Escambia County
C/O Neighborhood Enterprise Division
221 Palafox Place
Suite 200
Pensacola, FL 32502-5844

All post-award correspondence should be directed to Neighborhood Enterprise Division, 221 Palafox Place, Suite 200, Pensacola, FL 32502 for review.

3. Bid Surety

Each offer shall be accompanied by a bid bond, cashier's check or certified check in the amount of **5%** of the total offer.

Checks or bonds are to be made payable to Escambia County, Florida. The amount of the bond or check is the amount of liquidated damages agreed upon should the Offeror fail or refuse to enter into a contract with the County.

A County warrant in the amount of the bid check(s) of the successful Offeror(s) will be

returned immediately after the Offeror and the County are mutually bound by contract as evidenced by signatures thereto by an authorized representative of both the Offeror and the County, and/or the Offeror accepts the purchase order by signing the Solicitation, Offer and Bid Form, and returning to the County Purchasing department. Any unsuccessful Offeror(s) will have the amounts of his cashier's or certified check returned via County warrant promptly after award.

All Offerors agree that any interest earned on any bid surety while in possession of the County, or its agents, shall be retained by the County.

4. Performance and Payment Bonds

The County **shall** require the successful Offeror(s) to furnish **separate performance and payment bonds**, under pledge of adequate surety and covering up to **100% of the dollar value of award** on the forms provided by the County. Such bonds shall be issued by sureties authorized to act as a surety by the State of Florida. Bonds of the successful Offeror(s) shall be reviewed by the Office of Purchasing to assure compliance, then recorded in the Office of the Clerk of the Circuit Court Recording Office, 1st Floor, 221 Palafox Place, Pensacola, Florida, by the successful Offeror at his expense before the contract is executed. The cost of recording is $10.00 for the first page and $8.50 for each additional page.

5. Procurement Questions

Questions shall be directed to Jeffrey Lovingood, Purchasing Specialist, at JDLovingood@myescambia.com. Last day for questions will be April 15, 2019 at 5:00 p.m. CDT.

6. Bid Forms

This Solicitation contains a Solicitation, Offer, and Bid Form which shall be submitted in a sealed envelope, in duplicate with Original signatures in indelible ink signed in the proper spaces. Responses on Vendor forms will not be accepted.

The Offeror’s Checklist included in this Solicitation provides instructions to the Offeror on the documentation to be submitted during the procurement process.

7. Pre-Solicitation Conference

A non-mandatory Pre-Solicitation Conference will be held at the Escambia County Office of Purchasing, 213 Palafox Place, Pensacola, FL 32502 in Conference Room #11.407 on April 09, 2019 at 10:30 AM CDT.

It is strongly encouraged that all potential bidders attend this non-mandatory conference so they can ask questions and be automatically notified of any updates prior to the Bid Opening.

8. Liquidated Damages

Should the awarded Vendor fail to complete the required services or make delivery of the commodities or equipment within the time(s) specified in the contract, or within such

additional time(s) as may be granted by Escambia County, the County will suffer damage, the amount of which is difficult, if not impossible to ascertain therefore, the Vendor shall pay to the County, as liquidated damages, the sum of $150.00 for each calendar day of delay that actual completion extends beyond the time limit specified until such reasonable time as may be required for final completion of the work. Such sum is mutually agreed upon as a reasonable and proper amount of damages the County will sustain per diem by failure of the Vendor to complete the services or make delivery within the specified time. The costs for liquidated damages shall not be construed as a penalty on the Vendor.

9. Compliance with Occupational Safety and Health

Offeror certifies that all material, equipment, etc., contained in their offer meets all Occupational Safety and Health Administration (OSHA) requirements.

10. Codes and Regulations

The awarded Vendor shall strictly comply with all federal, state and local building and safety codes.

11. Permitting Fee Information

A. Building Permit Fees

Contractor shall include costs for all permitting fees as required by the Escambia County Building Department for Demolition and New Construction. Estimated permitting fees for new construction ONLY is $1,032.00. Demolition permit fees are a separate cost. Contractor shall verify all permitting fees.

B. Health Department Permitting Fees (for projects with septic tanks):

The $550.00 permit fee for a new septic system has already been paid to the Health Department. Contractor will be responsible for payment of $100.00 septic tank abandonment permitting fee. Contractor shall verify all permitting fees.

12. Payment

Payment request should be submitted to NED on original invoice, with reference to client, address, and purchase order number. Up to five (5) draws may be requested, utilizing the following payment schedule:

- Draw 1: Demolition and Septic Tank Abandonment (if applicable) complete (permits, demolition)—5%
- Draw 2: Foundation Complete (permits, site work, footings, foundation)—10%
- Draw 3: Rough-In Complete (wall and roof framed and sheathed, subflooring (if applicable), interior walls framing, roof complete, siding complete, windows and exterior doors, rough mechanical, plumbing, electrical)—35%
- Draw 4: Substantial Completion. (Certificate of Occupancy)—40%

- Draw 5/Final: Completion of all punch list items, provision of warranty paperwork to County, sign-off by Owner, Contractor's Final Payment affidavit—10%

Alternately, the contractor may utilize the AIA Document G702/703 (Application and Certification for Payment) to submit up to five draws (including final) for the project. A ten percent (10%) retainage will be withheld from draws 1-4. Contractor must provide a description/schedule of work prior to initializing work.

Note that all permits related to the draw in question must be pulled and approved up to the current progress status prior to the requested draw. For example, the demolition permit must be pulled and approved by the building inspections department before payment will be released related to the demolition of the structure.

The Contractor will be eligible for Final Payment after the following conditions have been fulfilled:

1. Completion of Write-Up
2. Certificate of Occupancy Received by Building Inspections
3. Inspections Approved by Health Department (if applicable)
4. Acceptance by the Homeowner (Homeowner's Release & Warranty)
5. Warranty Paperwork provided to NED [warranty paperwork should include all appliances, roofing, HVAC, fixtures, equipment and other materials provided on the project]
6. Premises free from all construction debris
7. Submission of Contractor's Final Affidavit
8. Surety's Consent to Final Payment (if applicable)

13. Assembly and/or Placement

All items shall be completely assembled when delivered to Escambia County.

All items shall be completely assembled by the awarded Vendor prior to acceptance by Escambia County. Space will be provided by the County for on-site assembly by the awarded Vendor. It will be the responsibility of the awarded Vendor to supply the necessary labor and materials for the placement of all equipment as specified herein. Equipment is to be set-up, serviced, tested and demonstrated at no charge to Escambia County.

14. Warranty

The awarded Vendor shall fully warrant all equipment furnished hereunder against defect in materials and/or workmanship for a period of One (1) year from date of delivery/acceptance by Escambia County.

Should any defect in materials or workmanship, except ordinary wear and tear, appear during the above stated warranty period, the awarded Vendor shall repair or replace same at no cost to the County, immediately upon written notice from the Purchasing Chief.

15. Drawings

A. **New Public Records Exemptions of Building Plans Florida Statutes Chapter**

119.07 www.leg.state.fl.us/statutes (To View Full Text of this Chapter)

Florida Statutes Chapter 119.07 has been amended as it relates to the inspection, examination and duplication of certain documents pertaining to County building construction.

Section 119.07(3)(b) provides the following:

1. Building plans, blueprints, schematic drawings, and diagrams, including draft, preliminary, and final formats, which depict the internal layout and structural elements of a building, arena, stadium, water treatment facility, or other structure owned or operated by an agency as defined in s. 119.011 are exempt from the provisions of subsection (1) and s. 24(a), Art. 1 of the State Constitution.

2. This exemption applies to building plans, blueprints, schematic drawings, and diagrams, including draft, preliminary, and final formats, which depict the internal layout and structural elements of a building, arena, stadium, water treatment facility, or other structure owned or operated by an agency before, on, or after the effective date of this act.

3. Information made exempt by this paragraph may be disclosed:

    a. To another governmental entity if disclosure is necessary for the receiving entity to perform its duties and responsibilities;

    b. To a licensed architect, engineer, or contractor who is performing work on or related to the building, arena, stadium, water treatment facility, or other structure owned or operated by an agency; or

    c. Upon a showing of good cause before a court of competent jurisdiction.

4. The entities or persons receiving such information shall maintain the exempt status of the information.

Therefore, all CD's and copies of CD's together with any reproductions of any of these documents shall be returned with your bid, together with a signed copy of the acknowledgement and certification letter contained in the bid form section of the solicitation.

B. Drawing A-1609, dated December, 2017 are included in this Solicitation.

16. Debris

Awarded Vendor shall be responsible for the prompt removal of all debris, which is a result of this contractual service.

17. Protection of Property/Security

The awarded Vendor shall provide all barricades and take all necessary precautions to

protect buildings and personnel.

All work shall be completed in every respect and accomplished in a professional manner and awarded Vendor shall provide for removal of all debris from County property.

The awarded Vendor shall at all times guard against damage or loss to property of Escambia County, or of other Vendors or contractors, and shall be held responsible for replacing or repairing any such loss or damage.

The County may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the awarded Offeror or his agent.

The awarded Vendor shall at all times guard against injury to Escambia County employees. The Vendor shall properly fence and secure the construction site(s) at all times, including evenings and weekends.

The awarded Vendor must, at all times, comply with State of Florida and Occupational Safety and Health Administration (OSHA) safety regulations.

18. Permits

The County and/or its contracted consultant(s) have conducted a review of required permits and fees required to be purchased by the contractor from the County permitting agencies for this specific project and they are listed on the Bid form(s) to the best of our knowledge.

19. Compliance with Governing Laws and Regulations

The Offeror or contractor will be required to fully comply with all applicable federal, state, and local regulations. The Offeror should carefully review these requirements which are detailed in this solicitation.

20. Pricing

All items sold to the County as a result of this award are subject to post sale audit adjustment. In the event an audit indicates Offeror has not honored quoted price lists and discounts, Offeror will be liable for any and all overage charges.

21. Changes - Service Contracts

The County may at any time by issuance of an executed change order make changes within the general scope of the contract in any of the following areas:

A. Description of services to be performed.

B. Time of performance (i.e., hours of the day, days of the week, etc.).

C. Place of performance of the services.

If additional work or other changes are required in the areas described above, an offer will

be requested from the contractor. Upon negotiation of the offer, execution and receipt of the change order, the contractor shall commence performance of the work as specified.

The contractor shall not commence the performance of additional work or other changes not covered by this contract without an executed change order issued by the Office of Purchasing. If the contractor performs additional work beyond the specific requirements of this contract without an executed change order, it shall be at his own risk. The County assumes no responsibility for any additional costs for work not specifically authorized by an executed change order.

22. Termination

A. The contract may be canceled by the contractor, for good cause, upon ninety (90) days prior written notice.

B. The County retains the right to terminate the contract, with or without good cause, upon thirty (30) days prior written notice.

C. In the event of termination by either party as provided herein, the awarded Vendor shall be paid for services performed through the date of termination.

23. Licenses, Certifications, Registrations

The Offeror shall at any time of Bid submission meet the license, certification, registration and any other requirements of the State, County, City and/or any other agency of authority with jurisdiction in such matters as necessary to perform the contractual services requested in this solicitation.

Copies of such licenses, certifications, registrations and any other requirements should be provided with the Bid submission; and, the Offeror shall provide follow-up evidence that as the contractor they maintain such credentials throughout the period of agreement.

24. Term of Offer

An offer shall constitute an irrevocable offer for a period of ninety (90) days from the solicitation opening date or until the date of award, whichever is earlier, without forfeiting bid bond or check. In the event that an award is not made by the County within ninety (90) days from the solicitation opening date, the Offeror may withdraw his offer or provide a written extension of his offer.

25. Award

Award shall be made on an "all-or-none total" basis using the Base Bid amount on the signed Bid Form and a combination of some or all Bid Alternates as determined by the County.

26. Termination

The purchase order or contract will be subject to immediate termination if either product or service does not comply with specifications as stated herein or fails to meet the County's performance standards. In the event that any of the provisions of the contract are violated

by awarded Vendor, Escambia County may serve written notice upon the awarded Vendor of its intention to terminate the contract. Such notice is to state the reason(s) for such intention to terminate contract. The liability of the Vendor for any and all such violation(s) shall not be affected by any such termination and his surety, if any, shall be forfeited.

27. Termination (Public Records Request)

If the contractor refuses to allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the contractor in conjunction with this agreement then the County may, without prejudice to any right or remedy and after giving the contractor and his surety, if any, seven (7) days written notice,

during which period contractor still fails to allow access, terminate the employment of the contractor and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon, owned by the contractor, and may finish the project by whatever method it may deem expedient. In such case, the contractor shall not be entitled to receive any further payment until the project is finished. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the contractor (excluding monies owed the contractor for subcontract work.)

28. As Specified

All items delivered shall meet the specifications herein. Items delivered not as specified will be returned at no expense by Escambia County. The County may return, for full credit, any unused items received which fail to meet the County's performance standards.

Non-Contract Insurance Requirements

29. Standard Insurance Requirements and Certificates

This offer contains an extensive insurance requirement. Offerors are encouraged to review these requirements with their insurance agents before submitting offers.

It is not necessary to have this level of insurance in effect at the time of submitting the offer.

A letter from the Offeror's insurance carrier will be required as evidence that the Offeror will be able to obtain the levels of insurance as required by the contract and indicated on the Sample Certificate of Insurance should your firm be awarded the contract.

A. County Insurance Required

The contractor shall procure and maintain the following described insurance, except for coverages specifically waived by the County. Such policies shall be from insurers with a minimum financial size of VII according to the latest edition of the AM Best Rating Guide. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Such policies shall provide coverages for any or all claims which may arise out of, or result from, the services, work and operations carried out pursuant to and under the requirements of the contract documents, whether such services, work and operations be by the

contractor, its employees, or by subcontractor(s), or anyone employed by or under the supervision of any of them, or for whose acts any of them may be legally liable.

The contractor shall require, and shall be responsible for assuring throughout the time the agreement is in effect, that any and all of its subcontractors obtain and maintain until the completion of that subcontractor's work, such of the insurance coverages described herein as are required by law to be provided on behalf of their employees and others.

The required insurance shall be obtained and written for not less than the limits of liability specified hereinafter, or as required by law, whichever is greater.

These insurance requirements shall not limit the liability of the contractor.

The County does not represent these types or amounts of insurance to be sufficient or adequate to protect the contractor's interests or liabilities, but are merely minimums.

Except for worker's compensation and professional liability, the contractor's insurance policies shall be endorsed to name Escambia County as an additional insured to the extent of its interests arising from this agreement, contract or lease.

The contractor waives its right of recovery against the County, to the extent permitted by its insurance policies.

The contractor's deductibles/self-insured retentions shall be disclosed to the County and may be disapproved by the County. They shall be reduced or eliminated at the option of the County. The contractor is responsible for the amount of any deductible or self-insured retention.

Insurance required of the contractor or any other insurance of the contractor shall be considered primary, and insurance of the County, if any, shall be considered excess, as may be applicable to claims obligations which arise out of this agreement, contract or lease.

B. <u>Workers Compensation Coverage</u>

The contractor shall purchase and maintain worker's compensation insurance for all worker's compensation obligations imposed by state law and with employer's liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease, or a valid certificate of exemption issued by the state of Florida, or an affidavit in accordance with the provisions of Florida Workers Compensation law.

Contractor shall also purchase any other coverages required by law for the benefit of employees.

C. <u>General, Automobile and Excess or Umbrella Liability Coverage</u>

The contractor shall purchase and maintain coverage on forms no more restrictive than the latest editions of the commercial general liability and business auto

policies of the insurance services office.

Minimum limits of $1,000,000.00 per occurrence for all liability must be provided, with excess or umbrella insurance making up the difference, if any, between the policy limits of underlying policies (including employer's liability required in the worker's compensation coverage section) and the total amount of coverage required.

D. General Liability Coverage - Occurrence Form Required

Coverage A shall include bodily injury and property damage liability for premises, operations, products and completed operations, independent contractors, contractual liability covering this agreement, contract or lease, broad form property damage coverages, and property damage resulting from explosion, collapse or underground (x,c,u) exposures.

Coverage B shall include personal injury.

Coverage C, medical payments, is not required.

The contractor is required to continue to purchase products and completed operations coverage, at least to satisfy this agreement, contract or lease, for a minimum of three years beyond the County's acceptance of renovation or construction projects.

E. Business Auto Liability Coverage

Business auto liability coverage is to include bodily injury and property damage arising out of ownership, maintenance or use of any auto, including owned, non-owned and hired automobiles and employee non-ownership use.

The General Liability and Business Auto Liability policies shall be endorsed to include Escambia County as an additional insured and provide for 30-day notification of cancellation.

F. Excess or Umbrella Liability Coverage (If utilized to achieve required policy limits)

Umbrella liability insurance is preferred, but an excess liability equivalent may be allowed. Whichever type of coverage is provided, it shall not be more restrictive than the underlying insurance policy coverages. Umbrella coverage shall drop down to provide coverage where the underlying limits are exhausted.

G. Evidence/Certificates of Insurance

Required insurance shall be documented in certificates of insurance. If and when required by the County, certificates of insurance shall be accompanied by documentation that is acceptable to the County establishing that the insurance agent and/or agency issuing the certificate of insurance has been duly authorized, in writing, to do so by and on behalf of each insurance company underwriting the insurance coverage(s) indicated on each certificate of insurance.

New certificates of insurance are to be provided to the County at least 30 days prior to coverage renewals. Failure of the contractor to provide the County with such renewal certificates may be considered justification for the County to terminate this agreement, contract or lease.

Certificates should contain the following additional information:

1. Indicate that Escambia County is an additional insured on the general liability and business auto liability policies.

2. Include a reference to the project and the Office of Purchasing number.

3. Disclose any self-insured retentions in excess of $1,000.

4. Designate Escambia County as the certificate holder as follows:

   Escambia County
   Attention: Neighborhood Enterprise Division
   221 Palafox Place
   Pensacola, FL 32502-5844

5. Indicate that the County shall be notified at least 30 days in advance of cancellation.

Receipt of certificates or other documentation of insurance or policies or copies of policies by the County, or by any of its representatives, which indicate less coverage than required does not constitute a waiver of the contractor's obligation to fulfill the insurance requirements herein.

If requested by the County, the contractor shall furnish complete copies of the contractor's insurance policies, forms and endorsements, and/or such additional information with respect to its insurance as may be requested.

For commercial general liability coverage, the contractor shall, at the option of the County, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage.

H. Endorsements/Additional Insurance

The County may require the following endorsements or additional types of insurance.

Termination/Adverse Change Endorsement

All of contractor's policies, except for professional liability and worker's compensation insurance, are to be endorsed, and the contractor's certificate(s) of insurance shall state, that the County shall be notified at least 30 days in advance of cancellation, nonrenewal or adverse change.

Owners Protective Liability Coverage

For renovation or construction contracts the contractor shall provide for the County an owners protective liability insurance policy (preferably through the contractor's insurer) in the name of the County.

This is redundant coverage if the County is named as an additional insured in the contractor's commercial general liability insurance policy. However, this separate policy may be the only source of coverage if the contractor's liability coverage limit is used up by other claims.

Builders Risk Coverage

Builders risk insurance is to be purchased to cover subject property for all risks of loss, subject to a waiver of coinsurance, and covering off-site storage, transit and installation risks as indicated in the installation floater and motor truck cargo insurance described hereafter, if such coverages are not separately provided.

The builders risk insurance is to be endorsed to cover the interests of all parties, including the County and all contractors and subcontractors. The insurance is to be endorsed to grant permission to occupy.

Installation Floater Coverage

Installation floater insurance is to be purchased when builder's risk insurance is inappropriate, or when builder's risk insurance will not respond, to cover damage or destruction to renovations, repairs or equipment being installed or otherwise being handled or stored by the contractor, including off-site storage, transit and installation. The amount of coverage should be adequate to provide full replacement value of the property, repairs, additions or equipment being installed, otherwise being handled or stored on or off premises. All risks coverage is preferred.

Motor Truck Cargo Coverage

If the installation floater insurance does not provide transportation coverage, separate motor truck cargo or transportation insurance is to be provided for materials or equipment transported in the contractor's or other vehicles from place of receipt to building sites or other storage sites. All risks coverage is preferred.

Fidelity/Dishonesty/Liability Coverage - for County

Fidelity/dishonesty/liability insurance is to be purchased or extended to cover dishonest acts of the contractor's employees resulting in loss to the County.

30. <u>Indemnification</u>

Contractor agrees to save harmless, indemnify, and defend County and Architect/Engineer and their, agents, officers and employees from any and all claims, losses, penalties, interest, demands, judgments, and costs of suit, including attorneys' fees and paralegals' fees, for any expense, damage or liability incurred by any of them,

whether for personal injury, death, property damage, direct or consequential damages, or economic loss, including environmental impairment, arising directly or indirectly on account of or in connection with the Work done by Contractor under this Agreement or by any person, firm or corporation to whom any portion of the Work is subcontracted by Contractor or resulting from the use by Contractor, or by any one for whom Contractor is legally liable, of any materials, tools, machinery or other property of County. County and Contractor agree the first $100.00 of the Contract Amount paid by County to Contractor shall be given as separate consideration for this indemnification, and any other indemnification of County by Contractor provided for within the Contract Documents, the sufficiency of such separate consideration being acknowledged by Contractor by Contractor's acceptance and execution of the Agreement. The Contractor's obligation shall not be limited by, or in any way to, any insurance coverage or by any provision in or exclusion or omission from any policy of insurance. The Contractor agrees to pay on behalf of Escambia County, as well as provide a legal defense for the County, both of which will be done only if and when requested by the County, for all claims made. Such payment on the behalf of the County shall be in addition to any and all other legal remedies available to the County and shall not be considered to be the County's exclusive remedy.

PERFORMANCE AND PAYMENT BOND

BOND NO. _____

PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: That _____,
(Insert name, address, and phone number of contractor)

as Principal, and _____,
(Insert full name, home office address and phone number of surety)

as Surety, are held and firmly bound unto the Board of County Commissioners for Escambia County, Florida, 223 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, as Obligee in the sum of _____ _____ Dollars ($_____), for the payment whereof we bind ourselves, our heirs, executors, personal representatives, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has entered into a contract dated as of the _____ day of_____, 20____, with Obligee for Contract No. _____

_____(Insert name of project, including legal description, street address of property and general description of improvement)

_____

_____

in accordance with drawings and specifications, which contract is by reference made a part hereof, and is hereinafter referred to as the Contract.

THE CONDITION OF THIS BOND is that if Principal:

1. Performs the Contract at the times and in the manner prescribed in the Contract; and

2. Pays Obligee any and all losses, damages, costs and attorneys' fees that Obligee sustains because of any default by Principal under the Contract; and
3. Performs the guarantee of all work and materials furnished under the Contract applicable to the work and materials, then this bond is void; otherwise it remains in full force; and
4. Principal understands and agrees that this bond shall remain in full force and effect throughout the warranty period after substantial completion of the work.

The Surety, for value received, hereby stipulates and agrees that no changes, extensions of time, alterations or additions to the terms of the Contract or other work to be performed hereunder, or the specifications referred to therein shall in anywise affect its obligation under this bond, and it does hereby waive notice of any such changes, extensions of time, alterations or additions to the terms of the Contract or to work or to the specifications.

This instrument shall be construed in all respects as a common law bond.

In no event will the Surety be liable in the aggregate to Obligee for more than the penalty sum of this Performance Bond, regardless of the number of suits that may be filed by Obligee.

IN WITNESS WHEREOF, the above parties have executed this instrument this _____ day of _____, 20____, the name and corporate seal of each corporate party being hereto affixed and these premises duly signed by its undersigned representative, pursuant to authority of its governing body.

PAYMENT BOND

BY THIS BOND, We, _____
(Insert name, address and phone number of contractor)
_____ (hereinafter called the "Principal")
and _____ (hereinafter called the "Surety"),
(Insert name)
located at _____, a surety insurer
(Insert address and phone number)
chartered and existing under the laws of the State of _____ and authorized to do business in the State of Florida, are held and firmly bound unto the Board of County Commissioners for Escambia County, Florida, 223 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, (hereinafter called the "County") in the sum of _____ ($_____) for payment of which we bind ourselves, our heirs, our personal representatives, our successors and our assignees, jointly and severally.

WHEREAS, Principal and County have reached a mutual agreement relating to Contract No._____ (hereinafter referred to as the "Contract") as of _____ (the bid award date for projects thereto) for the purpose of _____
(Insert name of project, including legal description, street address of property and general description of improvement)
_____
_____
_____
said Contract being made a part of this Bond by this reference.

NOW, THEREFORE, THE CONDITION OF THIS BOND IS THAT IF THE PRINCIPAL:

1. Performs the contract dated _____, _____ between Principal and County for construction of _____, the contract being made a part of this bond by reference, at the times and in the manner prescribed in the contract; and

2. Promptly makes payments to all claimants as defined in Section 255.05(1)(a), Florida Statutes, supplying the Principal with labor, materials or supplies, used directly or indirectly by the Principal in the prosecution of the work provided for in the Contract; and

3. Pays the County for all losses, damages, expenses, costs, and attorneys' fees, including appellate proceedings, that the County sustains because of a default by the Principal under the contract; and

4. Performs the guarantee of all work and materials furnished under the contract for the time specified in the contract, then this bond is void; otherwise it remains in full force.

Any action instituted by a claimant under this pond for payment must be in accordance with the notice and time limitation provisions in Section 255.05(2), Florida Statutes.

BE IT FURTHER KNOWN:

1. Any changes in or under the Contract and compliance or noncompliance with any formalities connected with the said Contract or alterations which may be made in the terms of the said Contract, or in the work to be done under it, or the giving by the County of any extension of time for the performance of the said Contract, or any other forbearance on the part of the County or Principal to the other, shall not in any way release the Principal and the Surety, or either of them, their heirs, personal representatives, successors or assigns from liability hereunder, notice to the Surety of any such changes, alterations, extensions or forbearance being hereby waived.

2. Certain claimants seeking the protection of this Bond must timely comply with the strict requirements set forth in Section 255.05, Florida Statutes, and as otherwise provided by law.

3. As concerns payment for labor, materials and supplies, as affects certain claimants, no legal action shall be instituted against the Principal or Surety on this Bond after one (1) year from the performance of labor or the completion of delivery of the materials or supplies as is specifically mandated pursuant to Section 255.05, Florida Statutes.

THIS BOND DATED THE _____ DAY OF _____, 20____ (the date of issue by the Surety or by the Surety's agent and the date of such agent's power-of-attorney).

EXHIBIT C
INSURANCE AND SAFETY

INSURANCE - BASIC COVERAGES REQUIRED

The Contractor shall procure and maintain the following described insurance, except for coverages specifically waived by the County. Such policies shall be from insurers with a minimum financial size of VII according to the latest edition of the AM Best Rating Guide. An A or better Best Rating is "preferred"; however, other ratings if "Secure Best Ratings" may be considered. Such on policies shall provide coverages for any or all claims which may arise out of, or result from, the services, work and operations carried out pursuant to and under the requirements of the Contract Documents, whether such services, work and operations be by the Contractor, its employees, or by subcontractor(s), or anyone employed by or under the supervision of any of them, or for whose acts any of them may be legally liable.

The Contractor shall require and shall be responsible for assuring throughout the time the Agreement is in effect, that any and all of its subcontractors obtain and maintain until the completion of that subcontractor's work, such of the insurance coverages described herein as are required by law to be provided on behalf of their employees and others.

The required insurance shall be obtained and written for not less than the limits of liability specified hereinafter, or as required by law, whichever is greater.

These insurance requirements shall not limit the liability of the Contractor. The County does not represent these types or amounts of insurance to be sufficient or adequate to protect the Contractor's interests or liabilities, but are merely minimums.

Except for workers compensation and professional liability, the Contractor's insurance policies shall be endorsed to name Escambia County as an additional insured to the extent of its interests arising from this agreement, contract or lease.

The Contractor waives its right of recovery against the County, to the extent permitted by its insurance policies.

The Contractor's deductibles/self-insured retentions shall be disclosed to the County and may be disapproved by the County. They shall be reduced or eliminated at the option of the County. The Contractor is responsible for the amount of any deductible or self-insured retention.

Insurance required of the Contractor or any other insurance of the Contractor shall be considered primary, and insurance of the County, if any, shall be considered excess, as may be applicable to claims obligations, which arise out of this agreement, contract or lease.

Workers Compensation Coverage
The Contractor shall purchase and maintain workers compensation insurance for all workers compensation obligations imposed by state law and with employer's liability limits of at least $100,000 each accident and $100,000 each employee/$500,000 policy limit for disease, or a valid certificate of exemption issued by the state of Florida, or an affidavit in accordance with the provisions of Florida Workers Compensation law.

Contractor shall also purchase any other coverages required by law for the benefit of employees.

General, Automobile and Excess Or Umbrella Liability Coverage

The Contractor shall purchase and maintain coverage on forms no more restrictive than the latest editions of the Commercial General Liability and Business Auto policies of the Insurance Services Office.
Minimum limits of $1,000,000 per occurrence for all liability must be provided, with excess or umbrella insurance making up the difference, if any, between the policy limits of underlying policies (including

employers liability required in the Workers Compensation Coverage section) and the total amount of coverage required.

General Liability Coverage - Occurrence Form Required
Coverage A shall include bodily injury and property damage liability for premises, operations, products and completed operations, independent contractors, contractual liability covering this agreement, contract or lease, broad form property damage coverages, and property damage resulting from explosion, collapse or underground (x,c,u) exposures.

Coverage B shall include personal injury.

Coverage C, medical payments, is not required.

The Contractor is required to continue to purchase products and completed operations coverage, at least to satisfy this agreement, contract or lease, for a minimum of three years beyond the County's acceptance of renovation or construction projects.

Business Auto Liability Coverage
Business Auto Liability coverage is to include bodily injury and property damage arising out of ownership, maintenance or use of any auto, including owned, non-owned and hired automobiles and employee non-ownership use.

Excess or Umbrella Liability Coverage
Umbrella Liability insurance is preferred, but an Excess Liability equivalent may be allowed. Whichever type of coverage is provided, it shall not be more restrictive than the underlying insurance policy coverages. Umbrella coverage shall drop down to provide coverage where the underlying limits are exhausted.

Evidence/Certificates of Insurance
Required insurance shall be documented in Certificates of Insurance. If and when required by the County, Certificates of Insurance shall be accompanied by documentation that is acceptable to the County establishing that the insurance agent and/or agency issuing the Certificate of Insurance has been duly authorized, in writing, to do so by and on behalf of each insurance company underwriting the insurance coverages(s) indicated on each Certificate of Insurance.

New Certificates of Insurance are to be provided to the County at least 30 days prior to coverage renewals. Failure of the Contractor to provide the County with such renewal certificates may be considered justification for the County to terminate this agreement, contract or lease.

Certificates should contain the following additional information.

1. Indicate that Escambia County is an additional insured on the general liability policy.
2. Include a reference to the project and the Office of Purchasing number.
3. Disclose any self-insured retentions in excess of $1,000.
4. Designate Escambia County as the certificate holder as follows:
   Escambia County
   C/O Neighborhood Enterprise Division
   221 Palafox Place, Suite 200
   Pensacola, FL 32502-5844
5. Indicate that the County shall be notified at least 30 days in advance of cancellation.

Receipt of certificates or other documentation of insurance or policies or copies of policies by the County, or by any of its representatives, which indicate less coverage than required does not constitute a waiver of the Contractor's obligation to fulfill the insurance requirements herein.

If requested by the County, the Contractor shall furnish complete copies of the Contractor's insurance policies,

forms and endorsements, and/or such additional information with respect to its insurance as may be requested.

For Commercial General Liability coverage the Contractor shall, at the option of the County, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage.

ENDORSEMENTS/ADDITIONAL INSURANCE

If checked below, the County requires the following endorsements or additional types of insurance.

❑ **TERMINATION/ADVERSE CHANGE ENDORSEMENT**
All of Contractor's policies, except for professional liability and workers compensation insurance, are to be endorsed, and the Contractor's Certificate(s) of Insurance shall state, that the County shall be notified at least 30 days in advance of cancellation, non-renewal or adverse change.

❑ **OWNERS PROTECTIVE LIABILITY COVERAGE**
For renovation or construction contracts the Contractor shall provide for the County an owners protective liability insurance policy (preferably through the Contractor's insurer) in the name of the County.

This is redundant coverage if the County is named as an additional insured in the Contractor's Commercial General Liability insurance policy. However, this separate policy may be the only source of coverage if the Contractor's liability coverage limit is used up by other claims.

❑ **BUILDERS RISK COVERAGE**
Builders Risk insurance is to be purchased to cover subject property for all risks of loss, subject to a waiver of coinsurance, and covering off-site storage, transit and installation risks as indicated in the Installation Floater and Motor Truck Cargo insurance described hereafter, if such coverages are not separately provided.

The Builders Risk insurance is to be endorsed to cover the interests of all parties, including the County and all contractors and subcontractors. The insurance is to be endorsed to grant permission to occupy.

❑ **MOTOR TRUCK CARGO COVERAGE**
If the Installation Floater insurance does not provide transportation coverage, separate Motor Truck Cargo or Transportation insurance is to be provided for materials or equipment transported in the Contractor's or other vehicles from place of receipt to building sites or other storage sites. All risks coverage is preferred.

❑ **FIDELITY/DISHONESTY/LIABILITY COVERAGE - FOR COUNTY**
Fidelity/Dishonesty/Liability insurance is to be purchased or extended to cover dishonest acts of the Contractor's employees resulting in loss to the County.

MINIMUM PROJECT SAFETY REQUIREMENTS

The following safety requirements represent the minimum condition, which shall be met by all Contractors and subcontractors performing work for Escambia County: Reported or observed violations of Federal and State laws and regulations, or County ordinances shall be brought to the attention of the County project manager and County's Department of Safety and Risk Services and shall be immediately corrected by the Contractor. Additionally, the County may order work to be stopped if conditions exist that present immediate danger to persons or property. The Contractor acknowledges that any such stoppage will not shift responsibility for any damages from the Contractor to the County. Failure to comply with required safety procedures shall result in the suspension of the Work of the Contractor until such time as his operations are brought into compliance. Items which are not corrected or that are disputed by the Contractor may be referred by the County's Department of Safety and Risk Services for inspection or interpretation. The Contractor shall take reasonable precautions for work place safety and shall provide reasonable protection to prevent damage, injury, or loss to employees on the work site and to other persons who may be affected by the Work.

(1) Prior to the commencement of the project, the Contractor and all subcontractors shall provide to the County a written copy of their respective safety and health plans for review as part of the pre-submittal bid package.

(2) The Contractor shall establish and maintain an access control system at the work site, including a daily sign-in log, for all visitors, including County and regulatory personnel. Prior to commencement of construction, the project manager may designate specific individuals for routine access so that their duties are not impeded. All visitors that are not pre-approved for admittance shall be escorted through the project by either a Contractor representative or by the project manager or designee.

(3) The Contractor shall provide all necessary safety equipment for County staff, employees, and visitors to enter the work site. This equipment may include hard hats, hearing protection, safety glasses, or any other safety items deemed necessary by the Contractor or required by State or Federal safety regulations.

(4) Construction vehicles on the work site shall always be operated in a safe manner. The Contractor shall take appropriate action to ensure the safety of County staff, visitors, and the general public while operating work vehicles at a "controlled" construction site. Where conditions warrant, or at the request of the County, temporary barriers shall also be established for these traffic areas.

(5) The Contractor shall prominently mark the work site and ensure its security. Site security shall include appropriate fencing, barricades, warning tape, covered walkways and warning signs. In no instance shall a work site be accessible, without obvious warning, to County staff, visitors, or the general public. At a minimum, the project site shall be posted with the appropriate trespass warning signs as specified in Section 810.09(2)(d), Florida Statutes: THIS AREA IS A DESIGNATED CONSTRUCTION SITE; ANYONE TRESPASSING ON THIS PROPERTY SHALL, UPON CONVICTION, BE GUILTY OF A FELONY; "A DANGER, CONSTRUCTION SITE. AUTHORIZED PERSONNEL ONLY," and other general safety warning signs, i.e., "HARD HAT AREA," as are deemed necessary by the Contractor and project manager.

(6) In the event barricading of a work site is not feasible, alternative measures may be used upon prior approval by the County safety Office. Alternative measures may include, but are not limited to, working during "off 'hours such as nights, weekends, or holidays, or the providing of temporary accommodations for building occupants (to be prearranged, if necessary, at the discretion of the County).

(7) The Contractor shall ensure compliance with all fire safety codes at the work site, especially as to egress, during the construction phase of an occupied facility. In no instance, (except where impractical and with the prior approval of the County's Department of Safety and Risk Services and the appropriate life safety code inspector), shall the life safety code components of an occupied

facility be reduced or otherwise compromised.

A set of these construction plans, with a signature of approval by the appropriate life safety code inspector, shall be kept at each construction site and available for routine inspection. The Contractor shall communicate with each subcontractor and County's Department of Safety and Risk Services as to scheduling of events that may pose hazards or inconveniences to building occupants. The Contractor shall also ensure that appropriate scheduling information is also conveyed to the project manager.

- When a project alters a building's fire protection compartment features, such as fire barriers, smoke barriers, or corridor walls, exits must provide free and unobstructed egress. Employees shall receive notice if any alternative exits have been designated. Buildings or areas under construction must maintain escape egress for construction workers at all times. These means of egress shall be inspected daily by the Contractor.

- When a project affects fire alarms, fire detection, or fire suppression systems, of a building that is occupied, the Contractor must ensure that such systems are not functionally impaired. Any temporary systems, which are installed, must be inspected and tested monthly by the Contractor. Employees must be notified when such temporary systems are in place.

- When any sources of ignition are present, such as welding torches, smoking by all persons shall be prohibited on any construction site and in any County facility.

(8) Noise, dust, and the use of chemical products may create inside health hazards at the work site to building occupants requiring that the Contractor to adhere to the following guidelines at a minimum:

(a) The Contractor shall initiate construction and engineering safety controls to minimize exposure of dusts, noise, and chemical odors to building occupants. These controls may involve the construction or use of temporary walls, plastic barriers, mechanical ventilation, elimination of make-up air returns from work areas, pressurizing occupied areas, or a combination of several methods. The Contractor shall coordinate all such engineering efforts with the project manager, and these control measures shall require prior approval by the County's Department of Safety and Risk Services. In cases where these efforts may not be feasible, alternative work schedules on evenings and weekends may be instituted as a part of this process.

(b) Material Safety Data Sheets (MSDS) shall be provided to the County's Department of Safety and Risk Services for all hazardous substances used on the project or brought on the job site. These products include, but are not limited to, paints, solvents, roofing compounds, and cleaning compounds.

(c) Appropriate precautions shall be taken to prevent occupant exposure to hazardous respirable dusts, contaminants, and fumes from welding, cutting, or drilling of concrete and masonry, or the operation of internal combustion engines. The Contractor shall also determine whether respirable crystalline silica, which is a potential carcinogen contained in many building products, is present at the work site. Control of dusts from these types of products and operations shall be an essential safety requirement for the Contractor.

(d) The Contractor should be aware of other buildings adjacent to his work areas and shall be prepared to take necessary actions to prevent the spread of dusts and fumes to those facilities.

(9) The Contractor shall ensure that all emergency notifications, including those for fires and medical needs, shall be promptly made by dialing County 911 dispatchers. The Caller should state the exact location of the work site emergency, the nature of the emergency, and specifically indicate if

medical or fire services are needed.

(10) The Contractor agrees and understands that all County construction/renovation sites shall be subject to periodic inspection by life safety code inspectors, Florida Department of Labor and Employment Security, Division of Safety, Occupational Safety and Health Administration, Florida Department of Environmental Protection, Environmental Protection Agency, and other Federal, State, or County regulatory agencies.

(11) The Contractor shall provide adequate refuse containers for the disposal of construction debris. Refuse shall not be allowed to accumulate on the project site grounds, and the Contractor shall ensure that these containers are subsequently emptied on a regular basis.

(12) Water runoff and soil erosion from the project site shall be controlled by the Contractor pursuant to the regulations of the Florida Department of Environmental Protection.

(13) Water-based paint and stain products shall be used by the Contractor in the place of solvent-based products where the application so permits. Use of organic solvent-based products shall be used only where absolutely necessary and with the prior approval of the project manager. Lead-containing paints shall not be normally used or specified for any application. If the use of lead-containing paint is essential for a specific application, prior written approval from the County's Department of Safety and Risk Services shall be obtained before their use.

(14) The use of any products containing toxic metals, especially those regulated by Resource Conservation and Recovery Act (RCRA), (i.e. lead, chromium, barium, silver, arsenic, cadmium, mercury, selenium), on the work site shall be avoided. Prior written approval for use of these metals shall be obtained by the Contractor from the County's Department of Safety and Risk Services.

(15) The use of any radioactive materials by the Contractor on project sites shall require pre-approval. Copies of appropriate certifications, licenses, testing, and inspection records shall be provided by the Contractor to the project manager and County's Department of Safety and Risk Services for review.

(16) The County contracts out the identification and abatement of asbestos containing building materials. Asbestos abatement can only be performed by state licensed asbestos abatement contractors. General contractors, therefore, shall not be authorized to remove or disturb any asbestos containing materials. Although efforts are made to identify or remove such asbestos containing materials prior to renovations, the possibility exists that asbestos materials may be encountered at a work site. If so, Contractors who encounter such materials shall immediately stop work and notify the project manager ~~or~~ and the County's Department of Safety and Risk Services.

(17) The above-cited guidelines represent minimum expectations and actions, which shall be taken by Contractors while under contract for County construction and renovation projects. These guidelines are not all inclusive and will be revised as necessary. In the event these guidelines conflict with other contract documents, the most stringent application shall apply. Any questions or disputes should be brought to the immediate attention of the project manager and County's Department of Safety and Risk Services.

HOME/SHIP SUBSTANTIAL REHABILITATION/
RECONSTRUCTION SERVICES PROGRAM AGREEMENT

THIS AGREEMENT is made and entered into by and between Mattie Price (hereinafter referred to as "Owner"), and Bill Walther Construction, Inc. (hereinafter referred to as "Contractor"), and Escambia County, Florida, a political subdivision of the State of Florida (hereinafter referred to as "County").

W I T N E S S E T H:

WHEREAS, the County, acting by and through the Neighborhood Enterprise Division (hereinafter referred to as "NED"), has established the **HOME/SHIP Substantial Rehabilitation/Reconstruction Services Program** (hereinafter referred to as the "Program") to provide loans to qualified income eligible property owners to fund repairs to homestead property; and

WHEREAS, the Owner submitted an application with the NED for a Program loan to fund certain repairs as provided herein; and

WHEREAS, the Contractor was selected by competitive bid to complete said repairs as provided herein; and

WHEREAS, the parties hereto wish to define their rights and responsibilities as it relates to the Program.

NOW, THEREFORE, in consideration of the mutual covenants contained in this Agreement, and other good and valuable consideration, the parties agree as follows:

Section 1. Recitals. The recitals contained in the preamble of this Agreement are declared to be true and correct and are hereby incorporated into this Agreement.

Section 2. Scope of Work. The Contractor agrees to furnish and pay for all management, supervision, financing, labor, materials, tools, fuel, supplies, equipment and services of every kind and type necessary to diligently, timely, and fully perform and complete in a good workmanlike manner the renovation and rehabilitation of the subject property located at 1809 W. Bobe Street, Pensacola, FL 32501 (hereinafter referred to as "Project"), in accordance with the *Scope of Work* as described in PD 18-19.036, attached hereto as **Exhibit A**. In the event there is any conflict between the provisions of this Agreement and the provisions of any other contract documents, the provisions of this Agreement shall in all cases prevail.

Section 3. Contract Amount. In consideration of the faithful performance by Contractor of the covenants in this Agreement to the full satisfaction and acceptance of County, County agrees to pay, or cause to be paid, to Contractor an amount not to exceed the total sum of **$115,350 (base bid of $113,500 plus alternate #1 addition of $1000 plus alternate addition of $850)** (hereinafter referred to as the "Contract Amount") for the completion of the Project in accordance with the Scope of Work referenced above.

Section 4. Method of Payment. The County shall issue payments to the Contractor as follows:

Draw 1: Demolition and Septic Tank Abandonment (if applicable) complete (permits, demolition)—5%

Draw 2: Foundation Complete (permits, site work, footings, foundation)—10%

Draw 3: Rough-In Complete (wall and roof framed and sheathed, subflooring (if applicable), interior walls framing, roof complete, siding complete, windows and exterior doors, rough mechanical, plumbing, electrical)—35%

Draw 4: Substantial Completion. (Certificate of Occupancy)—40%

Draw 5/Final: Completion of all punch list items, provision of warranty paperwork to County, sign-off by Owner, Contractor's Final Payment affidavit—10%

Alternately, the contractor may utilize the AIA Document G702/703 (Application and Certification for Payment) to submit up to five draws (including final) for the project. A ten percent (10%) retainage will be withheld from draws 1-4. Contractor must provide a description/schedule of work prior to initializing work.

Contractor may request payments by the submission of a properly executed original invoice submitted to NED with appropriate supporting documentation. All payments will be provided to the Contractor directly from the Clerk of the Circuit Court's office by mail or direct deposit as determined by the Contractor.

Contractor's acceptance of payments hereunder shall constitute a full waiver of any and all claims by Contractor against County arising out of this Agreement or otherwise relating to the Project, except those previously made in writing and identified by Contractor as unsettled at the time of the final inspection.

The County may decline to approve payment(s), or portions thereof, to such extent as may be necessary in the County's opinion to protect it from loss due to: (a) defective work not remedied; (b) third party claims filed or reasonable evidence indicating probable filing of such claims; (c) failure of Contractor to make payment properly to subcontractors or for labor, materials or equipment; (d) reasonable doubt that the work can be completed for the unpaid balance of the Contract Amount; (e) reasonable indication that the work will not be completed within the Contract Time; (f) unsatisfactory prosecution of the work by the Contractor; or (g) any other material breach of the Agreement.

All payments under this agreement and interest on any late payments shall be governed by and construed in accordance with the Florida Prompt Payment Act, §§218.70, et seq., Florida Statutes, as amended.

Section 5. Bonds. If the Contract Amount exceeds $25,000, the Contractor shall provide *Performance and Payment Bonds*, in the form prescribed in **Exhibit B**, in the amount of 100% of the Contract Amount. The Performance and Payment Bonds shall be underwritten by a surety authorized to do business in the State of Florida and otherwise acceptable to County; provided; however, the surety shall be rated as "A-" (excellent) or better as to general policy holders rating and Class V or higher rating as to financial size category and the amount required shall not exceed 5% of the reported policy holders' surplus, all as reported in the most current Best Key Rating Guide, published by A.M. Best Company, Inc. of 75 Fulton Street, New York, New York 10038.

If the surety for any bond furnished by Contractor is declared bankrupt, becomes insolvent, its right to do business is terminated in the State of Florida, or it ceases to meet the requirements imposed by the Contract Document, the Contractor shall, within five (5) calendar days thereafter, substitute another bond and surety, both of which shall be subject to the County's approval. Failure by Contractor to maintain its bonds in full force and effect at all times, including the warranty period, shall be grounds for termination of this Contract.

Pursuant to §255.05, Florida Statutes, the Contractor shall be required to execute and record the Performance and Payment bonds. The bonds must state the name and principal business address of both the Principal and the Surety and a description of the project sufficient to identify it. (The filing costs are $10.00 for the first page and $8.50 for each remaining page).

Section 6. Notice to Proceed. The County/NED shall issue a written Notice to Proceed to the Contractor within **thirty (30) calendar days** from the date of award. Contractor shall commence work within **seven (7) calendar days** from the Commencement Date specified in the Notice to Proceed. No work shall be performed at the Project site prior to the Commencement Date.

Section 7. Contract Time and Liquidated Damages. Time is of the essence in the performance of the work under this Agreement. The Project shall be substantially complete within **one hundred twenty (120) calendar days** from the Commencement Date specified in the Notice to Proceed. Work will be fully complete within **one hundred thirty-five (135) calendar days** from the date specified in the Notice to Proceed. Should Contractor fail to substantially complete the Project within the time period noted above, County shall be entitled to assess, as liquidated damages, but not as a penalty, **$150.00** for each calendar day thereafter until substantial completion is achieved.

The Project shall be deemed to be substantially complete on the date that the County/NED certifies in writing that the Project has been completed in accordance with the contract documents and as evidenced by a Certificate of Occupancy, so that the Project can be utilized for the purposes for which it is intended. Along with such certification, the County/NED shall compile a "punch list" of any remaining exceptions that do not adversely affect the use of the Project. Completion of these items will be required prior to final inspection and issuance of a final Certificate of Payment as provided in **Section 11** below.

Contractor hereby expressly waives and relinquishes any right which it may have to seek to characterize the above noted liquidated damages as a penalty, which the parties agree represents a fair and reasonable estimate of the actual damages at the time of contracting if Contractor fails to substantially complete the Project in accordance with the progress schedule.

When any period of time is referenced to by days herein, it shall be computed to exclude the first day and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day shall be omitted from the computation, and the last day shall become the next succeeding day which is not a Saturday, Sunday or legal holiday.

Section 8. Delays. Should Contractor be obstructed or delayed in the performance of the work as a result of the Owner's unreasonable interference or other unforeseeable causes beyond the control of Contractor, and not due to its fault or neglect, including but not restricted to acts of God or of the public enemy, acts of government, fires, floods, epidemics, quarantine regulations, strikes or lockouts, Contractor shall notify the County/NED in writing within **forty-eight (48) hours** after the commencement of such delay, stating the cause or causes thereof, or be deemed to have waived any right which Contractor may have had to request a time extension.

No interruption, interference, inefficiency, suspension or delay in the commencement or progress of the work from any cause whatever, including those for which County may be responsible, in whole or in part, shall relieve Contractor of his duty to perform or give rise to any right to damages or additional compensation from County. Contractor expressly acknowledges and agrees that it shall receive no damages for delay. Contractor's sole remedy, if any, against County will be the right to seek an extension to the Contract Time; provided, however, the granting of any such time extension shall not be a condition precedent to the aforementioned "No Damage For Delay" provision. This paragraph shall expressly apply to claims for early completion, as well as to claims based on late completion.

Section 9. Change Orders. After the execution of this Agreement, no change in the scope, quantity, or quality of work will be undertaken without the prior written approval of the County/NED. Any changes requested by the Owner or Contractor must be submitted in writing to the County/NED and must detail all proposed work and cost. The Owner or Contractor's preference shall not be cause for a Change Order. Furthermore, the Contractor shall not be entitled to additional compensation as a result of the Contractor's failure to properly evaluate the extent of the work, as related to the work specifications.

The County/NED shall have the right at any time during the progress of the work to increase or decrease the work. After being notified of an authorized change, Contractor shall submit an itemized estimate of any cost or time increases or savings it foresees as a result of the change. Except in an emergency endangering life or property, or as expressly set forth herein, no addition or changes to the work shall be made except upon written order of the County/NED, and the County/NED shall not be liable to the Contractor for any increased compensation without such written order.

A *Change Order*, in the form attached as **Exhibit C** to this Agreement, shall be issued and executed promptly after an agreement is reached between Contractor, Owner, and the County/NED concerning the requested changes. Contractor shall promptly perform changes authorized by duly executed Change Orders. The Contract Amount shall be adjusted in the Change Order in the manner as the County/NED, Owner, and Contractor shall mutually agree. The Owner shall execute a Modification of Mortgage and/or Lien, as appropriate, which coincides with any cost increase or decrease resulting from the Change Order.

Section 10. **Project Site Protection.** Contractor agrees to keep the Project site clean at all times of debris, rubbish and waste materials arising out of the work. Upon the completion of the work, Contractor shall remove all debris, rubbish and waste materials from and about the Project site, as well as all tools, appliances, construction equipment and machinery and surface materials, and shall leave the Project site clean and ready for occupancy.

Any existing surface or subsurface improvements, including, but not limited to, pavements, curbs, sidewalks, pipes, utilities, footings, structures, trees and shrubbery shall be protected by Contractor from damage during the prosecution of the work. Any such improvements so damaged shall be restored by Contractor to the condition equal to that existing at the time of Contractor's commencement of the work.

Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the work or adjacent property to stresses or pressures that will endanger it.

Section 11. **Final Completion.** The Contractor shall provide the County/NED with written notice that the Project is complete and ready for final inspection, and the County/NED shall promptly make such inspection.

After the Project is ready for final inspection by the County/NED, the Contractor shall submit to County: (1) a *Release and Affidavit* in the form attached as **Exhibit D;** (2) if requested by County/NED, other data establishing payment or satisfaction of all obligations, such as receipts, releases and waivers of liens, arising out of the Agreement, to the extent and in such form as may be designated by County; and (3) Owner's Final Release and Warranty. County reserves the right to inspect the work and make an independent determination as to the work's acceptability.

If the County/NED finds the work acceptable and fully performed in accordance with the Contract Documents and upon receiving the documentation described above, the County/NED shall promptly issue a final *Certificate for Payment*, stating that, on the basis of observations and inspections, the work has been completed in accordance with the terms and conditions of the Agreement and that any remaining balance due the Contractor is due and payable. If Owner does not consent to sign Homeowner's Final Release and Warranty, the County/NED, after documentation of acceptable completion of work and reasonable effort to secure signoff from the Owner, shall cause final Certificate for Payment to be issued to the Contractor.

Section 12. **Tests and Inspections.** The County/NED, its respective representatives,

agents and employees, and any governmental agencies with jurisdiction over the Project shall have access at all times to the work, whether performed on or off of the Project site, for their observation, inspection and testing. Contractor shall provide proper, safe conditions for such access. Contractor shall provide County with timely notice of readiness of the work for all required inspections, tests or approvals.

If the Agreement or any codes, laws, ordinances, rules or regulations of any public authority having jurisdiction over the Project requires any portion of the work to be specifically inspected, tested or approved, Contractor shall assume full responsibility therefor, pay all costs in connection therewith and furnish County the required certificates of inspection, testing or approval. All inspections, tests or approvals shall be performed in a manner and by organizations acceptable to the County.

If any work that is to be inspected, tested or approved is covered without written concurrence from the County, such work must, if requested by County, be uncovered for observation. Such uncovering shall be at Contractor's expense unless Contractor has given County timely notice of Contractor's intention to cover the same and County has not acted with reasonable promptness to respond to such notice. If any work is covered contrary to written directions from County, such work must, if requested by County, be uncovered for County's observation and be replaced at Contractor's sole expense.

The County/NED, or other County officials as may be duly authorized by the NED, reserves the right to place inspectors at the Project site in order to ensure proper expenditure of the funds provided under this Agreement. The County/NED does not assume any liability for the quality of work performed or injuries incurred during the performance of the Project. Further, the County/NED shall not act in a supervisory capacity during the course of the Project.

Section 13. Reports. Contractor shall maintain in a safe place at the Project site one copy of the all documents related to the performance of this Agreement, as well as all shop drawings and other Contractor submittals and all written interpretations and clarifications issued by the County, in good order and annotated to show all changes made during construction.

Contractor shall keep all records and supporting documentation which relate to the work hereunder for a minimum of five (5) years from the date of termination of this Agreement or the date the Project is completed, whichever is later. The County, the Clerk of the Circuit Court/Finance Division, or any duly authorized agents or representatives of County, shall have the right to audit, inspect, and copy all such records and documentation relating to this Agreement as often as they deem necessary during the period of this Agreement and during the five (5) year period noted above; provided, however, such activity shall be conducted only during normal business hours.

Section 14. Defective Work. Work not conforming to the requirements of the Agreement shall be deemed "*defective work*." If required by County, Contractor shall either cure all defective work, whether or not fabricated, installed or completed, or, if the defective work has been rejected by County, remove it from the site and replace it. Contractor shall bear all direct, indirect and consequential costs of such correction or removal (including, but not limited to fees and

charges of engineers, architects, attorneys and other professionals) made necessary thereby, and shall hold County harmless for same.

If the County considers it necessary or advisable that covered work be observed by County or inspected or tested by others, Contractor, at County's request, shall uncover, expose or otherwise make available for observation, inspection or tests as County may require, that portion of the work in question, furnishing all necessary labor, material and equipment. If it is found that such work is defective work, Contractor shall bear all direct, indirect and consequential costs of such uncovering, exposure, observation, inspection and testing and of satisfactory reconstruction (including, but not limited to, fees and charges of engineers, architects, attorneys and other professionals), and County shall be entitled to an appropriate decrease in the Contract Amount. If, however, such work is not found to be defective, Contractor shall be allowed an increase in the Contract Amount and/or an extension of the Contract Time, directly attributable to such uncovering, exposure, observation, inspection, testing and reconstruction.

If any portion of the work is defective work, or Contractor fails to supply sufficient skilled workers with suitable materials or equipment, or fails to finish or perform the work to conform to the requirements of the Agreement, County may order Contractor to stop the work, or any portion thereof, until the cause for such order has been eliminated; however, this right of County to stop the work shall not give rise to any duty on the part of County to exercise this right for the benefit of Contractor or any other party.

Should the County determine, at its sole discretion, it is in the County's best interest to accept defective work, the County may do so. Contractor shall bear all direct, indirect and consequential costs attributable to the County's evaluation of and determination to accept defective work. If such determination is rendered prior to final payment, a Change Order shall be executed evidencing such acceptance of such defective work, incorporating the necessary revisions in the Agreement and reflecting an appropriate decrease in the Contract Amount. If the County accepts such defective work after final payment, Contractor shall promptly pay County an appropriate amount to adequately compensate County for its acceptance of the defective work.

If Contractor fails, within a reasonable time after the written notice from County, to correct defective work or to remove and replace defective work as required by County, or if Contractor fails to perform the work in accordance with the Agreement, or if Contractor fails to comply with any of the provisions of the Agreement, County may, after **seven (7) calendar days'** written notice to Contractor, correct and remedy any such deficiency. To the extent necessary to complete corrective and remedial action, County may exclude Contractor from any or all of the Project site, take possession of all or any part of the work, and suspend Contractor's services related thereto, take possession of Contractor's tools, appliances, construction equipment and machinery at the Project site and incorporate in the work all materials and equipment stored at the Project site or for which County has paid Contractor but which are stored elsewhere. Contractor shall allow County, and their respective representatives, agents, and employees such access to the Project site as may be necessary to enable County to exercise the rights and remedies under this Section. All direct, indirect and consequential costs of County in exercising such rights and remedies shall be charged against Contractor, and a Change Order shall be issued, incorporating the necessary revisions to the Agreement, including an appropriate

decrease to the Contract Amount. Such direct, indirect and consequential costs shall include, but not be limited to, fees and charges of engineers, architects, attorneys and other professionals, all court and arbitration costs and all costs of repair and replacement of work or others destroyed or damaged by correction, removal or replacement of Contractor's defective work. Contractor shall not be allowed an extension of the Contract Time because of any delay in performance of the work attributable to the exercise by County of County's rights and remedies hereunder.

Section 15. Termination.

15.1 Termination for Contractor's Default. Contractor shall be considered in material default of the Agreement and such default shall be considered cause for County to terminate the Agreement, in whole or in part, as further set forth in this Section, if Contractor: (a) fails to begin the work within the time specified herein; or (b) fails to properly and timely perform the work as directed by the County; or (c) performs the work unsuitably or neglects or refuses to remove materials or to correct or replace such work as may be rejected as unacceptable or unsuitable; or (d) discontinues the performance of the work; or (e) fails to resume work which has been suspended within a reasonable time after being notified to do so; or (f) becomes insolvent or is declared bankrupt, or commits any act of bankruptcy; or (g) allows any final judgment to stand against it unsatisfied for more than ten (10) days; or (h) makes an assignment for the benefit of creditors; or (i) fails to obey any applicable codes, laws, ordinances, rules or regulations with respect to the work; or (j) materially breaches any other provision of the Agreement.

The County/NED shall notify Contractor in writing of Contractor's default(s). If County/NED determines that Contractor has not remedied and cured the default(s) within **seven (7) calendar days** following receipt by Contractor of said written notice of default, the County/NED may terminate Contractor's right to proceed under the Agreement, in whole or in part, and take possession of all or any portion of the work and any materials, tools, equipment, and appliances of Contractor, take assignments of any of Contractor's subcontracts and purchase orders, and complete all or any portion of Contractor's work by whatever means, method or agency which County, in its sole discretion, may choose.

If County deems any of the foregoing remedies necessary, Contractor agrees that it shall not be entitled to receive any further payments hereunder until after the Project is completed. All monies expended and all of the costs, losses, damages and extra expenses, including all management, administrative and other overhead and other direct and indirect expenses (including attorneys' fees) or damages incurred by County incident to such completion, shall be deducted from the Contract Amount, and if such expenditures exceed the unpaid balance of the Contract Amount, Contractor agrees to pay promptly to County on demand the full amount of such excess, including costs of collection, attorney's fees (including appeals) and interest thereon at the maximum legal rate of interest until paid. If the unpaid balance of the Contract Amount exceeds all such costs, expenditures and damages incurred by the County to complete the Work, such excess shall be paid to the Contractor. The amount to be paid to the Contractor or County, as the case may be, and this obligation for payment shall survive termination of the Agreement.

The liability of Contractor hereunder shall extend to and include the full amount of any and all sums paid, expenses and losses incurred, damages sustained, and obligations assumed by County in good faith under the belief that such payments or assumptions were necessary or required, in completing the work and providing labor, materials, equipment, supplies, and other items therefor or re-letting the work, in settlement, discharge or compromise of any claims, demands, suits, and judgments pertaining to or arising out of the work hereunder.

If, after notice of termination of Contractor's right to proceed pursuant to this Section, it is determined for any reason that Contractor was not in default, or that its default was excusable, or that County is not entitled to the remedies against Contractor provided herein, then Contractor's remedies against County shall be the same as and limited to those afforded Contractor below.

15.2 Termination for Owner's Default. The Owner shall be considered in material default of the Agreement and such default shall be considered cause for County to terminate the Agreement, if the Owner: (a) cancels the Project after the Owner's Right to Rescind has expired; (b) fails to allow necessary ingress and egress on the subject property; (c) fails to timely vacate the premises prior to the Project Commencement Date; (d) otherwise obstructs or delays the performance of the work; or (e) materially breaches any other provision of the Agreement.

The County/NED shall notify Owner in writing of Owner's default. If County/NED determines that the Owner has not remedied and cured the default within **seven (7) calendar days** following receipt of said written notice of default then the Agreement may be terminated by the County/NED.

Any Project costs incurred prior to the date of termination or Project funding advanced to the Owner or paid on the Owner's behalf, including, but not limited to, temporary relocation payment, moving/storage payment, title search fee, procurement costs, permit fees, work completed by Contractor as of the date of termination, and costs incurred for special order materials, etc.) shall be repaid to the County by Owner. Within **thirty (30) calendar days** of receipt of the notice of termination, the Owner shall submit a cashier's check to the County for the total amount of any costs incurred and/or funds disbursed under this Agreement through the date of Owner's termination. If Owner fails to return such funds, the County shall place a lien against the subject property for the total amount expended.

15.3 Termination for Convenience. County shall have the right to terminate this Agreement without cause upon **seven (7) calendar days'** written notice of termination to Contractor and Owner. In the event of such termination for convenience, Contractor's recovery against County shall be limited to that portion of the Contract Amount earned through the date of termination, but Contractor shall not be entitled to any other or further recovery against County, including, but not limited to, damages or any anticipated profit on portions of the work not performed. The Owner shall not be liable for any Project costs incurred through the date of termination but shall return any unencumbered funds advanced to the Owner.

15.4 Termination for Lack of Funding. The parties acknowledge that this Agreement is based upon the availability of HOME/SHIP funds, and the County/NED reserves

the right to cancel same upon providing **seven (7) calendar days'** written notice to Contractor and Owner should funding cease to be available. In the event of such termination for lack of funding, the Contractor will be paid for the work completed as of the contract termination date. The Owner shall not be liable for any Project costs incurred through the date of termination but shall return any unencumbered funds advanced to the Owner.

15.5 Notice of Suspension. County shall have the right to suspend all or any portions of the work upon providing Contractor **two (2) calendar days'** written notice of such suspension. If all or any portion of the work is so suspended, Contractor's sole and exclusive remedy shall be to seek an extension of time to its schedule in accordance with the procedures set forth in the Agreement. In no event shall the Contractor be entitled to any additional compensation or damages. Provided, however, if the ordered suspension exceeds three (3) months, the Contractor shall have the right to terminate the Agreement with respect to that portion of the work which is subject to the ordered suspension.

Section 16. Indemnification. To the extent permitted by law, the Contractor and Owner covenant and agree to, and do hereby indemnify and hold harmless and defend the County, NED, the U. S. Department of Housing and Urban Development, and the State of Florida and their agents, directors, and employees, from and against any and all claims for injuries or damages to persons or property of whatsoever kind or character, whether real or asserted, arising out of this agreement or the work to be performed hereunder.

Section 17. Insurance. The Contractor and any subcontractors who may perform work in connection with this Project are required to carry the following insurance:

(a) Commercial General Liability, Form CG1, with $1,000,000 per occurrence. Excess or umbrella insurance may be purchased to make up the difference, if any, between the policy limits of the underlying policies.

(b) Business Automobile Liability with $1,000,000 per occurrence minimum combined single limits for all hired, owned, and non-owned vehicles.

(c) Florida statutory Workers' Compensation or proof of exemption.

If the Contractor consists of a joint venture, partnership, or other association of professional or business firms, each such firm shall be required to individually carry the above cited coverages.

Contractor agrees all liability coverage shall be through carriers admitted to do business in the State of Florida. Carriers shall be "A" or other Secure Best Rating with a minimum financial size of "VII", according to the A.M. Best Key Rating Guide Latest Edition. The insurance policies shall be endorsed to provide at least **thirty (30) calendar days'** notice of cancellation, nonrenewal or adverse change. Such notices shall be mailed to Escambia County Neighborhood Enterprise Division, 221 Palafox Place, Suite 200, Pensacola, FL 32502.

The Board of County Commissioners and Escambia County shall be endorsed as "additional insureds" on all liability policies (except Workers' Compensation and professional liability).

Certificates of Insurance shall be provided to Escambia County, 221 Palafox Place, Suite 200, Pensacola, Florida 32502 prior to commencement of work hereunder. Certificates shall reflect the additional insured status of Escambia County. The Board of County Commissioners and Escambia County shall also be the certificate holders.

Neither the Contractor nor any subcontractor shall commence work under this agreement until all insurance required under this section has been secured and such insurance has been approved by the County/NED.

Section 18. Subcontracts. The Contractor may subcontract work under this Agreement with the prior written consent of the County. Regardless of any subcontract, the Contractor shall remain responsible for all work performed under this Agreement. The Contractor agrees to be responsible for the fulfillment of all work included in any subcontract and further agrees to be responsible for payment of all monies due to under any subcontract. It is understood and agreed that the County shall not be liable to any subcontractor for any expenses or liabilities incurred by Contractor under a subcontract and that the Contractor shall be solely liable to the subcontractor for all expenses and liabilities incurred under the subcontract.

Section 19. Independent Contractor Status. In the performance of this Agreement hereunder, Contractor and Owner shall be independent contractors. Neither Contractor nor Owner shall hold itself out as an employee, agent or servant of the County; and neither shall have the power or authority to bind the County in any promise, agreement or representation, other than as specifically provided in this Agreement or as may be expressly provided hereafter in writing by an authorized official of the County.

Section 20. Warranty. Contractor hereby guarantees the improvements detailed in the Scope of Work, attached hereto as **Exhibit A**, for a period of one calendar year from the date of final inspection and acceptance of all work performed pursuant to this Agreement. Should any defects arise during that period, the Owner shall provide written notice to the Contractor and County/NED.

It is further agreed that the Contractor will obtain and assign to the Owner, c/o the County/NED, all express warranties given to Contractor or any subcontractors by any materialmen supplying materials, equipment or fixtures to be incorporated into the Project.

Section 21. Utilities [CHECK ONE]: [N/A]

☐ The Owner will permit the Contractor to use at no extra cost, existing utilities such as lights, electrical power, and water necessary to complete the Project.

☐ The Owner will permit the Contractor to use the water at no extra cost. The Contactor assumes all obligation/liability regarding the electrical power necessary to complete the Project.

Section 22. Owner's Responsibilities. The Owner shall timely vacate the premises prior to the Commencement Date of the Project. The Owner shall at all times cooperate with the

Contractor and County to facilitate the performance of the work. The Owner shall allow and maintain a route of ingress and egress for Contractor's equipment on the subject property.

Section 23. Notice to Owner of Florida's Construction Lien Law & Recovery Fund.

ACCORDING TO FLORIDA'S CONSTRUCTION LIEN LAW (SECTIONS 713.001-713.37, FLORIDA STATUTES), THOSE WHO WORK ON YOUR PROPERTY OR PROVIDE MATERIALS AND SERVICES AND ARE NOT PAID IN FULL HAVE A RIGHT TO ENFORCE THEIR CLAIM FOR PAYMENT AGAINST YOUR PROPERTY. THIS CLAIM IS KNOWN AS A CONSTRUCTION LIEN. IF YOUR CONTRACTOR OR A SUBCONTRACTOR FAILS TO PAY SUBCONTRACTORS, SUB-SUBCONTRACTORS, OR MATERIAL SUPPLIERS, THOSE PEOPLE WHO ARE OWED MONEY MAY LOOK TO YOUR PROPERTY FOR PAYMENT, EVEN IF YOU HAVE ALREADY PAID YOUR CONTRACTOR IN FULL. IF YOU FAIL TO PAY YOUR CONTRACTOR, YOUR CONTRACTOR MAY ALSO HAVE A LIEN ON YOUR PROPERTY. THIS MEANS IF A LIEN IS FILED YOUR PROPERTY COULD BE SOLD AGAINST YOUR WILL TO PAY FOR LABOR, MATERIALS, OR OTHER SERVICES THAT YOUR CONTRACTOR OR A SUBCONTRACTOR MAY HAVE FAILED TO PAY. TO PROTECT YOURSELF, YOU SHOULD STIPULATE IN THIS CONTRACT THAT BEFORE ANY PAYMENT IS MADE, YOUR CONTRACTOR IS REQUIRED TO PROVIDE YOU WITH A WRITTEN RELEASE OF LIEN FROM ANY PERSON OR COMPANY THAT HAS PROVIDED TO YOU A "NOTICE TO OWNER." FLORIDA'S CONSTRUCTION LIEN LAW IS COMPLEX, AND IT IS RECOMMENDED THAT YOU CONSULT AN ATTORNEY.

According to Florida Statutes 489.1425 (1) regarding the FLORIDA HOMEOWNERS' CONSTRUCTION RECOVERY FUND:

PAYMENT MAY BE AVAILABLE FROM THE FLORIDA HOMEOWNERS' CONSTRUCTION RECOVERY FUND IF YOU LOSE MONEY ON A PROJECT PERFORMED UNDER CONTRACT, WHERE THE LOSS RESULTS FROM SPECIFIED VIOLATIONS OF FLORIDA LAW BY A LICENSED CONTRACTOR. FOR INFORMATION ABOUT THE RECOVERY FUND AND FILING A CLAIM, CONTACT THE FLORIDA CONSTRUCTION INDUSTRY LICENSING BOARD AT THE FOLLOWING TELEPHONE NUMBER AND ADDRESS:

Division of Professions
Construction Industry Licensing Board
1940 North Monroe Street
Tallahassee, FL 32399

Section 24. Dispute Resolution. Should a dispute arise between the Owner and the Contractor regarding work performed pursuant to this Agreement that cannot be satisfactorily resolved, the Owner and Contractor agree to participate in the Arbitration Mediation Program provided by the Better Business Bureau (BBB) of Northwest Florida, Inc. to resolve the dispute. The decision of the BBB shall be considered final by the parties. However, this shall in no way prohibit the Owner and/or the Contractor from further appeal.

Section 25. Public Records. The Owner and Contractor acknowledge that this Agreement and any related financial records, audits, reports, plans, correspondence, and other documents

related to the performance of this Agreement may be subject to disclosure to members of the public pursuant to Chapter 119, Florida Statutes. The Owner and Contractor shall maintain all such public records and, upon request, provide a copy of the requested records or allow the records to be inspected within a reasonable time. Owner and Contractor shall also ensure that any public records that are exempt or exempt and confidential from disclosure are not disclosed except as authorized by law. Upon the expiration or termination of the Agreement, Owner and Contractor agree to maintain all public records for a minimum period of five (5) fiscal years in accordance with the applicable records retention schedules established by the Florida Department of State. In the event that any party fails to abide by the provisions of Chapter 119, Florida Statutes, the County may, without prejudice to any other right or remedy and after giving the parties, and surety, if any, seven calendar days' written notice, during which period the parties still fail to allow access to such documents, terminate this Agreement. In such case, the Owner and Contractor shall not be entitled to receive any further disbursement or benefit associated with this Agreement.

IF THE OWNER OR CONTRACTOR HAVE QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE OWNER AND CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:

Escambia County/Office of the County Administrator
221 Palafox Place, Suite 420
Pensacola, FL 32502
850-595-4947

Section 26. **Entire Agreement.** This instrument constitutes the entire agreement between the parties and no written or oral agreement of any kind exists to change the provision hereof.

Section 27. **Permits.** The Contractor shall be responsible for obtaining all permits and licenses necessary for the Project. If Contractor performs any work without obtaining, or contrary to, any such permits or licenses necessary for the prosecution of the work, Contractor shall bear all costs arising therefrom. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the work.

Section 28. **Compliance with Laws.** Contractor agrees to comply, at its sole expense, with all federal, state, and local laws, codes, statutes, ordinances, rules, regulations and requirements related to the performance of this Agreement, including but not limited to those dealing with taxation, worker's compensation, equal employment and safety.

Section 29. **Assignment.** This Agreement, or any interest herein, shall not be assigned, transferred, or otherwise encumbered, under any circumstances, by Contractor without the prior written consent of the County.

Section 30. **Notices.** Any notices shall be mailed to:

COUNTY:	OWNER:	CONTRACTOR:
George Bell	Mattie Price	Bill Walther Construction, Inc.
Neighborhood Enterprise Division	1809 W. Bobe Street	POB 3793
221 Palafox Place, Suite 200	Pensacola, FL 32501	Milton, FL 32572
Pensacola, FL 32502		

All notices shall be sent by certified mail, return receipt requested.

Section 31. **No Discrimination.** The Owner and Contractor shall ensure that this Agreement is performed and executed in a non-discriminatory manner, consistent with state and federal civil rights legislation. All services and access shall be available without regard to race, creed, color, handicap, familial status, disability, religion, or national origin.

Section 32. **No Waiver.** This Agreement does not constitute a waiver of any local ordinances, codes, or regulations.

Section 33. **Governing Law.** This Agreement is executed in Escambia County, Florida, and performance and interpretation of this Agreement shall be construed in accordance with the laws of Florida. Any action relating to this Agreement shall be instituted and prosecuted in the courts of Escambia County, Florida, and each party waives the right to change of venue.

Section 34. **Severability.** If any part, term, or provision of this Agreement is held by the courts to be illegal or in conflict with any law of the state where made, the validity of the remaining portions or provisions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the Agreement did not contain the particular part, term, or provision held to be invalid.

Section 35. **Headings.** The headings appearing in this Agreement have been inserted for the purpose of convenience and for ready reference. They do not purport to, and shall not be deemed to define, limit or extend the scope or intent of the clauses to which they appertain.

Section 36. **Authority**. Each individual executing this Agreement on behalf of a business or government entity represents and warrants that they are duly authorized to execute and deliver this Agreement on behalf of their respective principal, in accordance with duly adopted action or authority of the governing Board of each party, and that this Agreement is binding upon each party in accordance with its terms.

Exhibit A - Scope of Work

2. Project Overview

Demolition of existing single-family dwelling and construction of new single-family dwelling per attached plans and written specifications.

A. General Instructions to Bidders

Federal funds are being used to rehabilitate this property. The Federal Compliance Packet must be submitted prior to award of bid. Contractor may not be debarred from participating in Federal programs in order for bid to be awarded.

Labor, overhead, permits, insurance, and profit must be included into each itemized price and not listed as a separate itemized price or listed under "miscellaneous."

All work performed must be inspected (rough and final) and conform to County Ordinances, State Laws, and Florida Building Code.

Escambia County will pay for recording of Notice of Commencement in public records. Energy Sheets will also be provided to the awarded contractor by the County Neighborhood Enterprise Division (NED) for pulling permits.

The Homeowner is responsible for the removal of all belongings/furnishings from the designated work areas prior to the start date. A Notice to Proceed will be issued once the homeowner has vacated the property. The Contractor is not responsible for removal of Homeowner's trash and/or discarded belongings or furnishings. Items left within the unit become the property of the Contractor.

All materials and supplies shall be installed in accordance with the manufacturer's instructions, with all work completed in accordance with industry standards for new construction.

B. Contractor Requirements

The Contractor is responsible for temporary utilities (water and power) during the project and portable toilet. Contractor is also responsible for provision of permit/plan document box on site.

Contractor will furnish the homeowner, c/o Escambia County NED, all manufacturers' and suppliers' written guarantee/warranty documents covering materials and equipment provided through this contract. Contractor will furnish a one-year limited labor and material warranty to cover defects in materials and workmanship occurring from normal use.

For housing projects utilizing SHIP- or HUD-related programs, the awarded firm shall provide the following items to the Office of Purchasing, and the documents shall be current and on file with the proper departments, prior to the issuance of any Purchase Order .

1. Current W9 (less than one year old).
2. County Vendor Information sheet (less than one year old).
3. Worker's Compensation as required by State Law **OR** exemption form.

4. Commercial General Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.
5. Automobile Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.

GL and Auto Liability Certificates must state the following under the Additional Interest:

Escambia County
C/O Neighborhood Enterprise Division
221 Palafox Place
Suite 200
Pensacola, FL 32502-5844

All post-award correspondence should be directed to Neighborhood Enterprise Division, 221 Palafox Place, Suite 200, Pensacola, FL 32502 for review.

EXHIBIT B
PERFORMANCE AND PAYMENT BOND

BOND NO. _____

PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: That _____
(Insert name, address, and phone number of contractor)
_____, as Principal,

and _____,
(Insert full name, home office address and phone number of surety)

as Surety, are held and firmly bound unto the Board of County Commissioners for Escambia County, Florida, 223 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, as Obligee in the sum of _____
_____ Dollars ($_____), for the payment whereof we bind ourselves, our heirs, executors, personal representatives, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has entered into a contract dated as of the _____ day of_____, 20____, with Obligee for Contract No. _____

_____
(Insert name of project, including legal description, street address of property and general description of improvement)

_____
_____

in accordance with drawings and specifications, which contract is by reference made a part hereof, and is hereinafter referred to as the Contract.

THE CONDITION OF THIS BOND is that if Principal:

1. Performs the Contract at the times and in the manner prescribed in the Contract; and

2. Pays Obligee any and all losses, damages, costs and attorneys' fees that Obligee sustains because of any default by Principal under the Contract; and

3. Performs the guarantee of all work and materials furnished under the Contract applicable to the work and materials, then this bond is void; otherwise it remains in full force; and

4. Principal understands and agrees that this bond shall remain in full force and effect throughout the warranty period after substantial completion of the work.

The Surety, for value received, hereby stipulates and agrees that no changes, extensions of time, alterations or additions to the terms of the Contract or other work to be performed hereunder, or the specifications referred to therein shall in anywise affect its obligation under this bond, and it does hereby waive notice of any such changes, extensions of time, alterations or additions to the terms of the Contract or to work or to the specifications.

This instrument shall be construed in all respects as a common law bond.

In no event will the Surety be liable in the aggregate to Obligee for more than the penalty sum of this Performance Bond, regardless of the number of suits that may be filed by Obligee.

IN WITNESS WHEREOF, the above parties have executed this instrument this _____ day of _____, 20____, the name and corporate seal of each corporate party being hereto affixed and these premises duly signed by its undersigned representative, pursuant to authority of its governing body.

BOND NO. _____

PAYMENT BOND

BY THIS BOND, We, _____
(Insert name, address and phone number of contractor)
_____ (hereinafter called the "Principal")

and _____ (hereinafter called the "Surety"),
(Insert name)
located at _____, a surety insurer
(Insert address and phone number)
chartered and existing under the laws of the State of _____ and authorized to do business in the State of Florida, are held and firmly bound unto the Board of County Commissioners for Escambia County, Florida, 223 Palafox Place, Pensacola, Florida 32597-1591, (850) 595-4900, (hereinafter called the "County") in the sum of _____ ($_____) for payment of which we bind ourselves, our heirs, our personal representatives, our successors and our assignees, jointly and severally.

WHEREAS, Principal and County have reached a mutual agreement relating to Contract No._____ (hereinafter referred to as the "Contract") as of _____ (the bid award date for projects thereto) for the purpose of

_____
(Insert name of project, including legal description, street address of property and general description of improvement)

_____

said Contract being made a part of this Bond by this reference.

NOW, THEREFORE, THE CONDITION OF THIS BOND IS THAT IF THE PRINCIPAL:

1. Performs the contract dated _____, _____ between Principal and County for construction of _____, the contract being made a part of this bond by reference, at the times and in the manner prescribed in the contract; and

2. Promptly makes payments to all claimants as defined in Section 255.05(1)(a), Florida Statutes, supplying the Principal with labor, materials or supplies, used directly or indirectly by the Principal in the prosecution of the work provided for in the Contract; and

3. Pays the County for all losses, damages, expenses, costs, and attorneys' fees, including appellate proceedings, that the County sustains because of a default by the Principal under the contract; and

4. Performs the guarantee of all work and materials furnished under the contract for the time specified in the contract, then this bond is void; otherwise it remains in full force.

Any action instituted by a claimant under this pond for payment must be in accordance with the notice and time limitation provisions in Section 255.05(2), Florida Statutes.

BE IT FURTHER KNOWN:

1. Any changes in or under the Contract and compliance or noncompliance with any formalities connected with the said Contract or alterations which may be made in the terms of the said Contract, or in the work to be done under it, or the giving by the County of any extension of time for the performance of the said Contract, or any other forbearance on the part of the County or Principal to the other, shall not in any way release the Principal and the Surety, or either of them, their heirs, personal representatives, successors or assigns from liability hereunder, notice to the Surety of any such changes, alterations, extensions or forbearance being hereby waived.

2. Certain claimants seeking the protection of this Bond must timely comply with the strict requirements set forth in Section 255.05, Florida Statutes, and as otherwise provided by law.

3. As concerns payment for labor, materials and supplies, as affects certain claimants, no legal action shall be instituted against the Principal or Surety on this Bond after one (1) year from the performance of labor or the completion of delivery of the materials or supplies as is specifically mandated pursuant to Section 255.05, Florida Statutes.

THIS BOND DATED THE _____ DAY OF _____, 20____ (the date of issue by the Surety or by the Surety's agent and the date of such agent's power-of-attorney).

Pensacola, Florida
Escambia County

SHEET TITLE:
STRUCTURAL NOTES/DETAILS

DATE:
1/2/2018

SHEET NUMBER:
S1

GENERAL NOTES:

1. THIS STRUCTURE IS DESIGNED TO WITHSTAND ULTIMATE WINDSPEED OF 160 MPH (3 SEC GUST) AND NOMINAL WINDSPEED OF 124 MPH WINDSPEED PER FLORIDA BUILDING CODE 2017, SECTION 1609 AND WIND FORCES BY ASCE 7-10.
2. RISK CATEGORY II.
3. WIND EXPOSURE CATEGORY B.
4. INTERNAL PRESSURE COEFFICIENT: +/- 0.18, STRUCTURE IS FULLY ENCLOSED.
5. ENGINEER OF RECORD: DEAN A. SPENCER, PE, SECB FL#44472.
6. COMPONENT AND CLADDING SHALL HAVE FLORIDA APPROVAL NUMBERS.
7. ALL CONCRETE SHALL HAVE A 28 DAY MINIMUM COMPRESSIVE STRENGTH OF 3000 PSI.
8. ALL REBAR SHALL BE ASTM A615 GRADE 40.
9. SEE DRAWINGS FOR ANCHORAGE DETAILS.
10. ALL REBAR SHALL HAVE A 3" MINIMUM COVER WHEN CONCRETE IS CAST AGAINST THE EARTH.
11. FOUNDATION ANCHORS MUST HAVE 7" MINIMUM EMBEDMENT.
12. WALL CONSTRUCTED AS FOLLOWS:
    - A) EXTERIOR STUDS: 2"x4" #2 SPF; SPACING 16" O.C. (UNLESS NOTED OTHERWISE).
    - B) INTERIOR STUDS: 2"x4" #2 SPF; SPACING 16" O.C.
    - C) INTERIOR BEARING STUDS: 2"x4" #2 SPF; SPACING 16" O.C.
    - D) SHEATHING: 7/16" OSB OR 1/2" (4-PLY) APA RATED PLYWOOD.
    - E) INTERIOR BEARING WALLS SUPPORTING ROOF SHALL BE TIED DOWN WITH ONE OF THE FOLLOWING OPTIONS:
        1) 1/2" ALL-THREAD AT 48" O.C. AND 8" CORNERS AND OPENINGS.
        2) SIMPSON SPH4 AT 32" O.C. BOTTOM AND TOP AND ALL KING AND JACK STUDS.
        3) WINDSTORM OSB WITH NAILS PER WINDSTORM OSB DETAILS.

    SEE PLANS FOR NAIL PATTERN AND CONNECTORS.
13. ROOF CONSTRUCTED AS FOLLOWS:
    - A) ENGINEERED TRUSSES, #2 SYP, SPACING 24" O.C. (SEE PLANS).
    - B) DECKING: 7/16" OSB OR 1/2" (4-PLY) APA RATED PLYWOOD.

    SEE PLANS FOR NAIL PATTERN AND CONNECTORS.
    - C) SEE PLANS FOR CONNECTORS.
14. ALL NAILS SHALL BE COMMON.
15. ALL BRACING OF THE ROOF SHALL BE #2 SYP.
16. ALL COVERED PORCHES SHALL BE DECKED UNDERNEATH W/ 7/16" OSB OR 1/2" (4-PLY) APA RATED PLYWOOD. USE 8d COMMON RING SHANK NAILS AT 4" O.C. EDGE AND 8" O.C. INTERMEDIATE OR PER MANUFACTURER'S SPECIFICATIONS.
17. ALL LVL BEAMS SHALL BE PROTECTED FROM WEATHERING AND WATER.
18. ONLY ONE MEMBER OF PLY-BUILT BEAMS MAY BE SPLICED PER SPAN.

    SPLICES SHALL OCCUR AT 1/4 SPANS.
19. ALL PLY-BUILT BEAMS SHALL BE JOINED PER MANUFACTURERS REQUIREMENTS.
    - A) CONTACT ENGINEER OF RECORD FOR SPECIFIC LOADING INFORMATION AS NEEDED.
    - B) SEE THE FOLLOWING WEBSITE FOR JOINING OPTION:
        1) www.strongtie.com/products/fastening-systems/technical-notes/joining-composite-lumber-with-sds-wood-screws
20. ASSUMED ALLOWABLE BEARING PRESSURE IS 1500 PSF. REPORT ANY UNUSUAL FIELD CONDITIONS TO ENGINEER OF RECORD.
21. DESIGN LOADS PER FBC 2017, SECTION 1609 AND ASCE 7-10.
    - A) ROOF DEAD LOADS (DL): 20 PSF.
    - B) ROOF LIVE LOADS (Lr): 20 PSF.

THIS STRUCTURE IS IN A WINDBORNE DEBRIS AREA:
ALL EXTERIOR GLAZING SHALL BE PROTECTED AS STATED IN THE FBC 2017, SECTION 1609.1.2, PROTECTION OF OPENINGS.

CMU FOUNDATION WALL NOTES:

1. DOWEL ALL CMU REINFORCING IN FOOTINGS AND EXTEND INTO UPPERMOST BOND BEAM WITH 90 DEG. HOOKS WITH A MINIMUM 8" LEG.
2. PROVIDE FOUR (4) FILLED CELLS OF TYPICAL REINFORCING AT INTERSECTIONS.
3. PROVIDE THREE (3) FILLED CELLS OF TYPICAL REINFORCING AT CORNERS.
4. ALL CONCRETE MASONRY UNITS SHALL BE PLACED IN RUNNING BOND.
5. TYPICAL WALL REINFORCING AS SHOWN IN FOUNDATION DETAILS:
    - A) ADDITIONAL REINFORCING AS NOTED IN NOTES 3 AND 4.
    - B) HORIZONTAL REINFORCING IN ALL BLOCK WALLS SHALL BE HEAVY DUTY (3/16 SIDE RODS WITH 9 GAUGE CROSS RODS) LADDER TYPE WALL REINFORCING AT 16".
    - C) GROUT STOP IS A FIBERGLASS MESH CONFORMING TO ASTM STANDARD D1668-73, TYPE 207.
    - D) SPLICE ALL BARS 48 BAR DIAMETERS.
6. f'm = 1500 PSI.
7. MORTAR:
    - A) EXTERIOR, ABOVE GRADE: TYPE N.
    - B) EXTERIOR, AT OR BELOW GRADE: TYPE S.

HOME/SHIP PROGRAM
SUBSTANTIAL HOUSING REHABILITATION/RECONSTRUCTION SPECIFICATIONS

EXHIBIT I: NED HOME/SHIP Price Reconstruction Project

OWNER: Mattie L. Price
ADDRESS: 1809 West Bobe Street
Pensacola, FL 32501

PROJECT OVERVIEW:

Demolition of existing single-family dwelling and construction of new single-family dwelling per attached plans and written specifications.

GENERAL INSTRUCTIONS TO BIDDERS:

Federal funds are being used to rehabilitate this property. The Federal Compliance Packet must be submitted prior to award of bid. Contractor may not be debarred from participating in Federal programs in order for bid to be awarded.

Labor, overhead, permits, insurance, and profit must be included into each itemized price and not listed as a separate itemized price or listed under “miscellaneous.”
All work performed must be inspected (rough and final) and conform to County Ordinances, State Laws, and Florida Building Code.

Escambia County will pay for recording of Notice of Commencement in public records. Energy Sheets will also be provided to the awarded contractor by the County Neighborhood Enterprise Division (NED) for pulling permits.

The Homeowner is responsible for the removal of all belongings/furnishings from the designated work areas prior to the start date. A Notice to Proceed will be issued once the homeowner has vacated the property. The Contractor is not responsible for removal of Homeowner’s trash and/or discarded belongings or furnishings. Items left within the unit become the property of the Contractor.

All materials and supplies shall be installed in accordance with the manufacturer’s instructions, with all work completed in accordance with industry standards for new construction.

CONTRACTOR REQUIREMENTS:

The Contractor is responsible for temporary utilities (water and power) during the project and portable toilet. Contractor is also responsible for provision of permit/plan document box on site.

Contractor will furnish the homeowner, c/o Escambia County NED, all manufacturers’ and suppliers’ written guarantee/warranty documents covering materials and equipment provided through this contract. Contractor will furnish a one-year limited labor and material warranty to cover defects in materials and workmanship occurring from normal use.

If your firm is awarded the bid for housing repair (SHIP or HUD programs), the following items must be current and on file in order to issue a Purchase Order.

1. Current W9 (less than one year old).
2. County Vendor Information sheet (less than one year old).
3. Worker's Compensation as required by State Law **OR** exemption form.
4. Commercial General Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.
5. Automobile Liability ($1,000,000 coverage) listing Escambia County as Certificate Holder and additional insured.

GL and Auto Liability Certificates must state the following under the Additional Interest:

Escambia County
C/O Neighborhood Enterprise Division
221 Palafox Place
Suite 200
Pensacola, FL 32502-5844

All correspondence should be directed to Neighborhood Enterprise Division, 221 Palafox Place, Suite 200, Pensacola, FL 32502 for review.

Project will require 100% Performance and Payment Bonds. Performance and Payment Bond format will be provided. Contractor will be responsible for the recording of all bonds with Pam Childers, Clerk of The Circuit Court of Escambia County Florida.

SOLICITATON INFORMATION:

Contractor should familiarize him/herself with the Index of Documents provided in the Specification issued from Purchasing as well as the documents/forms required to be submitted with bid. The following documents are listed to assist contractors with their bid.

Attachments/Exhibits:

Exhibit H: Plans
Exhibit I: Specifications
Exhibit J: Health Department Onsite Sewage Treatment and Disposal System Specifications (if applicable)
Exhibit K: HUD Federal Compliance Packet
Exhibit L: Pre-Demolition Asbestos Survey (not applicable)
Exhibit M: Reconstruction Services Agreement (blank)
Exhibit N: Change Order (blank)
Exhibit O: Homeowner's Final Release and Warranty (blank)

PERMITTING FEE INFORMATION:

Building Permit Fees: Contractor must include costs for all permitting fees as required by the Escambia County Building Department (Demolition and New Construction). Estimated permitting fees for new construction ONLY is $1032. Demolition permit fees are a separate cost. Contractor should verify all permitting fees.

Health Department Permitting Fees (for projects with septic tanks): The $550 new septic system permit fee has already been paid to the Health Department. Contractor will be responsible for payment of $100 septic tank abandonment permitting fee.

COMPLETION DATE:

The work shall be substantially complete within One Hundred Twenty (120) calendar days from the Commencement Date. Contractor agrees to fully complete all work included above within One Hundred Thirty-Five (135) consecutive calendar days from the date of Notice to Proceed. Liquidated damages of $150 each day will be assessed for each calendar day that completion of the project is delayed.

DRAW AND PAYMENT SCHEDULE:

Payment request should be submitted to NED on original invoice, with reference to client, address, and purchase order number. Up to five (5) draws may be requested, utilizing the following payment schedule:

Draw 1: Demolition and Septic Tank Abandonment (if applicable) complete (permits, demolition)—5%

Draw 2: Foundation Complete (permits, site work, footings, foundation)—10%

Draw 3: Rough-In Complete (wall and roof framed and sheathed, subflooring (if applicable), interior walls framing, roof complete, siding complete, windows and exterior doors, rough mechanical, plumbing, electrical)—35%

Draw 4: Substantial Completion. (Certificate of Occupancy)—40%

Draw 5/Final: Completion of all punch list items, provision of warranty paperwork to County, sign-off by Owner, Contractor's Final Payment affidavit—10%

Alternately, the contractor may utilize the AIA Document G702/703 (Application and Certification for Payment) to submit up to five draws (including final) for the project. A ten percent (10%) retainage will be withheld from draws 1-4. Contractor must provide a description/schedule of work prior to initializing work.

Note that all permits related to the draw in question must be pulled and approved up to the current progress status prior to the requested draw. For example, the demolition permit must be pulled and approved by the building inspections department before payment will be released related to the demolition of the structure.

The Contractor will be eligible for Final Payment after the following conditions have been fulfilled:

1. Completion of Write-Up
2. Certificate of Occupancy Received by Building Inspections
3. Inspections Approved by Health Department (if applicable)
4. Acceptance by the Homeowner (Homeowner's Release & Warranty)
5. Warranty Paperwork provided to NED [warranty paperwork should include all appliances, roofing, HVAC, fixtures, equipment and other materials provided on the project]
6. Premises free from all construction debris
7. Submission of Contractor's Final Affidavit
8. Surety's Consent to Final Payment (if applicable)

SCHEDULE OF ALTERNATES:

Do NOT include the following alternate(s) in your base bid amount. Inclusion of alternate(s) in your base bid total may cause your bid to be rejected.

Alternate #1: Provision of white cabinets for kitchen and baths in lieu of wood stained cabinetry.

ADD/DEDUCT: $_____

Alternate #2: The installation of 1" vinyl blinds (white) on all windows.

ADD: $_____

HOME/SHIP PROGRAM
SUBSTANTIAL HOUSING REHABILITATION/RECONSTRUCTION SPECIFICATIONS

OWNER: Mattie L. Price
ADDRESS: 1809 West Bobe Street
Pensacola, FL 32501

DIVISION 1—GENERAL CONDITIONS

GENERAL:
Supply all building permits and fees as required.
Supply all insurance as required.
Temporary utilities and portable toilet as required.
Dumpsters, permit box, and trash removal as required.

DEMOLITION:

1. Demolish existing single story single family residence completely including all concrete footers and piers and front walk and ramp from driveway. All debris to be removed from site and disposed in accordance with local regulations.
2. Remove utility connections to a point of reconnection for new residence.

Remove existing chain link fence as required for access to site for demolition and reconstruction. DEMOLITION OF PROPERTIES CONTAINING ASBESTOS (if applicable): NED will provide a Pre-Demolition Asbestos Survey of the property to indicate whether there is any asbestos present. Demolition of properties containing asbestos must be done under specifications required by the Florida Department of Environmental Protection, Division of Air Resource Management. Contractors should use demolition contractors knowledgeable of asbestos removal. Completion of a "Notice of Demolition or Asbestos Renovation" form should be completed and filed with the State prior to the actual demolition activity.

Note: Shed shall remain.
Existing Concrete Drive to remain.

DIVISION 2—SITE WORK

SEPTIC TANK: Abandon existing septic tank per Florida Health Department regulations and install new septic system per included Health Department Onsite Sewage Treatment and Disposal System Specifications.

FENCES: Install a new 4' chain link fence along the front ROW from existing east corner post to driveway with new walk gate. Contractor will be responsible for any remaining fencing that is damaged during demolition or construction.

EROSION CONTROL: Provide erosion control on the site during demolition and reconstruction as required to include silt fencing, mulch, and/or other approved methods.

GRADING: Final grading should slope away from the house to prevent water from standing. Contractor will not leave any ruts or holes on the property at project completion. Backfill should be clean of rocks and any debris.

LANDSCAPING:

1. Trim trees overhanging new single family residence.
2. Slope grade away from house and install 4 pallets of Centipede sod in front, sides and back yard.
3. Use clean topsoil for landscaping, not red clay or sand.

DIVISION 3—CONCRETE

FOUNDATION:

Foundation: Install a code approved foundation as per plans.

Apply a plaster finish to foundation walls.

Cement finish the exposed edges of front and back concrete porch floors.

WALKS and DRIVEWAYS: Install new 4' wide concrete walk from front porch to existing public sidewalk as shown on plans.

DIVISION 4—MASONRY

STEPS: Install concrete steps to code to match grade at front of house.

BRICK COLUMN BASES: Construct as shown on plans. Homeowner to select standard in stock brick.

BRICK THRESHOLDS: Install rowlock bricks under all exterior door thresholds.

DIVISION 5—METALS

N/A

DIVISION 6—WOOD AND PLASTICS

EXTERIOR WALLS & FRAMING:

1. Sheathing: 7/16" OSB or ½" plywood installed per engineering.
2. Roof framing: Engineered truss system designed and certified by truss manufacturer's engineer as provided by contractor.

EXTERIOR FINISH CARPENTRY:

1. Trim exterior doors and windows with 5/4 Fiber Cement trim. Review plans for flashing details.
2. Fascia: Install aluminum fascia with a minimum .019" thickness.
3. Soffit: Install white solid vinyl soffit with 50% ventilated panels. Soffit shall have a minimum thickness of .044".
4. Porch ceilings: White Vinyl solid soffit, vinyl exterior grade beadboard, or concrete fiberboard. Installation should minimize visible seams
5. Exterior Posts: 4x4 PT post at rear entry. 6x6 PT post or structural fiberglass on front porch on brick base. Construct posts and columns per details on plans and elevations. Prime and paint to match exterior trim selection

6. Handrails: Install a handrail from pressure treated lumber on both sides of the front steps. Bury the 4×4 in concrete. Prime and paint to match exterior trim selection

HANDICAPPED RAMPS (where required): Construct ramp with PT lumber to meet ADA and code requirements with railings. See plans for details on ramp. Prime and paint railings only to match exterior trim selection. Ramp should have a slip resistant surface applied. NOTE: A one and a half inch lip must be poured on porch slab landing.

CABINETRY: Install base cabinets with post-formed counter top and wall cabinets in accordance with the enclosed floor plan. Cabinets shall be constructed of 1/2 inch birch plywood or better. Front frames shall be of basswood or hardwood. Shelves shall be of solid pine or A/C exterior grade plywood. No particle board shall be used. Concealed cabinet sides may be of 1/2 inch fir plywood. All cabinets shall have a plywood or paneling backing. Base cabinets shall have 12-inch minimum deep shelves except for under kitchen or bathroom sinks. Drawers shall have side-mounted drawer guides. No plywood edges shall be left exposed. Toe kicks and cabinet trim to match cabinet finish. Install pulls/knobs on all doors and drawers. Wall cabinets shall be 30-inches tall**.** Cabinets shall be mounted with wood screws and shall be level and plumb and secure.

Cabinet to be Trucabinetry shaker "cass" style door with a wood stain (natural, ginger, or autumn finish), homeowner selection. Approved equal may be submitted to NED.

Exhaust from range hood or microhood extending above cabinets and vented to the outside must be boxed above cabinets with plywood to match cabinet finish OR may be sheetrocked, primed and painted to match wall color.

INTERIOR WOODWORK:
1. Baseboards: Install 3-1/4" wood base through-out. MDF will not be allowed.
2. Shoe Moulding: Install shoe moulding through out including around base cabinets and vanities.
3. Window Trim: Trim all interior windows in wood with stools and aprons. Profile on apron trim must match door trim. MDF will not be allowed.
4. Door Trim: 2 ¼" minimum clamshell or 356 profile. MDF will not be allowed.
4. All interior trim woodwork to be primed
5. Attic Access: Install attic access with ½" b/c plywood or better. Profile trim to match door trim. MDF will not be allowed.

DIVISION 7—THERMAL AND MOISTURE PROTECTION

ROOF: Install 30-year warranty dimensional fiberglass asphalt shingles over 30# felt or peel and stick secondary water resistant membrane. Install 6-inch double break aluminum eave metal. Eave metal must be 24 gauge. Install lead or metal/EPDM boots over all plumbing penetrations. Roof color to be GAF Timberline HD Weathered Wood (FL Approval No: FL10124-R20) OR Tamko Heritage Weathered Wood (FL Approval No: FL18355) . Other brand/color substitution to be approved by NED.

Ridge Vent: Install shingle over ridge vent.

INSULATION:
1. Ceiling: Install R-38 insulation in the attic space.
2. Exterior Walls: Install R-13 batt insulation on the exterior walls.

3. Seal around all doors and windows prior to installation of drywall**.**
4. Insulate all T's and corners on exterior walls prior to installation of exterior sheathing.
5. Attach 2 layers of R19 batt insulation to top of attic access cover. Install a dam around attic access to keep insulation in place.

SIDING: Install 8.25" with 7" exposure smooth fiber cement lap siding with associated 5/4 fiber cement trim. Prep, prime and paint siding and trim using exterior rated primer and paint.

CAULK: All caulk used must comply with ASTM C 834 or ASTM C 920 and have a minimum warranty of 30 years.

Install self adhesive window flashing tape around all window flanges prior to installation of trim and siding. See plan for flashing details on doors and windows.

DIVISION 8—DOORS AND WINDOWS

DOORS:
1. Front Entry: Install a prehung Fiberglass, Hurricane and Energy Star Rated Craftsman Style 2 panel door unit with ¼ view impact glass. Install a deadbolt and lockset.
2. Rear Entry: Install a metal clad, 6 panel, Hurricane and Energy Star Rated insulated door unit with dead bolt, lockset and peep hole.
3. Interior Doors: Install 6 panel colonial style Masonite doors with handle sets and 2-1/4" trim. All interior doors must have a minimum of 1–inch clearance between bottom of door and finish floor covering.
4. All hardware, including latches, hinges, knobs, handles, handle sets, and locks are to be included. All locks to be keyed alike.

FINISH HARDWARE:
1. Door Stops: Install rigid door stop on all interior and exterior doors. Satin nickel finish.
2. Install an electric door bell.
3. Interior door hardware will be Kwikset Tylo in satin nickel finish. Dummy knobs may be used for bifold closets or mechanical access doors; passage knobs for closets, storage, and hallway doors; privacy knobs for bedrooms and bathrooms.
4. Exterior entries will have a keyed dead bolt (interior thumb turn) and knob lock set with all locks keyed the same. Kwikset Tylo or Schlage J Stratus or equal in satin nickel finish.
5. Install peep hole at rear exterior door

WINDOWS: Install Florida building code approved single hung 1 over 1, tilt sash vinyl windows with low-e impact resistant glass and screens. Jeldwen Impact 2500 Low-e. Color to be white, unless otherwise specified.

DIVISION 9—FINISHES

FLOORS: Install Home Decorators Luxury Vinyl Plank Flooring per manufacturer's instructions, pattern and color to be Cider Oak.

WALLS AND CEILING SHEATHING:
1. Walls shall be ½" drywall. Prime with sheetrock primer. Light Orange peel texture.
2. Ceilings shall be 5/8" drywall. Prime and paint with flat interior latex white paint. Finish all rooms with knockdown texture.

3. Bathrooms shall be green board

PAINT:
1. Interior: Owner will have two interior color choices: one for walls and one for trim. All paint to be used must mid-grade or better. Walls to be latex satin or eggshell finish, 2 coats. All trim must be primed and painted with latex semi-gloss finish, 2 coats. All ceilings are to be white using flat latex.
2. Exterior: Owner will have up to three exterior color choices: one for siding, one for trim, and one for exterior doors. Owner may opt to select same door and trim color. All paint to be used must be rated for exterior use. Siding to be latex flat finish, 2 coats. Trim and door latex satin or semi-gloss finish, 2 coats.

COUNTERTOPS:
Post form laminate countertops to be selected by owner, Wilsonart or Formica standard finish. One selection for all kitchen and bath(s).

DIVISION 10—SPECIALTIES

BATH ACCESSORIES: In each bath, install a toilet paper holder, 24" towel bar, and shower curtain rod. Color is brushed nickel. Minimum 24"x30" mirror in each bathroom over sink.

HANDICAPPED

SHELVING: All shelving shall be white vinyl coated steel or ventilated shelving. Closets shall have hanging rod. Install as shown on drawings.

MAILBOX: Provide post mounted mailbox to comply with USPS standards installed for mail truck accessibility. White or black mailbox. Install adhesive street numbers on mail box.

HOUSE NUMBERS: Install minimum 3" height metal (black or brushed nickel) house numbers above or beside front door (siding or trim). Numbers should be over contrasting color for visibility.

DIVISION 11—EQUIPMENT

APPLIANCES:

1. Appliances will be GE and will include the following, with homeowner selecting white or black color:
    *GE Range model number JB225DJWW or BB
    *GE Refrigerator model number GTE18CTHWW or BB
    *GE Microhood model number JVM3160DFWW or BB
2. Contractor will provide range whip and will provide for all ductwork to enable microhood unit to be vented to the outside.
3. If required, contractor will provide and install a new plug on homeowner's existing dryer

DIVISION 15—MECHANICAL SYSTEMS

SEPTIC SYSTEM: Abandon old septic system and install a new septic system and drainfield per included Florida Health Department specifications. County has already paid septic system fee for new system to Florida Health Department. Contractor will be responsible for fees related to tank abandonment.

PLUMBING: All plumbing and fixtures will be new and installed per Florida Building Code and manufacturer's instructions

1. Water Lines: Install all new lines from meter to all fixtures using PEX, PVC SCH 40, and/or CPVC.
2. Drain Lines: New PVC SCH 40
3. Water Heater: Install a 40 gallon electric water heater that meets or exceeds Florida Energy Standards.
4. Hose Bibbs: Two (2) ¼ turn exterior hose bibbs as shown on plans
5. Washing machine connection: install a recessed washer connection in Laundry area.
6. Kitchen Plumbing fixtures:
    *Kitchen Sink: Install a new dual-compartment, drop-in, 6.5" deep minimum stainless steel sink with brushed finish.
    *Kitchen Faucet: Delta Foundations, American Standard Colony, or Moen Adler single handle standard faucet with sprayer. Chrome or Brushed Nickel finish.
7. Bathroom Plumbing fixtures:
    *Tub/Shower: Unless otherwise noted on plans, tub/shower combo and showers will be white fiberglass one piece units with age in place backers.
    *Water Closet: White WaterSense certified comfort height elongated toilet with matching seat.
    *Lavatory Sink: Install round, drop in white vitreous china sink. Minimum 19" width (side to side)—Glacier Bay Aragon, Kohler Pennington, or equal.
    *Lavatory Faucet: Brass bodied WaterSense Delta Classic or equal. Chrome or Brushed Nickel. Lever style handles.
    *Tub/Shower Faucet and Valve: Brass bodied WaterSense Delta Classic or equal. Chrome or Brushed Nickel finish. Single Lever style handle
8. Shut-off valves shall be ¼ turn brass bodied only.
9. Ice Maker: Install water supply to the refrigerator and terminate in plastic ice maker outlet box.
10. No interior water lines shall run over head.

HVAC: Install a 15 seer heat pump system with heat strip back up.

BATHROOM VENTILATION: Install a min 70CFM VENTED exhaust fan with light to be discharged through soffit.

DIVISION 16—ELECTRICAL SYSTEMS

1. Install a 200 amp electrical service. New wiring copper conductor with non-metallic sheath over multiple conductors.
2. Door bell: Install hardwired push button doorbell at front door.
3. Cable/phone: Install 4 CATV outlets and 4 telephone outlets with connecting terminals. One of each in each bedroom and remaining outlets in owner identified locations.
4. Smoke Alarms: Hardwired smoke alarms as required by code
5. Wiring device colors: All wiring devices and device plate covers shall be white
6. Ensure the secure mounting and support of all lighting fixtures. Install ceiling fan mounting brackets in all bedrooms and living room. All light fixtures shall be installed plumb, square, and level with the ceiling, wall, and/or adjacent lighting fixtures.
7. Field verify all outlet and switch locations as shown on plans. Provide receptacle in cabinet above range for microhood. In bedrooms, provide a separate switch for ceiling fan and light. Install receptacle under kitchen sink for future dishwasher and disposal by owner if desired.

8. Contractor to furnish LED bulbs as required.
9. Lighting Schedule:

*Bedrooms and Living room: Hampton Bay ceiling fan with light kit, model AG524BN Glendale CFL or model number 51091 Lyndhurst LED in brushed nickel finish.
*Hallway and Laundry: Hampton Bay model number FZP8012A in brushed nickel finish.
*Kitchen: Lithonia Lighting model FMFL30840SATLBN Saturn Linear in brushed nickel finish.
*Kitchen Pendant: Westinghouse 1 light adjustable Mini Pendant Model in brushed nickel Model #70284 with Westinghouse 5 5/16” white linen barrel shade with 2 1/4” fitter Model#81003-00
*Dining room: Hampton Bay model 19708-000 Santa Rita 5 light chandelier in brushed nickel finish
*Master Bathroom: Hampton Bay model 73958/HD 3 light wall mounted LED fixture in brushed nickel.
*Hall Bathroom: Hampton Bay 3 light brushed nickel with frosted shades Model #HB2076-35
*Foyer: Project Source 13in Brushed Nickel flushmount Model# FJ10-031-1
*Ceiling mounted porch: Canarm Atlanta 1 light outdoor black flush mount. Model IOL207BK
*Wall mounted porch: Canarm Atlanta 1 light Outdoor black wall mount. Model IOL208BK

HOME INVESTMENTS PARTNERSHIP (HOME) PROGRAM

Substantial Rehabilitation/Reconstruction Activity

FEDERAL CONTRACT COMPLIANCE PROVISIONS
FOR
CONSTRUCTION PROJECTS
(FUNDED IN WHOLE OR IN PART WITH HOME PROGRAM FUNDING OBTAINED FROM THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT)

Updated: February 2019

ESCAMBIA COUNTY
HOME INVESTMENTS PARTNERSHIP PROGRAM (HOME)

INFORMATION FOR BIDDERS

This project is financed through the HOME Program with funds obtained from the U.S. Department of Housing and Urban Development (HUD).

Section 3 Requirements: The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12. USC 1701 U (Section 3). The purpose of Section 3 is to ensure that employment and other economic development opportunities generated by HUD assistance, to the greatest extent feasible, be directed to low and very low income persons. Section 3 businesses are encouraged to submit proposals.

Equal Opportunity/Affirmative Action: Minority and women-owned businesses are encouraged to submit bids.

Federal Labor Standards: This project is subject to Federal Labor Standards Requirements, including Davis Bacon requirements, Copeland Act, and Contract Work Hours and Safety Standards. All work performed on the project will be subject to the approved wage determination rates in bid documents. If applicable to this project, a separate Federal Labor Standards Packet will be provided.

For your bid to be considered responsive, you must complete the following certification forms:

For ALL Bids:

1. Certification of Non Segregated Facilities (FORM A)
2. Certification Regarding Equal Employment Opportunity (FORM B)
3. Certification Regarding Debarment, Suspension, and Other Responsibility Matters (FORM C)
4. Anti-Lobbying Certification (FORM D)
5. Certification of M/W/DBE Designation (FORM E)
5. Documentation of MBE and WBE Subcontractor Solicitation (FORM F)
6. Certification for Business Concerns Seeking Section 3 Preference in Contracting and Demonstration of Ability Form (FORM G)
7. Architect, Engineer, or Contractor Certification Related to ADA Projects (FORM H)— ***NOT applicable to this project***
8. Certification of Receipt of Federal Labor Standards Provisions (INCLUDED IN FEDERAL LABOR STANDARDS PACKET)- ***Not applicable to this project***

For Contracts Exceeding $100,000:

1. Certification Regarding Section 3 Provisions (FORM I)

2. Section 3 Affirmative Action Plan—including Table A and B only (FORM J)

Additional Certifications will be required by subcontractors prior to the start of work:

For ALL subcontracts:

1. Certification Regarding Debarment, Suspension, and Other Responsibility Matters (FORM C)
2. Anti-Lobbying Certification (FORM D)
3. Certification of M/W/DBE Designation (FORM E)
4. Certification of Receipt of Federal Labor Standards Provisions (INCLUDED IN FEDERAL LABOR STANDARDS PACKET***) –Not applicable to this project.***

For all subcontracts exceeding $10,000:

1. Certification of Non Segregated Facilities (FORM A)
2. Certification Regarding Equal Employment Opportunity (FORM B)

For subcontracts exceeding $100,000:

1. Certification Regarding Section 3 Provisions (FORM I)
2. Section 3 Affirmative Action Plan—including Table A and B only (FORM J)

Submission of Section 3 Utilization Report for Contracts Exceeding $100,000:

Prime contractors must submit a Section 3 Utilization Report to Escambia County or their designee prior to final payment of HOME funds for the project. This Report must include all Section 3 Employees of both the Contractor and ALL Subcontractors according to the Section 3 Affirmative Action Plan.

THIS PACKET CONTAINS THE FOLLOWING INFORMATION:

SECTION I:
FORMS/CERTIFICATIONS pages 4-18

SECTION II:
SECTION 3 INFORMATION AND REPORTING FORMS pages 19-24

SECTION III:
FEDERAL PROVISIONS pages 26-40

FORM A

CERTIFICATION OF NONSEGREGATED FACILITIES

(Contracts/Subcontracts Exceeding $10,000)

Name of Contractor/Subcontractor: _____

Project Name and Number: HOME-SHIP Substantial Rehab/Reconstruction

The undersigned hereby certifies that:

(a) No segregated facilities will be maintained as required by Title VI of the Civil Rights Act of 1964

Name and Title of Authorized Representative (Please Print or Type):

Signature: **Date:**

NOTE: Form must be submitted by contractor at submission of bid and submitted by subcontractor(s) prior to start of work

FORM B

CERTIFICATION REGARDING EQUAL EMPLOYMENT OPPORTUNITY (EEO)

(Contracts and Subcontracts Exceeding $10,000)

INSTRUCTIONS:

This certification is required pursuant to Executive Order 11246, as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60). The implementing rules and regulations provide that any bidder or prospective contractor, or any of their proposed subcontractors, shall state as an initial part of the bid or negotiations of the contract whether it has participated in any previous contract or subcontract subject to the equal opportunity clause; and if so, whether it has filed all compliance reports due under applicable instructions.

Where the certification indicates that the BIDDER has not filed a compliance report due under applicable instructions, such bidder shall be required to submit a compliance report within seven calendar days after bid opening. No contract shall be awarded unless such report is submitted.

CERTIFICATION BY (check one): ☐ CONTRACTOR ☐ SUBCONTRACTOR
NAME AND ADDRESS OF CONTRACTOR/SUBCONTRACTOR (include ZIP CODE):

1. CONTRACTOR/SUBCONTRACTOR has participated in a previous contract or subcontract subject to the EEO Clause. Yes [ ] No [ ]

2. Compliance reports were required to be filed in connection with such contract or subcontract. Yes [ ] No [ ]

3. CONTRACTOR/SUBCONTRACTOR has filed all compliance reports due under applicable instructions, including SF 100. Yes [ ] No [ ]

4. Have you ever been or are you being considered for sanction due to violation of Executive Order 11246, as amended? Yes [ ] No [ ]

Name and Title of Authorized Representative (Please Print or Type):

Signature: **Date:**

NOTE: Form must be submitted by contractor at submission of bid and submitted by subcontractor(s) prior to start of work

Contractors with 50 or more employees that have either a (1) contract, subcontract, or purchase order of $50,000 or more; or (2) serve as a depository of Government funds in any amount; or (3) are a financial institution serving as a issuing and paying agent of U.S. Savings Bonds and Savings notes are required to submit a SF 100, EEO-1 report annually, by September 1, documenting the number of employees by race, ethnicity, and gender for each of nine job categories.

FORM C

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS PRIMARY COVERED TRANSACTIONS

(1) The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

(2) Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

FORM D

ANTI-LOBBYING CERTIFICATION FOR CONTRACTS, GRANTS, LOANS AND COOPERATIVE AGREEMENTS

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, and officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form To Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, sub-grants, and contracts under grants, loans and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

FORM F

DOCUMENTATION OF MBE AND WBE SUBCONTRACTOR SOLICITATION

All bidders are required in accordance with 24 CFR 85.36 (e)(2)(vi) to document efforts to solicit minority-owned and women-owned subcontractors if subcontracts are to be let. Failure to document these efforts and complete this certification will cause the bid to be non-responsive and possibly rejected.

At a minimum, bidders are required to take the following action:

Assuring that minority businesses and women's business enterprises are solicited whenever they are potential sources by including written documentation of such action with the bid proposal. Written documentation may include, for example, (1) written quotes from MBEs and WBEs; (2) letters of solicitation prepared by the bidder and sent to MBEs and WBEs who may be potential sources; and (3) written accounts of phone solicitations of MBEs and WBEs. Such accounts must include the name of the MBE or WBE firm, mailing address, phone number and contact person at the MBE or WBE firm.

☐ I hereby certify that the ATTACHED DOCUMENTATION of efforts to solicit MBE and WBE subcontractors is to the best of my knowledge true and accurate. Furthermore, I understand that the ATTACHED DOCUMENTATION will be verified prior to awarding a contract.

☐ I hereby certify that no subcontracts will be let on this project

FORM J

CONTRACTOR SECTION 3 AFFIRMATIVE ACTION PLAN

If award is received, _____ (Contractor) agrees to implement the following specific affirmative action steps directed at increasing the utilization of lower income residents and business within Escambia County, Florida.

A. To ascertain from the locality's CDBG/HOME program official the exact boundaries of the Section 3 covered project area and where advantageous, seek the assistance of local officials in preparing and implementing the affirmative action plan.

B. To attempt to recruit from within the County the necessary number of lower income residents through: Local advertising media, signs placed at the proposed site for the project, and community organizations and public or private institutions operating within or serving the project area such as Service Employment and Redevelopment (SER), Opportunities Industrialization Center (OIC), Urban League, Concentrated Employment Program, Hometown Plan, African American Chamber of Commerce, or the U. S. Employment Service.

C. To maintain a list of all lower income residents who have applied either on their own or on referral from any source, and to employ such persons, if otherwise eligible and if vacancy exists.

*D. To insert this Section 3 plan in all bid documents and in subcontracts over $100,000, and to require all bidders or subcontractors to submit Tables A and B from said subcontractors and to obtain all documentation for completion of Tables C and D prior to final payment. Section 3 affirmative action plan including utilization goals and the specific steps planned to accomplish these goals.

F. To formally contact unions, subcontractors, and trade associations to secure their cooperation for this program.

G. To insure that all appropriate project area business concerns are notified of pending subcontractual opportunities.

H. To maintain records, including copies of correspondence, memoranda, etc., which document that all of the above affirmative action steps have been taken.

I. To appoint or recruit an executive official of the company or agency as Equal Opportunity Officer to coordinate the implementation of this Section 3 plan.

_____

*Loans, grants, contracts, and subsidies for less than $100,000 will be exempt.

J. To list on Table A, information related to proposed subcontractors to be awarded to Section 3 businesses.

K. To list on Table B, all projected workforce needs for all phases of this project by occupation, trade, skill level, and number of positions.

As officers and representatives of _____
(Name of Contractor)

We the undersigned have read and fully agree to this Affirmative Action Plan, and become party to the full implementation of this program.

Company Name:

Name and Title of Authorized Representative (Please Print or Type):

Signature: **Date:**

Project Name: HOME-SHIP Substantial Rehab/Reconstruction **Project No:**

*Section 3 Resident: Individual residing within the County in which the Section 3 covered project is located and whose income does not exceed 80% of the higher of the median income, adjusted by family size

TABLE D
CONTRACTOR'S SECTION 3 BUSINESS UTILIZATION REPORT

Prime Contractor: **Address:**

Project Name: HOME-SHIP Substantial Rehab/Reconstruction

Contract Amount:

Name of Subcontractor	Section 3 business (Y/N)?	Address/Phone	Trade, Service or Supply	Contract Amount	Award Date	Competitive or Negotiated Bid?	FED ID #

TOTAL DOLLAR AMOUNT AWARDED TO SECTION 3 BUSINESSES: $_____

A Section 3 Business concern is a business that:

- Is 51 percent or more owned by Section 3 residents;
- Employs Section 3 residents for at least 30 percent of its full-time, permanent staff; or
- Provides evidence of a commitment to subcontract to Section 3 business concerns, 25 percent or more of the dollar amount of the awarded contract.

SECTION II

SECTION 3 - ECONOMIC OPPORTUNITIES

What is Section 3?

It is a means by which HUD fosters local economic development, neighborhood economic improvement, and individual self-sufficiency. Section 3 is the legal basis for providing jobs for residents and awarding contracts to businesses in areas receiving certain types of HUD financial assistance.

Under Section 3 of the HUD Act of 1968, wherever HUD financial assistance is expended for housing or community development, to the greatest extent feasible, economic opportunities will be given to Section 3 residents and businesses in that area.

Section 3 Policy

Congress established the Section 3 policy to guarantee that the employment and other economic opportunities created by Federal financial assistance for housing and community development programs should, if possible, be directed toward low- and very-low income persons, particularly those who are recipients of government assistance for housing.

Who are Section 3 residents?

Section 3 residents are:

- Public housing residents
- **Low and very-low income** persons who live in the metropolitan area or non-metropolitan county where a HUD-assisted project for housing or community development is located.

Determining Income Levels

- **Low income** is defined as 80% or below the median income of that area.
- **Very low income** is defined as 50% or below the median income of that area.
- Current income levels by household size for the **Escambia County area** are provided in the table below (2018):

# PERSONS IN FAMILY	50% OF MEDIAN	80% OF MEDIAN
1	$22,850	$36,550
2	26,100	41,750
3	29,350	46,950
4	32,600	52,150
5	35,250	56,350
6	37,850	60,500

What is a Section 3 business & what types of economic opportunities are available under Section 3?

A **Section 3 business** is a business:

- That is at least 51 percent or more owned by Section 3 residents,
- Whose permanent, full-time employees include persons, at least 30 percent of whom are currently Section 3 residents, or within three years of the date of first employment with the business concern were Section 3 residents, or
- That provides evidence of a commitment to subcontract in excess of 25 percent of the dollar award of all subcontracts to be awarded to a Section 3 business concern.

Types of Opportunities:

- Job training
- Employment
- Contracts

Examples include:

- Administrative/Management:

Accounting, payroll, research, bookkeeping, purchasing, word processing

- Services:

Appliance repair, florist, marketing, carpet installation, janitorial, photography, catering, landscaping, printing, computer/information, manufacturing, transportation

- Construction:

Architecture, bricklaying, carpentry, cement/masonry, demolition, drywall, electrical, elevator construction, engineering, fencing, heating, iron works, machine operation, painting, plastering, plumbing, surveying, tile settings

Who will award the economic opportunities?

Recipients of HUD financial assistance ***and their contractors and subcontractors are required*** to provide economic opportunities, to the greatest extent possible, consistent with existing Federal, State, and local laws and regulations.

Who receives priority under Section 3?

For training and employment:

- Persons in public and assisted housing
- Persons in the area where the HUD financial assistance is expended
- Participants in HUD Youthbuild programs
- Homeless persons

How can businesses find Section 3 residents to work for them?

Businesses can recruit in the neighborhood and public housing developments to inform residents about available training and job opportunities. Distributing flyers, posting signs, placing ads, and contacting resident organizations and local community development and employment agencies to locate potential workers are effective ways of acquiring jobs.

Are recipients, contractors and subcontractors required to provide long-term employment opportunities, and not simply seasonal or temporary employment?

Recipients are required, to the greatest extent feasible, to provide all types of employment opportunities to low and very low-income persons, including seasonal and temporary employment, as well as long-term jobs.

Employment goals are based on "new hires", which are defined as full-time employees for permanent, temporary or seasonal employment opportunities.

Recipients and contractors are encouraged to provide long-term employment. At least 30 percent of the permanent, full-time employees hired should be Section 3 residents. After a Section 3 employee has been employed for 3 years, the employee may no longer be counted as a Section 3 employee to meet the 30 percent requirement. This requires recipients to continue hiring Section 3 residents when employment opportunities are available.

SAMPLE OUTREACH LETTER

Dear _,

Our office is seeking quotes from building trades, subcontractors, and suppliers for construction of [ADDRESS]. This letter is to inform your agency of possible contracting opportunities and/or employment due to this project. We are seeking subcontractors and suppliers who can provide services relevant to the construction of this project. We like to provide your agency an opportunity to quote and provide services for the project.

For further information, please contact:

Sincerely,

Contractor

SECTION 3 COMPLIANCE REPORT

Attached is a sample SECTION 3 SUMMARY REPORT to be completed by every contractor/subcontractor awarded a construction contract of $100,000 or more on a CDBG or HOME project and must be submitted to County before final funds are released.

PDF or Excel Version may be requested from the Escambia County Neighborhood Enterprise Division at ned@myescambia.com or 850-595-0022.

Part II: Contracts Awarded during the period of this report (item 7, above)

1. Construction Contracts:

A. Total dollar amount of construction contracts awarded on the project		
B. Dollar amount of construction contracts awarded to Section 3 businesses		
C. Percentage of construction contract dollar amount awarded to Section 3 businesses		0.0%
D. Number of Section 3 businesses receiving construction contracts		

2. Non-Construction Contracts:

A. Total dollar amount of non-construction contracts awarded on the project/activity		
B. Dollar amount of non-construction contracts awarded to Section 3 businesses		
C. Percentage of non-construction dollar amount awarded to Section 3 businesses		0.0%
D. Number of Section 3 businesses receiving non-construction contracts		

Part III: Summary

Indicate the efforts made to direct the employment and other economic opportunities generated by HUD financial assistance for housing and community development programs, to the greatest extent feasible, toward low-and very low-income persons, particularly those who are recipients of government assistance for housing. (Check all that apply.)

Attempted to recruit low-income residents through: local advertising media, signs prominently displayed at the project site, contracts with the community organizations and public or private agencies operating within the metropolitan area (or nonmetropolitan county) in which the Section 3 covered program or project is located, or similar methods.

Participated in a HUD program or other program which promotes the training or employment of Section 3 residents.

Participated in a HUD program or other program which promotes the award of contracts to business concerns which meet the definition of Section 3 business concerns.

Coordinated with Youthbuild Programs administered in the metropolitan area in which the Section 3 covered project is located.

Other; describe below (Include any obstacles that prevented achieving program goals).

Failure to meet hiring and contracting goals requires a description of obstacles that prevented achievement.

Narrative:

Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u, mandates that the Department ensures that employment and other economic opportunities generated by its housing and community development assistance programs are directed toward low- and very-low income persons, particularly those who are recipients of government assistance housing. The regulations are found at 24 CFR Part 135. The information will be used by the Department to monitor program recipients' compliance with Section 3, to assess the results of the Department's efforts to meet the statutory objectives of Section 3, to prepare reports to Congress, and by recipients as self-monitoring tool. The data is entered into a database and will be analyzed and distributed. The collection of information involves recipients receiving Federal financial assistance for housing and community development programs covered by Section 3. The information will be collected annually to assist HUD in meeting its reporting requirements under Section 808(e)(6) of the Fair Housing Act and Section 916 of the HCDA of 1992. An assurance of confidentiality is not applicable to this form. The Privacy Act of 1974 and OMB Circular A-108 are not applicable. The reporting requirements do not contain sensitive questions. Data is cumulative; personal identifying information is not included

SECTION III

FEDERALLY RELATED CONTRACT PROVISIONS AND WAGE RATE INFORMATION

THIS SECTION includes the myriad of Federally related contract requirements which must be complied with during the completion of this project, including applicable Wage Rates which must be paid to workers on the job. All of the requirements in this section should be carefully reviewed by the Bidder/Contractor and all Subcontractors.

Each Contractor must conform with the following:

I. Compliance with Determination of Prevailing Wage Rate and Affidavit

A. The Contractor shall affirm, to the satisfaction of the County, that all wage rates paid to any worker engaged in any craft or occupation, in the performance of the work for which this contract shall be made, shall be not less than those rates specified in the attached Wage Determination **NOT APPLICABLE TO THIS PROJECT** issued by the U.S. Department of Housing and Urban Development. This requirement shall extend to all employees provided by a subcontractor and similarly employed in the performance of this contract.

B. All Contractors and subcontractors engaged in any manner whatsoever in any aspect of the performance of this contract shall execute an affidavit stating that a schedule of prevailing wage rats, as required by Title 29, Part 5 (a)(1) of the Code of Federal Regulations, has been posted as required on the premises of the work to be done. A copy of the Wage Determination and a copy of the form of Affidavit required are included in the LABOR STANDARDS PROVISIONS PACKET.

C. All contractors and subcontractors must submit certified Weekly Payroll Reports using HUD Form WF 347 or an equivalent document providing the required information.

II. Standard Contract Provisions (Full Text Attached)

All applicable Federal provisions are attached including:

1. Certification of Non-Segregated Facilities
2. Compliance with Air and Water Acts
3. EEO Compliance Certification
4. Labor Standards Provisions
5. Anti-Kickback Act
6. Executive Order 11246/Affirmative Action
7. Title VI of the Civil Rights Act
8. Lead Based Paint Prohibition

9. Flood Hazards Mitigation (where applicable)
10. Architectural Barriers Act (where applicable)
11. Energy Policy and Conservation Act
12. Section 503 and 504 of the Rehabilitation Act of 1973
13. Contract Work Hours and Safety Act
14. Minority and Women Owned Business Listings
15. Americans with Disabilities Act (ADA)

III. Affirmative Action Plan

The successful bidder must provide documentation that the company has duly adopted an Affirmative Action Plan, and must provide at least one (1) copy of the Plan with the bid submission.

IV. HUD Section 3 Plan and Compliance Requirements

The successful Bidder must complete an acceptable Section 3 Utilization Plan and Certification Regarding Section 3 and Segregated Facilities (forms enclosed).

V. Access to Related Documents

Bidder understands that acceptance of this contract assures that the County, Department of Housing and Urban Development, Florida Department of Community Affairs, Comptroller General of the United States, or any duly authorized representative shall have access to any books, documents, papers, and records of the Contractor which are directly pertinent to this project for purposes of audit, examination, excerpts, and/or transcriptions. All records related to this project will be maintained for a period of at least three (3) years and longer should they be the subject of inspection, litigation, or under review.

VI. Interest of Certain Federal and Other Officials

A. No member of or delegate to the Congress of the United States and no Resident Commissioners shall be admitted to any share of part of this Contract or to any benefit to arise from same: Provided, that the foregoing provision of this section shall not be construed to extent to this Contract if made with corporation for its general benefit.

B. No member officer or employee of the Grantee, or its designees or agents, no member of the governing body of the locality in which the Project is locate, and no other public official of such locality or localities who exercises any functions or responsibilities in connection with the Project during his tenure or for one year thereafter, shall have any interest, direct or indirect, in any Contract or Subcontract, or the proceeds thereof, for work to be performed under this Contract.

The Contractor will include these provisions in every Subcontract such that these provisions will be binding upon each Subcontractor.

VII. Reporting, Copyrights, and Patents

All required reports will be promptly submitted to the county and/or other Federal/State agencies and such reports will be approved in writing by the Chief Executive Officer of the Company or his/her designee.

Any copyright or patent resulting from this project will be retained by the Grantor Agency and will be made available as directed by such agency.

VIII. EQUAL EMPLOYMENT OPPORTUNITY PROVISIONS. All contracts shall contain a provision requiring compliance with E.O. 11246. "Equal Employment Opportunity"

A. Activities and Contracts Not Subject to Section 202 (applicable to Federally assisted construction contracts and related subcontracts $10,000 and under)

During the performance of the contract, the Contractor agrees as follows:

(1) The Contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor shall take affirmative action to ensure that applicants for employment are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(2) The Contractor shall post in conspicuous places, available to employees and applicants for employment, notices to be provided by Contracting Officer setting forth the provisions of this non-discrimination clause. The Contractor shall state that all qualified applicants will be considered without regard to race, color, religion, sex, or national origin.

(3) Contractors shall incorporate foregoing requirements in all subcontracts.

B. Activities and contracts subject to Section 202 (all contracts/subcontracts above $10,00)

(1.) Section 202 Equal Opportunity Clause: During the performance of this contract, the contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during

employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment, or recruitment advertising; layoff or termination, rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in a conspicuous place, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration without regard to race, color, religion, sex, or national origin.

(c) The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding a notice to be provided by the Contract Compliance Officer advising the labor union or worker's representatives of the Contractor's commitment under Section 202 of Executive Order 11246, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the Rules, Regulations, and Relevant Orders of the Secretary of Labor.

(e) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the Department and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and others.

(f) In the event of the Contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(g) The Contractor will include the Provisions of the sentence immediately preceding Paragraph (a) and the provisions of Paragraphs (a) through (g) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a

means of enforcing such provisions, including sections of noncompliance: *Provided,* however, that in the event the Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the Contractor may request the United States to enter into such litigation to protect the interest of the United States.

(2.) Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity (Executive Order 11246). (Applicable to contracts/subcontracts exceeding $10,000.)

(a.) The Offerer's or Bidder's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Opportunity Construction Contract Specifications" set forth herein.

(b.) The goals and timetables for minority- and female-participation, expressed in percentage terms for the Contractor's aggregate workforce in each trade on all construction work in the covered area, are as follows:

Female participation: 6.9% (statewide)

Minority participation: 19.9%

These goals are applicable to all Contractor's construction work (whether or not it is federally-assisted) performed in the covered area. If the Contractor performs construction work in a geographic area located outside of the covered area, it shall apply the goals established for such geographic area where the work is actually performed. With regard to this second area, the Contractor also is subject to the goals for both its Federally involved and non-Federally involved construction.

The Contractor's compliance with Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3 (a), and its efforts to meet the goals established or the geographic area where the contract resulting from his solicitation is to be performed. The hours of minority and female employment or training must be substantially uniform throughout the length of the contract and in each trade the Contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting the Contractor's goals shall be a violation of the contract, the Executive Order, and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

(c) The Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs within 10 working days of award of any construction subcontract in excess of $10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor; employer identification number; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the contract is to be performed.

(d) As used in this Notice, and in the contract resulting from the solicitation, the "covered area" is **Escambia County, Florida.**

(3.) Standard Federal Equal Employment Opportunity Construction Contract Specifications (Executive Order 11246).

(a) As used in these specifications:

i. "Covered area" means the geographical area described in the solicitation from which this contract resulted;

ii. "Director" means Director, Office of Federal Contract Compliance Programs, United States Department of Labor, or any person to whom the Director delegates authority;

iii. "Employer identification number" means the Federal Social Security number used on the Employer's quarterly Federal Tax Return, U. S. Treasury Department Form 941.

iv. "Minority" includes:

(A.) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(B.) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish Culture or origin, regardless of race);

(C.) Asian and Pacific Islander (all persons having origins in any of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and

(D.) American Indian or Alaskan Native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

(b) Whenever the Contractor, or any Subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of $10,000 the provisions of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

(c) If the Contractor is participating (pursuant to 41 CFR 60-4.5) in a Hometown Plan approved by the U. S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each Contractor or Subcontractor participating in an approved Plan is individually

required to comply with its obligations under the EEO clause, and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other Contractors toward a goal in an approved Plan does not execute any covered Contractor's or Subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

(d) The Contractor shall implement the specific affirmative action standards provided in paragraphs (g) (i) through (xvi) of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization the Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing contracts in geographical areas where they do not have a Federal or Federally-assisted construction contract shall apply the minority and female goals established for the geographic area where the contract is being performed. Goals are published periodically in the Federal Register in notice form and such notices may be obtained from any Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. The Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

(e) Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom the Contractor has a collective bargaining agreement, to refer either minorities or women shall excuse the Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

(f) In order for the nonworking training hours of apprentices and trainees to be counted in meeting goals, such apprentices and trainees must be employed by the Contractor during the training period, and the Contractor must have made a commitment to, employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U. S. Department of Labor.

(g) The Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of the Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The Contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensively as the following:

    i. Ensure and maintain a working environment free of harassment, intimidation and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to

minority or female individuals working at such sites in such facilities.

ii. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organization's responses.

iii. Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union, or if referred, not employed by the Contractor, this shall be documented in the file with the reason therefore, along with whatever additional actions the Contractor may have taken.

iv. Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or woman sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.

v. Develop on-the-job training opportunities and/or participate in training programs for the areas which expressly include minorities and women, including upgrading apprenticeship, trainee and other programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor. The Contractor shall provide notice of these programs to the sources compiled under 7b above.

vi. Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

vii. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all

employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with on-site supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

viii. Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other Contractors and Subcontractors with whom the Contractor does or anticipates doing business.

ix. Direct its recruitment efforts, both oral and written, to minority, female and community organizations, to schools with minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

x. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer and vacation employment to minority and female youth both on the site and in other areas of a Contractor's work force.

xi. Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR 60-3.

xii. Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

xiii. Ensure that seniority practices, job classifications, work assignments and other personnel practices, do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.

xiv. Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

xv. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

xvi. Conduct a review, at least annually, of all supervisors' adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

(h) Contractors are encouraged to participate in voluntary associations which assist in fulfilling one or more of their affirmative action obligations g(i) through (xvi). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which the Contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under g(i) through (xvi) of these Specifications provided that the Contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the Contractor. The obligation shall not be a defense for the Contractor's noncompliance.

(i) A single goal for minorities and separate single goal for women have been established. The Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, the Contractor may be in violation of the Executive Order if a particular group is employed in a substantially disparate manner (for example, even though the Contractor has achieved its goals for women generally, the Contractor may be in violation of the Executive Order if a specific minority group of women is under utilized).

(j) The Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

(k) The Contractor shall not enter into any Subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

(l) The Contractor shall carry out-sections and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as

amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any Contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

(m) The Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensively as those standards prescribed in paragraph g of these specifications, so as to achieve maximum results from its effort to ensure equal employment opportunity. If the Contractor fails to comply with the requirement of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR 60-4.8.

(n) The contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government and to keep records. Records shall at least include for each employee, the name, address, telephone numbers, construction trade, union affiliation, if any, employee identification number where assigned, social security number, race, sex, status (e.g., mechanic, apprentice trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and location at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

(o) Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance and encourage present minority and female employees to recruit other minority persons and women and, where reasonable, upon the application of requirements for the hiring of local is or other area residents (e.g., those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

C. Certification of Non-Segregated Facilities (Contracts over $10,000)

By the submission of this bid, the bidder, offeror, applicant or subcontractor certifies that he/she does not maintain or provide for his/her employees any segregated facility at any of his/her establishments, and that he/she does not permit employees to perform their services at any location, under his/her control, where segregated facilities are maintained. He/She certifies further that he/she will not maintain or provide for employees any segregated facilities at any of his/her establishments, and he/she will not permit employees to perform their services at any location under his/her control where segregated facilities are maintained. The bidder, offer or, applicant or subcontractor agrees that a breach of this certification is violation of the Equal Opportunity Clause of this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work eating areas, time clocks, locker rooms, and other storage or dressing areas, Deportation and housing facilities provided for

employees which are in fact segregated on the basis of race, color, religion, or otherwise. He/She further agrees that (except where he/she has obtained identical certifications from proposed subcontractors prior to the award of subcontractors have submitted identical certifications for specific time periods).

D. Civil Rights Act of 1964

Under Title VI of the Civil Rights Act of 1964, no person shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

E. Section 109 of the Housing and Community Development Act of 1974

No person in the United States shall on the grounds of race, color, national original, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity financed in whole or in part with funds made available under this title.

F. "Section 3" Compliance in the Provision of Training, Employment and Business Opportunities

(a) The work to be performed under this contract is on a project assisted under a program providing direct Federal financial assistance from the Department of Housing and Urban Development and is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U. S. C. 1701. Section 3 requires that to the greatest extent feasible opportunities for training and employment be given lower income residents of the project area and contracts for work in connection with the project be awarded to business concerns which are located in, or owned in substantial part by persons residing in the area of the project.

(b) The parties to this contract will comply with the provisions of said Section 3 and the regulations issued pursuant thereto by the Secretary of Housing and Urban Development set forth in 24 CFR 134, and all applicable rules and orders of the Department issued thereunder prior to the execution of this contract. The parties to this contract certify and agree that they are under no contractual or other disability which would prevent them from complying with these requirements.

(c) The Contractor will send to each labor organization or representative of workers with which he has a collective bargaining agreement or other contract or understanding, if any, a notice advising said labor organization or workers' representative of his commitments under this Section 3 clause and shall post copies of the notice in conspicuous places available to employees and applicants for employment or training.

(d) The Contractor will include this Section 3 clause in every subcontract for work in connection with the project and will, at the direction of the applicant for or recipient of Federal financial assistance, take appropriate

action pursuant to the subcontract upon a finding that the subcontractor is in violation of regulations issued by the Secretary of Housing and Urban Development, 24 CFR Part 135. The Contractor will not subcontract with any subcontractor where it has notice of knowledge that the latter has been found in violation of regulations under 24 CFR Part 135 and will not let any subcontract unless the subcontractor has first provided it with a preliminary statement of ability to comply with the requirements of these regulations.

(e) Compliance with the provisions of Section 3, the regulations set forth in 24 CFR 135, and all applicable rules and orders of the Department issued hereunder prior to the execution of the contract, shall be a condition of the Federal financial assistance provided to the project, binding upon the applicant or recipient for such assistance, it successors and assigns. Failure to fulfill these requirements shall subject the applicant or recipient, its contractors or subcontractors, it successors and assigned to those sanctions specified by the grant or loan agreement or contract through which federal assistance is provided, and to such sanctions as are specified by 24 CFR Part 135.

G. Section 503 Handicapped (Contracts $2,500 or Over)

(a) The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap in regard to any position for which the employee or applicant for employment is qualified. The Contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified handicapped individuals without discrimination based upon their physical or mental handicap in all employment practices such as the following: employment, upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The Contractor agrees to comply with the rules, regulations and relevant orders of the Secretary of Labor issued pursuant to the Act.

(c) In the event of the Contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(d) The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notices shall state the Contractor's obligation under the law to take affirmative action to employ and advance in employment qualified handicapped employees and applicants for employment, and the rights of applicants and employees.

(e) The Contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or their contract

understanding, that the contractor is bound by the terms of Section 503 of the Rehabilitation Act of 1973, and is committed to take affirmative action to employ and advance in employment physically and mentally handicapped individuals.

(f) The Contractor will include the provisions of this clause in every subcontract or purchase order of $2,500 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to Section 503 of the Act, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions, including action for noncompliance.

H. Age Discrimination Act of 1975

No person in the United States shall, on the basis of age be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program, or activity receiving Federal Financial assistance.

IX. CERTIFICATION OF COMPLIANCE WITH AIR AND WATER ACTS

(Applicable to Federally assisted construction contracts and related subcontracts exceeding $100,000)

During the performance of this contract, the contractor and all subcontractors shall comply with the requirements of the Clean Air Act, as amended, 42 USC 1857 et seq., the Federal Water Pollution Control Act, as amended, 33 USC 1251 et seq., and the regulations of the Environmental Protection Agency with respect thereto, at 40 CFR Part 15, as amended.

In addition to the foregoing requirements, all nonexempt contractors and subcontractors shall furnish to the owner, the following:

(1) A stipulation by the contractor or subcontractors, that any facility to be utilized in the performance of any nonexempt contract or subcontract, is not listed on the List of Violating Facilities issued by the Environmental Protection Agency (EPA) pursuant to 40 CFR 15.20.

(2) Agreement by the contractor to comply with all the requirement of Section 114 of the Clean Air Act, as amended, (42 USC 1857c-8) and Section 308 of the Federal Water Pollution Control Act, as amended, (33 USC 1318) relating "to inspection, monitoring, entry, reports and information, as well as all other requirements specified in said Section 114 and Section 308, and all regulations and guidelines issued thereunder.

(3) A stipulation that as a condition for the award of the contract prompt notice will be given of any notification received from the Directors' office of Federal Activities, EPA, indicating that a facility utilized or to be utilized for the

contracts, is under consideration to be listed on the EPA List of Violating Facilities.

(4) Agreement by the Contractor that he will includes or cause to be included, the criteria and requirements in paragraph (1) through (4) of this section in every non-exempt subcontract and requiring that the Contractor will take such action as the Government may direct as a means of enforcing such provisions.

X. SPECIAL CONDITIONS PERTAINING TO HAZARDS, SAFETY STANDARDS AND ACCIDENT PREVENTION

A. Lead Based Paint Hazards (Applicable to contracts for construction, rehabilitation or conversion of residential structures):

The Contracting entity and subcontractors thereto must comply with the Lead Based Paint Regulations (24 CFR part 35) issued pursuant to the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4831 et seq.) requiring prohibition of the sue of lead-based paint, whenever assistance financed by the U.S. Department of Housing and Urban Development ("HUD") is used directly or indirectly for construction, rehabilitation, or modernization of residential structures; elimination of immediate lead-based paint hazards in residential structures assisted with such financing; and notification of the hazards of lead-based paint poisoning to purchasers, owners or tenants of residential structures constructed prior to 1978 who are assisted through HUD financed activities.

B. Flood Prevention and Protection (Applicable to acquisition, rehabilitation and construction activities)

Activities undertaken under this contract are subject to the provisions of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), Executive Order 11988, and the regulations there under (24 CFR Ch. X, Subchapter B). Agencies operating under said provisions shall not approve any financial assistance for acquisition or construction purposes for sue in any area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards unless the community in which such area is situated is then participating in the National Flood Insurance Program. HUD funds provided through the Community Development Block Grant, HOME, or related Programs shall not be expended for acquisition or construction purposes in an area identified by the Secretary of Housing and Urban Development as having special flood hazards which is located in a community not in compliance with the requirements of the National Flood Insurance Program pursuant to section 201(d) of said Act. The use of any such funds for acquisition or construction purposes in identified special flood hazard areas shall be subject to the mandatory purchase of flood insurance requirements of section 102(a) of said Act.

C. Site Safety Measures

Contracting entity and subcontractors thereto shall take necessary precautions to protect all employees and persons on the worksite and in the immediate vicinity of the worksite with respect to worksite safety hazards, the safety of

workmen, authorized visitors, adjacent property owners/residents/ businesses, construction inspectors, and members of the general public. Said measures related to this project shall include but are not limited to: limitation of access to hazardous work areas; proper traffic control measures (where applicable); provision of safety training for employees and requiring like training for the employees of subcontractors, including all classes of labor, heavy and power equipment operators, and superintendents; and assuring that properly qualified and trained personnel are assigned to perform work required to complete the project activities.

XI. Access to Record/Maintenance of Records

The contracting entity and subcontractors thereto shall maintain accounts and records, including personnel, property, and financial records, adequate to identify and account for all costs pertaining to the contract and other such records as may be deeded necessary by the contracting entity to assure proper accounting for all funds. These records will be available for audit purposes to the contracting entity, the State of Florida, the U.S. Department of Housing and Urban Development, or any of their duly authorized representatives, and will be retained for a minimum of **six (6)** years after contract completion unless permission to destroy said records is granted by the contracting entity. Moreover, the contracting entity, State of Florida, U.S. Department of Housing and Urban Development, or their duly authorized representatives, shall have access to any book, documents, papers and records, of the Contracting entity or subcontractors thereto which are directly pertinent to this contract for the purposes of making audit, examination, excerpts and transcriptions.

XII. Conflict of Interest of Officers or Employees of the Contracting Entity/Local Jurisdiction, Members of the Local Governing Body, or Other Elected Officials

No member or employee of the contracting entity/local jurisdiction or its designees or agents; no member of the governing body; and no other public official of the locality(s) who exercises any function or responsibility with respect to this contract, during his/her tenure or for one year thereafter, shall have any interest, direct or indirect, in any contract or subcontract, or the proceeds thereof, for work to be performed. Further, the Contractor shall cause to be incorporated in all subcontracts, the language set forth in this paragraph prohibiting conflict of interest.

XIII. Minority and Female Contractor Associations

Lists citing minority, disadvantaged, and female owned businesses are available from various sources including the Florida Department of Transportation, the University of Florida/School of Building Construction, the U.S. Department of Housing and Urban Development/Jacksonville Office, the Florida Office of Supplier Diversity, and the Escambia-Pensacola Human Relations Commission. These lists are provided solely for the benefit of the Contractor for the purpose of assisting him/her in meeting the Equal Opportunity Provisions contained in these contract

conditions. No assertion is made as to the completeness of these lists, and the information contained in such lists may be out of date in some cases. Contracting entity and subcontractors thereto are to make reasonable efforts to identify and utilize minority, disadvantaged or female owned businesses in the completion of this contract.

XIV. Contract Work Hours Act, Safety Standards Act, and Fair Labor Standards Act

These laws apply to all Federally-assisted construction contracts, including those which are otherwise exempt from Davis Bacon Act provisions. The laws generally require that:

1. A minimum wage of $7.25/hour be paid **(unless higher rates are required by Florida Statute, wherein the higher of the Federal minimum wage rate or the Florida minimum wage rates shall be paid)**;
2. Forty hours constitutes a standard workweek;
3. "Time and one-half" rates be paid for work in excess of these maximums;
4. Employers are liable to employees for payment of overtime;
5. Equal pay for equal work is required as it effects male and female workers in the same classification;
6. Failure to pay overtime is punishable by liquidated damages of $10/employee/day;
7. Contracting entities/local jurisdictions may withhold such damages from progress payments to Contractors;
8. Intentional violations constitute a Federal misdemeanor and are punishable by fine ($1,000 minimum), imprisonment (6 months in prison), and possible debarment by the U. S. Department of Housing and Urban Development, U. S. Department of Labor, the State of Florida, or other cognizant agencies.

NOTE: The Minimum Wage required in the State of Florida is currently $8.46 per hour. Therefore, contractors must pay at least this amount to hourly workers

XV. Title VIII of the Civil Rights Act of 1968 (as amended) and Executive Order 11063 Regarding Fair Housing

Title VIII and E.O. 11063 prohibit discrimination on the basis of race, color, religion, sex, familial status, handicap or national origin in connection with housing and public accommodations and with respect to the sale or rental of housing.

XVI. Americans with Disabilities Act (ADA) and Handicapped Accessibility Standards

All contract parties shall fully comply with all applicable provisions of the Americans with Disabilities Act with regard to employment, accessibility, and prohibition of discriminatory actions. Further, each building or facility (other than a privately owned residential structure) which is designed, constructed or altered with HUD funds shall comply with the requirements of the "American Standards Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped," issued subject to the Architectural Barriers Act of

1968, 42 U.S.C. 4151, and amendments thereto

XVII. Preservation of Historically Significant Properties

Evaluation of the acceptability of HUD assisted acquisition, construction, rehabilitation or related project activities must take into account the effect of the project upon any district, site, building, structure or object listed or found by the Secretary of the Interior, pursuant to 34 CFR Part 800, to be eligible for inclusion in the National Register of Historic Places. Actions should be taken to minimize any resulting adverse impact on a historic property, subject to requirements set forth in 24 CFR Part 570.603. Requirements of Pub. L. 93-291, the Archaeological and Historic Preservation Act of 1974, and Executive Order 11593, and any amendments or revisions thereto.

In the event that any ground disturbing work uncovers significant archaeological materials, such as stone arrowheads, ceramics, or early building foundations, or if work uncovers human burials or human remains, ground disturbing activities will immediately be stopped within a 300 foot radius and the materials protected. Notify the Escambia County Neighborhood Enterprise Division immediately for contact with the State Historic Preservation Officer and other relevant entities to provide input before construction resumes.

XVIII. Prohibition Against Use of Debarred, Suspended, or Ineligible Contractors or Subcontractors

Contracting entity certifies and asserts that his/her business and/or affiliated businesses, and further, that the subcontractors selected by the Contracting entity to complete work on this project, are not currently debarred, suspended or otherwise ineligible to participate in or undertake contract work financed by the U.S. Government under the provisions of 24 CFR Part 24.

XIX. Energy Efficiency

The Contractor shall comply with any mandatory standards and policies relating to energy efficiency which are contained in the Florida State Energy Conservation Plan issued in compliance with the Energy Policy and Conservation Act (Public Law 94-163).

XX. Environmental Compliance

As described elsewhere in this document, if this contract exceeds $100,000, the Contractor shall comply with all applicable standards, orders or requirements issued under Section 306 of the Clean Air Act (42 U.S.C. 1857(b)), Section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and U.S. Environmental Protection Agency Regulations (40 C.F.R. Part 15). The Contractor shall include this clause in any subcontracts over $100,000.

EXHIBIT O

FINAL RELEASE AND WARRANTY

SECTION 1: HOMEOWNER'S RELEASE

I, _____, as owner of the unit located at [**ADDRESS],** certify and accept all work as performed and contracted by, _____ as complete and satisfactory. I hereby authorize final payment to_____ for the work done on this residence**.**

SECTION 2: CONTRACTOR'S OBLIGATION AND WARRANTY

I, _____ as Contractor of record, for the rehabilitation of the above referenced residence, do issue a one (1) year limited labor and material warranty ending_____**.** The warranty covers defects in materials and workmanship, which occur during normal use. I, _____ **(owner)** acknowledge that routine homeowner maintenance and/or problems caused by neglect, abuse, or improper use are not covered by this warranty. Further, after the warranty expiration date, neither the County, nor the Contractor, shall be responsible for any further work related to this Contract.

SECTION 3: HOMEOWNER/ESCAMBIA COUNTY OBLIGATIONS

As the Contractor has completed his/her contract, the Homeowner, upon acceptance of same, now causes final payment to be made to the Contractor. The Homeowner fully understands that the Contractor is the sole responsible party for the one (1) year warranty as specified in Section 2 of this agreement. The Homeowner understands that it is his/her responsibility to contact the Contractor regarding necessary warranty work. Only after documented efforts by the Homeowner will Escambia County become involved with warranty issues/disputes. Failure of the Contractor to respond to legitimate warranty requests will cause Escambia County/NED to sanction said Contractor.

CAO Approval:

RECOMMENDATION:

Recommendation Concerning Contract Award for Financial Auditing Services - Paul Nobles, Purchasing Manager, Office of Purchasing

That the Board approve and authorize the Chairman to sign the Agreement between Escambia County, Florida, and Warren Averett, LLC, per the terms and condition of PD 18-19.004, Financial Auditing Services as follows:

1. Year 1, in the amount of $220,000;
2. Year 2, in the amount of $222,200;
3. Year 3, in the amount of $224,422;
4. Year 4, in the amount of $226,666; and
5. Year 5, in the amount of $228,933.

Grand Total Price for Audit Services for 5 years - $1,122,221.

[Funding: Fund 001, General Fund, Cost Center 140201, Object Code 53101]

BACKGROUND:

The Request for Proposals was advertised on February 11, 2019 in the Pensacola News Jouranl. Nine firms were notified of the solicitation. Three firms responded to the solicitation on February 26, 2019. The Selection Committee held discussions with three firms on March 15, 2019. Based on the selection criteria, the committee sleected Warren Averett, LLC as the best firm able to provide the necessary services.

Per Florida Statute 218.391 prior to the selection of an auditor all non-charter Counties must have an auditor selection committee that includes, at a minimum,

representatives from each of the elected officials subject to the annual audit. This audit committee consisted of a representative from the Board, Tax Collector, Property Appraiser, Sheriff and Supervisor of Elections. This committee met to write the scope of the request for proposals (RFP), develop the decision criteria, serve as the selection committee and make recommendations to the Board after hearing proposals from respondents. This committee received three responses which were ranked as follows:

1. Warren Averett, LLC
2. Plante & Moran, PLLC
3. Saltmarsh, Cleveland & Gund, P.A.

Negotiations were held on March 30, 2019.

BUDGETARY IMPACT:

Fund 001, General Fund, Cost Center 140201. Object Code 53101

LEGAL CONSIDERATIONS/SIGN-OFF:

Agreement prepared by Senior Assistant County Attorney Kristin Hual.

PERSONNEL:

N/A

POLICY/REQUIREMENT FOR BOARD ACTION:

This recommendation is in compliance with the Escambia Count, Fl, Code of Ordinance, Chapter 46, Article II, Purchases and Contracts and is in compliance with Florida Statute 218.391.

IMPLEMENTATION/COORDINATION:

The Office of Purchasing will issue the agreement and purchase order.

PD 18-19.004 Financial Auditing Services Solicitation

AGREEMENT FOR FINANCIAL AUDITING SERVICES (PD 18-19.004)

THIS AGREEMENT is made by and between Escambia County, Florida, a political subdivision of the State of Florida (hereinafter referred to as "County**"**), whose mailing address is 221 Palafox Place, Pensacola, Florida 32502, and Warren Averett, LLC (hereinafter referred to as "Auditor"), a limited liability company authorized to conduct business in the State of Florida, FEI/EIN 45-4084437, whose principal address is 2500 Acton Road, Birmingham, AL 35243.

WITNESSETH:

WHEREAS, the County issued a Request for Proposal for Financial Auditing Services (PD18-19.004); and

WHEREAS, in response to the solicitation, the Auditor submitted a proposal dated February 25, 2019; and

WHEREAS, the County determined that the Auditor was the most responsive and responsible firm whose proposal met the requirements and criteria set forth in the solicitation; and

WHEREAS, the County desires to enter into an agreement with the Auditor for the provision of annual financial audit services as specified herein; and

WHEREAS, the parties hereto also desire that this Agreement shall be construed to authorize the County to request and the Auditor to provide expert witness services in connection with court proceedings arising out of projects in which the Auditor provided audit services.

NOW THEREFORE, in consideration of the promises contained herein, the parties hereto agree as follows:

1. The recitals contained in the preamble of this Agreement are declared to be true and correct and are hereby incorporated into this Agreement.

2. The Board of County Commissioners has complied with the auditor selection procedures provided in §218.391, Florida Statutes, and has selected the Auditor to perform the services hereunder.

3. Term. This Agreement shall commence upon the date last executed by the parties and continue for an initial term of five (5) years, subject to termination as provided herein. Upon mutual agreement of the parties, the Agreement may be renewed for up to five (5) additional one-year terms.

4. Scope of Services. The Auditor shall perform financial auditing services, including, but not limited to, the scope of services provided in Escambia County's *Request for Proposals for Financial Auditing Services, Specification No. P.D. 18-19.004*, attached hereto as **Exhibit A.** In the event of a conflict between the terms of the Exhibits referenced herein and this Agreement, the terms of this Agreement shall prevail.

The County may authorize additional services to be performed pursuant to this Agreement through the issuance of a Work Order setting forth a specific Scope of Services, the amount of compensation, deliverables, and date of completion. Authorization for additional services shall

be subject to the approval of the BCC in accordance with the County's Purchasing Policies and Procedures.

5. Compensation. The County agrees to pay Auditor a total fee for annual audit services in accordance with the Schedule of Fees and Expenses for Audit Services and the Schedule of Fees for Additional Services, attached hereto as **Exhibit B**. Failure to timely submit the annual audit report will result in the withholding of further fee payment by the County until satisfactory submission is made. In addition, the County reserves the right to terminate this Agreement upon completion of the auditor's services for the fiscal year in question and award a contract for the remaining audit years to another firm.

6. Method of Payment. Consultant may request payment from the County by the submission of a properly executed original invoice. Invoices shall reflect the amount due and owing and identify the nature of services performed with appropriate supporting documentation. Requests for payment shall not be made more frequently than once a month. All payments under this Agreement and interest on any late payments shall be governed by and construed in accordance with the Local Government Prompt Payment Act, §§218.70, Florida Statutes, as amended.

7. Standard of Care. The Auditor certifies that it is a certified public accounting firm duly licensed under Chapter 473, Florida Statutes, and is fully qualified to conduct audits in accordance with government auditing standards as adopted by the Florida Board of Accountancy. The Auditor shall exercise the same degree of care, skill and diligence in the performance of the services as ordinarily provided by a professional under similar circumstances, and Auditor shall, at no additional cost to the County, re-perform any services that fail to satisfy the foregoing standard of care.

8. Termination. Either party may terminate this Agreement for cause upon providing not less than seven (7) days written notice to the other party. The County shall have the right to terminate this Agreement without cause upon providing fourteen (14) days written notice to Auditor, and Auditor shall terminate the performance of services on a schedule acceptable to County or at the end of this fourteen (14) day period. In the event of termination for County's convenience, the County shall pay Auditor for all services performed through the date of termination.

9. Force Majeure. Neither party shall be considered to be in default of this Agreement if delays in or failure of performance shall be due to uncontrollable forces, the effect of which, by the exercise of reasonable diligence, the non-performing party could not avoid. The term "Uncontrollable Forces" shall mean any event which results in the prevention or delay of performance by a party of its obligations under this Agreement and which is beyond the reasonable control of the non-performing party, including, but not limited to, fire, flood, earthquakes, storms, lightening, epidemic, war, riot, civil disturbance, sabotage, Acts of God and governmental actions. Neither party shall, however, be excused from performance if nonperformance is due to forces which are preventable, removable, or remediable and which the non-performing party could have, with the exercise of reasonable diligence, prevented, removed, or remedied with reasonable dispatch. The non-performing party shall, within a reasonable time of being prevented or delayed from performance by an uncontrollable force, give written notice to the other party describing the circumstances preventing continued performance of the obligations of this Agreement.

10. Indemnification. Auditor shall indemnify and hold harmless the County, its elected and appointed officials and employees from liabilities, damages, losses and costs, including, but

not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of Auditor and persons employed or utilized by Auditor in the performance of this Agreement. Any costs and expenses, including attorney's fees, appellate, bankruptcy or defense counsel fees incurred by the County to enforce this Indemnification Clause shall be borne by the Auditor. This Indemnification Clause shall continue indefinitely and survive the cancellation, termination, expiration, lapse or suspension of this Agreement.

11. Insurance. During the performance of this Agreement, Auditor shall procure and maintain, at its sole expense, the following insurance:

(a) Commercial General Liability, Form CG1, with $1,000,000 per occurrence. Excess or umbrella insurance may be purchased to make up the difference, if any, between the policy limits of the underlying policies.

(b) Professional Liability with $1,000,000 per occurrence minimum limits.

(c) Florida statutory Workers' Compensation.

It is understood and agreed by the parties that if the Auditor consists of a joint venture, partnership, or other association of professional or business firms, each such firm shall be required to individually carry the above cited coverages.

Auditor agrees all liability coverage shall be through carriers admitted or authorized to do business in the State of Florida. Carriers shall be "A" or other Secure Best Rating with a minimum financial size of "VII", according to the A.M. Best Key Rating Guide Latest Edition. The insurance policies shall be endorsed to provide at least thirty (30) days prior notice of cancellation, nonrenewal or adverse change. Such notices shall be mailed to Escambia County, Post Office Box 1591, Pensacola, Florida 32597.

The Board of County Commissioners and Escambia County shall be endorsed as "additional insureds" on the policy of commercial general liability. Certificates of Insurance shall be provided to Escambia County, Post Office Box 1591, Pensacola, Florida 32597 prior to commencement of work hereunder. Certificates shall reflect the additional insured status of Escambia County described in this section. The Board of County Commissioners and Escambia County shall also be the certificate holders.

12. Independent Contractor Status. The parties intend by this Agreement that Auditor is an independent contractor and not an employee of County. Auditor shall not be considered an employee of County at any time, under any circumstances, or for any purpose. Neither party is the agent of the other nor neither shall have the right to bind the other by contract or otherwise, except as herein specifically provided. As an independent contractor, Auditor has and shall retain sole responsibility for all workers' compensation, unemployment compensation, withholding, and employment taxes due to federal, state or local governments in the performance of this Agreement. Auditor shall not be entitled to participate in or receive any benefits under any benefit plan or program of County including, without limitation, medical, dental, disability, group life, retirement savings plan or program, vacation, or holidays. Auditor agrees to indemnify, defend and hold harmless County from any claims by him, or by any federal, state, or local government agency, on account of wages, withholding and employment taxes, or workers' compensation claims, or any other actions arising out of Auditor's performance of this Agreement.

13. Governing Law and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida, and the parties stipulate that venue shall be in the County of Escambia.

14. Public Records. The Auditor acknowledges that this Agreement and any related financial records, audits, reports, plans correspondence, and other documents may be subject to disclosure to members of the public pursuant to Chapter 119, Florida Statutes. The Auditor shall maintain all such public records and, upon request, provide a copy of the requested records or allow the records to be inspected within a reasonable time. The Auditor shall also ensure that any public records that are exempt or exempt and confidential from disclosure are not disclosed except as authorized by law. Upon the expiration or termination of the Agreement, Auditor agrees to maintain all public records for a minimum period of five (5) fiscal years in accordance with the applicable records retention schedules established by the Florida Department of State. In the event the Auditor fails to abide by the provisions of Chapter 119, Florida Statutes, the County may, without prejudice to any other right or remedy and after giving the Auditor seven days written notice, during which period the Auditor still fails to allow access to such documents, terminate the Agreement. In such case, the Auditor shall not be entitled to receive any further payment. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the Auditor.

IF THE AUDITOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE AUDITOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:

Escambia County
Office of the County Administrator
221 Palafox Place, Suite 420
Pensacola, Florida 32502
(850) 595-4947

15. Nondisclosure of Proprietary Information. Auditor shall consider all information provided by the County and all reports, studies, calculations and other documentation resulting from the Auditor's performance pursuant to this Agreement to be proprietary unless such information is available from public sources or is a public record under Chapter 119, Florida Statutes. Auditor shall not publish or disclose proprietary information for any purpose other than the performance of services pursuant to this Agreement without the prior written authorization of County or in compliance with a lawful court order.

16. Ownership of Documents. All reports and other documents resulting from the Auditor's performance of services pursuant to this Agreement shall become the property of the County upon final payment to the Auditor for the County's use and distribution as may be deemed appropriate by the County. All working papers and other memoranda relating to any agency, entity, or constitutional officer that is subject to the audit that may be produced by the Auditor in the course of performing services pursuant to this Agreement shall remain the property of the Auditor but, with the appropriate written authorization, shall be made available to the County for examination or duplication at no cost to the County.

17. Use of Systems and Software. The Auditor shall obtain the County's written permission prior to using the County's computer system or software. The Auditor agrees that such system use will be controlled by the County so as not to disrupt its ongoing daily operations.

18. Non-waiver. A waiver by either party of any breach of this Agreement shall not be binding upon the waiving party unless such waiver is in writing and duly signed by both parties to this Agreement. In the event of a written waiver, such a waiver shall not affect the waiving party's rights with respect to any other or further breach. The making or acceptance of a payment by either party with knowledge of the existence of a default or breach shall not operate or be construed to operate as a waiver of any subsequent default or breach.

19. Severability. The invalidity, illegality, or unenforceability of any provision of this Agreement, or the occurrence of any event rendering any portion or provision of this Agreement void or voidable, shall in no way affect the validity or enforceability of any other portion or provision of the Agreement. Any void or voidable provision shall be deemed severed from the Agreement and the balance of the Agreement shall be construed and enforced as if the Agreement did not contain the particular portion of provisions held to be void. The provisions of this section shall not prevent the entire Agreement from being held void should a provision which is of the essence of the Agreement be determined to be void by a court of compensation jurisdiction.

20. Entire Agreement. This Agreement contains the final, complete, and exclusive statement of the terms of the Agreement between the parties and supersedes all prior oral or written agreements. This Agreement supersedes all prior agreements, contracts, proposals, representations, negotiations, letters of other communications between the parties pertaining to the services, whether written or oral. The Agreement may not be modified unless such modifications are evidenced by an amendment in writing signed by both parties.

21. Assignment of Agreement. This Agreement, or any interest herein, shall not be assigned, transferred, or otherwise encumbered, under any circumstances, by the Auditor without the prior written consent of the County. However, the Agreement shall run with the Escambia County Board of County Commissioners and its successors.

22. Compliance with Laws. Auditor will comply with all applicable regulatory and other applicable requirements including federal, state, and local laws, rules, policies, or guidelines related to the performance of this Agreement.

23. Conflict of Interest. Auditor agrees it shall not contract for or accept employment for the performance of any work or service with any individual, business corporation, or government unit that would create a conflict of interest in the performance of its obligations under this Agreement. Auditor further agrees it will neither take any action nor engage in any conduct that would cause any County employee or official to violate the provisions of Chapter 112, Florida Statutes, relating to ethics in government. Auditor also agrees to comply with the County's ordinance prohibiting conflicts of interest among retained consultants.

24. Contingent Fees. The Auditor warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the Auditor to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona fide employee working solely for the Auditor, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this Agreement. For the breach or violation of this provision, the County shall have the right to terminate the Agreement without liability and, at its discretion, to deduct from the

contract price, or otherwise recover, the full amount of such fee, commission, percentage, gift, or consideration.

25. Truth-in-Negotiation Certificate. Execution of this Agreement by the Auditor shall act as the execution of a truth-in-negotiation certificate certifying that the wage rates and costs used to determine the compensation provided for in this Agreement are accurate, complete, and current as of the date of the Agreement and no higher than those charged the Auditor's most favored customer for the same or substantially similar services. The said rates and cost shall be adjusted to exclude any significant sums should the County determine that the rates and costs were increased due to inaccurate, incomplete, or noncurrent wage rates or due to inaccurate representations of fees paid to outside consultants. The County shall exercise its rights under this "Certificate" within one (1) year following payment.

26. Notice. Any notice, payment or other communication under this Agreement required hereunder or desired by the party giving such notice shall be given in writing and delivered by hand or through the instrumentality of certified mail of the United States Postal Service or private courier service, such as Federal Express. Unless otherwise notified in writing of a new address, notice shall be made to each party as follows:

Escambia County	Warren Averett, LLC
Attention: Stephan Hall	Attention: Kristen McAllister
221 Palafox Place, Suite 440	316 South Baylen Street, Suite 300
Pensacola, FL 32502	Pensacola, FL 32502

Rejection, or other refusal by the addressee to accept, or the inability of the courier service or the United States Postal Service to deliver because of a changed address of which no notice was given, shall be deemed to be receipt of the notice sent. Any party shall have the right, from time to time, to change the address to which notices shall be sent by giving the other party at least ten (10) days prior notice of the address change.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the respective dates under each signature:

PART II – STATEMENT OF WORK

2.1 WORK OBJECTIVE

This RFP solicits proposals from certified public accounting firms to provide the County with an annual financial statement audit. The RFP is to provide responding parties with guidelines and information to aid in their submission of proposals.

The County will contract for five annual audits (2019, 2020, 2021, 2022, and 2023) based on a fee not to exceed a maximum amount (per year) with provisions for extension of the contract for five one year renewal terms. Additional services will be contracted for separately with the County reserving the right to solicit to other firms.

Escambia County has a population of approximately 315,187 people and is located in the northwestern part (the "Panhandle") of Florida. The County employs some 2,497 full-time employees and has total net position of over $602 million and revenues of over $506 million for the year ending September 30, 2017. The County organizational chart is presented on pages 36 & 37. The County has consecutively received the GFOA's Certificate of Achievement.

The County provides a pension plan through the Florida Retirement System (FRS) for all full-time employees of the County. FRS is a multiple employer cost sharing defined benefit pension plan established in 1970 by Chapter 121, Florida Statutes and is administered by the Florida Department of Management Services, Division of Retirement. Financial reports including financial statements and required supplementary information are available.

The County's accounting system is substantially fully automated. All Clerk Finance Department staff have a personal computer with access to the accounting system(s). Computer access will be made available to the auditors. The primary accounting software is an integrated financial system supplied by Superion (formerly Sunguard Pentamation), including general ledger, payroll, purchasing, fixed assets, accounts receivable, cash receipts, and extended reporting. The Finance Department utilizes reports from the accounting software, various spreadsheets, and word processing documents in preparing the Comprehensive Annual Financial Report (CAFR). In addition, Finance Department staff use personal computers extensively in day-to-day applications.

The County will provide adequate work and storage space during the field work period. County staff will be available to pull documents and prepare schedules that are agreed to prior to the start of the year-end field work.

Available for inspection are the County's CAFR, CAFR AG and Annual Audit Reports (for various years) on the Clerk's Website at www.escambiaclerk.com.

2.2 SCOPE OF WORK TO BE PERFORMED

The scope of the audit engagement will require the examination of the BCC and individual elected officials', the Pensacola Bay Center, and the Law Library (collectively known as "the County") financial statements as required by the Auditor General for the period of October 1, 2019 through September 30, 2023, and verification of beginning balances, in order to express an opinion on the fairness with which they present the financial position, results of operations, and changes in financial position in conformity with generally accepted accounting principles, and an examination to determine whether operations are properly conducted in accordance with legal and regulatory requirements.

The funds and account groups to be audited are those included or includable in the County's annual audit report (available at www.escambiaclerk.com). The County shall have closed, balanced, and prepared financial statements for all funds and account groups to be examined by the auditor in a schedule of events ending prior to November 25th, of each year, with the exception of the GASB 68 Florida Retirement System entry. The Clerk will have primary responsibility for producing the CAFR (and all elements thereof) as well as the Annual Audit Report. The auditor shall assist in finalizing the County's annual financial report, and shall include an opinion in its report regarding the County's CAFR; as well as the individual elected officials' audit reports (including notes to financial statements), and shall include an opinion in its report regarding the County's CAFR and supplemental financial schedules. The opinion shall reference the audit of the County's governmental and business-type activities, each major fund and the aggregate remaining fund information. The County shall also provide additional financial and non-financial information not subject to examination by the auditor but necessary to conform to the principles and standards of public financial reporting necessary to submit the County's CAFR to the Government Finance Officers Association (GFOA) Certificate of Achievement Program. The County's CAFR will additionally be expected to meet any present or to-be-established standards for disclosure attributed to the CAFR to enable inclusion in various municipal bonds continuing disclosure libraries and depositories.

All records of constitutional officers of Escambia County, Florida, shall be included in the single combined audit report with separate management letters for each constitutional officer.

The audit should be performed in accordance with the following as they exist or as each may be subsequently amended:

- Generally accepted governmental accounting principles as promulgated by GASB
- Statements on Auditing Standards (GAAS) promulgated by the American Institute of Certified Public Accountants (AICPA)
- Government Auditing Standards (GAS) issued by the Comptroller General of the United States
- Uniform Guidance (2CFR 200) and other applicable OMB circulars
- The Federal and Florida Single Audit Acts
- Florida Statutes as applicable
- Regulations of the Florida Department of Financial Services
- Rules of the Auditor General, State of Florida, Chapter 10.550
- Audits of State and Local Governmental Units (AICPA Audit Guide revised) or other authoritative standards
- Any applicable federal, state, local regulations or professional guidance not specifically listed above as well as any additional requirements which may be adopted by these organizations in the future.

The auditors shall perform a study and evaluation of internal accounting and administrative controls as required by GAAS and GAO. If weaknesses are noted, recommendations should be

reviewed with the appropriate level of management and included in a separate Management Letter to each elected official.

Timeliness and the ability to complete the individual audit reports in a timely manner are critical factors in the performance of the audit. The proposer should include a proposed audit plan in consideration of the County's plan outlined in Appendix A (which will be subject to annual negotiation). The auditor will coordinate the audit with the Clerk's Finance Director and will mutually endeavor to accomplish the audit in a phased basis throughout the year to reduce the year-end workload on the County's financial audit activities.

The auditor will review and accept separate audit reports for the Human Relations Commission, the Santa Rosa Island Authority, the Pensacola Economic Development Commission, Law Library and the Housing Finance Authority.

The Auditor agrees to do the GFOA checklist review for submission to the GFOA.

The auditor will agree to end field work by February 8th and to complete a review of the CAFR in time for the County to release the CAFR by March 1st and the Annual Audit Report by the same date.

2.3 REPORTS TO BE ISSUED

The County requires:

- An opinion on the CAFR
- An opinion on the government-wide basic financial statements and all supplementary information
- A separate single audit report that complies with Uniform Guidance (2CFR200) and Rules of the Auditor General, State of Florida, Chapter 10.550 for Federal and State Programs
- A Schedule of Financial Assistance, both Federal and State
- A reports on compliance and internal control over financial reporting
- A report on Landfill Management Escrow Account activity
- A report on Section 29.008 Article V revenues and expenditures
- Individual management letters as required by Florida Statute 11.45(3)(a)4 and defined in Rule 10.554, Rule of the Auditor General, for each elected official in accordance with the Auditor General of the State of Florida that includes a summation statement of audit findings and recommendations affecting financial statements, internal control, etc.
- Data collection form for reporting on audits of states, local governments, and non-profit organizations
- Any attestations of conclusions or special reports as required from time-to-time by Florida Statutes or Rules of State Agencies
- Review the Annual Financial Report (AFR), filed via LOGER
- Issuance of Constitutional Officers' Financial Statements
- Detention Commissary Audit
- Law Library Audit Report

Prior to submission of the completed report, the audit firm's staff will be required to review a draft of the proposed report and management letter with individual constitutional officers.

After delivery of the final audit report, the firm shall have the responsibility to notify each constitutional officer of his/her right to provide a written statement of explanation or rebuttal to the auditor's comments, including corrective action to be taken.

The independent audit reports shall be delivered by the auditor to the Clerk's liaison for inclusion in the audit report that is published on behalf of the County.

2.4 SPECIAL CONSIDERATIONS AND SERVICES

A. The County will send a CAFR to the GFOA of the United States and Canada for review in the Certificate of Achievement for Excellence in Financial Reporting Program. It is anticipated that the auditor will be required to provide special assistance to the County to meet the requirements of that program by providing technical advice to ensure awarding of certification, including GFOA checklist review.

B. The schedules of federal and state financial assistance and related auditor's report, (data collection report) as well as the reports on the internal control structure and compliance, are to be issued in conjunction with the CAFR.

C. Review of the accrued liability reserves for the County's self-funded Health Insurance fund, workers compensation fund and the general liability fund.

D. Review of the financial report of the County filed with the Department of Banking and Finance, State of Florida, pursuant to Section 218.32, Florida Statutes, to verify that it is in agreement with the financial statements for the year ended September 30, 2019 and all subsequent years covered by this agreement.

E. Review and issuance of special reports as required for:

- ♦ The landfill liability financial assurance
- ♦ Article V Section 29.008 report
- ♦ Detention Commissary Audit Report
- ♦ Law Library

F. The auditor must designate the partner in charge and two (2) "key" members of the audit team. The County shall reserve the right to approve any substitutions or changes in those staff designated as "key".

G. The auditor shall report to the Clerk at least weekly the status of any potential audit adjustments so that the County may have adequate opportunity to investigate, gather information and respond if necessary. Final audit adjustments shall be submitted to the Clerk no later than 90 days following the end of the fiscal year under audit.

H. The auditor will be available to attend the BCC meetings at which time the audit report will be submitted for acceptance. The auditor will be available to present the report or to respond to BCC questions as needed.

I. There may be instances where the auditor will need to rely on estimates prepared by third-party specialists in respective fields such as engineering and/or actuarial estimates. Guidance found in SAS 73 will govern the use of third-party estimates.

2.5 WORKING PAPER RETENTION AND ACCESS TO WORKING PAPERS

All reports and other documents that result from the auditor's services shall become the property of the County after final payment to the auditor. No changes or revisions to such documents shall be made by the County or its agents without the auditor's written approval.

Working papers are the property of the auditor and should be held locally for a period of five years. Working papers, including those of all agencies and Constitutional Officers subject to this audit and all supporting documentation, will be available for examination or duplication without charge to the Escambia County Board of County Commissioners, authorized County personnel or designated agencies, representatives of the cognizant Federal Audit Agency, the General Accounting Office, the State of Florida Auditor General or the State Board of Accountancy. They will be made available for examination or duplication at reasonable charge to subsequent auditors engaged by the County.

The auditor will agree to notify the County if the Board of Accountancy or any other regulatory agency requests a review of the audit work papers concerning the County or any government client audited by the local office.

To make each proposer aware of certain additional contractual requirements, which the County will provide for the contract, the following points are made:

a) Understanding the nature of most CPA firms' promotion/resource reallocation practices, the County will reserve the right to approve the re-designation of any partner, manager, or seniors at the on-site supervisory or higher level. Each proposer should be aware of the County's interest in the on-site expertise and experience of the proposed project team.

b) We expect immediate compliance with any expanded scope definitions and will only consider fee adjustment where significant change can be demonstrated which will materially affect what the County should have expected the auditor to accomplish at the time of fee determination.

c) The auditor acknowledges that it will conduct its business in conformity with the provisions of Chapter 112, Florida Statutes, relating to ethics in government. In the event the auditor causes or in any way promotes or encourages a County officer, employee, or agent to violate Chapter 112, Florida Statutes, the County shall have the right to immediate termination of this agreement.

PART III - TIME REQUIREMENTS

3.1 SCHEDULE FOR CONDUCTING AUDITS

Each of the following should be completed by the Auditor no later than the dates indicated:

A. Interim Work – The auditor shall complete interim work by August 31, 2019 and all subsequent years covered by this contract.

B. Detailed Audit Plan – The auditor shall provide the County by July 31st each year both a detailed audit plan and a list of all schedules to be prepared by the County.

PART IV – ASSISTANCE TO BE PROVIDED TO THE AUDITOR AND REPORT PREPARATION

4.1 FINANCIAL SERVICES DEPARTMENT AND CLERICAL ASSISTANCE

The County staff and responsible management personnel will be available during the provision of services to assist the firm by providing information, documentation and explanations. The preparation of confirmations will be the responsibility of the County.

4.2 WORK AREA, TELEPHONES, PHOTOCOPYING AND FAX MACHINES

The County will provide the auditor with reasonable work space, desks and chairs. The auditor will also be provided with access to telephone lines, photocopying facilities and facsimile machines. The auditor will provide their own personal computer equipment and printers. The auditor will provide their own office supplies, such as pens, printer paper, etc.

4.3 REPORT PREPARATION

CAFR and annual audit report preparation, editing and printing shall be the responsibility of the Clerk. Preparation and printing of other reports described herein shall be the responsibility of the proposer. The auditor will coordinate the delivery of each constitutional officer's stand-alone financial statements and notes to the Clerk no later than December 5th so that the Clerk can prepare the consolidated financial statements used in the preparation of the CAFR.

PART V – INSTRUCTIONS FOR PREPARING PROPOSALS

5.1 RULES FOR PROPOSALS

The proposal must name all persons or entities interested in the proposal as principles. The proposal must declare that it is made without collusion with any other person or entity submitting a proposal pursuant to this RFP.

Submission of a proposal indicates acceptance by the firm of the conditions contained in this RFP unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the County and the firm selected.

5.2 PROPOSAL FORMAT

Proposers should prepare their proposals using the following format and follow the numbering format below for tabbing/indexing their RFP submittal. Proposal to include but not limited to:

1. Title Page: Title page showing the RFP's subject; the firm's name; the name, address and telephone number of contact person; and the date of the proposal.

2. Table of Contents: The table of contents of the proposal should include a clear and complete identification of the materials submitted by section and page number.

3. Letter of Transmittal: This letter will summarize in a brief and concise manner the following:

   - Proposer's understanding of the scope of work and make a positive commitment to timely performance of work.
   - The letter must name all persons or entities interested in the proposal as principals.
   - The letter must declare that it is made without collusion with any other person or entity submitting a proposal pursuant to this RFP.
   - Identify all of the persons authorized to make representations for the proposer, including the titles, addresses and telephone numbers of such persons.
   - An authorized agent of the proposer must sign the Letter of Transmittal and must indicate the agent's title or authority.

   The firm identified on the Letter of Transmittal will be considered the primary firm. If more than one firm is named on the Letter of Transmittal, a legal document showing the partnership, joint venture, corporation, etc. shall be submitted showing the legality of such. Submittal for Joint Venture to include executed Joint Venture agreement and if state law requires that the Joint Venture be registered, filed, funded, or licensed prior to submission of the proposal, then same shall be completed prior to submittal. Proposers shall make their own independent evaluation of the requirements of the state law. The County will not consider submittals that identify a joint partnership to be formed. The primary firm identified herein will be responsible for final negotiations and receipt of payments from the County. The letter should not exceed two pages in length.

4. Executed copy of Drug Free Workplace.

5. Proposer Guarantee (Appendix B).

6. Notarized Acknowledgement of Business Type Form.

7. Statement acknowledging receipt of each addendum issued by the County.

8. Understanding of Scope of Services as detailed Part II.

9. Technical Proposal (as detailed herein).

5.3 CONTENT OF TECHNICAL PROPOSAL

A. General Requirements

The purpose of the technical proposal is to demonstrate the qualifications, competence, and capacity of the firms seeking to undertake an independent audit of the County in conformity with the requirements of this RFP. As such, the substance of proposals will carry more weight than their form or manner of presentation. The technical proposal should demonstrate the combined qualifications of the firms and of the particular staff to be assigned to this engagement. It should also specify an audit approach that will meet the RFP requirements.

The technical proposal should address all of the points outlined in the Request for Proposal. The proposal should be prepared simply and economically, providing a straightforward, concise description of the proposer's capabilities to satisfy the requirements of the RFP. While additional data may be presented, the following subjects, items B through R, must be included.

TECHNICAL PROPOSAL SHOULD UTILIZE SAME NUMBERING FORMAT IDENTIFIED HEREIN

B. Independence

1. The firm shall provide an affirmative statement that it is independent of the County as defined by generally accepted auditing standards and the US General Accounting Office's Governmental Auditing Standards.

2. The firm shall also disclose any relationships or business dealings either the firm itself or its key partners and personnel have with the County or key County personnel that could appear to be a conflict.

3. The firm should list and describe the firm's or any individual in the firm's professional relationships, if any, involving the County or key County personnel for the past five (5) years.

C. License to Practice in Florida

1. An affirmative statement must be included indicating that the firm and all assigned key professional staff are properly registered/licensed to practice in Florida.

D. Firm Qualifications and Experience

1. Proposer to identify the following:
   - ♦ State whether the firm is local, national, or international
   - ♦ Size of the firm
   - ♦ Size of the firm's governmental audit staff
   - ♦ Location of the offices from which the work on this engagement is to be performed
   - ♦ Number and nature of the professional staff to be employed in this engagement on a full-time basis.

- Number and nature of the staff to be so employed on a part-time basis and a delineation of the responsibilities of the firm.

2. The firm shall also provide information on the results of any federal or state desk reviews or field reviews of its audits during the past three (3) years.

3. The firm shall provide information on the circumstances and status of any disciplinary action taken or pending against the firm or any professional staff during the past three (3) years with State Board of Accountancy or the Auditor General.

4. The firm shall also describe any litigation or proceeding whereby, during the past two years, a court or any administrative agency has ruled against the firm in any manner related to its professional activities. Similar information shall be provided for any current or pending litigation.

Failure to return this information with your proposal may result in the rejection of your proposal.

E. Partner, Supervisory and Staff Qualifications and Experience

1. The proposal shall identify the principal supervisory and management staff of engagement office, including engagement partners, managers, other supervisors and specialists, who would be assigned to the engagement and indicate whether each such person is licensed to practice as a Certified Public Accountant in Florida.

2. The proposal shall also include information on the governmental, utility and electronic data processing auditing experience of each person on the team, including information on relevant continuing professional education for the past three (3) years and membership in professional organizations and on standards setting advisory boards and committees relevant to the performance of this audit.

   As much information as possible should be provided regarding the number, qualifications, experience and training of the specific staff to be assigned to this engagement. The proposal shall also indicate how the quality of staff over the term of the agreement will be assured.

3. Describe the firm's participation and experience in quality reviews and peer reviews, specifically the inclusion of governmental audits in the quality review and peer reviews of the proposed office. Enclose a copy of the firm's latest peer review report. Report to be submitted at end of Section 5.3, Item E.

4. The auditor should outline its commitment to governmental auditing and financial reporting experience by:

   - Compliance with Florida Statutes and Rules and Government Auditing Standards for staff CPE in governmental auditing or accounting by staff levels involved.

   - Commitment to active participation in local, state and national governmental finance organizations.

   - Growth experience in number of governmental audit clients served locally, state-wide and nationally. Number of governmental clients served in the management advisory services practice of the firm locally, state-wide or nationally.

F. Similar Engagements with Other Government Entities

1. For the engagement office assigned responsibility for the audit, list and rank the five (5) most significant engagements performed in the last five years that are similar to the engagement described in this RFP. These engagements should be ranked on the basis of total staff hours.

   Indicate:

   - the scope of work
   - date
   - engagement partners
   - total hours
   - the name and telephone number of the principal client contact

   The County reserves the right to contact the above-mentioned references and any other clients.

G. Conflict of Interest

The proposal must also disclose any potential real or perceived (as outlined in GAS Chapter 3) conflicts of interest due to any other client's contract or property interests or include a notarized statement certifying that no member of your firm's ownership, management or staff currently have a vested interest which might be considered a conflict of interest. Any potential conflict of interest listed by a firm will be reviewed by the County Attorney to determine its substantivizes. If the conflict of interest is found to be substantive, the proposal will be rejected.

H. Specific Audit Approach

The proposal must set forth a work plan; including an explanation of the audit methodology to be followed to perform the services required in Part II of this RFP. In developing the work plan, reference should be made to such sources of information as the County's budget and related materials, organizational charts, manuals, programs, and other financial and management information. Proposers will be required to provide the following information on their audit approach:

1. Proposed segmentation of the engagement.

2. Staffing assignments and levels to be designated to each proposed segment of the engagement.

3. Extent of evaluation and use of electronic data processing software in the engagement.

4. Approach to be taken to gain and document an understanding of the County's internal control structure.

5. Approach to be taken in determining laws and regulations that will be subject to audit test work.

6. Approach to be taken in determining audit samples for purposes of test compliance.

I. Proof of Insurance

Firms shall provide proof that they are in compliance with the insurance requirements as described in Part I (1.21) and specifically regarding minimum coverage for Errors and Omissions Insurance.

J. Identification of Anticipated Potential Audit Problems

The proposal should identify and describe any anticipated potential audit problems, the firm's approach to resolving these problems and any special assistance that will be requested from the County.

K. Availability

Indicate current and anticipated workloads and availability for other activities. Identify the extent and nature of any anticipated outside support.

L. Additional Information

This section shall include the following items:

1. Provide a summary of any litigation filed against the proposer in the past five years which is related to the services that proposer provides in the regular course of business. The summary shall state the nature of the litigation, a brief description of the case, the outcome or projected outcome, and the monetary amounts involved.

2. Any additional information which the proposer considers pertinent for consideration should be included in this part of the proposal.

M. Dollar Cost Bid

This section of the Proposal should contain all pricing information relative to performing the audit engagement as described in this RFP. The total all-inclusive maximum price to be bid is to contain all direct and indirect costs including all out-of-pocket expenses.

The County will not be responsible for expenses incurred in preparing and submitting the technical proposal or the dollar cost bid. Such costs should not be included in the proposal.

The first page of the price proposal should include the following information:

1. Name of Firm

2. Certification that the person signing the proposal is entitled to represent the firm empowered to submit the bid and authorized to sign a contract with the County.

3. A total all-inclusive maximum price for the 2019 engagement.

N. Rates by Partner, Specialist, Supervisory and Staff Level Times Hours Anticipated for Each

The second page of the dollar cost proposal should include a schedule of professional fees and expenses, presented in the format provided in the attachment (Appendix A, Part 1), that supports the total all-inclusive maximum price.

The cost of special services described in Part II (2.4) of this RFP should be disclosed as separate components of the total all-inclusive maximum price using the formats provided in Appendix A, Parts 2 and 3.

O. Out-of-Pocket Expenses Included in the Total All-Inclusive Maximum Price and Reimbursement Rates

Out-of-pocket expenses for firm personnel (e.g., travel, lodging and subsistence) will be reimbursed in accordance with Section 112.061, Florida Statutes. All estimated out-of-pocket expenses to be reimbursed should be presented in the dollar cost bid in the format provided in the attachment (Appendix A). All expense reimbursements will be charged against the total all-inclusive maximum price submitted by the firm.

In addition, a statement must be included in the proposal pricing cost, stating that travel, lodging and subsistence expenses included in the total all-inclusive price are in accordance with Section 112.061, Florida Statutes.

P. Rates for Additional Professional Services

If it should become necessary for the County to request the auditor to render any additional services to either supplement the services requested in this RFP or to perform additional work as a result of the specific recommendations included in any report issued on this engagement, then such additional work shall be performed only upon a written agreement between the County and the firm. Any such additional work agreed to between the County and the firm shall be performed at the same rates set forth in the schedule of fees and expenses included in the dollar cost bid.

Q. Pricing for Contract Years 1 through 5

Use the lower section of Appendix A, Part 1, to provide the total all-inclusive price for contract years 1 through 5. If the proposed hourly rates used to calculate the total all-inclusive price for any contract year are different from contract year 1 rates, provide an index for those years or provide rates for each staff level and each contract year for which there is a change. Also include a statement that those rates will be applicable for any additional professional services which may be requested during those contract years.

R. Manner of Payment

Payments will be based on a percentage of completion methodology based on scheduled milestones/progress, to be developed upon awarding of the contract. The County will withhold retainage from all scheduled payments until final completion of the Audit. Retainage rate will be 10%; at 50% completion the rate will be reduced to 5%. The County reserves the right to inspect records supporting the auditor's billings.

PART VI – EVALUATION OF PROPOSALS

6.1 EVALUATION CRITERIA

The County will evaluate proposals and will select the proposer(s) which meets the best interests of the County. The County shall be the sole judge of its own best interests, the proposals, and the resulting negotiated agreement. The County's decision will be final.

The following represent the principal selection criteria and related weight values; however, not limited to, which will be considered during the evaluation process.

Criteria	Weight Values
Responsiveness of the proposal related to the scope of work	0 - 5
Ability, capacity, and skill of the proposer to perform the services on a timely basis	0 - 30
Responses of the clients' governmental references	0 - 10
Experience of the business and individual members of the business in accomplishing similar services	0 - 5
Total price	0 - 30
Recent, current and projected workload of proposing auditors	0 - 5
The quality, availability, and adaptability of the services to the particular need requested	0 - 10
Local presence	0 - 5
Total	0 - 100

ALTHOUGH COST IS OF CONSIDERABLE IMPORTANCE, IT WILL NOT BE THE PRIMARY FACTOR IN THE SELECTION OF AN AUDIT FIRM

BILLING/PAYMENT SCHEDULE

Audit Plan/Phase	Completion Date	Payment Progress
Planning	July 31st	Progress billing
Preliminary Field Work (Interim)	August 31st	Progress billing
Progress Billings (Monthly)		Progress billings
Year End Field Work	February 15th	Progress billing
Completed Reviews/Exit Conferences and Release of Reports	March 15th	Final billing

M. Dollar Cost Bid

1. Warren Averett, LLC

2. Kristen R. McAllister, CPA, CGFM is entitled to represent the Firm, empowered to submit the bid and authorized to sign a contract with the County.

3. The total all-inclusive maximum price for the 2019 engagement is $220,000.

The information in this document is privileged and confidential and is protected from disclosure. Dissemination, distribution or copying of this communication without the express permission of Warren Averett is strictly prohibited.

N. Rates by Member, Specialist, Supervisory and Staff Level Times Hours Anticipated for Each

Schedule of Professional Fees and Expenses
For the Audit of the September 30, 2019 – 2023 Financial Statements:
Supporting Schedule for Audit Services

	Hours	Standard Rates	Proposed Total
Members	300	$ 295	$ 88,500
Managers	565	$ 255	$144,075
Supervisors	350	$ 205	$ 71,750
Other Staff	300	$ 175	$ 52,500
IT Specialist	40	$ 225	$ 9,000
Subtotal	1555		$ 365,825
Projected 40% discount			($ 145,823)
All-inclusive price			$ 220,000
Total Price for Audit Services			
Year 1			$ 220,000
Year 2			$ 222,200
Year 3			$ 224,422
Year 4			$ 226,666
Year 5			$ 228,933
Grand Total Price for Audit Services (5 Years)			**$ 1,122,221**

Note: Years two through five are based on 1% increases in rates. These rates will apply to additional services that might be requested by the County.

We bring our experience to the field.
Our commitment to finishing timely and providing the County the highest level of service with experienced team members is evidenced by the Member and Manager time committed in our proposed hours. **Approximately 55% of the total hours are incurred at the Member and Manager level.**

The actual hours will vary year-to-year depending on implementation of new GASB pronouncements, changes to reporting standards, changes required by the Florida Auditor General, changes to opinion units, types and number of major federal programs and state projects selected for audit, as well as technological advancements for efficiency.

We will provide interim progress billings on the dates per the contract guidelines at the rates above. Regardless of the number of hours necessary to complete the job, we will not exceed the maximum all-inclusive price. The projected discount indicated above is based on the estimated hours and standard rates and will be applied on the final invoice.

Name of Firm: Warren Averett, LLC

The information in this document is privileged and confidential and is protected from disclosure. Dissemination, distribution or copying of this communication without the express permission of Warren Averett is strictly prohibited.

APPENDIX A, PART 2

SCHEDULE OF PROFESSIONAL FEES AND EXPENSES FOR ADDITIONAL SERVICES NOT IDENTIFIED IN PART II

		STANDARD HOURLY RATES
Partners		$ 295
Managers		$ 255
Supervisory Staff		$ 205
Staff		$ 175
Other (specify):	IT Specialist	$ 225
Other (specify):		$

Other Expenses (specify):

Name of Firm: Warren Averett, LLC

The information in this document is privileged and confidential and is protected from disclosure. Dissemination, distribution or copying of this communication without the express permission of Warren Averett is strictly prohibited.

O. Out-Of-Pocket Expenses Included in the Total All-Inclusive Maximum Price and Reimbursement Rates

Warren Averett understands that all out-of-pocket expenses for Firm personnel (e.g. travel, lodging and subsistence) will be reimbursed in accordance with Section 112.061, Florida Statutes; however, due to our close proximity to the County offices, we do not anticipate any out-of-pocket expenses.

P. Rates for Additional Professional Services

If the County requests any additional services to either supplement the services requested in the RFP or to perform additional work as a result of the specific recommendations included in any report issued on this engagement, then such work will be performed only upon a written agreement between the County and Warren Averett. Any such additional work agreed to between the County and Warren Averett will be performed at the same rates set forth in the schedule of fees and expenses included in the dollar cost bid.

Q. Pricing for Contract Years 1 Through 5

The rates listed below are the total all-inclusive prices for contract years one through five. These rates will be applicable for any additional professional services which may be requested during those contract years.

PART I – GENERAL INFORMATION

1.1 DEFINITIONS

For the purposes of this Request for Proposal (RFP), "proposer" shall mean contractors, consultants, proposers, organizations, firms, or other persons submitting a response to this RFP.

1.2 PURPOSE

The Escambia County Board of County Commissioners (hereinafter referred to as "BCC") is seeking the professional services of a qualified auditing firm to provide services in connection to the County's Annual Financial Audit. This RFP provides guidelines for the submission of proposals in response to Financial Audit Services.

1.3 PROPOSAL SUBMISSION AND WITHDRAWAL

The Project Director shall be Stephan Hall, Director, Management and Budget Services. The liaison officer shall be Sharon Harrell, Interim Finance Director, Clerk of the Circuit Court & Comptroller's Office (hereinafter referred to as "Clerk"). The contracting agency shall be the Escambia County BCC's Purchasing Office. The BCC shall not be held responsible for the content of RFP packages obtained from any third party source nor will they be responsible for providing addenda to potential proposers who receive a RFP package from other sources than BCC's Purchasing Office.

The BCC will receive proposals at the following address:

Board of County Commissioners
Purchasing Department
Attn: Paul R. Nobles
213 Palafox Place, 2nd Floor
Pensacola, FL 32502

To facilitate processing, please mark the outside of the envelope as follows: RFP for Financial Audit Services. The envelope shall also include the proposer's return address.

Proposers shall submit one (1) original and seven (7) copies for a total of eight (8) sets of the proposal and one (1) electronic copy in a sealed envelope marked as noted above. A proposer may submit the proposal by personal delivery or by mail.

THE BCC SHALL RECEIVE ALL PROPOSALS 1:00 P.m., CDT, February 26, 2019 IN THE BCC'S PURCHASING OFFICE AT 213 PALAFOX PLACE, 2ND FLOOR.

Proposers may withdraw their proposals by notifying the BCC in writing at any time prior to the deadline for proposal submittal. After the deadline, proposals once opened, become a public record of Escambia County and will not be returned to the proposers. The County reserves the right to retain all proposals submitted and use any idea in a proposal regardless of whether that proposal is selected.

The right is reserved by the BCC to accept any or all proposals or to waive any informality, existing in any proposal, or to accept the proposal which best serves the interest and intent of this project.

Upon opening, proposals are subject to public disclosure consistent with Chapter 119, Florida Statutes. Proposers must invoke the exemptions to disclosure provided by law in the response to the RFP, and must identify the data or other materials to be protected, state the reasons why such exclusion from public disclosure is necessary and the legal basis for such exemption, including a specific statutory citation for such exemption.

1.4 INVITATION TO PROPOSE

The BCC is requiring all proposals from qualified firms of certified public accountants to audit its financial statements for the fiscal years ending September 30, 2019 through September 30, 2023, with the option to renew for five (5) additional one-year periods. These audits are to be performed in accordance with auditing standards generally accepted in the United States of America and the standards for financial audits set forth in the Governmental Auditing Standards issued by the Comptroller General of the United States and the provisions of the Federal and State Single Audit Acts.

1.5 MINIMUM QUALIFICATIONS

A firm submitting a proposal shall meet the following requirements:

a. The firm must have been established as a legal entity in the State of Florida and have performed continuous CPA services for a minimum of five (5) years.

b. The firm must also be a member of the American Institute of Certified Public Accountants and the Florida Institute of Certified Public Accountants.

c. The firm must meet the standards for financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States (the yellow book) and Laws and Rules of the Florida Board of Accountancy Chapter 455 and 475, FS Chapter 11, 218 and other applicable statutes, and Florida Administrative Code Chapter 61H1.

1.6 CONTRACT AWARDS

The BCC anticipates entering into a contract with the proposer who submits the proposal judged by the County to be most advantageous. The BCC anticipates awarding one contract but reserves the right to award more than one if in its best interests to do so.

The proposer understands that this RFP does not constitute an offer or a contract with the BCC. A contract shall not be deemed to exist and is not binding until proposals are reviewed and accepted by appointed staff, the best proposal has been identified, negotiations with the Proposer have been authorized by the appropriate level of authority within the County, an agreement executed by parties and approved by the appropriate level of authority within the County. A sample Contract is attached to this RFP. The BCC anticipates that the final contract will be in substantial conformance with the Sample Contract; nevertheless, proposers are advised that any contract which may result from the RFP may deviate from the Sample Contract if in the County's opinion such deviation is reasonable, justifiable and serves the best interest of this procurement and of the BCC.

In the event the parties are unable to negotiate terms acceptable to the County, the County may determine to accept the offer of the second most responsive and responsible Proposer determined by the selection committee, or it may re-solicit proposals.

The County reserves the right to reject all proposals, to waive non-material, technical variances or infirmities in the proposal, to abandon the project or to solicit and re-advertise for other proposals. The County may in its discretion waive any informalities and irregularities contained in a proposal or in the manner of its submittal and award a contract thereafter.

1.7 DEVELOPMENT COSTS

Neither the County nor its representatives shall be liable for any expenses incurred in connection with preparation of a response to this RFP. Proposers should prepare their proposals simply and economically, providing a straightforward and concise description of the proposer's ability to meet the requirements of the RFP.

1.8 INQUIRIES

Interested proposers may direct questions to Paul R. Nobles. The BCC's Purchasing Office will act as a clearinghouse for all questions and answers regarding the RFP.

Paul R. Nobles
850-595-4918 phone
E-mail address prnobles@myescambia.com

The County may record its responses to inquiries and any supplemental instructions in the form of written addenda. The County may mail written addenda before the date fixed for receiving proposals. Proposers shall contact the County to ascertain whether any addenda have been issued. Failure to do so could result in an unresponsive proposal. Any oral explanation given before the RFP opening will not be binding upon the County and should be disregarded.

All proposers are expected to carefully examine the proposal documents. Any ambiguities or inconsistencies should be brought to the attention of the County through written communication with the County prior to the opening of the proposals.

1.9 TIME TABLES

The County and proposers shall adhere to the following schedule in all actions concerning this RFP:

For a complete time table see Appendix D

a. The last day for question and answer clarifications regarding the proposal will be February 19, 2019 at 5:00 pm CDT.

b. The County shall receive the proposals by the 1:00 pm CDT February 26, 2019.

c. The County will review and evaluate the proposals in a timely manner.

d. Short-listed firms will be scheduled for oral presentations in March.

e. The County may enter into a contract after obtaining appropriate approvals and conducting negotiations.

f. Anticipate finalization of contract with awarded firm by March 4, 2019 for placement on Agenda for next BCC meeting.

g. Anticipated contract term will begin with the fiscal year ending September 30, 2019. For audit planning purposes the field work and interim testing for the first nine months of the fiscal year will occur during June 2019. The final field work for the fiscal year

ending September 30, 2019 will occur during November and December 2019. Future contract renewal terms will follow same date pattern.

1.10 DELAYS

The County may delay scheduled due dates if it is to the advantage of the County to do so. The County will notify proposers of all changes in scheduled due dates by written addenda.

1.11 ADDENDA

If revisions become necessary, the County will provide written addenda to all proposers who have received the RFP via mail or fax. The County shall not be responsible for providing said addenda to potential proposers who receive a proposal package from other sources. All addenda issued by the County will include a receipt form that must be signed and included with any proposals that are submitted to the County. In the event multiple addenda are issued, a separate receipt for each addendum must be included with the proposal at the time it is submitted to the County.

1.12 SELECTION PROCESS

Evaluation of proposals will be conducted by the County's audit committee. The audit committee is comprised of one representative from each of the elected officials, specifically the BCC, the Sheriff, the Tax Collector, the Property Appraiser, the Clerk, and the Supervisor of Elections. The committee will short list a minimum of three (3) proposers to be finalists for further consideration based on the initial submittal. During the initial evaluation process, the proposers may be required to submit follow-up information for clarification purposes only.

In the event that there are less than three (3) responsive proposals, the committee will give further consideration to the remaining proposals received.

Upon short listing, the committee will then conduct any of the following: discussions, interviews, or oral presentations (at proposer's expense) for clarification purposes only, with the finalists and re-evaluate and rate the finalist's proposals. The top ranked proposers resulting from this process will be recommended for award to the BCC.

Respondents will be ranked in order as determined by the audit committee of being best qualified based on the considerations listed in the evaluation criteria. Award sequence will be based on the established ranking.

1.13 NEWS RELEASES

The proposer shall obtain the prior approval of the BCC of all news releases or other publicity pertaining to this RFP or the service, study or project to which it relates generated by the proposer or its agents.

1.14 LICENSES

Proposers, both corporate and individual, must be fully licensed and certified for the type of work to be performed in the **State of Florida** at the time of RFP receipt. This license shall remain current through the duration of the engagement. The proposal of any proposer that is not fully licensed and certified shall be rejected.

1.15 PUBLIC ENTITY CRIMES

In accordance with applicable portions of Section 287.133, Florida Statutes, which read as follows:

"A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017 for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list."

1.16 CODE OF ETHICS

If any proposer violates or is a party to a violation of the Code of Ethics of the County of Escambia or the State of Florida with respect to this proposal, such proposer may be disqualified from performing the work described in this proposal or from furnishing the goods or services for which the proposal is submitted and shall be further disqualified from bidding on any future proposals of work, goods or services for the County of Escambia. A copy of the County and State Ethics Codes is available at the BCC's Purchasing Office.

1.17 DRUG-FREE WORKPLACE

In accordance with Florida Statute 287.087, preference shall be given to businesses with drug-free workplace (DFW) programs. Whenever two or more proposals which are equal with respect to price, quality, and service are received by the County for the procurement of commodities or contractual services, a proposal received from a business that completes the attached DFW form certifying that it is a DFW shall be given preference in the award process.

1.18 PROCUREMENT POLICIES AND PROCEDURES

This RFP is governed by the County. Policies and Procedures for procurement are available for your review at the Board's Purchasing Office or at www.myescambia.com.

1.19 POLITICAL CAMPAIGNS

During the term of this Agreement, the Consultant or any employee or associate, shall not be involved in any political campaign for County elective office nor make financial contribution(s) to any such campaign.

1.20 CONDUCT OF PARTICIPANTS

All submitters or individuals acting on behalf of submitters are hereby prohibited from lobbying or otherwise attempting to persuade or influence any member of the BCC and other local elected officials or any member of the Selection Committee at any time during the course of the solicitation process. Failure to comply with this procedure will result in rejection/disqualification of said submittal without exception.

All submitters or individuals acting on behalf of submitters are further prohibited from contacting or otherwise attempting to communicate with any member of the Selection Committee regarding

the pending solicitation or its outcome until after the Committee has arrived at a recommendation of the most qualified submitters. Until such recommendation is disclosed, any contact with the Selection Committee shall be channeled through the Office of Purchasing. Failure to comply with this procedure will result in rejection/disqualification of said submittal without exception.

1.21 INSURANCE

The proposer, if awarded a contract, shall maintain insurance coverage reflecting the minimum amounts and conditions specified herein. In the event the proposer is a governmental entity or a self-insured organization, different insurance requirements may apply. Misrepresentation of any material fact, whether intentional or not, regarding the proposer's insurance coverage, policies, or capabilities may be grounds for rejection of the proposal and rescission of any awarded contract.

INSURANCE REQUIREMENTS
(proof of ability to obtain to be submitted with proposal)

WORKER'S COMPENSATION
The proposer shall procure and maintain, for the life of this Contract/Agreement, Worker's Compensation Insurance covering all employees with limits meeting all applicable state and federal laws. This coverage shall include Employer's Liability with limits meeting all applicable state and federal laws. This coverage shall extend to any subcontractor that does not have their own Workers' Compensation and Employer's Liability Insurance. Thirty (30) days' notice of cancellation is required and must be provided to the County of Escambia via Certified Mail.

COMMERCIAL GENERAL LIABILITY
The proposer shall procure and maintain, for the life of this Contact/Agreement, Commercial General Liability Insurance. This coverage shall be on an "Occurrence" basis. Coverage shall include Premises and Operations; Independent Contractors' Products and Completed Operations and Contractual Liability. This policy shall provide coverage for death, personal injury or property damage that could arise directly or indirectly from the performance of this Agreement.

The Minimum Limits of Coverage shall be **$1,000,000** per occurrence, Combined Single Limit for Bodily Injury and Property Damage Liability with a deductible no more than $10,000.

The County of Escambia must be named as an additional insured. The additional insured requirement is waived if Owners and Proposers' Protective Coverage is also provided, or required. Thirty (30) days written notice must be provided to the County of Escambia via Certified Mail in the event of cancellation.

BUSINESS AUTOMOBILE LIABILITY
The proposer shall procure and maintain, for the life of the Contract/Agreement, Business Automobile Liability Insurance.

The minimum limits of coverage shall be **$500,000** per occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability. This coverage shall be an "Any Auto" or "Comprehensive Form" type policy.

In the event that the proposer does not own any vehicles, we will accept hired and non-owned coverage in the amounts listed above. In addition, we will require an affidavit signed by the proposer indicating the following:

_____ does not own any vehicles.
"Company Name"

In the event we acquire any vehicles throughout the term of this Contract/Agreement,

_____ agrees to purchase "Any Auto" or
"Company Name"

Comprehensive Form coverage as of the date of acquisition.

Proposer's Signature: _____
Thirty (30) days written notice must be provided to the County of Escambia via Certified Mail in the event of cancellation.

PROFESSIONAL LIABILITY/ERRORS AND OMISSIONS

The Consultant shall procure and maintain, for the life of this Contract/Agreement either Professional Liability Insurance or Errors and Omissions Insurance. This coverage is for damages arising out of the insured's negligence, mistakes or failure to take appropriate action in the performance of business or professional duties. This coverage shall be on a "Claims Made" basis.

The minimum limits of coverage shall be $1,000,000 per occurrence with a deductible of no more than $10,000.

Thirty (30) days written notice must be provided to the County of Escambia via Certified Mail in the event of cancellation.

SUPPLEMENTAL PROVISIONS

The insurance coverage and conditions afforded by this policy(s) shall not be suspended, voided, canceled or modified, except after thirty (30) days prior written notice by Certified Mail, Return Receipt Requested, has been given to the Clerk's Office that originated this contract.

Certificates of Insurance meeting the specific required provision specified within this Contract/Agreement shall be forwarded to the BCC's Purchasing Office and approved prior to the start of any work or the possession of any County property or the commencement of services, as application.

INDEMNIFICATION/HOLD HARMLESS AGREEMENT

Consultant shall indemnify and hold harmless the County, its officers, and employees from liabilities, damages, losses and costs, including, but not limited to reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of Consultant and persons employed or utilized by Consultant in the performance of this agreement. Except as specifically provided herein, this agreement shall not require the Consultant to indemnify the County, its officers, and employees from any liability, damage, loss, claim, action, or proceeding.

Any costs and expenses, including attorney's fees, appellate, bankruptcy or defense counsel fees incurred by the County to enforce this indemnification Clause shall be borne by the Consultant. This Indemnification Clause shall continue indefinitely and survive the cancellation, termination, expiration, lapse or suspension of this agreement.

1.22 DEFINITIONS

The following definitions are listed to present a clear understanding of operational terms:

Auditor means the independent certified public accountant retained and paid by the County to perform a financial audit.

County Agency means a Board of County Commissioners, a Clerk & Comptroller, a Sheriff, a Property Appraiser, a Tax Collector, a Supervisor of Elections, Pensacola Bay Center, Law Library or any other officer in whom any portion of the audit is included.

Financial Audit means an examination of the County's financial statements and the individual elected official audit reports in order to express an opinion on the fairness with which they present financial position, results of operations, and changes in financial position in conformity with generally accepted governmental accounting principles, and an examination to determine whether operations are properly conducted in accordance with legal and regulatory requirements.

Drug Free Workplace Form

The undersigned vendor in accordance with Florida Statute 287.087 hereby certifies that _____ does:
(Name of Business)

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4. In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by, any employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

As the person authorized to sign the statement, I certify that this firm complies fully with the above requirements.

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(a), FLORIDA STATUTES, ON ENTITY CRIMES

1. This sworn statement is submitted to _____
by _____ (print name of the public entity)
_____
(print individual's name and title)
for _____
(print name of entity submitting sworn statement)

whose business address is
_____
_____

and (if applicable) its Federal Employer Identification Number (FEIN) is:
_____

(If the entity has no FEIN, include the Social Security Number of the Individual signing this sworn statement: _____

2. I understand that a "public entity crime" as defined in Paragraph 287.133(1)(g), Florida Statutes, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision or any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in Paragraph 287.133(1)(b), Florida Statutes, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statutes, means:

a. Predecessor or successor of a person convicted of a public entity crime; or

b. An entity under the control any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months shall be considered an affiliate.

c. I understand that a "person" as defined in Paragraph 287.133(1)(e), Florida Statutes, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into binding contract and which bids or applies to bid on contracts for the provision of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

d. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. (indicate which statement applies.)

_____ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. (attach a copy of the final order)

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 (ONE) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THOROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

PART II – STATEMENT OF WORK

2.1 WORK OBJECTIVE

This RFP solicits proposals from certified public accounting firms to provide the County with an annual financial statement audit. The RFP is to provide responding parties with guidelines and information to aid in their submission of proposals.

The County will contract for five annual audits (2019, 2020, 2021, 2022, and 2023) based on a fee not to exceed a maximum amount (per year) with provisions for extension of the contract for five one year renewal terms. Additional services will be contracted for separately with the County reserving the right to solicit to other firms.

Escambia County has a population of approximately 315,187 people and is located in the northwestern part (the "Panhandle") of Florida. The County employs some 2,497 full-time employees and has total net position of over $602 million and revenues of over $506 million for the year ending September 30, 2017. The County organizational chart is presented on pages 36 & 37. The County has consecutively received the GFOA's Certificate of Achievement.

The County provides a pension plan through the Florida Retirement System (FRS) for all full-time employees of the County. FRS is a multiple employer cost sharing defined benefit pension plan established in 1970 by Chapter 121, Florida Statutes and is administered by the Florida Department of Management Services, Division of Retirement. Financial reports including financial statements and required supplementary information are available.

The County's accounting system is substantially fully automated. All Clerk Finance Department staff have a personal computer with access to the accounting system(s). Computer access will be made available to the auditors. The primary accounting software is an integrated financial system supplied by Superion (formerly Sunguard Pentamation), including general ledger, payroll, purchasing, fixed assets, accounts receivable, cash receipts, and extended reporting. The Finance Department utilizes reports from the accounting software, various spreadsheets, and word processing documents in preparing the Comprehensive Annual Financial Report (CAFR). In addition, Finance Department staff use personal computers extensively in day-to-day applications.

The County will provide adequate work and storage space during the field work period. County staff will be available to pull documents and prepare schedules that are agreed to prior to the start of the year-end field work.

Available for inspection are the County's CAFR, CAFR AG and Annual Audit Reports (for various years) on the Clerk's Website at www.escambiaclerk.com.

2.2 SCOPE OF WORK TO BE PERFORMED

The scope of the audit engagement will require the examination of the BCC and individual elected officials', the Pensacola Bay Center, and the Law Library (collectively known as "the County") financial statements as required by the Auditor General for the period of October 1, 2019 through September 30, 2023, and verification of beginning balances, in order to express an opinion on the fairness with which they present the financial position, results of operations, and changes in financial position in conformity with generally accepted accounting principles, and an examination to determine whether operations are properly conducted in accordance with legal and regulatory requirements.

The funds and account groups to be audited are those included or includable in the County's annual audit report (available at www.escambiaclerk.com). The County shall have closed, balanced, and prepared financial statements for all funds and account groups to be examined by the auditor in a schedule of events ending prior to November 25th, of each year, with the exception of the GASB 68 Florida Retirement System entry. The Clerk will have primary responsibility for producing the CAFR (and all elements thereof) as well as the Annual Audit Report. The auditor shall assist in finalizing the County's annual financial report, and shall include an opinion in its report regarding the County's CAFR; as well as the individual elected officials' audit reports (including notes to financial statements), and shall include an opinion in its report regarding the County's CAFR and supplemental financial schedules. The opinion shall reference the audit of the County's governmental and business-type activities, each major fund and the aggregate remaining fund information. The County shall also provide additional financial and non-financial information not subject to examination by the auditor but necessary to conform to the principles and standards of public financial reporting necessary to submit the County's CAFR to the Government Finance Officers Association (GFOA) Certificate of Achievement Program. The County's CAFR will additionally be expected to meet any present or to-be-established standards for disclosure attributed to the CAFR to enable inclusion in various municipal bonds continuing disclosure libraries and depositories.

All records of constitutional officers of Escambia County, Florida, shall be included in the single combined audit report with separate management letters for each constitutional officer.

The audit should be performed in accordance with the following as they exist or as each may be subsequently amended:

- Generally accepted governmental accounting principles as promulgated by GASB
- Statements on Auditing Standards (GAAS) promulgated by the American Institute of Certified Public Accountants (AICPA)
- Government Auditing Standards (GAS) issued by the Comptroller General of the United States
- Uniform Guidance (2CFR 200) and other applicable OMB circulars
- The Federal and Florida Single Audit Acts
- Florida Statutes as applicable
- Regulations of the Florida Department of Financial Services
- Rules of the Auditor General, State of Florida, Chapter 10.550
- Audits of State and Local Governmental Units (AICPA Audit Guide revised) or other authoritative standards
- Any applicable federal, state, local regulations or professional guidance not specifically listed above as well as any additional requirements which may be adopted by these organizations in the future.

The auditors shall perform a study and evaluation of internal accounting and administrative controls as required by GAAS and GAO. If weaknesses are noted, recommendations should be

reviewed with the appropriate level of management and included in a separate Management Letter to each elected official.

Timeliness and the ability to complete the individual audit reports in a timely manner are critical factors in the performance of the audit. The proposer should include a proposed audit plan in consideration of the County's plan outlined in Appendix A (which will be subject to annual negotiation). The auditor will coordinate the audit with the Clerk's Finance Director and will mutually endeavor to accomplish the audit in a phased basis throughout the year to reduce the year-end workload on the County's financial audit activities.

The auditor will review and accept separate audit reports for the Human Relations Commission, the Santa Rosa Island Authority, the Pensacola Economic Development Commission, Law Library and the Housing Finance Authority.

The Auditor agrees to do the GFOA checklist review for submission to the GFOA.

The auditor will agree to end field work by February 8th and to complete a review of the CAFR in time for the County to release the CAFR by March 1st and the Annual Audit Report by the same date.

2.3 REPORTS TO BE ISSUED

The County requires:

- An opinion on the CAFR
- An opinion on the government-wide basic financial statements and all supplementary information
- A separate single audit report that complies with Uniform Guidance (2CFR200) and Rules of the Auditor General, State of Florida, Chapter 10.550 for Federal and State Programs
- A Schedule of Financial Assistance, both Federal and State
- A reports on compliance and internal control over financial reporting
- A report on Landfill Management Escrow Account activity
- A report on Section 29.008 Article V revenues and expenditures
- Individual management letters as required by Florida Statute 11.45(3)(a)4 and defined in Rule 10.554, Rule of the Auditor General, for each elected official in accordance with the Auditor General of the State of Florida that includes a summation statement of audit findings and recommendations affecting financial statements, internal control, etc.
- Data collection form for reporting on audits of states, local governments, and non-profit organizations
- Any attestations of conclusions or special reports as required from time-to-time by Florida Statutes or Rules of State Agencies
- Review the Annual Financial Report (AFR), filed via LOGER
- Issuance of Constitutional Officers' Financial Statements
- Detention Commissary Audit
- Law Library Audit Report

Prior to submission of the completed report, the audit firm's staff will be required to review a draft of the proposed report and management letter with individual constitutional officers.

After delivery of the final audit report, the firm shall have the responsibility to notify each constitutional officer of his/her right to provide a written statement of explanation or rebuttal to the auditor's comments, including corrective action to be taken.

The independent audit reports shall be delivered by the auditor to the Clerk's liaison for inclusion in the audit report that is published on behalf of the County.

2.4 SPECIAL CONSIDERATIONS AND SERVICES

A. The County will send a CAFR to the GFOA of the United States and Canada for review in the Certificate of Achievement for Excellence in Financial Reporting Program. It is anticipated that the auditor will be required to provide special assistance to the County to meet the requirements of that program by providing technical advice to ensure awarding of certification, including GFOA checklist review.

B. The schedules of federal and state financial assistance and related auditor's report, (data collection report) as well as the reports on the internal control structure and compliance, are to be issued in conjunction with the CAFR.

C. Review of the accrued liability reserves for the County's self-funded Health Insurance fund, workers compensation fund and the general liability fund.

D. Review of the financial report of the County filed with the Department of Banking and Finance, State of Florida, pursuant to Section 218.32, Florida Statutes, to verify that it is in agreement with the financial statements for the year ended September 30, 2019 and all subsequent years covered by this agreement.

E. Review and issuance of special reports as required for:

- ♦ The landfill liability financial assurance
- ♦ Article V Section 29.008 report
- ♦ Detention Commissary Audit Report
- ♦ Law Library

F. The auditor must designate the partner in charge and two (2) "key" members of the audit team. The County shall reserve the right to approve any substitutions or changes in those staff designated as "key".

G. The auditor shall report to the Clerk at least weekly the status of any potential audit adjustments so that the County may have adequate opportunity to investigate, gather information and respond if necessary. Final audit adjustments shall be submitted to the Clerk no later than 90 days following the end of the fiscal year under audit.

H. The auditor will be available to attend the BCC meetings at which time the audit report will be submitted for acceptance. The auditor will be available to present the report or to respond to BCC questions as needed.

I. There may be instances where the auditor will need to rely on estimates prepared by third-party specialists in respective fields such as engineering and/or actuarial estimates. Guidance found in SAS 73 will govern the use of third-party estimates.

2.5 WORKING PAPER RETENTION AND ACCESS TO WORKING PAPERS

All reports and other documents that result from the auditor's services shall become the property of the County after final payment to the auditor. No changes or revisions to such documents shall be made by the County or its agents without the auditor's written approval.

Working papers are the property of the auditor and should be held locally for a period of five years. Working papers, including those of all agencies and Constitutional Officers subject to this audit and all supporting documentation, will be available for examination or duplication without charge to the Escambia County Board of County Commissioners, authorized County personnel or designated agencies, representatives of the cognizant Federal Audit Agency, the General Accounting Office, the State of Florida Auditor General or the State Board of Accountancy. They will be made available for examination or duplication at reasonable charge to subsequent auditors engaged by the County.

The auditor will agree to notify the County if the Board of Accountancy or any other regulatory agency requests a review of the audit work papers concerning the County or any government client audited by the local office.

To make each proposer aware of certain additional contractual requirements, which the County will provide for the contract, the following points are made:

a) Understanding the nature of most CPA firms' promotion/resource reallocation practices, the County will reserve the right to approve the re-designation of any partner, manager, or seniors at the on-site supervisory or higher level. Each proposer should be aware of the County's interest in the on-site expertise and experience of the proposed project team.

b) We expect immediate compliance with any expanded scope definitions and will only consider fee adjustment where significant change can be demonstrated which will materially affect what the County should have expected the auditor to accomplish at the time of fee determination.

c) The auditor acknowledges that it will conduct its business in conformity with the provisions of Chapter 112, Florida Statutes, relating to ethics in government. In the event the auditor causes or in any way promotes or encourages a County officer, employee, or agent to violate Chapter 112, Florida Statutes, the County shall have the right to immediate termination of this agreement.

PART III - TIME REQUIREMENTS

3.1 SCHEDULE FOR CONDUCTING AUDITS

Each of the following should be completed by the Auditor no later than the dates indicated:

A. Interim Work – The auditor shall complete interim work by August 31, 2019 and all subsequent years covered by this contract.

B. Detailed Audit Plan – The auditor shall provide the County by July 31st each year both a detailed audit plan and a list of all schedules to be prepared by the County.

PART IV – ASSISTANCE TO BE PROVIDED TO THE AUDITOR AND REPORT PREPARATION

4.1 FINANCIAL SERVICES DEPARTMENT AND CLERICAL ASSISTANCE

The County staff and responsible management personnel will be available during the provision of services to assist the firm by providing information, documentation and explanations. The preparation of confirmations will be the responsibility of the County.

4.2 WORK AREA, TELEPHONES, PHOTOCOPYING AND FAX MACHINES

The County will provide the auditor with reasonable work space, desks and chairs. The auditor will also be provided with access to telephone lines, photocopying facilities and facsimile machines. The auditor will provide their own personal computer equipment and printers. The auditor will provide their own office supplies, such as pens, printer paper, etc.

4.3 REPORT PREPARATION

CAFR and annual audit report preparation, editing and printing shall be the responsibility of the Clerk. Preparation and printing of other reports described herein shall be the responsibility of the proposer. The auditor will coordinate the delivery of each constitutional officer's stand-alone financial statements and notes to the Clerk no later than December 5th so that the Clerk can prepare the consolidated financial statements used in the preparation of the CAFR.

PART V – INSTRUCTIONS FOR PREPARING PROPOSALS

5.1 RULES FOR PROPOSALS

The proposal must name all persons or entities interested in the proposal as principles. The proposal must declare that it is made without collusion with any other person or entity submitting a proposal pursuant to this RFP.

Submission of a proposal indicates acceptance by the firm of the conditions contained in this RFP unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the County and the firm selected.

5.2 PROPOSAL FORMAT

Proposers should prepare their proposals using the following format and follow the numbering format below for tabbing/indexing their RFP submittal. Proposal to include but not limited to:

1. Title Page: Title page showing the RFP's subject; the firm's name; the name, address and telephone number of contact person; and the date of the proposal.

2. Table of Contents: The table of contents of the proposal should include a clear and complete identification of the materials submitted by section and page number.

3. Letter of Transmittal: This letter will summarize in a brief and concise manner the following:

   - Proposer's understanding of the scope of work and make a positive commitment to timely performance of work.
   - The letter must name all persons or entities interested in the proposal as principals.
   - The letter must declare that it is made without collusion with any other person or entity submitting a proposal pursuant to this RFP.
   - Identify all of the persons authorized to make representations for the proposer, including the titles, addresses and telephone numbers of such persons.
   - An authorized agent of the proposer must sign the Letter of Transmittal and must indicate the agent's title or authority.

   The firm identified on the Letter of Transmittal will be considered the primary firm. If more than one firm is named on the Letter of Transmittal, a legal document showing the partnership, joint venture, corporation, etc. shall be submitted showing the legality of such. Submittal for Joint Venture to include executed Joint Venture agreement and if state law requires that the Joint Venture be registered, filed, funded, or licensed prior to submission of the proposal, then same shall be completed prior to submittal. Proposers shall make their own independent evaluation of the requirements of the state law. The County will not consider submittals that identify a joint partnership to be formed. The primary firm identified herein will be responsible for final negotiations and receipt of payments from the County. The letter should not exceed two pages in length.

4. Executed copy of Drug Free Workplace.

5. Proposer Guarantee (Appendix B).

6. Notarized Acknowledgement of Business Type Form.

7. Statement acknowledging receipt of each addendum issued by the County.

8. Understanding of Scope of Services as detailed Part II.

9. Technical Proposal (as detailed herein).

5.3 CONTENT OF TECHNICAL PROPOSAL

A. General Requirements

The purpose of the technical proposal is to demonstrate the qualifications, competence, and capacity of the firms seeking to undertake an independent audit of the County in conformity with the requirements of this RFP. As such, the substance of proposals will carry more weight than their form or manner of presentation. The technical proposal should demonstrate the combined qualifications of the firms and of the particular staff to be assigned to this engagement. It should also specify an audit approach that will meet the RFP requirements.

The technical proposal should address all of the points outlined in the Request for Proposal. The proposal should be prepared simply and economically, providing a straightforward, concise description of the proposer's capabilities to satisfy the requirements of the RFP. While additional data may be presented, the following subjects, items B through R, must be included.

TECHNICAL PROPOSAL SHOULD UTILIZE SAME NUMBERING FORMAT IDENTIFIED HEREIN

B. Independence

1. The firm shall provide an affirmative statement that it is independent of the County as defined by generally accepted auditing standards and the US General Accounting Office's Governmental Auditing Standards.

2. The firm shall also disclose any relationships or business dealings either the firm itself or its key partners and personnel have with the County or key County personnel that could appear to be a conflict.

3. The firm should list and describe the firm's or any individual in the firm's professional relationships, if any, involving the County or key County personnel for the past five (5) years.

C. License to Practice in Florida

1. An affirmative statement must be included indicating that the firm and all assigned key professional staff are properly registered/licensed to practice in Florida.

D. Firm Qualifications and Experience

1. Proposer to identify the following:
   - ♦ State whether the firm is local, national, or international
   - ♦ Size of the firm
   - ♦ Size of the firm's governmental audit staff
   - ♦ Location of the offices from which the work on this engagement is to be performed
   - ♦ Number and nature of the professional staff to be employed in this engagement on a full-time basis.

- Number and nature of the staff to be so employed on a part-time basis and a delineation of the responsibilities of the firm.

2. The firm shall also provide information on the results of any federal or state desk reviews or field reviews of its audits during the past three (3) years.

3. The firm shall provide information on the circumstances and status of any disciplinary action taken or pending against the firm or any professional staff during the past three (3) years with State Board of Accountancy or the Auditor General.

4. The firm shall also describe any litigation or proceeding whereby, during the past two years, a court or any administrative agency has ruled against the firm in any manner related to its professional activities. Similar information shall be provided for any current or pending litigation.

Failure to return this information with your proposal may result in the rejection of your proposal.

E. Partner, Supervisory and Staff Qualifications and Experience

1. The proposal shall identify the principal supervisory and management staff of engagement office, including engagement partners, managers, other supervisors and specialists, who would be assigned to the engagement and indicate whether each such person is licensed to practice as a Certified Public Accountant in Florida.

2. The proposal shall also include information on the governmental, utility and electronic data processing auditing experience of each person on the team, including information on relevant continuing professional education for the past three (3) years and membership in professional organizations and on standards setting advisory boards and committees relevant to the performance of this audit.

   As much information as possible should be provided regarding the number, qualifications, experience and training of the specific staff to be assigned to this engagement. The proposal shall also indicate how the quality of staff over the term of the agreement will be assured.

3. Describe the firm's participation and experience in quality reviews and peer reviews, specifically the inclusion of governmental audits in the quality review and peer reviews of the proposed office. Enclose a copy of the firm's latest peer review report. Report to be submitted at end of Section 5.3, Item E.

4. The auditor should outline its commitment to governmental auditing and financial reporting experience by:

   - Compliance with Florida Statutes and Rules and Government Auditing Standards for staff CPE in governmental auditing or accounting by staff levels involved.

   - Commitment to active participation in local, state and national governmental finance organizations.

   - Growth experience in number of governmental audit clients served locally, state-wide and nationally. Number of governmental clients served in the management advisory services practice of the firm locally, state-wide or nationally.

F. Similar Engagements with Other Government Entities

1. For the engagement office assigned responsibility for the audit, list and rank the five (5) most significant engagements performed in the last five years that are similar to the engagement described in this RFP. These engagements should be ranked on the basis of total staff hours.

   Indicate:

   - the scope of work
   - date
   - engagement partners
   - total hours
   - the name and telephone number of the principal client contact

   The County reserves the right to contact the above-mentioned references and any other clients.

G. Conflict of Interest

The proposal must also disclose any potential real or perceived (as outlined in GAS Chapter 3) conflicts of interest due to any other client's contract or property interests or include a notarized statement certifying that no member of your firm's ownership, management or staff currently have a vested interest which might be considered a conflict of interest. Any potential conflict of interest listed by a firm will be reviewed by the County Attorney to determine its substantivizes. If the conflict of interest is found to be substantive, the proposal will be rejected.

H. Specific Audit Approach

The proposal must set forth a work plan; including an explanation of the audit methodology to be followed to perform the services required in Part II of this RFP. In developing the work plan, reference should be made to such sources of information as the County's budget and related materials, organizational charts, manuals, programs, and other financial and management information. Proposers will be required to provide the following information on their audit approach:

1. Proposed segmentation of the engagement.

2. Staffing assignments and levels to be designated to each proposed segment of the engagement.

3. Extent of evaluation and use of electronic data processing software in the engagement.

4. Approach to be taken to gain and document an understanding of the County's internal control structure.

5. Approach to be taken in determining laws and regulations that will be subject to audit test work.

6. Approach to be taken in determining audit samples for purposes of test compliance.

I. Proof of Insurance

Firms shall provide proof that they are in compliance with the insurance requirements as described in Part I (1.21) and specifically regarding minimum coverage for Errors and Omissions Insurance.

J. Identification of Anticipated Potential Audit Problems

The proposal should identify and describe any anticipated potential audit problems, the firm's approach to resolving these problems and any special assistance that will be requested from the County.

K. Availability

Indicate current and anticipated workloads and availability for other activities. Identify the extent and nature of any anticipated outside support.

L. Additional Information

This section shall include the following items:

1. Provide a summary of any litigation filed against the proposer in the past five years which is related to the services that proposer provides in the regular course of business. The summary shall state the nature of the litigation, a brief description of the case, the outcome or projected outcome, and the monetary amounts involved.

2. Any additional information which the proposer considers pertinent for consideration should be included in this part of the proposal.

M. Dollar Cost Bid

This section of the Proposal should contain all pricing information relative to performing the audit engagement as described in this RFP. The total all-inclusive maximum price to be bid is to contain all direct and indirect costs including all out-of-pocket expenses.

The County will not be responsible for expenses incurred in preparing and submitting the technical proposal or the dollar cost bid. Such costs should not be included in the proposal.

The first page of the price proposal should include the following information:

1. Name of Firm

2. Certification that the person signing the proposal is entitled to represent the firm empowered to submit the bid and authorized to sign a contract with the County.

3. A total all-inclusive maximum price for the 2019 engagement.

N. Rates by Partner, Specialist, Supervisory and Staff Level Times Hours Anticipated for Each

The second page of the dollar cost proposal should include a schedule of professional fees and expenses, presented in the format provided in the attachment (Appendix A, Part 1), that supports the total all-inclusive maximum price.

The cost of special services described in Part II (2.4) of this RFP should be disclosed as separate components of the total all-inclusive maximum price using the formats provided in Appendix A, Parts 2 and 3.

O. Out-of-Pocket Expenses Included in the Total All-Inclusive Maximum Price and Reimbursement Rates

Out-of-pocket expenses for firm personnel (e.g., travel, lodging and subsistence) will be reimbursed in accordance with Section 112.061, Florida Statutes. All estimated out-of-pocket expenses to be reimbursed should be presented in the dollar cost bid in the format provided in the attachment (Appendix A). All expense reimbursements will be charged against the total all-inclusive maximum price submitted by the firm.

In addition, a statement must be included in the proposal pricing cost, stating that travel, lodging and subsistence expenses included in the total all-inclusive price are in accordance with Section 112.061, Florida Statutes.

P. Rates for Additional Professional Services

If it should become necessary for the County to request the auditor to render any additional services to either supplement the services requested in this RFP or to perform additional work as a result of the specific recommendations included in any report issued on this engagement, then such additional work shall be performed only upon a written agreement between the County and the firm. Any such additional work agreed to between the County and the firm shall be performed at the same rates set forth in the schedule of fees and expenses included in the dollar cost bid.

Q. Pricing for Contract Years 1 through 5

Use the lower section of Appendix A, Part 1, to provide the total all-inclusive price for contract years 1 through 5. If the proposed hourly rates used to calculate the total all-inclusive price for any contract year are different from contract year 1 rates, provide an index for those years or provide rates for each staff level and each contract year for which there is a change. Also include a statement that those rates will be applicable for any additional professional services which may be requested during those contract years.

R. Manner of Payment

Payments will be based on a percentage of completion methodology based on scheduled milestones/progress, to be developed upon awarding of the contract. The County will withhold retainage from all scheduled payments until final completion of the Audit. Retainage rate will be 10%; at 50% completion the rate will be reduced to 5%. The County reserves the right to inspect records supporting the auditor's billings.

PART VI – EVALUATION OF PROPOSALS

6.1 EVALUATION CRITERIA

The County will evaluate proposals and will select the proposer(s) which meets the best interests of the County. The County shall be the sole judge of its own best interests, the proposals, and the resulting negotiated agreement. The County's decision will be final.

The following represent the principal selection criteria and related weight values; however, not limited to, which will be considered during the evaluation process.

Criteria	Weight Values
Responsiveness of the proposal related to the scope of work	0 - 5
Ability, capacity, and skill of the proposer to perform the services on a timely basis	0 - 30
Responses of the clients' governmental references	0 - 10
Experience of the business and individual members of the business in accomplishing similar services	0 - 5
Total price	0 - 30
Recent, current and projected workload of proposing auditors	0 - 5
The quality, availability, and adaptability of the services to the particular need requested	0 - 10
Local presence	0 - 5
Total	0 - 100

ALTHOUGH COST IS OF CONSIDERABLE IMPORTANCE, IT WILL NOT BE THE PRIMARY FACTOR IN THE SELECTION OF AN AUDIT FIRM

SAMPLE AGREEMENT

THIS AGREEMENT made and entered into this _____ day of _____, 2019, by and between the County of Escambia, a local government of the State of Florida, hereinafter referred to as the COUNTY, and _____ hereinafter referred to as the AUDITOR:

WHEREAS, the COUNTY intends to enter into a non-exclusive agreement for the provision of Annual Financial Audit Services by the AUDITOR to the COUNTY; and,

WHEREAS, the COUNTY requires certain professional services in connection with annual financial auditing services and,

WHEREAS, the AUDITOR represents that it is capable and prepared to provide such Services:

WHEREAS, the parties hereto also desire that this Agreement shall be construed to authorize the COUNTY to request and the AUDITOR to provide expert witness services in connection with court proceedings arising out of projects in which the AUDITOR provided audit services;

NOW THEREFORE, in consideration of the promises contained herein, the parties hereto agree as follows:

ARTICLE 1 – EFFECTIVE DATE

The effective date of this Agreement shall be 10 days after approval by the Board of County Commissioners (BCC) for a five year term, with the option to renew for five (5) additional one year periods, subject to cancellations as provided herein.

ARTICLE 2 – SERVICE TO BE PERFORMED BY CONSULTANT

The AUDITOR shall perform the services as specifically stated in the Scope of Work (Exhibit A) and as may be specifically designated and additionally authorized by the COUNTY through the issuance of a Work Order. Such additional authorizations will be in the form of a Work Order, pursuant to Addendum 1, which is attached hereto as part of this Agreement. Each Work Order will set forth a specific Scope of Services, amount of compensation, deliverables and completion date and shall be subject to the approval of the BCC in accordance with the COUNTY'S Purchasing Policies and Procedures. AUDITOR shall perform no work until all applicable work authorization is obtained in accordance with the COUNTY'S Purchasing Policies and Procedures and countersigned by the AUDITOR.

ARTICLE 3 – COMPENSATION

The COUNTY shall pay AUDITOR in accordance with Attachment B and C, Fee Schedule which are attached hereto and incorporated by reference as part of this Agreement. Failure to submit timely the audit report will result in the withholding of further fee payment by the County until satisfactory submission is made. In addition, the County thereafter reserves the right to terminate this agreement upon completion of the auditor services for the fiscal year in question and re-award a contract for the remaining audit years to another vendor.

In the event there are delays caused by actions or omissions of the County that delay the auditor's performance pursuant to the audit schedule, the BCC will grant the auditor reasonable extensions of the schedule. In other cases, upon a finding of good cause, the BCC may extend the schedule only upon written request by the auditor. However, in the performance of all services under this agreement, dates for preparation, submission, and review of the audits established by the Auditor General of the State of Florida and any other applicable laws, regulations, and rules shall be complied with and shall prevail over this section.

ARTICLE 4 – STANDARD OF CARE

AUDITOR shall exercise the same degree of care, skill and diligence in the performance of the Services as is ordinarily provided by a professional surveyor, under similar circumstances and AUDITOR shall, at no additional cost to the COUNTY, re-perform services which fail to satisfy the foregoing standard of care.

ARTICLE 5 – INDEMNIFICATION

AUDITOR shall indemnify and hold harmless the COUNTY, its officers, and employees from liabilities, damages, losses and costs, including, but not limited to reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of AUDITOR and persons employed or utilized by AUDITOR in the performance of this Agreement. Except as specifically provided herein, this Agreement shall not require the AUDITOR to indemnify the COUNTY, its officers, and employees from any liability, damage, loss, claim, action or proceeding.

Any costs and expenses, including attorney's fees, appellate, bankruptcy or defense counsel fees incurred by the COUNTY to enforce this Indemnification Clause shall be borne by the AUDITOR. This Indemnification Clause shall continue indefinitely and survive the cancellation, termination, expiration, lapse or suspension of this Agreement.

ARTICLE 6 – INDEPENDENT CONTRACTOR

AUDITOR undertakes performance of the Services as an independent contractor and shall be wholly responsible for the methods of performance. The COUNTY shall have no right to supervise the methods used, but the COUNTY shall have the right to observe such performance. AUDITOR shall work closely with the COUNTY in performing Services under this Agreement. The AUDITOR shall not receive any COUNTY benefits, stipend or privileges afforded to COUNTY employees.

ARTICLE 7 – COMPLIANCE WITH LAWS

In performance of the Services, AUDITOR will comply with applicable regulatory and other applicable requirements including federal, state, and local laws, rules regulations, orders, codes, criteria and standards.

ARTICLE 8 – INSURANCE

During the performance of the Services under this Agreement, AUDITOR shall maintain the following insurance policies, and provide originals or certified copies of all policies, and such coverage shall be written by an insurance company authorized to do business in Florida.

<u>WORKERS COMPENSATION</u>
The AUDITOR shall procure and maintain, for the life of this Contract/Agreement, Worker's Compensation Insurance covering all its employees with limits meeting all applicable state and federal laws. This coverage shall include Employers' Liability with limits meeting all applicable state and federal laws. This coverage shall extend to any agent of AUDITOR that does not have their own Workers' Compensation and Employer's Liability Insurance. Thirty (30) days' notice of cancellation, lapse or material modification is required and must be provided to the COUNTY via Certified Mail.

<u>COMMERCIAL GENERAL LIABILITY</u>
The AUDITOR shall procure and maintain, for the life of this Contract/Agreement, Commercial General Liability Insurance. This coverage shall be on an "Occurrence" basis. Coverage shall include Premises and Operations; Independent Contractors' Products and Completed Operations and Contractual Liability. This policy shall provide coverage for death, personal injury or property damage that could arise directory or indirectly from the performance of this Agreement.

The Minimum Limits of Coverage shall be $1,000,000 per occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability with a $10,000 deductible.

The COUNTY must be named as an additional insured. The additional insured requirement is waived if owners and Contractors' Protective Coverage is also provided, or required. Thirty (30) days written notice must be provided to the COUNTY via Certified Mail in the event of cancellation.

BUSINESS AUTOMOBILE LIABILITY

The AUDITOR shall procure and maintain, for the life of the Contract/Agreement, Business Automobile Liability Insurance.

The minimum limits of coverage shall be $500,000 per occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability. This coverage shall be an "Any Auto" or "Comprehensive Form" type policy.

In the event that the AUDITOR does not own any vehicles, the COUNTY will accept hired and non-owned coverage in the amounts listed above. In addition, the COUNTY requires an affidavit signed by the AUDITOR indicating the following:

_____ does not own any vehicles.
"Name of Auditor"

In the event we acquire any vehicles throughout the term of this Contract/Agreement,

_____ agrees to purchase "Any Auto" or
"Name of Auditor"

Comprehensive Form coverage as of the date of acquisition.

Consultant's Signature: _____

Thirty (30) days written notice must be provided to the COUNTY via Certified Mail in the event of cancellation, lapse or material modification of any coverage required by this Agreement.

PROFESSIONAL LIABILITY/ERRORS AND OMISSIONS

The AUDITOR shall procure and maintain, for the life of this Contract/Agreement either Professional Liability Insurance or Errors and Omissions Insurance. This coverage is for damages arising out of the insured's negligence, mistakes or failure to take appropriate action in the performance of business or professional duties. This coverage shall be on a "Claims Made" basis.

The minimum limits of coverage shall be $1,000,000 per occurrence with a deductible of no more than $10,000.

Thirty (30) days written notice must be provided to the COUNTY via Certified Mail in the event of cancellation.

SUPPLEMENTAL PROVISIONS

1. The insurance coverage and conditions afforded by this policy(s) shall be suspended, voided, canceled or modified except after thirty (30) days prior written notice by Certified Mail, Return Receipt Required, has been given to the COUNTY.
2. Certificates of Insurance meeting the specific required provision specified within this Contract/Agreement shall be forwarded to the COUNTY, and approved prior to the start of any work or the possession of any COUNTY property or the commencement of Services, as application.

SUBCONTRACTOR'S INSURANCE

The AUDITOR shall require each of his subcontractors to take out and maintain during the life of his subcontract the same insurance coverage's required of the successful AUDITOR. Each subcontractor shall furnish to the successful AUDITOR two copies of the Certificate of Insurance, and successful AUDITOR shall furnish one copy of the Certificate of Insurance to the COUNTY.

ARTICLE 9 – COUNTY'S RESPONSIBILITIES

The COUNTY shall be responsible for providing all reasonably required access to all project sites, and providing information on hand including other data that are available in the files of the COUNTY.

ARTICLE 10 – TERMINATION OF AGREEMENT

The obligation to continue services under this Agreement may be terminated for cause by either party upon seven (7) days written notice of substantial failure by the other party to perform in accordance with the terms hereof through no fault of the terminating party.

COUNTY shall have the right to terminate this Agreement or suspend performance thereof without cause for the COUNTY'S convenience upon fourteen (14) days written notice to AUDITOR, and AUDITOR shall terminate or suspend performance of services on a schedule acceptable to COUNTY or at the end of this fourteen (14) day period, at the option of the COUNTY. In the event of termination or suspension for COUNTY'S convenience, COUNTY shall pay AUDITOR for all services performed through the date of notice of termination or suspension.

ARTICLE 11 – NONDISCLOSURE OF PROPRIETARY INFORMATION

AUDITOR shall consider all information provided by COUNTY and all reports, studies, calculations and other documentation resulting from the AUDITOR'S performance of the Services to be proprietary unless such information is available from public sources or is a public record under Florida law. AUDITOR shall not publish or disclose proprietary information for any purpose other than the performance of the Services without the prior written authorization of COUNTY or in response to legal process.

ARTICLE 12 – UNCONTROLLABLE FORCES

Neither the COUNTY nor AUDITOR shall be considered to be in default of this Agreement if delays in or failure of performance shall be due to Uncontrollable Forces, the effect of which, by the exercise of reasonable diligence, the non-performing party could not avoid. The term "Uncontrollable Forces" shall mean any event which results in the prevention or delay of performance by a party of its obligations under this Agreement and which is beyond the reasonable control of the non-performing party. It includes, but is not limited, fire, flood, earthquakes, storms, lightening, epidemic, war, riot, civil disturbance, sabotage, Acts of God and governmental actions.

Neither party shall, however, be excused from performance if nonperformance is due to forces which are preventable, removable, or remediable and which the non-performing party could have, with the exercise of reasonable diligence, prevented, removed, or remedied with reasonable dispatch. The non-performing party shall, within a reasonable time of being prevented or delayed from performance by an uncontrollable force, give written notice to the other party describing the circumstances and uncontrollable forces preventing continued performance of the obligations of this Agreement.

ARTICLE 13 – GOVERNING LAW AND VENUE

This Agreement shall be governed by the laws of the State of Florida. Any and all legal action necessary to enforce the Agreement will be held in Escambia County, Florida and the Agreement will be interpreted according to the laws of Florida.

ARTICLE 14 – MISCELLANEOUS

14.1 Non-waiver

A waiver by either COUNTY or AUDITOR of any breach of this Agreement shall not be binding upon the waiving party unless such waiver is in writing and duly signed by both parties to this Agreement. In the event of a written waiver, such a waiver shall not affect the waiving party's rights with respect to any other or further breach. The making or acceptance of a payment by either party with knowledge of the existence of a default or breach shall not operate or be construed to operate as a waiver of any subsequent default or breach.

14.2 Severability

The invalidity, illegality, or unenforceability of any provision of this Agreement, or the occurrence of any event rendering any portion or provision of this Agreement void or voidable, shall in no way affect the validity or enforceability of any other portion or provision of the Agreement. Any void or voidable provision shall be deemed severed from the Agreement and the balance of the Agreement shall be construed and enforced as if the Agreement did not contain the particular portion of provisions held to be void. The parties further agree to reform the Agreement to replace any stricken provision with a valid provision that comes as close as possible to the intent of the stricken provision.

The provisions of this section shall not prevent the entire Agreement from being held void should a provision which is of the essence of the Agreement be determined to be void by a court of compensation jurisdiction.

14.3 Political Campaigns

During the term of this Agreement, the AUDITOR or any employee or associate, shall not be involved in any political campaign for COUNTY elective office nor make financial contribution to any such campaign.

ARTICLE 15 – INTEGRATION AND MODIFICATION

This Agreement is adopted by the COUNTY and AUDITOR as a final, complete and exclusive statement of the terms of the Agreement between the COUNTY and AUDITOR. This Agreement supersedes all prior agreements, contracts, proposals, representations, negotiations, letters of other communications between the CITY and AUDITOR pertaining to the Services, whether written or oral.

The Agreement may not be modified unless such modifications are evidenced by an amendment in writing signed by both the COUNTY and AUDITOR.

ARTICLE 16 – SUCCESSORS AND ASSIGNS

The COUNTY and AUDITOR each binds itself and its director, officers, partners, successors, executors, administrators, assigns and legal representatives to the other party to this Agreement and to the partners, successors, executors, administrators, assigns and legal representatives. Any assignment, sale, pledge, or conveyance of this contract by AUDITOR must be previously approved by the COUNTY, whose consent may be reasonably withheld.

ARTICLE 17 – CONTINGENT FEES

The AUDITOR warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the AUDITOR to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona fide employee working solely for the AUDITOR, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this Agreement.

ARTICLE 18 – TRUTH-IN-NEGOTIATION CERTIFICATE

Execution of this Agreement by the AUDITOR shall act as the execution of a truth-in-negotiation certificate certifying that the wage rates and costs used to determine the compensation provided for in this Agreement are accurate, complete and current as of the date of the Agreement and no higher than those charged the AUDITOR'S most favored customer for the same or substantially similar services.

The said rates and cost shall be adjusted to exclude any significant sums should the COUNTY determine that the rates and costs were increased due to inaccurate, incomplete or noncurrent wage rates or due to inaccurate representations of fees paid to outside consultants. The COUNTY shall exercise its rights under this "Certificate" within one (1) year following payment.

ARTICLE 19 – OWNERSHIP OF DOCUMENTS

AUDITOR shall be required to work in harmony with other auditors/consultants relative to providing information requested in a timely manner and in the specified form. Any and all documents, records, disks, original drawings, or other information shall become the property of the COUNTY upon completion for its use and distribution as may be deemed appropriate by the COUNTY.

The AUDITOR acknowledges that this agreement and any related financial records, audits, reports, plans, correspondence, and other documents may be subject to disclosure to members of the public pursuant to Chapter 119, Florida Statutes, as amended. In the event the AUDITOR fails to abide by the provisions of Chapter 119, Florida Statutes, the County without prejudice to right or remedy and after giving the AUDITOR and its surety, if any, seven (7) days written notice, during which period the AUDITOR still fails to allow access to such documents, terminates this agreement with the AUDITOR. In such case, the AUDITOR shall not be entitled to receive any further payment. Reasonable terminal expenses incurred by the County may be deducted from any payments left owing the AUDITOR.

ARTICLE 20 – USE OF OPERATIONAL SYSTEMS AND COMPUTER SOFTWARE

The AUDITOR shall obtain the County's written permission prior to using the County's computer system or software. The AUDITOR agrees that such system use will be controlled by the County so as not to disrupt its ongoing daily operations.

ARTICLE 21 – NOTICE

Any notice, demand, communication or request required or permitted hereunder shall be in writing and delivered in person or sent by certified mail, postage prepaid as follows:

As to COUNTY

Board of County Commissioners
Management Services Bureau
Attention: Amy Lovoy
221 Palafox Place, Suite 440

Escambia County, Florida

AI-16152 **County Administrator's Report 10. 21.**
BCC Regular Meeting **Budget & Finance Consent**
Meeting Date: 05/16/2019
Issue: Discretionary Money Allocation for Employee Morale Events
From: Robert Bender, District 4 Commissioner
Organization: Commissioner, District 4
CAO Approval:

RECOMMENDATION:

Recommendation Concerning the Discretionary Allocation for County Employee Morale and "Thank You" Events - Robert Bender, County Commissioner, District 4

That the Board approve funding $2,000 from Commissioner Robert Bender's discretionary funds that he can use toward County Employee Morale and "Thank you" events through September 30, 2019.

[Funding: Fund 001, General Fund, Board of County Commissioners' Discretionary Money, Cost Center 110101, Object Code 58201]

BACKGROUND:

Commissioner Robert Bender would like to use a portion of his discretionary funds to say "Thank you" to our County Employees.

BUDGETARY IMPACT:

The Board approved $50,000 in the Fiscal Year 2018-2019 Budget for each Commissioner to use at their discretion.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16133 **County Administrator's Report 10. 1.**
BCC Regular Meeting **Discussion**
Meeting Date: 05/16/2019
Issue: State Law Enforcement Trust Fund Appropriation
From: Henrique Dias, Chief Financial Officer
Organization: Escambia County Sheriff's Office
CAO Approval:

RECOMMENDATION:

Recommendation Concerning State Law Enforcement Trust Fund - Henrique Dias, Chief Financial Officer, Escambia County Sheriff's Office Finance Division

That the Board approve the following allocations of Law Enforcement Trust (LET) Funds, per the requirements of F.S. 932.7055(5), for Outside Agency partners in Escambia County for Fiscal Year 2018/2019:

A. General Daniel Chappie James Flight Academy, in the amount of $5,000;

B. Studer Community Institute, in the amount of $2,500; and

C. Dixon School of the Arts & Sciences, in the amount of $1,000.

Upon approval of these funding allocations, the Sheriff's Office will process all appropriate paperwork and submit for payment from LET Funds to the Escambia Clerk of the Circuit Court and Comptroller.

[Funding Source: Fund 121, Law Enforcement Trust Fund, Cost Center 540103, Aids to Private Organizations 58201]

BACKGROUND:

Per F.S. 932.7055(5), certain law enforcement activities generate a revenue stream that must be appropriated into the Law Enforcement Trust to be expended by the Sheriff. These funds support various law enforcement related activities in Escambia County.

List of Agencies with amount (appropriate backup for each agency is attached):

General Daniel Chappie James Flight Academy. - $5,000
Studer Community Institute - $2,500
Dixon School of the Arts & Sciences - $1,000

BUDGETARY IMPACT:

N/A

LEGAL CONSIDERATIONS/SIGN-OFF:

N/A

PERSONNEL:

N/A

POLICY/REQUIREMENT FOR BOARD ACTION:

These funds may be expended upon request by the sheriff to the board of county commissioners or by the chief of police to the governing body of the municipality, accompanied by a written certification that the request complies with the provisions of this subsection, and only upon appropriation to the sheriff's office or police department by the board of county commissioners or the governing body of the municipality.

Re: Your Request for Funds from the Escambia Law Enforcement Trust Fund dated April 10, 2019.

Dear Clifton W. Curtis Jr,

We have received your request to provide your organization with funds from the Escambia Law Enforcement Trust (LET) fund. Your request for funding for Drug Prevention, Drug Education, Safe Neighborhood or other law enforcement purposes has been reviewed and approved by the Sheriff for the amount of $5000. The Sheriff has submitted your request to the Escambia County Board of County Commissioner with his written certification that the funds will be used for a purpose authorized by law.

Your request for LET funding, as approved by the Sheriff, is now awaiting review by the Escambia County Board of County Commissioners. The funds cannot be provided to you until your request is approved by the Board.

Please contact the County Commissioner for your district for information on the status of your request.

Point of contact in this matter is Daniel Capozzolo, C.F.O. administrative assistant at 850-436-9949.

Addendum Applies:
No

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

is exempt from the payment of Florida sales and use tax on real property rented, transient rental property rented, tangible personal property purchased or rented, or services purchased.

FLORIDA

Important Information for Exempt Organizations

DR-14
R. 01/18

1. You must provide all vendors and suppliers with an exemption certificate before making tax-exempt purchases. See Rule 12A-1.038, Florida Administrative Code (F.A.C.).
2. Your *Consumer's Certificate of Exemption* is to be used solely by your organization for your organization's customary nonprofit activities.
3. Purchases made by an individual on behalf of the organization are taxable, even if the individual will be reimbursed by the organization.
4. This exemption applies only to purchases your organization makes. The sale or lease to others of tangible personal property, sleeping accommodations, or other real property is taxable. Your organization must register, and collect and remit sales and use tax on such taxable transactions. Note: Churches are exempt from this requirement except when they are the lessor of real property (Rule 12A-1.070, F.A.C.).
5. It is a criminal offense to fraudulently present this certificate to evade the payment of sales tax. Under no circumstances should this certificate be used for the personal benefit of any individual. Violators will be liable for payment of the sales tax plus a penalty of 200% of the tax, and may be subject to conviction of a third-degree felony. Any violation will require the revocation of this certificate.
6. If you have questions about your exemption certificate, please call Taxpayer Services at 850-488-6800. The mailing address is PO Box 6480, Tallahassee, FL 32314-6480.

Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type
See Specific Instructions on page 2.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
GENERAL DANIEL CHAPPIE JAMES SUMMER FLIGHT ACADEMY INC

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification; check only one of the following seven boxes:
☐ Individual/sole proprietor or single-member LLC ☑ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate
☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶
Note. For a single-member LLC that is disregarded, do not check LLC; check the appropriate box in the line above for the tax classification of the single-member owner.
☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):
Exempt payee code (if any)
Exemption from FATCA reporting code (if any)
(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.)
2575 ESCAMBIA AVE

Requester's name and address (optional)

6 City, state, and ZIP code
PENSACOLA, FL, 32503

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the instructions for line 1 and the chart on page 4 for guidelines on whose number to enter.

Social security number
___ - ___ - ____

or

Employer identification number
46 - 5480504

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 3.

Sign Here | Signature of U.S. person ▶ Clifton W. [illegible] | Date ▶ 4/21/19

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. Information about developments affecting Form W-9 (such as legislation enacted after we release it) is at *www.irs.gov/fw9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following:

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding? on page 2.

By signing the filled-out form, you:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income, and
4. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting, is correct. *See What is FATCA reporting?* on page 2 for further information.

Re: Your Request for Funds from the Escambia Law Enforcement Trust Fund dated April 17, 2019.

Dear Shannon Nickinson,

We have received your request to provide your organization with funds from the Escambia Law Enforcement Trust (LET) fund. Your request for funding for Crime Prevention, Drug Prevention, Safe Neighborhood or other law enforcement purposes has been reviewed and approved by the Sheriff for the amount of $2500. The Sheriff has submitted your request to the Escambia County Board of County Commissioner with his written certification that the funds will be used for a purpose authorized by law.

Your request for LET funding, as approved by the Sheriff, is now awaiting review by the Escambia County Board of County Commissioners. The funds cannot be provided to you until your request is approved by the Board.

Please contact the County Commissioner for your district for information on the status of your request.

Studer Community Institute's Light Up Learning fundraiser will support our efforts to improve the lives of families in Escambia County through our programs aimed at improving school readiness and building capacity in parents in under-served communities. We do this through education programs that help parents understand the link between rich early educational experiences, school readiness and ultimately better education outcomes that as adults will support safer communities. SCI's Parent Outreach program is a cornerstone of this work, engaging parents in subsidized housing complexes in weekly parenting classes to help build the capacity in parents to be better first teachers for their children. Healthy early brain development is key to the foundation of a child's readiness for school, and ultimately for putting that child on a path for success in school and life. That is crucial in Escambia County, which state education data indicates has a kindergarten readiness rate of 45 percent (as of 2018, the most recently available data). SCI's program aims to improve the quality of life in communities of need by serving parents who live in Attucks Court, Moreno Court and Oakwood Terrace apartment complexes. Our partnership with Area Housing Commission began with a program to reach parents with the message of the importance of talking, reading and interacting with young children, especially in the first three years of life. It has expanded to work on building the capacity within these parents to make stronger, healthier decisions about their lives and life path, making their community safer, getting counseling where needed and giving their children a stronger foundation for school and life. The program's curriculum includes 16 weeks of lessons focused on the importance of parent talk and interaction in healthy brain development in the first three years of a child's life — and the role that that interaction plays in a child's kindergarten readiness. It also includes focusing on education as a lifelong journey, with components of stress management, self-sufficiency, longer-term planning and goal setting, and other life skills. After the initial 16 weeks, the program adds lessons in financial literacy, self-sufficiency and building parenting capacity in families. In September 2018, we set up an office in the Family Center at Pathways for Change, a faith-based recovery and counseling center to help women recovering from addiction. PFC offers GED and CDL license classes as well as parenting support. Our Parent Outreach curriculum will now be part of those offerings.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

FLORIDA

Important Information for Exempt Organizations

DR-14
R. 10/15

1. You must provide all vendors and suppliers with an exemption certificate before making tax-exempt purchases. See Rule 12A-1.038, Florida Administrative Code (F.A.C.).

2. Your *Consumer's Certificate of Exemption* is to be used solely by your organization for your organization's customary nonprofit activities.

3. Purchases made by an individual on behalf of the organization are taxable, even if the individual will be reimbursed by the organization.

4. This exemption applies only to purchases your organization makes. The sale or lease to others of tangible personal property, sleeping accommodations, or other real property is taxable. Your organization must register, and collect and remit sales and use tax on such taxable transactions. Note: Churches are exempt from this requirement except when they are the lessor of real property (Rule 12A-1.070, F.A.C.).

5. It is a criminal offense to fraudulently present this certificate to evade the payment of sales tax. Under no circumstances should this certificate be used for the personal benefit of any individual. Violators will be liable for payment of the sales tax plus a penalty of 200% of the tax, and may be subject to conviction of a third-degree felony. Any violation will require the revocation of this certificate.

6. If you have questions regarding your exemption certificate, please contact the Exemption Unit of Account Management at 800-352-3671. From the available options, select "Registration of Taxes," then "Registration Information," and finally "Exemption Certificates and Nonprofit Entities." The mailing address is PO Box 6480, Tallahassee, FL 32314-6480.

Form **W-9**
(Rev. December 2011)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type
See Specific Instructions on page 2.

Name (as shown on your income tax return)
Studer Community Institute, Inc

Business name/disregarded entity name, if different from above

Check appropriate box for federal tax classification:
☐ Individual/sole proprietor ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶

☐ Exempt payee

☑ Other (see instructions) ▶ Not-for-Profit Florida Corporation

Address (number, street, and apt. or suite no.)
220 West Garden St. Ste 100

Requester's name and address (optional)

City, state, and ZIP code
Pensacola, FL 32501

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number
			-		-				

Employer identification number
4	7	-	5	6	5	7	0	0	8

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here — Signature of U.S. person ▶ Nicole Weldon — Date ▶ 12-12-17

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

Re: Your Request for Funds from the Escambia Law Enforcement Trust Fund dated April 24, 2019.

Dear Natalie Chism,

We have received your request to provide your organization with funds from the Escambia Law Enforcement Trust (LET) fund. Your request for funding for Crime Prevention, Drug Prevention, Drug Education or other law enforcement purposes has been reviewed and approved by the Sheriff for the amount of $1,000. The Sheriff has submitted your request to the Escambia County Board of County Commissioner with his written certification that the funds will be used for a purpose authorized by law.

Your request for LET funding, as approved by the Sheriff, is now awaiting review by the Escambia County Board of County Commissioners. The funds cannot be provided to you until your request is approved by the Board.

Please contact the County Commissioner for your district for information on the status of your request.

Point of contact in this matter is Daniel Capozzolo, C.F.O. administrative assistant at 850-436-9949.

- See attached -

Funding from the Sheriff's Office will be used in the effort to prevent crime and drug abuse through educating our students of the risk and consequences associated with each.

Dixon School for the Arts is a private, kindergarten through 8th grade school, serving at-risk youth living in Escambia County, Florida. The majority of the 108 students reside within a ten-mile radius of the school located at 2601 West Strong Street. We've recently acquired the former AA Dixon school with the financial support of Innisfree Hotels and have a 50 year lease! Students will begin classes in the Fall there and we anticipate doubling our student enrollment. 100% of students enrolled at Dixon receive full scholarship support through Florida's Step-up for Students Scholarship program. Students and their families must be at or below poverty level to qualify for financial support from Step-Up. The primary demographic of the school includes children living in the low-income housing areas of Pensacola Village, Truman Arms, and Attucks Court.

Attending Dixon School of the Arts is a transformative experience for students. Most of the students at Dixon have never the greater Pensacola area, not even to venture as far as Pensacola Beach. Once inside our doors, we begin to see students feel good about themselves because of the things they can accomplish in their art or dance or music classes. The unique learning experiences Dixon offers, the exposure to the greater world outside of one's neighborhood, and our work to help each child understand that they can do anything they put their mind to, opens a new world of opportunities for each and every student. This positive alteration in outlook is so profound for our students that it permeates their thinking and helps to inspire others- improving the lives of their families and the lives of others in the community. The work we do at Dixon produces engaged, educated, and productive citizens, who help make their communities and neighborhood better and safer places to live.

Support from the Escambia County Sheriff's Office will be visibly displayed on all materials related to the Jaws on the Water event at the level decided upon from the Sheriff's office. We would love your consideration in support of this event and the Dixon School of Arts & Sciences.

Dixon SCHOOL of ARTS & SCIENCES

2601-A West Strong Street
Pensacola, FL 32505

Dear Friends of Dixon,

We are excited to announce that something BIG is coming to Pensacola Beach this summer!

JAWS On The Water will keep you on the edge of your float with suspense and anticipation! For only $35, guests will receive an inner tube, a glow necklace, and a killer experience watching the movie JAWS while floating in the Santa Rosa Sound. This exciting event will be held on June 21st and 22nd, 2019 at the new Jelly's Eatery (which will be open exclusively for the event).

All proceeds go to Dixon School of Arts & Sciences. Please consider joining us by sponsoring this 'jawesome' event!

Your support as a sponsor will give our scholars unique opportunities to explore the world outside the boundaries of their classroom. They will be able to participate in hands-on learning experiences such as gardening with local scientists at the From the Ground Up Community Garden, and scholars will engage with professional visiting artists who will immerse them in ballet, modern dance, yoga, music, and visual arts. Support at any level is greatly appreciated and will have a positive impact on the scholars at Dixon School of Arts & Sciences.

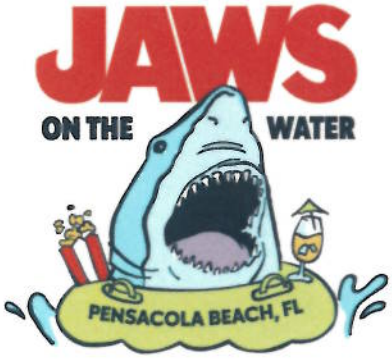
If you have any questions about sponsorships or would like to learn more about the school, please contact Natalie Chism at (850) 610-1725 or natalie@dixonschoolota.org.

Thank you for your consideration! We look forward to your support.

Gratefully,

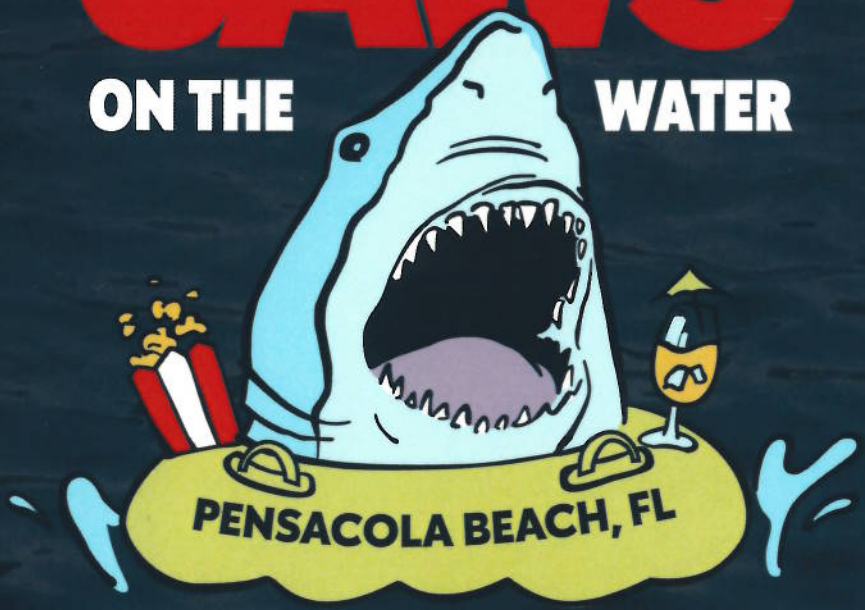
Rich

Rich Chism
President, Board of Directors



JAWS

ON THE WATER



SPONSOR[SHIPS]

You're gonna need a bigger float!

Join us in the Santa Rosa Sound for a killer event that you won't want to miss.

JUNE 21 & 22, 2019
6 -10PM

ALL PROCEEDS BENEFITTING Dixon SCHOOL of ARTS & SCIENCES

Dixon School of Arts & Sciences is a private, K - 8th-grade neighborhood school, serving at-risk youth living in Escambia County, Florida. The school offers a world-class Fine Arts program as well as a robust Science, Technology, Engineering, Art and Math (STEAM) curriculum.

Dixon School of Arts & Sciences exists to provide values-based excellence in academic achievement focused on the arts and sciences and to provide creative experiences for its scholars, their families, and the community.

By sponsoring the school, you will help Dixon achieve its vision of becoming a model for excellence and to be recognized as one of the nation's premier education institutions.

Form 990 required: YES

Dear Taxpayer:

We're responding to your request dated Feb. 04, 2019, about your tax-exempt status.

We issued you a determination letter in December 2010, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

We also show you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(ii).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period:

- Form 990, Return of Organization Exempt From Income Tax
- Form 990EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990-EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling 800-TAX-FORM (800-829-3676).

If you have questions, call 877-829-5500 between 8 a.m. and 5 p.m.,

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only one of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☑ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is not disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
2601 A WEST STRONG STREET

Requester's name and address (optional)

6 City, state, and ZIP code
PENSACOLA, FLORIDA 35205

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
___ - ___ - ____

or

Employer identification number
30 - 0600414

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here | **Signature of U.S. person** ▶ [signature] **Date** ▶ 02/07/2019

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16123 **County Administrator's Report 10. 2.**
BCC Regular Meeting **Discussion**
Meeting Date: 05/16/2019
Issue: Recommendation Concerning the Acquisition of Real Property at 123 Diego Circle
From: TONYA GREEN, Neighborhood & Human Services Director
Organization: Neighborhood & Human Svcs
CAO Approval:

RECOMMENDATION:

Recommendation Concerning the Acquisition of Real Property Located at 123 Diego Circle for the Erress Boulevard and Diego Circle Blight Reduction Project - Tonya Green, Neighborhood & Human Services Department Director

That the Board either approve, by super majority vote, or deny the following action:

A. Authorize the purchase of real property, located at 123 Diego Circle, from 5T Wealth Partners, LP, a California limited partnership, for the Erress Boulevard and Diego Circle Blight Reduction Project, in the amount of $9,500 (County's appraised value is $8,000);

B. Approve the Contract for Sale and Purchase for the acquisition of real property located at 123 Diego Circle (.0384 acres); and

C. Authorize the County Attorney's office to prepare, and the Chairman or Vice Chairman to execute, subject to Legal Review and sign-off, any documents necessary to complete the acquisition of this property without further action of the Board.

This parcel is located in District 3.

[Funding: Fund 129/2017 CDBG, Cost Center 370231]

BACKGROUND:

Westernmark subdivision located on Erress Boulevard and Valencia Arms subdivision located on Diego Circle are neighborhoods located in the CRA Palafox Redevelopment District. Many of the units within the neighborhood have become neglected and/or abandoned leading to severe blighted and slum conditions. Escambia County has conducted multiple refuse "clean sweeps" through the neighborhood; there have been numerous repetitive code violations in which properties currently have outstanding liens.

During the June 22, 2017 BCC Meeting, the Board authorized staff to begin the process to pursue acquisition on all properties that had vacant lots and unoccupied structures. Neighborhood and Human Services staff have identified over 30 potential parcels to solicit for acquisitions. Staff has sent correspondence to all identified vacant properties and have completed appraisal reports, title insurance commitments, and other related activities in implementing the project. The acquisition checklist has been provided with this recommendation.

A preliminary offer was made to the owner for the appraised value of the property of $8000, but the owner has counter-offered with $9,500. The current property value from the Escambia County Property Appraiser notes the value at $10,240. Four votes from the Board would be needed to authorize this purchase price over the County appraisal of $8,000.

BUDGETARY IMPACT:

Funding for acquisition is budgeted in Fund 129, 2017 CDBG, Cost Center 370231.

LEGAL CONSIDERATIONS/SIGN-OFF:

All documents will be reviewed by the County Attorney's office for approval.

PERSONNEL:

Not applicable to this recommendation. All work associated with this request is being handled by County staff.

POLICY/REQUIREMENT FOR BOARD ACTION:

These actions are consistent with the provisions of Section 46-139 of the Escambia County Code of Ordinances.

IMPLEMENTATION/COORDINATION:

Upon Board action, Community Redevelopment Agency (CRA) and Neighborhood Enterprise Division (NED) staff will implement in consultation with the County Attorney's office.

Attachments

Contract with Backup Docs

CONTRACT FOR SALE AND PURCHASE

This is a Contract for Sale and Purchase ("Contract"), between 5T Wealth Partners, LP, a California limited partnership, whose address is P.O. Box 830539, Birmingham, AL 35283 ("Seller"), and ESCAMBIA COUNTY, a political subdivision of the State of Florida, acting by and through its duly authorized Board of County Commissioners, whose address is 221 Palafox Place, Pensacola, Florida 32502 ("Buyer").

1. AGREEMENT. Seller agrees to sell and Buyer agrees to buy the real property described in Exhibit A, together with all structures, fixtures, and improvements (the "Property") upon the terms and conditions stated in this Contract. Authorization for this purchase was obtained during a duly advertised meeting of the Board of County Commissioners held on May 16, 2019.

2. PURCHASE PRICE; PAYMENT. The purchase price is $9,500, payable to Seller at closing.

3. TIME FOR ACCEPTANCE; EFFECTIVE DATE; FACSIMILE. If the Contract is not executed by and delivered to all parties, or fact of execution communicated in writing between the parties, the Contract will be null and void. A facsimile copy of the Contract and any signatures on the Contract will be considered for all purposes as originals. The effective date ("Effective Date") of the Contract is the date when the last party signs the Contract.

4. TITLE EVIDENCE. Within thirty (30) days from the Effective Date of this Contract, Buyer shall examine title to the Property. If the title is found to be defective in Buyer's opinion, Buyer shall notify Seller in writing specifying the defects, and Seller shall have one hundred twenty (120) days from receipt of notice within which to cure the defects and the date for closing shall be accordingly extended. If Seller is unsuccessful in removing the defects within that time to Buyer's reasonable satisfaction, Buyer shall have the option of either (i) accepting title as it then is, including the title defect, or (ii) terminating this Contract, whereupon Buyer and Seller shall be released for all obligations under the Contract.

5. SELLER'S AFFIDAVITS AS TO UNRECORDED MATTERS, POSSESSION AND MECHANIC'S LIENS. Subject to any provisions in the Contract to the contrary, Seller must furnish to Buyer at closing affidavits in a form acceptable to the Buyer and sufficient to remove standard printed exceptions to title in an owner's policy of title insurance regarding (i) unrecorded matters (except for taxes not yet due and payable and special assessments not shown by the public records), (ii) parties in possession, except for the rights of tenants, if any, as tenants only, in possession and occupancy of the Property under written leases which have been furnished to Buyer by Seller and accepted by Buyer in writing, and (iii) mechanic's liens. Seller represents to Buyer that there are and at closing there will be no tenants or lessees occupying the Property or any portion of the Property. The Seller's Affidavits must contain information required for completion of Internal Revenue Service 1099 Form and a FIRPTA disclosure.

6. COSTS AND EXPENSES. Seller and Buyer will pay costs and expenses as follows: prorated ad valorem taxes and assessments (Seller); Deed Documentary Stamp Tax (Seller); Survey (Buyer); Title Insurance (Buyer); Recording of Deed (Buyer); Buyer's Attorney's Fees (Buyer); Seller's Attorney's Fees (Seller); Environmental Assessment (Buyer), costs to cure title defects and encumbrances on title (Seller).

7. BROKERS. Neither Buyer nor Seller has utilized the services of, or for any other reason owes compensation to, a licensed real estate broker.

8. TAXES AND ASSESSMENTS. All real estate taxes and assessments which are or which may become a lien against the Property must be satisfied by Seller at closing. In the event the closing occurs between January 1 and November 1, Seller must, in accordance with Section 196.295, Florida Statutes, place in escrow with the county tax collector an amount equal to the current taxes prorated to the date of transfer, based upon the current assessment and millage rates on the Property. In the event the closing occurs on or after November 1, Seller must pay to the tax collector an amount equal to the taxes that are determined to be legally due and payable.

9. CONVEYANCE AND TRANSFER OF TITLE. Seller shall convey title to the Property by Warranty Deed.

10. CLOSING. This transaction will be closed and the Warranty Deed and other closing documents prepared by the Office of the County Attorney, 221 Palafox Place, Suite 430, Pensacola, Florida 32502. Closing shall occur on or before thirty (30) days from the Effective Date of this Contract unless the date for closing is extended by mutual agreement of the parties or as otherwise provided in this Contract.

11. CLOSING PROCEDURE; DISBURSEMENT OF PROCEEDS OF SALE. At closing, Seller shall deliver the Warranty Deed and the proceeds of the sale will be disbursed to Seller in accordance with a settlement statement signed by both parties.

12. FAILURE OF PERFORMANCE. If Buyer fails or refuses to perform the Contract and Seller is not in default under this Contract, Seller will receive the deposit/earnest money, if any, plus all interest accrued, and other reasonable costs incurred by the Seller in reliance on the Contract, to be paid by Buyer as liquidated damages, consideration for the execution of the Contract and in full settlement of any claims for damages and as Seller's sole remedy under the Contract and Seller has no right of specific performance. If Seller fails or refuses to perform the Contract for any reason and Buyer is not in default under the Contract, (i) Buyer may proceed in law or in equity to enforce Buyer's rights under the Contract, or (ii) Buyer may elect to terminate the Contract and to receive the return of Buyer's deposit, plus interest earned, and reimbursement from Seller for all costs and expenses Buyer incurred with regard to the Contract in full settlement of any claims for damages.

13. ATTORNEYS' FEES; COSTS. Each party shall be responsible for their own attorneys' fees and costs in connection with any litigation or other dispute resolution proceeding.

14. SURVIVAL. All representations and warranties contained in the Contract and any provision of the Contract which by their nature and effect are required to be observed, kept or performed after closing, (i) survive closing and the delivery of the Warranty Deed, and (ii) remain binding upon and for the benefit of the parties to the Contract, their respective successors and assigns, until fully observed, kept or performed.

15. ASSIGNABILITY. Buyer and Seller cannot assign the Contract or rights under the Contract without the express written consent of the other.

16. RISK OF LOSS. The risk of loss to the Property is the responsibility of Seller until closing.

17. RADON GAS. Radon is a naturally occurring radioactive gas that, when it has accumulated in a building in sufficient quantities, may present health risks to persons who are exposed to it over time. Levels of radon that exceed federal and state guidelines have been found in buildings in Florida. Additional information regarding radon and radon testing may be obtained from the Escambia County public health unit.

18. OTHER AGREEMENTS. No prior or present agreements or representations are binding upon Buyer or Seller unless included in the Contract. No modification or change in the Contract are valid or binding upon the parties unless in writing and executed by the parties to be bound.

19. NOTICES. Any notice or demand to be given or that may be given under this Contract must be in writing and delivered by hand or delivered through the United States mail to:

TO BUYER:
Neighborhood Enterprise Division
c/o Meredith Reeves
221 Palafox Place, Suite 200
Pensacola, Florida 32502

TO SELLER:
5T Wealth Partners, LP
Department 6200
P. O. Box 830539
Birmingham, AL 35283

WITH A COPY TO:
Escambia County Attorney's Office
221 Palafox Place, Suite 430
Pensacola, Florida 32502

20. COUNTERPARTS. The Contract will be executed in duplicate counterparts, both of which taken together constitute one and the same instrument and any party or signatory may execute the Contact by signing a counterpart.

21. THIRD PARTY LEASES AND CONTRACTS. Seller shall at closing furnish to Buyer releases from any mortgage or existing leases.

22. SURVEY. Buyer may obtain a survey at its own expense. If Buyer prepares a survey and objectionable items are disclosed, objectionable matters will be viewed as title defects and the provisions of Paragraph 4 shall apply.

23. INSPECTION OF PROPERTY. Upon reasonable notice and without disruption of Seller's current use of the Property, Buyer may have subsurface investigations and environmental audits of the Property made by qualified geotechnical and environmental engineers sufficient in the judgment of the inspecting engineer to ascertain whether or not the Property meets the standards acceptable to Buyer. In the event that the report indicates that the Property does not meet Buyer's standards, Buyer, by notice to Seller on or before 10 days prior to closing, has the option of terminating the Contract and Seller agrees to return any deposit paid by Buyer. Seller warrants that there are no facts known to Seller materially affecting the value of the Property, which are not readily observable by Buyer or which have not been disclosed to Buyer.

24. ACCESS. Upon prior notice to Seller, Buyer and Buyer's agents and representatives shall have the right to access the Property at any reasonable time prior to closing for the purpose of making the investigations, environmental audits, inspections and surveys authorized by the Contract, provided neither Buyer nor its agents interfere with the use of the Property by Seller or its employees or customers.

25. OCCUPANCY AND POSSESSION. Seller warrants delivery of possession of the Property to Buyer at closing.

26. CONDEMNATION. Seller conveys by sale the Property for public use and waives any right to compensation for the Property other than as provided for in the Contract. If at any time prior to closing, the Property or any portion of the Property is taken by the exercise of eminent domain by another entity possessing those powers or if any preliminary steps in any taking by eminent domain of all or any portion of the Property occurs prior to closing, Buyer may, at Buyer's option, within 10 days after notice of this fact from Seller, rescind the Contract and Seller must return any deposit paid under the Contract to Buyer. Upon refund of the deposit, plus any interest earned, Buyer and Seller are released, as to one another, of all further obligations under the Contract. Seller shall notify Buyer of any taking by eminent domain and all steps preliminary to any taking immediately upon Seller's knowledge of the occurrence. If Buyer does not exercise Buyer's option to rescind under this Paragraph, the Contract remains in full force and effect. In this event Seller, (i) shall pay to Buyer at closing all proceeds previously received by Seller from the condemning authority, and (ii) shall assign to Buyer at closing all proceeds to be paid by the condemning authority after closing by an instrument of assignment in a form reasonably acceptable to Buyer.

27. FOREIGN INVESTMENT AND REAL PROPERTY TAX ACT (FIRPTA) AFFIDAVIT. Seller agrees to furnish to Buyer at closing a transferor's certification disclosing under penalty of perjury Seller's foreign or non-foreign status and Seller's United States federal identification number. The certification must be, (i) in a form acceptable to Buyer, and (ii) if Buyer has non-foreign status, in a form meeting the requirements of Section 1445(a) of the Internal Revenue Code of 1986, as amended, and the Regulations under Section 1445(a).

THIS CONTRACT IS INTENDED TO BE A LEGALLY BINDING CONTRACT. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

THIS CONTRACT SHALL NOT BE EFFECTIVE UNLESS APPROVED BY THE ESCAMBIA COUNTY BOARD OF COUNTY COMMISSIONERS AT A DULY NOTICED PUBLIC MEETING.

(gPAR™) General Purpose Appraisal Report 12/2005
GPAR1004_05 11122014

ADDENDUM

Client: NEIGHBORHOOD & HUMAN SERVICES DEPARTMENT		File No.: V190011
Property Address: 123 DIEGO CIRCLE		Case No.:
City: PENSACOLA	State: FL	Zip: 32505

Neighborhood Boundaries
SUBJECT MARKET AREA IS LOCATED NORTH OF FAIRFIELD DRIVE, WEST OF I-110, SOUTH OF I-10, AND EAST OF BLUE ANGEL PKWY, IN THE WEST PENSACOLA FLORIDA AREA.

Additional Features
HORIZONTAL BLINDS, COVERED FRONT STOOP, REAR COVERED/OPEN PATIO, CEILING FANS, FENCE, SCUTTLE ATTIC ACCESS, KITCHEN APPLIANCES, UTILITY ROOM, ETC. INTERIOR ITEMS ARE AN ESTIMATION ONLY DUE TO INTERIOR INSPECTION UNAVAILABLE DUE TO FIRE DAMAGE OF SUBJECT CREATING UNSAFE INTERIOR INSPECTION. ROOM COUNT ESTIMATED FROM MLS OF SIMILAR UNITS IN SUBJECT SUBDIVISION, AND IS AN ESTIMATION ONLY.

Condition of Improvements
THE SUBJECT DWELLING APPEARS TO BE IN POOR CONDITION. PHYSICAL DEPRECIATION STANDARD FOR AGE. NO FUNCTIONAL OR EXTERNAL INADEQUACIES NOTED AT THE TIME OF INSPECTION. SIGNIFICANT DEFERRED MAINTENANCE NOTED AT TIME OF INSPECTION DUE TO SUBJECT HAVING SEVERE FIRE DAMAGE, AND IS AS FOLLOWS: ENTIRE UPPER FLOOR APPEARS TO BE DESTROYED DUE TO FIRE, SMOKE, AND WATER DAMAGE. LOWER FLOOR APPEARS TO BE IN POOR CONDITION DUE TO WATER, AND SMOKE DAMAGE, AND HAVING BEEN SUBJECTED TO WATER DAMAGE AND OTHER DAMAGE DUE TO ROOF FROM UPPER FLOOR BEING DAMAGED AND LEAKING, ETC. IT COULD POSSIBLY HAVE MOLD DAMAGE DUE TO THE LENGTH OF TIME OF HAVING WATER INTRUSION. APPRAISAL SUBJECT TO INTERIOR INSPECTION, AND REPAIR ESTIMATES FROM LICENSED CONTRACTOR(S). APPRAISER UNABLE TO DETERMINE CONDITION OF THE INTERIOR OF SUBJECT, AND ASSUMES THAT THE SUBJECT IS BASICALLY A SHELL WITH ALL OR NEARLY ALL INTERIOR NEEDING REPAIR OR REPLACING.

Comments on Sales Comparison
THE COMPARABLES CHOSEN WERE SALES OF HOMES IN THE SUBJECT MARKET AREA AND WERE GOOD INDICATORS OF VALUE FOR THE SUBJECT PROPERTY DUE TO SIMILARITY IN LOCATION, GLA, BEDROOMS, BATHROOMS, UTILITY, CONSTRUCTION, ACTUAL AND EFFECTIVE AGE, ETC. COMPS WERE CONSIDERED RECENT DUE TO BEING SALES UNDER THIRTEEN MONTHS TIME OF SALE, WITH COMP # 2 BEING UNDER 7 MONTHS TIME OF SALE, AND COMP # 1 BEING UNDER 7 MONTHS TIME OF SALE. ALL SALES WERE OVER ONE MILE IN PROXIMITY TO SUBJECT DUE TO LACK OF MORE SIMILAR/RECENT SALE IN THE SUBJECT MARKET ARE IN CLOSER PROXIMITY.
PREVIOUS SALES/TRANSFERS: SUBJECT HAD ONE PRIOR TRANSFER IN THE PREVIOUS 36 MONTHS ON 01/11/2017 FOR $2,700 AS A TAX SALE. NO PRIOR SALE FOR COMP 2. COMP # 3 HAD TWO PRIOR TRANSFERS PER CRC AND PUBLIC RECORDS IN THE PREVIOUS 12 MONTHS ONE ON 12/19/2017 FOR $53,00, AND ONE ON 01/18/2018 FOR $100, AS PART OF AN REO ACQUISITION.

Final Reconciliation
WEIGHT GIVEN TO THE MARKET APPROACH AS IT BEST REFLECTS THE MOST CURRENT BUYING/SELLING HABITS OF THE PUBLIC IN GENERAL. INCOME APPROACH CONSIDERED BUT NOT USED DUE TO A LACK OF RENTAL DATA, AND NOT BEING CONSIDERED PERTINENT OR RELIABLE PER HUD HAND BOOK. PERTINENT VALUE DETERMINANTS BRACKETED BY COMPARABLES EXCEPT IN ACTUAL AGE, LOCATION, CONDITION, BEDROOM COUNT, GLA, ETC, DUE TO SUBJECT BEING OLDER THAN COMPARABLES IN ACTUAL AGE, COMPS CONSIDERED TO BE IN A SUPERIOR LOCATION, SUBJECT BEING CONSIDERED INFERIOR IN CONDITION DUE TO NOT BEING CONSIDERED IN LIVABLE CONDITION, AND BEDROOM COUNT DUE TO SUBJECT HAVE HIGHER BEDROOM COUNT THAN COMPS, AND IS NOT CONSIDERED A NEGATIVE FACTOR DUE TO ADJUSTMENTS MADE, HIGHER BEDROOM COUNT NOT CONSIDERED A NEGATIVE FACTOR. GROSS, NET, AND LINE ADJUSTMENTS WERE HIGHER THAN NORMAL DUE TO CONDITION OF SUBJECT. THIS REPORT IS INTENDED FOR USE BY CLIENT FOR VALUE PURPOSES, AND IS NOT INTENDED FOR ANY OTHER USE OR PARTY. METHODS USED FOR THIS REPORT AND CONCLUSIONS SHOULD BE CONSIDERED IN WHOLE. USE OF ANY PARTIAL ENTITY WITHIN REPORT IS NOT VALID. ALL COMPS USED IN FINAL VALUE. SUBJECT APPRAISAL IS NOT INTENDED TO BE USED IN A FEDERALLY RELATED AND/OR BACKED MORTGAGE TRANSACTION.
I HAVE NOT APPRAISED THE SUBJECT PROPERTY IN THE PAST 3 YEARS, TO THE BEST OF MY RECOLLECTION.

LONGER MARKETING TIMES SHOULD BE EXPECTED DUE TO PRICES IN THE AREA AND THE SMALL POOL OF QUALIFIED BUYERS WHO CAN QUALIFY FOR THAT SIZE MORTGAGE. THERE IS AN EFFECTIVE NUMBER OF COMPETING PROPERTIES ON THE MARKET IN THIS AREA. THIS INDICATES THAT SUPPLY AND DEMAND ARE IN BALANCE. REASONABLE EXPOSURE PERIOD IS ESTIMATED TO BE UNDER 15 MONTHS. TYPICAL HOLDING PERIOD IS 3-7 YEARS. APPRAISER DOES NOT AGREE TO APPEAR IN COURT IN ANY REFERENCE TO SUBJECT APPRAISAL. IF APPRAISERS AGREES TO APPEAR IN COURT THE MINIMUM FEE RETAINER IS $5000.00, AND $175 PER HOUR THEREAFTER FOR COURT TIME, RESEARCH, ETC.

SUPPLEMENTAL ADDENDUM: IN FORMING AN OPINION OF MARKET VALUE THE APPRAISER RESEARCHED COUNTY PUBLIC RECORDS, COURTHOUSE RETRIEVAL SYSTEM, PAR MLS PUBLIC RECORDS, AS PART OF THE SCOPE OF WORK, ZONING, SALES HISTORY WERE ALSO PART OF THE SCOPE OF WORK REQUIRED BY USPAP. DIFFERENCES IN INFORMATION SYSTEMS REQUIRED THE APPRAISER TO FURTHER INVESTIGATE AND RELY ON THE SOURCE THAT WAS IN THE OPINION OF THE APPRAISER MOST ACCURATE. ANY SUBSEQUENT REVIEW ON THIS APPRAISAL MUST UTILIZE THE SOURCES NOTED OTHERWISE THEY COULD BE RELYING ON DATA THAT HAS ALREADY BEEN DETERMINED BY THIS APPRAISER NOT TO BE RELIABLE OR IN CONFORMANCE WITH THE VALUE OPINION REQUIRED OF THIS ASSIGNMENT. CONSULT THE LIMITING CONDITIONS FOR THE DEFINITION OF VALUE AND WHAT WAS REQUIRED OF THE COMPARABLES FOR FORMING AN OPINION OF VALUE.
ALL COMPS INSPECTED FROM STREET. PHOTOS MAY BE FROM APPRAISERS FILES OR MLS, AND ACCURATELY REFLECT THE COMPARABLES AT TIME OF SALE.

Conditions of Appraisal
THIS REPORT IS SUBJECT TO THE ATTACHED ASSUMPTIONS AND LIMITING CONDITIONS. APPRAISAL SUBJECT TO FINDINGS FROM AN INTERIOR INSPECTION AND/OR INSPECTION/FINDINGS FROM LICENSED CONTRACTOR AND COST ESTIMATES TO CURE SUBJECT DEFERRED MAINTENANCE AND WITH THE EXTRAORDINARY ASSUMPTION THAT THE INTERIOR OF THE SUBJECT PROPERTY IS NOT SO SEVERE AND/OR CONSIDERED A TOTAL LOSS WITH NO SALVAGEABLE ASPECTS, RESULTING IN THE NEED TO DEMOLISH ENTIRE STRUCTURE. IF A HYPOTHETICAL CONDITION AND/OR AN EXTRAORDINARY ASSUMPTION WAS USED IN THIS REPORT, ITS USE MIGHT HAVE EFFECTED THE ASSIGNMENT RESULTS.

Scope of Work, Assumptions and Limiting Conditions

Scope of work is defined in the Uniform Standards of Professional Appraisal Practice as " the type and extent of research and analyses in an assignment." In short, scope of work is simply what the appraiser did and did not do during the course of the assignment. It includes, but is not limited to: the extent to which the property is identified and inspected, the type and extent of data researched, the type and extent of analyses applied to arrive at opinions or conclusions.

The scope of this appraisal and ensuing discussion in this report are specific to the needs of the client, other identified intended users and to the intended use of the report. This report was prepared for the sole and exclusive use of the client and other identified intended users for the identified intended use and its use by any other parties is prohibited. The appraiser is not responsible for unauthorized use of the report.

The appraiser's certification appearing in this appraisal report is subject to the following conditions and to such other specific conditions as are set forth by the appraiser in the report. All extraordinary assumptions and hypothetical conditions are stated in the report and might have affected the assignment results.

1. The appraiser assumes no responsibility for matters of a legal nature affecting the property appraised or title thereto, nor does the appraiser render any opinion as to the title, which is assumed to be good and marketable. The property is appraised as though under responsible ownership.

2. Any sketch in this report may show approximate dimensions and is included only to assist the reader in visualizing the property. The appraiser has made no survey of the property.

3. The appraiser is not required to give testimony or appear in court because of having made the appraisal with reference to the property in question, unless arrangements have been previously made thereto.

4. Neither all, nor any part of the content of this report, copy or other media thereof (including conclusions as to the property value, the identity of the appraiser, professional designations, or the firm with which the appraiser is connected), shall be used for any purposes by anyone but the client and other intended users as identified in this report, nor shall it be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the written consent of the appraiser.

5. The appraiser will not disclose the contents of this appraisal report unless required by applicable law or as specified in the Uniform Standards of Professional Appraisal Practice.

6. Information, estimates, and opinions furnished to the appraiser, and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy of such items furnished to the appraiser is assumed by the appraiser.

7. The appraiser assumes that there are no hidden or unapparent conditions of the property, subsoil, or structures, which would render it more or less valuable. The appraiser assumes no responsibility for such conditions, or for engineering or testing, which might be required to discover such factors. This appraisal is not an environmental assessment of the property and should not be considered as such.

8. The appraiser specializes in the valuation of real property and is not a home inspector, building contractor, structural engineer, or similar expert, unless otherwise noted. The appraiser did not conduct the intensive type of field observations of the kind intended to seek and discover property defects. The viewing of the property and any improvements is for purposes of developing an opinion of the defined value of the property, given the intended use of this assignment. Statements regarding condition are based on surface observations only. The appraiser claims no special expertise regarding issues including, but not limited to: foundation settlement, basement moisture problems, wood destroying (or other) insects, pest infestation, radon gas, lead based paint, mold or environmental issues. Unless otherwise indicated, mechanical systems were not activated or tested.

This appraisal report should not be used to disclose the condition of the property as it relates to the presence/absence of defects. The client is invited and encouraged to employ qualified experts to inspect and address areas of concern. If negative conditions are discovered, the opinion of value may be affected.

Unless otherwise noted, the appraiser assumes the components that constitute the subject property improvement(s) are fundamentally sound and in working order.

Any viewing of the property by the appraiser was limited to readily observable areas. Unless otherwise noted, attics and crawl space areas were not accessed. The appraiser did not move furniture, floor coverings or other items that may restrict the viewing of the property.

9. Appraisals involving hypothetical conditions related to completion of new construction, repairs or alteration are based on the assumption that such completion, alteration or repairs will be competently performed.

10. Unless the intended use of this appraisal specifically includes issues of property insurance coverage, this appraisal should not be used for such purposes. Reproduction or Replacement cost figures used in the cost approach are for valuation purposes only, given the intended use of the assignment. The Definition of Value used in this assignment is unlikely to be consistent with the definition of Insurable Value for property insurance coverage/use.

11. The ACI General Purpose Appraisal Report (GPAR™) is not intended for use in transactions that require a Fannie Mae 1004/Freddie Mac 70 form, also known as the Uniform Residential Appraisal Report (URAR).

Additional Comments Related To Scope Of Work, Assumptions and Limiting Conditions

12. This appraisal is not for the purpose of, or to be used in a federally related transaction.

This form Copyright © 2005-2016 ACI, a First American Company. All Rights Reserved.

Appraiser's Certification

The appraiser(s) certifies that, to the best of the appraiser's knowledge and belief:

1. The statements of fact contained in this report are true and correct.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are the appraiser's personal, impartial, and unbiased professional analyses, opinions, and conclusions.
3. Unless otherwise stated, the appraiser has no present or prospective interest in the property that is the subject of this report and has no personal interest with respect to the parties involved.
4. The appraiser has no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
5. The appraiser's engagement in this assignment was not contingent upon developing or reporting predetermined results.
6. The appraiser's compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
7. The appraiser's analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
8. Unless otherwise noted, the appraiser has made a personal inspection of the property that is the subject of this report.
9. Unless noted below, no one provided significant real property appraisal assistance to the appraiser signing this certification. Significant real property appraisal assistance provided by:

Additional Certifications:

I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

Property Address: 123 DIEGO CIRCLE	Case No.:	
City: PENSACOLA	State: FL	Zip: 32505

Definition of Value
Clarification of Intended Use and Intended User:

The Intended User of this appraisal report is the Client. The Intended Use is to evaluate the property that is the subject of this appraisal but not for a federally related mortgage finance transaction, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. No additional Intended Users are identified by the appraiser.

SCOPE OF WORK: THE APPRAISAL ASSIGNMENT HAS BEEN IDENTIFIED BY THE CLIENT AS THE APPRAISERS OPINION OF CURRENT MARKET VALUE OF THE ADDRESS IDENTIFIED HEREIN, AND THE REQUIREMENTS OF THIS APPRAISAL REPORT FORM, INCLUDING THE DEFINITION OF MARKET VALUE AS STATED IN THE LIMITED CONDITIONS, THE STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS, AND CERTIFICATIONS. FOR PURPOSES OF THIS APPRAISAL REPORT, THE STATEMENT THAT "THE APPRAISER MUST, AT A MINIMUM: (1) PERFORM A COMPLETE VISUAL INSPECTION OF THE INTERIOR AND EXTERIOR AREAS OF THE SUBJECT PROPERTY," IT SHALL BE NOTED THAT THIS INSPECTION CONSISTED OF VISUALLY OBSERVING THOSE AREAS THAT WERE READILY AND EASILY ACCESSIBLE TO THE LAYMANS EYE. ATTIC'S AND CRAWL SPACES WERE NOT OBSERVED, ROOFS WERE NOT CLIMBED, BUT WERE VISUALLY OBSERVED FROM THE GROUND. INTERIOR WALLS WERE NOT ACCESSED, AND STRUCTURAL ASSESSMENTS WERE NOT MADE UNLESS SO STATED. THE APPRAISER IS NOT A QUALIFIED HOME INSPECTOR AND ONLY THOSE ADVERSE CONDITIONS THAT WERE READILY AND VISUALLY OBSERVABLE WERE REPORTED, IF ANY. "(2) INSPECT THE NEIGHBORHOOD" SUGGESTS AND INDICATES THAT THE APPRAISER DROVE THE NEIGHBORHOOD, VISUALLY OBSERVING FROM THE STREET, THE CONDITION AND APPEAL OF EXISTING DWELLINGS AND VACANT LOTS. "(3) INSPECT EACH OF THE COMPARABLE SALES FROM AT LEAST THE STREET," SUGGESTS AND INDICATES A VISUAL OBSERVATION FROM AN AUTOMOBILE STOPPED IN FRONT OF THE COMPARABLE PROPERTY, AND WHAT CAN BE DETERMINED BY SUCH AN INSPECTION. "(4) RESEARCH, VERIFY AND ANALYZE DATA FROM RELIABLE PUBLIC AND/OR PRIVATE SOURCES." THIS STATEMENT SHALL MEAN THAT THE APPRAISER GATHERED INFORMATION FROM THE PROPERTY APPRAISERS OFFICE VIA THEIR WEB SITE, AND/OR TELEPHONE, AND/OR PERSONAL OFFICE VISIT, (OF THE COUNTY IN WHICH THE PROPERTY IS LOCATED), AND/OR THE PENSACOLA ASSOCIATION OF REALTORS MULTIPLE LISTING SERVICE, VIA THEIR WEB SITE, AND/OR TELEPHONE, AND/OR PERSONAL OFFICE VISIT, OR OTHER SOURCES SUCH AS METRO MARKET TRENDS, ETC, AT AN ABSOLUTE MINIMUM. OTHER SOURCES ARE IDENTIFIED AS USED. THESE FINDINGS, ANALYSIS, OPINIONS AND CONCLUSIONS ARE THEN REPORTED IN AN APPRAISAL FORMAT ON THE APPROPRIATE FORM.

BOUNDARY SURVEY

EXHIBIT "A"

Legal Description (Per Official Record Book 4141, Page 1137).
Prepared at the request of the Community Redevelopment Agency
June 29, 2018

Lots 28, 29, 41, 48, 49, and 50, Valencia Arms, a subdivision of a portion of Section 9, Township 2 South, Range 30 West, in Escambia County, Florida, according to the plat of said subdivision recorded in Plat Book 7 at Page 99 of the public records of said County.

SURVEYOR'S NOTES:

1) Measurements were made in accordance with the United States Standard Foot.
2) Basis of Bearings Reference: Grid North and the grid bearings shown hereon are based on the following:
   a. Projection Zone: Florida North (State Plane)
   b. Projection Type: Lambert Conformal Conic
   c. Datum: North American Datum of 1983 with a datum tag of 2011 (NAD83 (2011))
   d. North as shown hereon is referenced to Florida Department of Transportation (FDOT) Horizontal Control Network.
3) Joseph Barrett, Florida Professional Surveyor and Mapper did not perform a title search, nor however a title search been provided. Therefore, the survey shown hereon is subject to any facts that may be disclosed by a full and accurate title search.
4) Lands shown hereon were not abstracted by Joseph Barrett, Florida Professional Surveyor and Mapper, and is, therefore, subject to deeds of record, unrecorded deeds, easements, right-of-ways, building setbacks, restrictive covenants, or other instruments which could affect the boundaries or use of the subject property.
5) This survey does not reflect, determine, or guarantee ownership.
6) No attempt was made to locate any underground foundations, septic/drain fields, underground utilities, or overhead utilities.
7) Additions or deletions to survey map(s) or report(s) by other than the signing party or parties is prohibited without written consent of the signing parties.
8) The horizontal positions shown hereon were derived from the utilization of a Leica 1200 Real Time Kinematic (RTK) Global Positioning System (GPS) dual frequency receiver in RTK Mode utilizing the Florida Department of Transportation (FDOT) Florida Permanent Reference Network (FPRN).
9) The field survey was performed between April 11, 2018 through April 16, 2018 and recorded in Field Book 538, Pages 11-17.
10) Right of way and parcel lines are based on the Escambia County Property Appraiser's maps. They are "For Illustrative Purposes Only".
11) Improvement locations shown hereon may be exaggerated and not to scale for clarity purposes.
12) Documents used in the preparation of this Boundary survey: Escambia County Property Appraiser's Maps; existing field monumentation, and the Following Legal Description recorded in the Public Records of Escambia County, Florida: O.R. Book 4141, Page 1137; Plat Book 7, Page 99 of the public records of Escambia County, Florida.
13) Improvement locations shown hereon may be exaggerated and not to scale for clarity purposes.
14) The description and boundary survey are not full and complete without the other.
15) Boundary lines as shown were determined by a boundary survey performed by Escambia County.
16) The official record of this survey is the original signed and sealed paper version. Any electronic version(s) is not valid unless it is identical in all forms and respects to the original signed and sealed paper version. The onus of comparison is placed on the user of the electronic version.

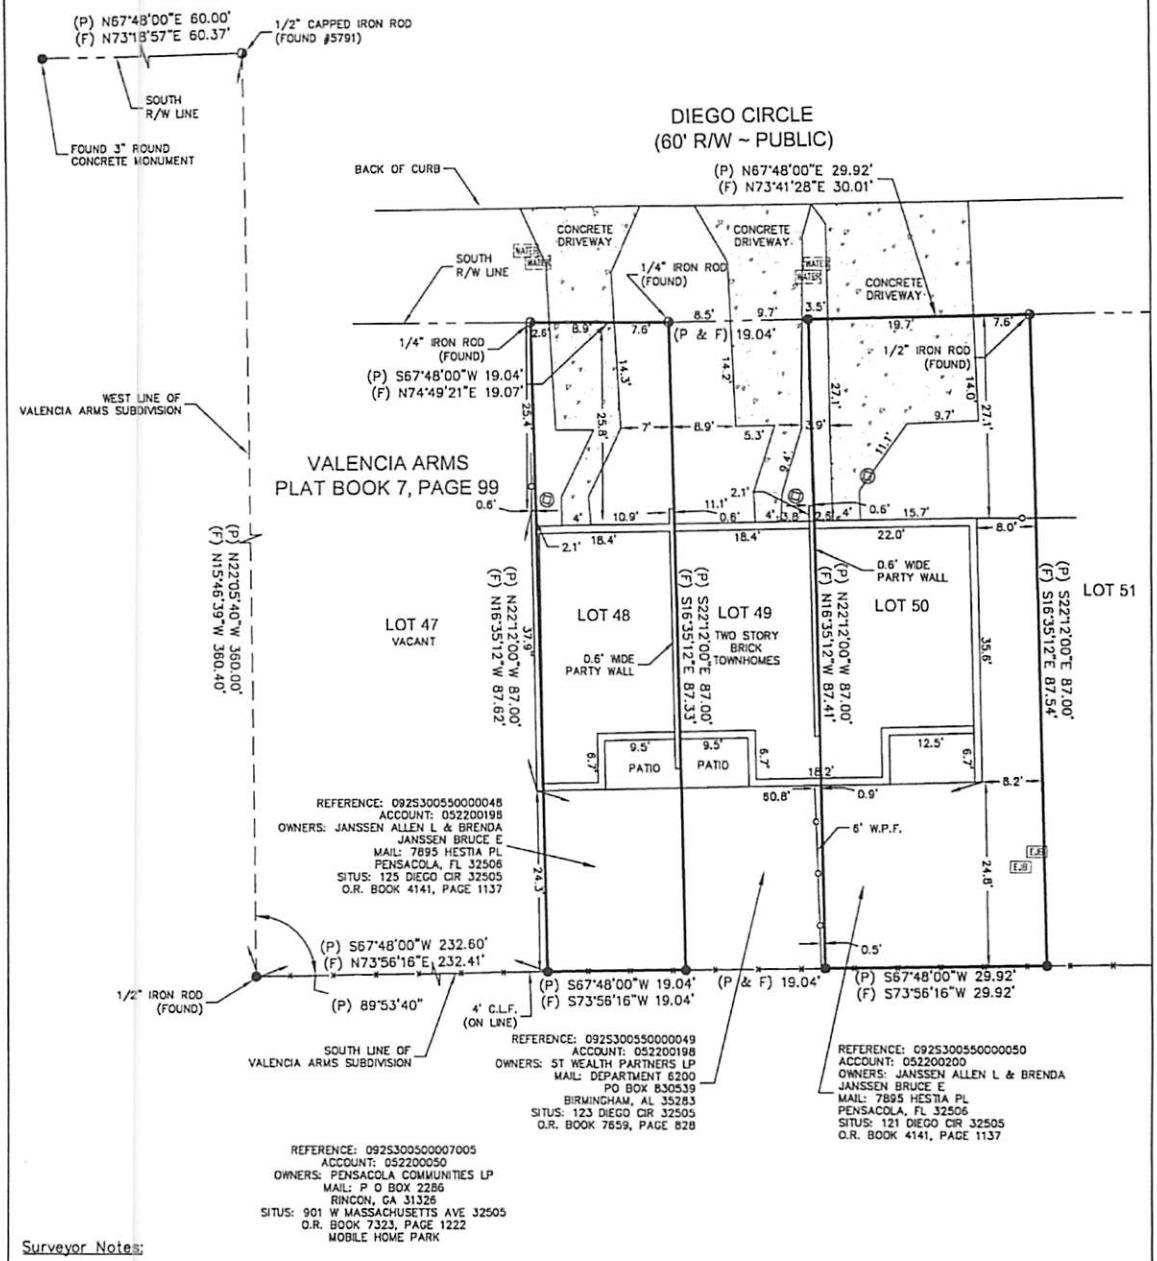
Joseph Barrett, Professional Surveyor and Mapper No. 6260 State of Florida — Date: July 3, 2018

I hereby certify that the Boundary Survey shown hereon was made under my responsible charge and meets the Standards of Practice as set forth by the Florida Board of Professional Surveyors and Mappers in Chapter 5J-17.050, 5J-17.051, and 5J-17.052, pursuant to Section 472.027 Florida Statutes.

BOUNDARY SURVEY

EXHIBIT "A"



Surveyor Notes:

1) Additions or deletions to survey map(s) or report(s) by other than the signing party or parties is prohibited without written consent of the signing parties.
2) The boundary survey and description or copies thereof are not valid without the signature and the original raised seal of a Florida licensed Surveyor and Mapper.
3) The description and sketch are not full and complete without the other.
4) Improvement locations shown hereon may be exaggerated and not to scale for clarity purposes.
5) The official record of this survey is the original signed and sealed paper version. Any electronic version(s) is not valid unless it is identical in all forms and respects to the original signed and sealed paper version. The onus of comparison is placed on the user of the electronic version.

AMERICAN LAND TITLE ASSOCIATION COMMITMENT

SCHEDULE B - SECTION I

Commitment No.: **117683-59**

1. Pay and/or disburse the agreed amounts for the interest in the land to be insured and/or according to the mortgage to be insured.

2. Pay us the premiums, fees and charges for the policy.

3. Pay all taxes and/or assessments, levied and assessed against the land, which are due and payable.

4. The following documents, satisfactory to us, creating the interest in the land and/or the mortgage to be insured, must be signed, delivered and recorded:

   a. **Title to captioned property was conveyed by Tax Deed filed in Official Records Book 7659, Page 828. The Company hereby requires the following:**

   A) A Quiet Title Action pursuant to FS 65.081, joining the taxpayer that lost title, all lienholders and any other parties having an interest in the property, which results in a non-appealable Final Order Quieting Title to the property and vesting the title to the property in 5T Wealth Partners LP. OR

   B) Obtain and record a Deed from Allen L. Janssen and Brenda Janssen, husband and wife, and Bruce E. Janssen to 5T Wealth Partners LP conveying the land. (Note: All other adversarial matters must also be released of record including but not limited to any open mortgages, judgments, liens, etc. which occurred prior to the issuance of the Tax Deed whether they were included or not included in Tax Deed proceedings). OR

   C) If the tax deed is at least four(4) years old and a thorough examination of the tax deed proceedings reveal all statutory and procedural requirements have been met, the following Affidavits must be obtained and filed prior to the filing of the proposed insured documents:

   Affidavit stating that the parties that lost the property, or anyone claiming by, through or under them, has not been in actual possession of said property within one year, or more, following the issuance of the tax deed.

   Affidavit stating that the grantee on the Tax Deed, and/or anyone claiming by, through or under them, has been in continuous adverse possession of the property for a minimum of four consecutive years, following the issuance of the Tax Deed

   b. **Warranty Deed from 5T Wealth Partners LP to Escambia County conveying the land, together with the following: (1) Proof of registration of the limited partnership. (2) Affidavit is required to establish the authority and identity of the partners executing the documents to be insured. (3) Satisfactory evidence that any corporate or limited partnership acting as general partner(s) is in good standing.**

5. **Release of Claim of Lien in favor of Fire Protection Municipal Service Benefit Unit (MSBU), and against Allen L. Janssen and Brenda Janssen, recorded in Book 4315, Page 452.**

6. **Release of Claim of Lien in favor of Fire Protection Municipal Service Benefit Unit (MSBU), and against Allen L. Janssen and Brenda Janssen, recorded in Book 4445, Page 1069.**

7. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen Janssen, recorded in Book 6168, Page 216, and Certified in Book 6168, Page 360.**

8. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1874, and Certified in Book 7703, Page 142 (Cross-Attaching).**

9. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1879, and Certified in Book 7703, Page 147 (Cross-Attaching).**

10. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1899, and Certified in Book 7703, Page 167 (Cross-Attaching).**

11. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7707, Page 1 (Cross-Attaching).**

12. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7706, Page 1990 (Cross-Attaching).**

13. **Written evidence, from appropriate governmental authorities, that Special Taxing District, City and County Special Assessment Liens, MSBU Assessment Liens, Impact Fees, and Water, Sewer and Trash Removal Charges, if any, have been paid.**

14. **Perform an Office of Foreign Asset Control (OFAC) search (formerly known as a Patriot Act search) on all seller(s) and/or buyer(s), and follow proper procedures if any party's name appears on OFAC's Specially Designated Nationals (SDN) list.**

15. **Note: 2017 taxes show UNPAID in the gross amount of $268.60 for Tax Identification No. 092S30-0550-000-049. Note: Any tax amount(s) shown herein are for informational purposes only, and should be verified with the appropriate taxing authority(s)**

16. **Note: 2018 taxes show UNPAID in the gross amount of $268.89 for Tax ID No. 092S30-0550-000-049.**

17. **Redemption of Tax Certificate No. 2255 for unpaid taxes for the year 2017.**

18. **Proof of payment of taxes and assessments for the years 2017 and 2018.**

19. **NOTE: FOR INFORMATIONAL PURPOSES ONLY: The following constitutes a 24 month Chain of Title preceding the effective date hereof and constitutes conveyances and transfers of ownership only: 1. Warranty Deed recorded June 18, 1997 in Book 4141, Page 1137. 2. Tax Deed recorded January 30, 2017 in Book 7659, Page 828.**

Item A of Schedule B - Section II is hereby deleted. However, immediately prior to the disbursement of the closing proceeds, the search of the public records must be continued from the effective date hereof. The Company reserves the right to raise such further exceptions and requirements as an examination of the information revealed by such search requires, provided, however, that such exceptions or requirements shall not relieve the Company from its liability under this Commitment arising from the matters which would be revealed by such search, to the extent that Company, or its Agent countersigning this Commitment, has disbursed said proceeds.

AMERICAN LAND TITLE ASSOCIATION COMMITMENT

SCHEDULE B - SECTION II

Commitment No.: **117683-59**

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

A. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the Proposed Insured acquires for value of record the estate or interest or mortgage thereon covered by this Commitment.

1. Any rights, interests or claims of parties in possession of the land not shown by the public records.
2. Any encroachment, encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the land.
3. Any lien for services, labor, or materials in connection with improvements, repairs or renovations provided before, on, or after Date of Policy, not shown by the public records.
4. Any dispute as to the boundaries caused by a change in the location of any water body within or adjacent to the land prior to Date of Policy, and any adverse claim to all or part of the land that is, at Date of Policy, or was previously under water.
5. Taxes or special assessments not shown as lien in the public records or in the records of the local tax collecting authority, at Date of Policy.
6. Any minerals or mineral rights leased, granted or retained by current or prior owners.
7. Taxes and assessments for the year 2018 and subsequent years, which are not yet due and payable.
8. **Restrictions, dedications, conditions, reservations, easements and other matters shown on the Plat of VALENCIA ARMS, a subdivision of a portion of Section 9, Township 2 South, Range 30 West as recorded in Plat Book 7, Page(s) 99, but deleting any covenant, condition or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, handicap, familial status or national origin to the extent such covenants, conditions or restrictions violate 42 USC 3604(c).**
9. **Declaration of Covenants, Conditions, Restrictions and Easements, recorded in Book 517, Page 431 and amended in Book 554, Page 783, but deleting any covenant, condition or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, handicap, familial status or national origin to the extent such covenants, conditions or restrictions violate 42 USC 3604(c).**
10. **Gulf Power Company Easement as recorded in Book 591, Page 306.**
11. **Gulf Power Company Easement as recorded in Deed Book 277, Page 355.**
12. **Gulf Power Company Easement as recorded in Book 411, Page 983.**
13. **Rights of adjoining owners in Party Wall(s) located partly on the land and partly on abutting property and rights of such adjoining owners in common, with the owner of the land in the roof of such building and in any appurtenances which are susceptible to common use; together with all liability for maintenance, repair and damage which common use entails.**

14. **Any lien as provided for by Chapter 159, Florida Statutes, in favor of any city, town, village or port authority for unpaid service charges for service by any water, sewer or gas systems supplying the lands described herein.**

Note: All the recording information contained herein refers to the Public Records of Escambia County, Florida, unless otherwise indicated. Any reference herein to a Book and Page or Instrument Number is a reference to the Official Records Books of said county, unless indicated to the contrary.

AMERICAN LAND TITLE ASSOCIATION COMMITMENT

SCHEDULE B - SECTION I

Commitment No.: 117683-59

1. Pay and/or disburse the agreed amounts for the interest in the land to be insured and/or according to the mortgage to be insured.

2. Pay us the premiums, fees and charges for the policy.

3. Pay all taxes and/or assessments, levied and assessed against the land, which are due and payable.

4. The following documents, satisfactory to us, creating the interest in the land and/or the mortgage to be insured, must be signed, delivered and recorded:

   a. **Title to captioned property was conveyed by Tax Deed filed in Official Records Book 7659, Page 828. The Company hereby requires the following:**

   A) A Quiet Title Action pursuant to FS 65.081, joining the taxpayer that lost title, all lienholders and any other parties having an interest in the property, which results in a non-appealable Final Order Quieting Title to the property and vesting the title to the property in 5T Wealth Partners LP. OR

   B) Obtain and record a Deed from Allen L. Janssen and Brenda Janssen, husband and wife, and Bruce E. Janssen to 5T Wealth Partners LP conveying the land. (Note: All other adversarial matters must also be released of record including but not limited to any open mortgages, judgments, liens, etc. which occurred prior to the issuance of the Tax Deed whether they were included or not included in Tax Deed proceedings). OR

   C) If the tax deed is at least four(4) years old and a thorough examination of the tax deed proceedings reveal all statutory and procedural requirements have been met, the following Affidavits must be obtained and filed prior to the filing of the proposed insured documents:

   Affidavit stating that the parties that lost the property, or anyone claiming by, through or under them, has not been in actual possession of said property within one year, or more, following the issuance of the tax deed.

   Affidavit stating that the grantee on the Tax Deed, and/or anyone claiming by, through or under them, has been in continuous adverse possession of the property for a minimum of four consecutive years, following the issuance of the Tax Deed

   b. **Warranty Deed from 5T Wealth Partners LP to Escambia County conveying the land, together with the following: (1) Proof of registration of the limited partnership. (2) Affidavit is required to establish the authority and identity of the partners executing the documents to be insured. (3) Satisfactory evidence that any corporate or limited partnership acting as general partner(s) is in good standing.**

5. **Release of Claim of Lien in favor of Fire Protection Municipal Service Benefit Unit (MSBU), and against Allen L. Janssen and Brenda Janssen, recorded in Book 4315, Page 452.**

6. **Release of Claim of Lien in favor of Fire Protection Municipal Service Benefit Unit (MSBU), and against Allen L. Janssen and Brenda Janssen, recorded in Book 4445, Page 1069.**

7. **Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen Janssen, recorded in Book 6168, Page 216, and Certified in Book 6168, Page 360.**

8. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1874, and Certified in Book 7703, Page 142 (Cross-Attaching).

9. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1879, and Certified in Book 7703, Page 147 (Cross-Attaching).

10. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1894, and Certified in Book 7703, Page 162.

11. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7702, Page 1899, and Certified in Book 7703, Page 167 (Cross-Attaching).

12. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7707, Page 1 (Cross-Attaching).

13. Release and proof of Compliance of Code Enforcement Lien in favor of the Office of Environmental Enforcement Special Magistrate in and for the County of Escambia, State of Florida against Allen L. Janssen, Brenda Janssen and Bruce E. Janssen, recorded in Book 7706, Page 1990 (Cross-Attaching).

14. Written evidence, from appropriate governmental authorities, that Special Taxing District, City and County Special Assessment Liens, MSBU Assessment Liens, Impact Fees, and Water, Sewer and Trash Removal Charges, if any, have been paid.

15. Perform an Office of Foreign Asset Control (OFAC) search (formerly known as a Patriot Act search) on all seller(s) and/or buyer(s), and follow proper procedures if any party's name appears on OFAC's Specially Designated Nationals (SDN) list.

16. Note: 2017 taxes show UNPAID in the gross amount of $268.60 for Tax Identification No. 092S30-0550-000-049. Note: Any tax amount(s) shown herein are for informational purposes only, and should be verified with the appropriate taxing authority(s)

17. Proof of payment of taxes and assessments for the year 2017.

18. NOTE: FOR INFORMATIONAL PURPOSES ONLY: The following constitutes a 24 month Chain of Title preceding the effective date hereof and constitutes conveyances and transfers of ownership only: 1. Warranty Deed recorded June 18, 1997 in Book 4141, Page 1137. 2. Tax Deed recorded January 30, 2017 in Book 7659, Page 828.

Item A of Schedule B - Section II is hereby deleted. However, immediately prior to the disbursement of the closing proceeds, the search of the public records must be continued from the effective date hereof. The Company reserves the right to raise such further exceptions and requirements as an examination of the information revealed by such search requires, provided, however, that such exceptions or requirements shall not relieve the Company from its liability under this Commitment arising from the matters which would be revealed by such search, to the extent that Company, or its Agent countersigning this Commitment, has disbursed said proceeds.

RESOLUTION ADOPTED
BY WRITTEN CONSENT OF
5TQ CAPITAL LP

The undersigned, constituting all of the members of the Partners of 5TQ Capital LP (the "**Partnership**"), waiving all requirements of notice, consent to the actions specified below and adopt the following resolutions by written consent, without a meeting:

WHEREAS, the Partnership has obtained the services of Kite Tax Lien Capital, LLC, a Florida limited liability company ("**KTL**"), for the purpose of pursuing the purchase and sale of tax certificates and tax deeds as those terms are described in Chapter 197, F.S., (collectively, "**Tax Transactions**"), as more fully set forth in Sub-Advisory Agreement dated May 1, 2016 (the "**Sub-Advisory Agreement**")

WHEREAS, concurrently herewith the Partnership is entering into that certain Addendum to the Sub-Advisory Agreement (the "**Addendum**") (the Addendum and Sub-Advisory Agreement is hereby referred to as the "**Agreement**")

WHEREAS, pursuant to the Agreement, the Partnership deems it necessary and desirable to authorize the officers of KTL to enter into, execute and deliver certain documents related to Tax Transactions

NOW, THEREFORE, BE IT RESOLVED:

1. That Agreement is hereby ratified and affirmed.

2. That the Partnership deems it to be advisable for, expedient and in the best interest of, the Partnership and partners to authorize the executive officers of KTL, including but not limited to those set forth below, each as an "**Authorized Signatory**" of the Partnership, and as a power of attorney for the limited purposes of negotiating, executing, delivering and binding the Partnership with respect to Tax Transactions that the Authorized Signatory deem advisable, in their sole discretion, on behalf of the Partnership; provided, however, that no single transaction shall exceed $30,000.00 (exclusive of closing costs and other similar fees incurred in the ordinary course of business).

Kelly P. Kite
Joseph P. Schlitt

3. That each Authorized Signatory be and is hereby authorized, empowered and directed by and on behalf of the Partnership to execute and deliver, in the name and on behalf of the Partnership, any purchase or sale agreement, transfer agreement, grant, deed, affidavit, certificate, closing statement or other instrument deemed reasonably necessary by the Authorized Signatory to consummate a Tax Transaction (collectively, the "**Closing Documents**"), with such execution or delivery to be conclusively binding on the Partnership, and to perform all acts, execute all papers and documents, and to do all other things and take all actions as they may deem necessary or appropriate, in the Authorized Signatory's discretion, to effect such transaction or the implementation of any of the resolutions contained herein; and (I) each Authorized Signatory be and hereby is authorized to take such further actions and to do and perform all such other acts and things as reasonably necessary or appropriate in furtherance of the accomplishment of the purposes and intent of the foregoing resolutions without any need for further consent from the Partnership, its partners or officers, including but not limited to recording this resolution in any place an Authorized Signatory deems necessary or desirable; and (II) that any and all action heretofore taken by an Authorized Signatory with respect to the subject matter of these resolutions are hereby ratified, confirmed and approved in all respects as the act and deed of the Partnership.

[Signatures on following page]

IN WITNESS WHEREOF, the undersigned General Partner of the Partnership has duly executed this Written Consent and adopted these resolutions as of the date set forth above.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16124 **County Administrator's Report 10. 3.**
BCC Regular Meeting **Discussion**
Meeting Date: 05/16/2019
Issue: Acquisition of Property Located on Old Chemstrand Road
From: Joy Jones, Director
Organization: Engineering
CAO Approval:

RECOMMENDATION:

Recommendation Concerning the Acquisition of Property Located on Old Chemstrand Road - Joy Jones, P.E., Engineering Department Director

That the Board take the following action regarding the acquisition of a parcel of real property (approximately 0.67 acres), located in the 1600 Block of Old Chemstrand Road, from Hussein and Anne Sharaway:

A. Approve, by super-majority vote, or deny the purchase of a parcel of real property located in the 1600 Block of Old Chemstrand Road from Hussein and Anne Sharaway for $25,000; and

B. Authorize staff to draft the Contract for Sale and Purchase for the acquisition of real property located in the 1600 Block of Old Chemstrand Road, and bring the Contract to the Board for final approval and execution.

[Funding source: District 5 Discretionary Fund]

This property is located in Commission District 5.

BACKGROUND:

Meeting in regular session on February 21, 2019, and on April 4, 2019, the Board authorized staff to obtain an appraisal for this parcel and then to make an offer to purchase based on the appraisal ($13,400.) As directed during the regularly-scheduled meeting on April 4, 2019, the counter-offer is being brought back before the Board before staff proceeds with the remaining due diligence items and moves toward to a Contract for Sale and Purchase. Mr. and Mrs. Sharaway are willing to sell their property, located in the 1600 Block of Old

Chemstrand Road, for the net purchase price of $23,000.

BUDGETARY IMPACT:

Funding will come from District 5 Discretionary Fund.

LEGAL CONSIDERATIONS/SIGN-OFF:

The Contract for Sale and Purchase will be reviewed and approved by the County Attorney's Office.

PERSONNEL:

All work associated with this request is being done in-house and no additional staff is required.

POLICY/REQUIREMENT FOR BOARD ACTION:

These actions are consistent with the provisions of Section 46-139 of the Escambia County Code of Ordinances.

IMPLEMENTATION/COORDINATION:

Upon Board approval, staff will maintain compliance with Section 46-139 of the County Codes.

If you agree to the terms listed above, please sign below and return the letter to this office or if you would like to discuss this further, please mark the appropriate box below.

Thank you for your time and help in this project. If you have any questions, please call (850) 595-2415, which is my direct office line.

Sincerely,

Stacey W. Coker
Real Estate Acquisition Manager
Real Estate Division

ACCEPTANCE

I have read the foregoing and would be willing to:

☐ a) Sell the property, located in the 1600 Block of Old Chemstrand Road, for the appraised value of $13,400.00 depicted in Exhibit "A"; or

☒ b) Discuss the terms and conditions associated with this acquisition further with County Staff. I/We can be reached, via phone, at ~~(850)~~ (407) 556-3384

I also understand the purchase may be subject to certain additional terms and conditions that will appear in a Contract for Sale and Purchase.

ITEMS ADDED TO THE AGENDA – COMMISSIONER BERGOSH – Continued

2. Verbal Item Added to the Agenda

Motion: Move to waive the cost of the fee for the rental of Beulah Park on Saturday, March 2nd, and I will cover any associated costs out of my discretionary fund so that the community of Beulah can honor Mr. Reddy and raise money for his family **For Information:** Govardhan "Reddy" Kotha was the victim killed in a robbery on Mobile Highway in Pensacola on February 19, 2019.
Made by: Commissioner Bergosh **Seconded by:** Commissioner Underhill
Disposition: Carried unanimously

ITEMS ADDED TO THE AGENDA – COMMISSIONER STEVEN L. BARRY

1. Recommendation: That the Board take the following action concerning obtaining an appraisal for property located in the 1600 Block of Old Chemstrand Road (approximately 0.67 acres), owned by Hussein and Anne Sharaway:

   A. Authorize staff to order an appraisal for the potential acquisition of property located in the 1600 Block of Old Chemstrand Road, owned by Hussein and Anne Sharaway; and

   B. Authorize staff to bring the appraisal back to the Board for further discussion prior to making an offer and prior to continuing with standard due diligence, as outlined in Section 46-139 of Escambia County Code of Ordinances.

   [Funding Source: Fund 352 "LOST (Local Option Sales Tax) III," Cost Center 350229, Object Code 56101, Project #08PR0058 "Park Development"]

Motion: Move the recommendation concerning appraisal for acquisition of property located on Old Chemstrand Road
Made by: Commissioner Bender **Seconded by:** Commissioner Underhill
Disposition: Carried 4-0, with Commissioner May having left the meeting

COUNTY ADMINISTRATOR'S REPORT – Continued

II. BUDGET/FINANCE CONSENT AGENDA – Continued

42. Recommendation: That the Board take the following action regarding the acquisition of a parcel of real property (approximately 0.67 acres) located in the 1600 Block of Old Chemstrand Road, from Hussein and Anne Sharaway:

A. Authorize staff to make an offer to purchase the property, located in the 1600 Block of Old Chemstrand Road, for the appraised value of $13,400, from Hussein and Anne Sharaway; any counter-offer will be brought back before the Board; and

B. Authorize staff to draft the Contract for Sale and Purchase for the acquisition of real property located in the 1600 Block of Old Chemstrand Road, and bring the Contract to the Board for final approval and execution.

[Funding will come from District 5 Discretionary Fund.]

Motion: Move the balance in the affirmative **For Information:** The "balance" refers to Consent Agenda Items 1 through 42, with the exception of Items 5, 7, and 31, which were held for separate votes, as amended to drop Item 19.
Made by: Commissioner Underhill **Seconded by:** Commissioner Bender
Disposition: Carried unanimously

DRAFT

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16102 **County Administrator's Report 10. 4.**
BCC Regular Meeting **Discussion**
Meeting Date: 05/16/2019
Issue: Acquisition of Real Property located at 416 and 450 Herman Street for the Delano/Herman Streets Drainage Improvement Project
From: Joy Jones, Director
Organization: Engineering
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Acquisition of Real Property Located at 416 and 450 West Herman Street for the Delano/Herman Streets Drainage Improvement Project - Joy Jones, P.E., Engineering Department Director

That the Board take the following action regarding the acquisition of real property (approximately 2.15 acres) located at 416 and 450 West Herman Street from Rocky's Collision Center, Inc.:

A. Authorize the purchase of three parcels of real property located at 416 and 450 West Herman Street (approximately 2.15 acres), owned by Rocky's Collision Center, Inc., for the Delano/Herman Streets Drainage Improvement Project, for an average of the County's appraised values of $820,000 and $870,000, which equals $845,000, in accordance with the terms and conditions contained in the Contract for Sale and Purchase;

B. Approve the Contract for Sale and Purchase for the acquisition of three parcels of real property located at 416 and 450 West Herman Street (approximately 2.15 acres) from Rocky's Collision Center, Inc., for $845,000; and

C. Authorize the County Attorney's Office to prepare, and the Chairman or Vice Chairman to execute any documents, subject to Legal review and sign-off, necessary to complete the acquisition of this property, without further action of the Board.

[Funding Source: Fund 352, LOST III/HMGP Grant, Cost Center 210124, Object Code 56101, Project 17EN3743. Funds spent toward this project are eligible for

reimbursement through the Hazard Mitigation Grant Program]

These properties are located in District 3.

BACKGROUND:

Escambia County has a long history of stormwater drainage problems and frequent flooding in the Pace Boulevard/Herman Street/Fairfield Street/Delano Street areas impacting government buildings, private facilities and roadways. These parcels will be used to expand the adjacent stormwater pond.

Following the April 2014 Flood Event, the Florida Department of Emergency Management (FDEM) approved funding for the design of a project to mitigate flooding in the Delano Street area. The design for the Delano Area Drainage Project has been completed, permitted, and submitted to FDEM for approval of grant funding for acquisition and construction.

The closings for all properties within the Delano Area Drainage Project will be scheduled once FDEM has approved acquisition and construction funding. This property owner is aware the closing will be delayed until then to comply with grant reimbursement requirements.

BUDGETARY IMPACT:

Funding for this project is available in Fund 352, LOST III/HMGP Grant, Cost Center 210124, Object Code 56101, Project 17EN3743. Funds spent toward this project are eligible for reimbursement through the Hazard Mitigation Grant Program.

LEGAL CONSIDERATIONS/SIGN-OFF:

The County Attorney's Office will prepare the closing documents and conduct the closing for the purchase of this property. The Contract for Sale and Purchase was approved as to form and legal sufficiency by Stephen West, Assistant County Attorney, on April 18, 2019.

PERSONNEL:

All work associated with this request is being done in-house and no additional staff is required.

POLICY/REQUIREMENT FOR BOARD ACTION:

These actions are consistent with the provisions of Section 46-139 of the Escambia County Code of Ordinances.

IMPLEMENTATION/COORDINATION:

Upon Board approval, staff will maintain compliance with Section 46-139 of the County Codes.

CONTRACT FOR SALE AND PURCHASE

This is a Contract for Sale and Purchase ("Contract"), between Rocky's Collision Center, Inc., a Florida for-profit corporation, whose address is 450 West Herman Street, Pensacola, Florida 32505 ("Seller"), and ESCAMBIA COUNTY, a political subdivision of the State of Florida, acting by and through its duly authorized Board of County Commissioners, whose address is 221 Palafox Place, Pensacola, Florida 32502 ("Buyer").

1. AGREEMENT. Seller agrees to sell and Buyer agrees to buy the real property and improvements described in Exhibit A (the "Property") upon the terms and conditions stated in this Contract. Authorization for this purchase was obtained during a duly advertised meeting of the Board of County Commissioners held on _____, 2019. This Contract is expressly contingent on Buyer receiving approval from the Florida Division of Emergency Management of a Phase II grant funding agreement for the Delano Drainage Project; in the event that Buyer does not receive approval of the grant funding agreement within fifteen (15) months from the Effective Date, this Contract shall be null and void.

2. PURCHASE PRICE; PAYMENT. The purchase price is Eight Hundred Forty-five Thousand Dollars ($845,000.00), payable to Seller at closing.

3. TIME FOR ACCEPTANCE; EFFECTIVE DATE; FACSIMILE. If the Contract is not executed by and delivered to all parties, or fact of execution communicated in writing between the parties, the Contract will be null and void. A facsimile copy of the Contract and any signatures on the Contract will be considered for all purposes as originals. The effective date ("Effective Date") of the Contract is the date when the last party signs the Contract.

4. TITLE EVIDENCE. Within thirty (30) days from the Effective Date of this Contract, Buyer shall examine title to the Property. If the title is found to be defective in Buyer's opinion, Buyer shall notify Seller in writing specifying the defects, and Seller shall have one hundred twenty (120) days from receipt of notice within which to cure the defects and the date for closing shall be accordingly extended. If Seller is unsuccessful in removing the defects within that time to Buyer's reasonable satisfaction, Buyer shall have the option of either (i) accepting title as it then is, including the title defect, or (ii) terminating this Contract, whereupon Buyer and Seller shall be released for all obligations under the Contract.

5. SELLER'S AFFIDAVITS AS TO UNRECORDED MATTERS, POSSESSION AND MECHANIC'S LIENS. Subject to any provisions in the Contract to the contrary, Seller must furnish to Buyer at closing affidavits in a form acceptable to the Buyer and sufficient to remove standard printed exceptions to title in an owner's policy of title insurance regarding (i) unrecorded matters (except for taxes not yet due and payable and special assessments not shown by the public records), (ii) parties in possession, except for the rights of tenants, if any, as tenants only, in possession and occupancy of the Property under written leases which have been furnished to Buyer by Seller and

accepted by Buyer in writing, and (iii) mechanic's liens. Seller represents to Buyer that there are and at closing there will be no tenants or lessees occupying the Property or any portion of the Property. The Seller's Affidavits must contain information required for completion of Internal Revenue Service 1099 Form and a FIRPTA disclosure.

6. COSTS AND EXPENSES. Seller and Buyer will pay costs and expenses as follows: prorated ad valorem taxes and assessments (Seller); Deed Documentary Stamp Tax (Seller); Survey (Buyer); Title Insurance (Buyer); Recording of Deed (Buyer); Buyer's Attorney's Fees (Buyer); Seller's Attorney's Fees (Seller); Environmental Assessment (Buyer), costs to cure title defects and encumbrances on title (Seller).

7. BROKERS. Neither Buyer nor Seller have utilized the services of, or for any other reason owes compensation to, a licensed real estate broker.

8. TAXES AND ASSESSMENTS. All real estate taxes and assessments which are or which may become a lien against the Property must be satisfied by Seller at closing. In the event the closing occurs between January 1 and November 1, Seller must, in accordance with Section 196.295, Florida Statutes, place in escrow with the county tax collector an amount equal to the current taxes prorated to the date of transfer, based upon the current assessment and millage rates on the Property. In the event the closing occurs on or after November 1, Seller must pay to the tax collector an amount equal to the taxes that are determined to be legally due and payable.

9. CONVEYANCE AND TRANSFER OF TITLE. Seller shall convey title to the Property by Warranty Deed.

10. CLOSING. This transaction will be closed and the Warranty Deed and other closing documents prepared by the Office of the County Attorney, 221 Palafox Place, Suite 430, Pensacola, Florida 32502. Closing shall occur on or before thirty (30) days from the date Buyer receives an approved and executed Phase II grant funding agreement for the Delano Drainage Project from the Florida Division of Emergency Management.

11. CLOSING PROCEDURE; DISBURSEMENT OF PROCEEDS OF SALE. At closing, Seller shall deliver the Warranty Deed and the proceeds of the sale will be disbursed to Seller in accordance with a settlement statement signed by both parties.

12. FAILURE OF PERFORMANCE. If Buyer fails or refuses to perform the Contract and Seller is not in default under this Contract, Seller will receive reasonable costs incurred by the Seller in reliance on the Contract, to be paid by Buyer as liquidated damages, consideration for the execution of the Contract, and in full settlement of any claims for damages, and as Seller's sole remedy under the Contract, and Seller have no right of specific performance. If Seller fails or refuses to perform the Contract for any reason and Buyer is not in default under the Contract, (i) Buyer may proceed in law or in equity to enforce Buyer's rights under the Contract, or (ii) Buyer may elect to

terminate the Contract and to receive the reimbursement from Seller for all costs and expenses Buyer incurred with regard to the Contract in full settlement of any claims for damages.

13. ATTORNEYS' FEES; COSTS. Each party shall be responsible for their own attorneys' fees and costs in connection with any litigation or other dispute resolution proceeding.

14. SURVIVAL. All representations and warranties contained in the Contract and any provision of the Contract which by their nature and effect are required to be observed, kept or performed after closing, (i) survive closing and the delivery of the Warranty Deed, and (ii) remain binding upon and for the benefit of the parties to the Contract, their respective successors and assigns, until fully observed, kept or performed.

15. ASSIGNABILITY. Buyer and Seller cannot assign the Contract or rights under the Contract without the express written consent of the other.

16. RISK OF LOSS. The risk of loss to the Property is the responsibility of Seller until closing.

17. RADON GAS. Radon is a naturally occurring radioactive gas that, when it has accumulated in a building in sufficient quantities, may present health risks to persons who are exposed to it over time. Levels of radon that exceed federal and state guidelines have been found in buildings in Florida. Additional information regarding radon and radon testing may be obtained from the Escambia County public health unit.

18. OTHER AGREEMENTS. No prior or present agreements or representations are binding upon Buyer or Seller unless included in the Contract. No modification or change in the Contract are valid or binding upon the parties unless in writing and executed by the parties to be bound.

19. NOTICES. Any notice or demand to be given or that may be given under this Contract must be in writing and delivered by hand or delivered through the United States mail to:

TO BUYER:
Office of the County Engineer
Real Estate Division
3363 West Park Place
Pensacola, Florida 32505

TO SELLER:
Rocky's Collision Center, Inc.
450 West Herman Street
Pensacola, Florida 32505

WITH A COPY TO:
Escambia County Attorney's Office
221 Palafox Place, Suite 430
Pensacola, Florida 32502

20. COUNTERPARTS. The Contract will be executed in duplicate counterparts, both of which taken together constitute one and the same instrument and any party or signatory may execute the Contact by signing a counterpart.

21. THIRD PARTY LEASES AND CONTRACTS. Seller shall at closing furnish to Buyer releases from any mortgage or existing leases.

22. SURVEY. Buyer may obtain a survey at its own expense. If Buyer prepares a survey and objectionable items are disclosed, objectionable matters will be viewed as title defects and the provisions of Paragraph 4 shall apply.

23. INSPECTION OF PROPERTY. Upon reasonable notice and without disruption of Seller's current use of the Property, Buyer may have subsurface investigations and environmental audits of the Property made by qualified geotechnical and environmental engineers sufficient in the judgment of the inspecting engineer to ascertain whether or not the Property meets the standards acceptable to Buyer. In the event that the report indicates that the Property does not meet Buyer's standards, Buyer, by notice to Seller on or before 10 days prior to closing, has the option of terminating the Contract. Seller warrants that there are no facts known to Seller materially affecting the value of the Property that are not readily observable by Buyer or which have not been disclosed to Buyer.

24. ACCESS. Upon prior notice to Seller, Buyer and Buyer's agents and representatives shall have the right to access the Property at any reasonable time prior to closing for the purpose of making the investigations, environmental audits, inspections and surveys authorized by the Contract, provided neither Buyer nor its agents interfere with the use of the Property by Seller or its employees or customers.

25. OCCUPANCY AND POSSESSION. Seller warrants delivery of possession of the Property to Buyer at closing.

26. CONDEMNATION. Seller conveys by sale the Property for public use and waives any right to compensation for the Property other than as provided for in the Contract. If at any time prior to closing, the Property or any portion of the Property is taken by the exercise of eminent domain by another entity possessing those powers or if any preliminary steps in any taking by eminent domain of all or any portion of the Property occurs prior to closing, Buyer may, at Buyer's option, within 10 days after notice of this fact from Seller, rescind the Contract, and Buyer and Seller shall be released, as to one another, of all further obligations under the Contract. Seller shall notify Buyer of any taking by eminent domain and all steps preliminary to any taking immediately upon Seller's knowledge of the occurrence. If Buyer does not exercise Buyer's option to rescind under this Paragraph, the Contract remains in full force and effect. In this event Seller, (i) shall pay to Buyer at closing all proceeds previously received by Seller from the condemning authority, and (ii) shall assign to Buyer at closing all proceeds to be paid by the condemning authority after closing by

an instrument of assignment in a form reasonably acceptable to Buyer.

27. FOREIGN INVESTMENT AND REAL PROPERTY TAX ACT (FIRPTA) AFFIDAVIT. Seller agrees to furnish to Buyer at closing a transferor's certification disclosing under penalty of perjury Seller's foreign or non-foreign status and Seller's United States federal identification number. The certification must be, (i) in a form acceptable to Buyer, and (ii) if Buyer has non-foreign status, in a form meeting the requirements of Section 1445(a) of the Internal Revenue Code of 1986, as amended, and the Regulations under Section 1445(a).

THIS CONTRACT IS INTENDED TO BE A LEGALLY BINDING CONTRACT. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

THIS CONTRACT SHALL NOT BE EFFECTIVE UNLESS APPROVED BY THE ESCAMBIA COUNTY BOARD OF COUNTY COMMISSIONERS AT A DULY NOTICED PUBLIC MEETING.

Attn: Stacey Ward Coker, Real Estate Acquisition Manager

RE: Appraisal Report
Mixed-Use Commercial Property
416 & 450 West Herman Street, Pensacola

Dear Ms. Coker:

As requested, an inspection has been made of the referenced property for the purpose of estimating the market value of each of the three parcels that together make up the entire ownership. In compliance with the *Uniform Standards of Professional Appraisal Practice*, this is an appraisal report, being a narrative report to include all data necessary for us to complete our work within the scope of our assignment.

Market value will be defined in the following report, but basically assumes a willing buyer and seller, both knowledgeable of the subject real estate market and with the valuation at the property's highest and best use.

As will be shown by photographs and more fully described and analyzed herein, the subject property consists of three adjoining tax parcels with one ownership. We have been asked to appraise the three tax parcels separately, determining current market values for each. The three subject parcels have been designated as Parcel A, Parcel B, and Parcel C. Parcel A, identified as 416 West Herman Street, includes approximately 48,332 square

feet of land and a 2,000-square foot office building with about one-third of the building being garage. Parcel B, identified as 416 West Herman Street (behind), includes approximately 21,433 square feet of land and a 5,136-square foot officed warehouse building. Parcel C, identified as 450 West Herman Street, includes approximately 21,205 square feet of land and an 8,020-square foot officed warehouse building.

Subject to the above and the limiting conditions and certification as set forth herein, it is our opinion that the market value of the real estate described as being Subject Parcel A, or 416 Herman Street (Front), as of January 14, 2019, is:

ONE HUNDRED EIGHTY-FIVE THOUSAND DOLLARS

$185,000

Subject to the above and the limiting conditions and certification as set forth herein, it is our opinion that the market value of the real estate described as being Subject Parcel B, or 416 Herman Street (Rear), as of January 14, 2019, is:

TWO HUNDRED FIFTY-FIVE THOUSAND DOLLARS

$255,000

Subject to the above and the limiting conditions and certification as set forth herein, it is our opinion that the market value of the real estate described as being Subject Parcel C, or 450 Herman Street, as of January 14, 2019, is:

THREE HUNDRED EIGHTY THOUSAND DOLLARS

$380,000

At these values, it is assumed the exposure time is about nine to fifteen months. It is also assumed marketing is through someone knowledgeable of the property and the real estate market for these types of property.

We hereby certify we have no interest, present or contemplated, in the appraised property. This appraisal has been prepared utilizing all of the requirements set forth as standards for real estate appraisals as established for federally related transactions in the State of Florida. The appraisal conforms to the *Uniform Standards of Professional Appraisal Practice* (USPAP). The fee for this appraisal was not based on a minimum value nor was the assignment undertaken based on a pre-determined value or guaranteed loan amount.

We appreciate the opportunity of doing this work for you. After your review, should you have questions, please call.

Respectfully submitted,

Presley-McKenney & Associates, Inc.

Re: Appraisal of
An Improved Commercial Property
416 & 450 W. Herman Street
Pensacola, Florida 32505
AAC Job 19-2373

Dear Ms. Wieborg:

Per the terms of my engagement, I have made a recent inspection of the referenced property for the purpose of providing an opinion of the market value of the fee simple ownership estate as of a current date. Based on the information provided, my inspection and valuation analysis, it is my opinion that the market value of the three identified parcels of record "As-Is" in fee simple estate, as of the recent date of January 22, 2019, is as follows:

MARKET VALUE OPINIONS – FEE SIMPLE INTEREST

PARCEL "A" (450 W. HERMAN STREET):	**$425,000**
PARCEL "B" (416 W. HERMAN STREET - FRONT):	**$175,000**
PARCEL "C" (416 W. HERMAN STREET - REAR):	**$270,000**
COMBINED PROPERTY TOTAL:	**$870,000**

This valuation analysis is performed under the extraordinary assumption that Parcel "C" has been granted an access/utility easement over the existing driveway that traverses Parcels "A" and "B". The use of this extraordinary assumption is necessary to enable Parcel "C" to be operated independently of the two other parcels under the same ownership. The reader should be aware that the use of this extraordinary assumption may have affected the assignment results.

This is a narrative appraisal report, which is intended to comply with the reporting requirements set forth within the Uniform Standards of Professional Appraisal Practice. The reader is advised that the level of detail presented within this report is in a summarized format with supporting documentation pertaining to data, reasoning, and the analyses retained in the appraiser's work file.

Marcia Wieborg, Escambia County Engineering Dept. January 25, 2019

This appraisal has been made in compliance with the Uniform Standards of Professional Appraisal Practice (USPAP), the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA), and with the Code of Professional Ethics of the Appraisal Institute. This appraisal assignment was not made, nor was the appraisal rendered on the basis of a requested minimum valuation, specific valuation, or an amount, which would result in the approval of a loan.

I estimate a reasonable marketing period at 9 to 15 months for all three parcels. This estimate is based on my review of sales of similar properties within the same market area.

I appreciate the opportunity to perform this work for Escambia County. If there should be any questions, please do not hesitate to call.

Sincerely,

Joel J. Asmar, MAI

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16089 **County Administrator's Report 10. 5.**
BCC Regular Meeting **Discussion**
Meeting Date: 05/16/2019
Issue: Acquisition of Real Property Located at 4253 Erress Boulevard
From: TONYA GREEN, Neighborhood & Human Services Director
Organization: Neighborhood & Human Svcs
CAO Approval:

RECOMMENDATION:

Recommendation Concerning the Acquisition of Real Property Located at 4253 Erress Boulevard for the Erress Boulevard and Diego Circle Blight Reduction Project - Tonya Green, Neighborhood & Human Services Department Director

That the Board either approve, by super majority vote, or deny the following action:

A. Authorize the purchase of real property located at 4253 Erress Boulevard (0.080 acres), from JoAnna Lyn Cope, for the Erress Boulevard and Diego Circle Blight Reduction Project, in the amount of $20,000 (County's appraised value is $18,000);

B. Approve the Contract for Sale and Purchase for the acquisition of real property located at 4253 Erress Boulevard (0.080 acres); and

C. Authorize the County Attorney's Office to prepare, and the Chairman or Vice Chairman to execute any documents, subject to Legal review and sign-off, necessary to complete the acquisition of this property without further action of the Board.

This parcel is located in District 3.

[Funding Source: Fund 129, 2017 CDBG, Cost Center 370231]

BACKGROUND:

Westernmark subdivision located on Erress Boulevard and Valencia Arms subdivision located on Diego Circle are neighborhoods located within the CRA Palafox Redevelopment District. Many of these units in the neighborhood have become neglected and/or abandoned leading to severe blighted and slum conditions. Escambia County has conducted multiple refuse "clean sweeps" through the neighborhood; there have been numerous repetitive code violations in which properties currently have outstanding liens.

During the June 22, 2017 BCC Meeting, the Board authorized staff to begin the process to pursue acquisition on all properties that had vacant lots and unoccupied structures. Neighborhood and Human Services (NHS) staff had identified over 30 potential parces to solicit for acquisitions. NHS staff have sent correspondences to all identified vacant properties and continues to solicit for acquisitions through correspondences as properties become vacant. NHS staff continues to perform appraisals, title commitments, and other related activities to implement the project. An acquisition checklist has been provided with this recommendation.

A prelimary offer was made to the property owner for the appraised value of the property, but the property owner has counter-offered with $20,000 (Exhibit II). Four votes from the Board would be needed to authorize this purchase price over the County appraisal of $18,000.

BUDGETARY IMPACT:

Funding for acquisition of this property noted above is budgeted in Fund 129, 2017 CDBG, Cost Center 370231.

LEGAL CONSIDERATIONS/SIGN-OFF:

The Contract for Sale and Purchase has been reviewed and approved by Stephen West, Senior County Attorney. The County Attorney's office will prepare the closing documents and conduct the closing for the purchase of this property. Mr. West also noted via an email dated April 9, 2019: the Seller would need to undertake significant steps to make the title insurable, and it would not be reasonable to expect the Seller to be willing or able to take these steps.

PERSONNEL:

All work associated with this request is being done in-house and no additional staff is required.

POLICY/REQUIREMENT FOR BOARD ACTION:

These actions are consistent with the provisions of Section 46-139 of the Escambia County code of Ordinances.

IMPLEMENTATION/COORDINATION:

Upon Board approval, staff will maintain compliance with Section 46-139 of the County Codes and will implement in consultation with the County Attorney's office.

Contract with Backup Docs

CONTRACT FOR SALE AND PURCHASE

This is a Contract for Sale and Purchase ("Contract"), between JoAnna Lyn Cope, whose address is 1900 Dr. Martin Luther King, Jr. Drive, Pensacola, Florida 32503 ("Seller"), and ESCAMBIA COUNTY, a political subdivision of the State of Florida, acting by and through its duly authorized Board of County Commissioners, whose address is 221 Palafox Place, Pensacola, Florida 32502 ("Buyer").

1. AGREEMENT. Seller agrees to sell and Buyer agrees to buy the real property described in Exhibit A, together with all structures, fixtures, and improvements (the "Property") upon the terms and conditions stated in this Contract. Authorization for this purchase was obtained during a duly advertised meeting of the Board of County Commissioners held on May 16, 2019.

2. PURCHASE PRICE; PAYMENT. The purchase price is $20,000, payable to Seller at closing.

3. TIME FOR ACCEPTANCE; EFFECTIVE DATE; FACSIMILE. If the Contract is not executed by and delivered to all parties, or fact of execution communicated in writing between the parties, the Contract will be null and void. A facsimile copy of the Contract and any signatures on the Contract will be considered for all purposes as originals. The effective date ("Effective Date") of the Contract is the date when the last party signs the Contract.

4. TITLE EVIDENCE. Within thirty (30) days from the Effective Date of this Contract, Buyer shall examine title to the Property. If the title is found to be defective in Buyer's opinion, Buyer shall notify Seller in writing specifying the defects, and Seller shall have one hundred twenty (120) days from receipt of notice within which to cure the defects and the date for closing shall be accordingly extended. If Seller is unsuccessful in removing the defects within that time to Buyer's reasonable satisfaction, Buyer shall have the option of either (i) accepting title as it then is, including the title defect, or (ii) terminating this Contract, whereupon Buyer and Seller shall be released for all obligations under the Contract.

5. SELLER'S AFFIDAVITS AS TO UNRECORDED MATTERS, POSSESSION AND MECHANIC'S LIENS. Subject to any provisions in the Contract to the contrary, Seller must furnish to Buyer at closing affidavits in a form acceptable to the Buyer and sufficient to remove standard printed exceptions to title in an owner's policy of title insurance regarding (i) unrecorded matters (except for taxes not yet due and payable and special assessments not shown by the public records), (ii) parties in possession, except for the rights of tenants, if any, as tenants only, in possession and occupancy of the Property under written leases which have been furnished to Buyer by Seller and accepted by Buyer in writing, and (iii) mechanic's liens. Seller represents to Buyer that there are and at closing there will be no tenants or lessees occupying the Property or any portion of the Property. The Seller's Affidavits must contain information required for completion of Internal Revenue Service 1099 Form and a FIRPTA disclosure.

6. COSTS AND EXPENSES. Seller and Buyer will pay costs and expenses as follows: prorated ad valorem taxes and assessments (Seller); Deed Documentary Stamp Tax (Seller); Survey (Buyer); Title Insurance (Buyer); Recording of Deed (Buyer); Buyer's Attorney's Fees (Buyer); Seller's Attorney's Fees (Seller); Environmental Assessment (Buyer), costs to cure title defects and encumbrances on title (Seller).

7. BROKERS. Neither Buyer nor Seller has utilized the services of, or for any other reason owes compensation to, a licensed real estate broker.

8. TAXES AND ASSESSMENTS. All real estate taxes and assessments which are or which may become a lien against the Property must be satisfied by Seller at closing. In the event the closing occurs between January 1 and November 1, Seller must, in accordance with Section 196.295, Florida Statutes, place in escrow with the county tax collector an amount equal to the current taxes prorated to the date of transfer, based upon the current assessment and millage rates on the Property. In the event the closing occurs on or after November 1, Seller must pay to the tax collector an amount equal to the taxes that are determined to be legally due and payable.

9. CONVEYANCE AND TRANSFER OF TITLE. Seller shall convey title to the Property by Warranty Deed.

10. CLOSING. This transaction will be closed and the Warranty Deed and other closing documents prepared by the Office of the County Attorney, 221 Palafox Place, Suite 430, Pensacola, Florida 32502. Closing shall occur on or before thirty (30) days from the Effective Date of this Contract unless the date for closing is extended by mutual agreement of the parties or as otherwise provided in this Contract.

11. CLOSING PROCEDURE; DISBURSEMENT OF PROCEEDS OF SALE. At closing, Seller shall deliver the Warranty Deed and the proceeds of the sale will be disbursed to Seller in accordance with a settlement statement signed by both parties.

12. FAILURE OF PERFORMANCE. If Buyer fails or refuses to perform the Contract and Seller is not in default under this Contract, Seller will receive the deposit/earnest money, if any, plus all interest accrued, and other reasonable costs incurred by the Seller in reliance on the Contract, to be paid by Buyer as liquidated damages, consideration for the execution of the Contract and in full settlement of any claims for damages and as Seller's sole remedy under the Contract and Seller has no right of specific performance. If Seller fails or refuses to perform the Contract for any reason and Buyer is not in default under the Contract, (i) Buyer may proceed in law or in equity to enforce Buyer's rights under the Contract, or (ii) Buyer may elect to terminate the Contract and to receive the return of Buyer's deposit, plus interest earned, and reimbursement from Seller for all costs and expenses Buyer incurred with regard to the Contract in full settlement of any claims for damages.

13. ATTORNEYS' FEES; COSTS. Each party shall be responsible for their own attorneys' fees and costs in connection with any litigation or other dispute resolution proceeding.

14. SURVIVAL. All representations and warranties contained in the Contract and any provision of the Contract which by their nature and effect are required to be observed, kept or performed after closing, (i) survive closing and the delivery of the Warranty Deed, and (ii) remain binding upon and for the benefit of the parties to the Contract, their respective successors and assigns, until fully observed, kept or performed.

15. ASSIGNABILITY. Buyer and Seller cannot assign the Contract or rights under the Contract without the express written consent of the other.

16. RISK OF LOSS. The risk of loss to the Property is the responsibility of Seller until closing.

17. RADON GAS. Radon is a naturally occurring radioactive gas that, when it has accumulated in a building in sufficient quantities, may present health risks to persons who are exposed to it over time. Levels of radon that exceed federal and state guidelines have been found in buildings in Florida. Additional information regarding radon and radon testing may be obtained from the Escambia County public health unit.

18. OTHER AGREEMENTS. No prior or present agreements or representations are binding upon Buyer or Seller unless included in the Contract. No modification or change in the Contract are valid or binding upon the parties unless in writing and executed by the parties to be bound.

19. NOTICES. Any notice or demand to be given or that may be given under this Contract must be in writing and delivered by hand or delivered through the United States mail to:

TO BUYER:
Neighborhood Enterprise Division
c/o Meredith Reeves
221 Palafox Place, Suite 200
Pensacola, Florida 32502

TO SELLER:
JoAnna Lyn Cope
1900 Dr. Martin Luther King, Jr. Drive
Pensacola, FL 32503

WITH A COPY TO:
Escambia County Attorney's Office
221 Palafox Place, Suite 430
Pensacola, Florida 32502

20. COUNTERPARTS. The Contract will be executed in duplicate counterparts, both of which taken together constitute one and the same instrument and any party or signatory may execute the Contact by signing a counterpart.

21. THIRD PARTY LEASES AND CONTRACTS. Seller shall at closing furnish to Buyer releases from any mortgage or existing leases.

22. SURVEY. Buyer may obtain a survey at its own expense. If Buyer prepares a survey and objectionable items are disclosed, objectionable matters will be viewed as title defects and the provisions of Paragraph 4 shall apply.

23. INSPECTION OF PROPERTY. Upon reasonable notice and without disruption of Seller's current use of the Property, Buyer may have subsurface investigations and environmental audits of the Property made by qualified geotechnical and environmental engineers sufficient in the judgment of the inspecting engineer to ascertain whether or not the Property meets the standards acceptable to Buyer. In the event that the report indicates that the Property does not meet Buyer's standards, Buyer, by notice to Seller on or before 10 days prior to closing, has the option of terminating the Contract and Seller agrees to return any deposit paid by Buyer. Seller warrants that there are no facts known to Seller materially affecting the value of the Property, which are not readily observable by Buyer or which have not been disclosed to Buyer.

24. ACCESS. Upon prior notice to Seller, Buyer and Buyer's agents and representatives shall have the right to access the Property at any reasonable time prior to closing for the purpose of making the investigations, environmental audits, inspections and surveys authorized by the Contract, provided neither Buyer nor its agents interfere with the use of the Property by Seller or its employees or customers.

25. OCCUPANCY AND POSSESSION. Seller warrants delivery of possession of the Property to Buyer at closing.

26. CONDEMNATION. Seller conveys by sale the Property for public use and waives any right to compensation for the Property other than as provided for in the Contract. If at any time prior to closing, the Property or any portion of the Property is taken by the exercise of eminent domain by another entity possessing those powers or if any preliminary steps in any taking by eminent domain of all or any portion of the Property occurs prior to closing, Buyer may, at Buyer's option, within 10 days after notice of this fact from Seller, rescind the Contract and Seller must return any deposit paid under the Contract to Buyer. Upon refund of the deposit, plus any interest earned, Buyer and Seller are released, as to one another, of all further obligations under the Contract. Seller shall notify Buyer of any taking by eminent domain and all steps preliminary to any taking immediately upon Seller's knowledge of the occurrence. If Buyer does not exercise Buyer's option to rescind under this Paragraph, the Contract remains in full force and effect. In this event Seller, (i) shall pay to Buyer at closing all proceeds previously received by Seller from the condemning authority, and (ii) shall assign to Buyer at closing all proceeds to be paid by the condemning authority after closing by an instrument of assignment in a form reasonably acceptable to Buyer.

27. FOREIGN INVESTMENT AND REAL PROPERTY TAX ACT (FIRPTA) AFFIDAVIT. Seller agrees to furnish to Buyer at closing a transferor's certification disclosing under penalty of perjury Seller's foreign or non-foreign status and Seller's United States federal identification number. The certification must be, (i) in a form acceptable to Buyer, and (ii) if Buyer has non-foreign status, in a form meeting the requirements of Section 1445(a) of the Internal

Revenue Code of 1986, as amended, and the Regulations under Section 1445(a).

THIS CONTRACT IS INTENDED TO BE A LEGALLY BINDING CONTRACT. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

THIS CONTRACT SHALL NOT BE EFFECTIVE UNLESS APPROVED BY THE ESCAMBIA COUNTY BOARD OF COUNTY COMMISSIONERS AT A DULY NOTICED PUBLIC MEETING.

AMERICAN LAND TITLE ASSOCIATION COMMITMENT

SCHEDULE B - SECTION I

Commitment No.: **122799-59**

1. Pay and/or disburse the agreed amounts for the interest in the land to be insured and/or according to the mortgage to be insured.

2. Pay us the premiums, fees and charges for the policy.

3. Pay all taxes and/or assessments, levied and assessed against the land, which are due and payable.

4. The following documents, satisfactory to us, creating the interest in the land and/or the mortgage to be insured, must be signed, delivered and recorded:

   a. **Warranty Deed from JoAnna Lyn Cope, as a single person or joined by spouse, if married, to Escambia County, Florida conveying the land.**

5. **Title to captioned property was conveyed by Tax Deed filed in Official Records Book 7079, Page 648. If the tax deed is at least four(4) years old and a thorough examination of the tax deed proceedings reveal all statutory and procedural requirements have been met, the following Affidavits must be obtained and filed prior to the filing of the proposed insured documents: Affidavit stating that the parties that lost the property, or anyone claiming by, through or under them, has not been in actual possession of said property within one year, or more, following the issuance of the tax deed; and Affidavit stating that the grantee on the Tax Deed, and/or anyone claiming by, through or under them, has been in continuous adverse possession of the property for a minimum of four consecutive years, following the issuance of the Tax Deed.**

6. **Release or Satisfaction of Nuisance Abatement Liens in favor of Escambia County, Florida recorded in Official Records Book 6785, Page 561, Official Records Book 6862, Page 857 and Official Records Book 8081, Page 215, of the Public Records of Escambia County, Florida.**

7. **Recordation of proof that Joanne Cope, the grantor(s) in that certain deed recorded in Official Records Book 7130, Page 1849, was unmarried at the time of conveyance, or that the property was not the homestead of the said grantor(s).**

8. **Recordation of proof that Timothy Vaughn, the grantor(s) in that certain deed recorded in Official Records Book 7135, Page 58, was unmarried at the time of conveyance, or that the property was not the homestead of the said grantor(s).**

9. **Redemption of Tax Certificate No. 2270, sale of 2017 for the year of 2016 taxes for Account No. 092S301000082008.**

10. **Redemption of Tax Certificate No. 2328, sale of 2018 for the year of 2017 taxes for Account No. 092S301000082008.**

11. **Payment of taxes for the year 2018 Tax I.D. # 092S301000082008 ; Assessed Value $14,300.00; Gross Amount $365.64; Exemptions: No. Note: Any tax amount(s) shown herein are for informational purposes only, and should be verified with the appropriate taxing authority(s).**

12. **Written evidence, from appropriate governmental authorities, that Special Taxing District, City and County Special Assessment Liens, MSBU Assessment Liens, Impact Fees, and Water, Sewer and Trash Removal Charges, if any, have been paid.**

13. **Perform an Office of Foreign Asset Control (OFAC) search (formerly known as a Patriot Act search) on all seller(s) and/or buyer(s), and follow proper procedures if any party's name appears on OFAC's Specially Designated Nationals (SDN) list.**

14. **NOTE: FOR INFORMATIONAL PURPOSES ONLY: The following constitutes a 24 month Chain of Title preceding the effective date hereof and constitutes conveyances and transfers of ownership only: 1. Deed recorded February 14, 2014 in Official Records Book 7135, Page 58, of the Public Records of Escambia County, Florida.**

Item A of Schedule B - Section II is hereby deleted. However, immediately prior to the disbursement of the closing proceeds, the search of the public records must be continued from the effective date hereof. The Company reserves the right to raise such further exceptions and requirements as an examination of the information revealed by such search requires, provided, however, that such exceptions or requirements shall not relieve the Company from its liability under this Commitment arising from the matters which would be revealed by such search, to the extent that Company, or its Agent countersigning this Commitment, has disbursed said proceeds.

AMERICAN LAND TITLE ASSOCIATION COMMITMENT

SCHEDULE B - SECTION II

Commitment No.: **122799-59**

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

A. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the Proposed Insured acquires for value of record the estate or interest or mortgage thereon covered by this Commitment.

1. Any rights, interests or claims of parties in possession of the land not shown by the public records.
2. Any encroachment, encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the land.
3. Any lien for services, labor, or materials in connection with improvements, repairs or renovations provided before, on, or after Date of Policy, not shown by the public records.
4. Any dispute as to the boundaries caused by a change in the location of any water body within or adjacent to the land prior to Date of Policy, and any adverse claim to all or part of the land that is, at Date of Policy, or was previously under water.
5. Taxes or special assessments not shown as lien in the public records or in the records of the local tax collecting authority, at Date of Policy.
6. Any minerals or mineral rights leased, granted or retained by current or prior owners.
7. Taxes and assessments for the year 2019 and subsequent years, which are not yet due and payable.
8. **Restrictions, reservations, setbacks and easements, if any, as indicated and/or shown on that certain Plat recorded in Plat Book 7, at Page 81.**
9. **Restrictions, covenants, conditions and easements as contained in that certain instrument recorded in Official Records Book 497, Page 526 and amended in Official Records Book 533, Page 898.**
10. **Gulf Power Company Easement as recorded in Official Records Book 523, Page 466.**
11. **Rights of adjoining owners in Party Wall(s) located partly on the land and partly on abutting property and rights of such adjoining owners in common, with the owner of the land in the roof of such building and in any appurtenances which are susceptible to common use; together with all liability for maintenance, repair and damage which common use entails.**
12. **Existing unrecorded leases and all right thereunder of the lessees and of any person claiming by, through or under lessees.**
13. **Any lien as provided for by Chapter 159, Florida Statutes, in favor of any city, town, village or port authority for unpaid service charges for service by any water, sewer or gas systems supplying the lands described herein.**

Note: All the recording information contained herein refers to the Public Records of Escambia County, Florida, unless otherwise indicated. Any reference herein to a Book and Page or Instrument Number is a reference to the Official Records Books of said county, unless indicated to the contrary.

QUIT CLAIM DEED

THIS QUIT CLAIM DEED is made this 3rd day of February, 2014, between Joanne Cope, whose address is 3970 Piedmont Rd Pensacola Fl. 32503 ("Grantor"), and [redacted] whose post office address [redacted] ("Grantee"). TIMOTHY VAUGHN 825 MACKENZIE RD. CANTONMENT 32533

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees.)

WITNESSETH, that said Grantor, for and in consideration of the sum of FIVE THOUSAND DOLLARS ($5,000) and other good and valuable consideration to said Grantor in hand paid by said Grantee, the receipt of which is hereby acknowledged, does hereby remise, release, and quitclaim to the said Grantee, and Grantee's successors and assigns forever, all the right, title, interest, claim, and demand which Grantor has in and to the following described lands situated, lying, and being in Escambia County, Florida, to wit:

UNIT 22 BEG AT NE COR OF LT 8 THENCE ALG E LI OF SD LT S 8 DEG 12 MIN 0 SEC E 51 70/100 FT FOR POB THENCE CONT ALG SD LI S 8 DEG 12 12 MIN 0 SEC E 19 93/100 FT THENCE S 81 DEG 28 MIN 27 SEC W 165 FT TO W LI OF SD LT 8 THENCE ALG W LI N 8 DEG 12 MIN 0 SEC W 19 93/100 FT THENCE N 81 DEG 28 MIN 27 SEC E 165 FT TO POB PART OF LT 8 BLK H WESTERNMARK S/D PB 7 P 81 OR 4972 P 826

Parcel Number: 092S301080082008

Property Address: 4253 Errese Blvd, Pensacola FL 32505

Subject, however to all covenants, conditions, restrictions, reservations, limitations, easements, real estate taxes, utility liens, and to all applicable zoning ordinances, restrictions and prohibitions imposed by governmental authorities, and any adjacent parcel liens or boundary disputes, if any.

TO HAVE AND TO HOLD, the same together with all and singular the appurtenances thereto belonging or in anywise appertaining, and all the estate, right, title, interest, lien, equity, and claim whatsoever of Grantors, either in law or equity, for the use, benefit, and profit of the said Grantee forever.

IN WITNESS WHEREOF, Grantor has hereunto set Grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

NOTICE OF LIEN
(Nuisance Abatement)

STATE OF FLORIDA
COUNTY OF ESCAMBIA

This lien is imposed by Escambia County, Florida, for certain costs incurred by the County to abate violations of the County Nuisance Abatement Ordinance, Sections 42-191 – 42-198, Escambia County Code of Ordinances, on property owned by James T White Jr. located at 4253 Erress Blvd. and more particularly described as:

PR#092S301000082008

UNIT 22 BEG AT NE COR OF LT 8 THENCE ALG E LI OF SD LT S 8 DEG 12 MIN 0 SEC E 51 70/100 FT FOR POB THENCE CONT ALG SD LI S 8 DEG 12 12 MIN 0 SEC E 19 93/100 FT THENCE S 81 DEG 28 MIN 27 SEC W 165 FT TO W LI OF SD LT 8 THENCE ALG W LI N 8 DEG 12 MIN 0 SEC W 19 93/100 FT THENCE N 81 DEG 28 MIN 27 SEC E 165 FT TO POB PART OF LT 8 BLK H WESTERNMARK S/D PB 7 P 81 OR 4972 P 826

A field investigation by the Office of Environmental Enforcement was conducted on August 2, 2011 and revealed the property to be in violation of the following provisions of the Escambia County Nuisance Abatement Ordinance: 42-196(a), (b), and (d)

Following notice and written demand to the owner by certified mail, return receipt requested, and posting in accordance with Section 42-164, Escambia County Code of Ordinances, and the owner having not abated the violation or requested or demonstrated at a hearing before the Escambia County Board of County Commissioners that the property is not in violation of the referenced provisions of the ordinance within ten days of the date of the written demand (or in the case of a repeat violation, within three days of the date of the written demand) the County abated the violations and incurred the following costs, which shall constitute a lien against the property:

Abatement costs	$325.00
Administrative costs	$250.00
Total	$575.00

46/year @ 368.00 + 372.50

The principal amount of this lien shall bear interest at a rate of 8% per annum; provided, however, that no interest shall accrue until the 30th day after the filing of the lien in the official records of the Clerk of the Circuit Court. This lien may be enforced at any time by the Board of County Commissioners after 30 days from the date of recording this Notice of Lien to recover the amount due, together with all costs and reasonable attorneys' fees, by proceeding in a court

of equity to foreclose liens in the manner in which a mortgage lien is foreclosed or as collection and enforcement of payment may be accomplished by other methods authorized by law.

ORDER

THIS CAUSE was brought before the Office of the Environmental Enforcement Special Magistrate on Petitioner's Certification of Costs, pursuant to the Special Magistrate's Order of January 22, 2013; and the Special Magistrate having found the Respondent in violation of Escambia County Code of Ordinances 42-196 (a) Nuisance Conditions, (b) Trash & Debris, (d) Overgrowth, 30-203 (p), (t), (u) an (x). Escambia County made certain repairs to bring the property into compliance and that the repairs were reasonable and necessary. Escambia County having given the Respondent notice of the fines and abatement costs and the Respondent having failed to timely object thereto. THEREFORE, the Special Magistrate being otherwise fully advised of the premises; it is hereby ORDERED, pursuant to Section 30-35 of the Escambia County Code of Ordinances, that in addition to the costs of $1,100.00 imposed by the Order of Special Magistrate dated January 22, 2013, the following itemized fines and abatement fees are hereby imposed as follow:

Itemized	Cost
a. Fines ($50.00 per day 2/22/13 - 3/14/16)	$55,800.00
b. County Abatement Fees	$ 650.00
Total	$56,450.00 which

together with the previously imposed costs of $1,100.00 makes a total of $57,550.00.

DONE AND ORDERED at Escambia County, Florida, this 23rd day of May, 2016.

BOUNDARY SURVEY

EXHIBIT "A"

Legal Description: (Per O.R. Book 4972, Page 828)
Prepared at the request of the Community Redevelopment Agency
July 05, 2018

Portions of Block "H", Westernmark Subdivision, Section 9, Township 2 South, Range 30 West, Escambia County, Florida, recorded in Plat Book 7,Page 81, more particularly described as units as follows:

Unit 22: Commencing at the Northeast corner of Lot 8, Block "H", thence along the East line of said Lot South 8°12'00" East 51.70 feet for a point of beginning, thence continue along said line South 8°12'00" East, 19.93 feet, thence South 81°28'27" West,165.00 feet to the West line of said Lot 8, thence along said West lineNorth 8°12'00" West, 19.93 feet, thence North 81°28'27" East,165.00 feet to the point ofr Beginning. Being a part of Lot 8.

SURVEYOR'S NOTES:

1) Measurements were made in accordance with the United States Standard Foot.
2) Basis of Bearings Reference: Grid North and the grid bearings shown hereon are based on the following:
    a. Projection Zone: Florida North (State Plane)
    b. Projection Type: Lambert Conformal Conic
    c. Datum: North American Datum of 1983 with a datum tag of 2011 (NAD83 (2011))
    d. North as shown hereon is referenced to Florida Department of Transportation (FDOT) Horizontal Control Network.
3) Joseph Barrett, Florida Professional Surveyor and Mapper did not perform a title search, nor however a title search been provided. Therefore, the survey shown hereon is subject to any facts that may be disclosed by a full and accurate title search.
4) Lands shown hereon were not abstracted by Joseph Barrett, Florida Professional Surveyor and Mapper, and is, therefore, subject to deeds of record, unrecorded deeds, easements, right-of-ways, building setbacks, restrictive covenants, or other instruments which could affect the boundaries or use of the subject property.
5) This survey does not reflect, determine, or guarantee ownership.
6) No attempt was made to locate any underground foundations, septic/drain fields, underground utilities, or overhead utilities.
7) Additions or deletions to survey map(s) or report(s) by other than the signing party or parties is prohibited without written consent of the signing parties.
8) The horizontal positions shown hereon were derived from the utilization of a Leica 1200 Real Time Kinematic (RTK) Global Positioning System (GPS) dual frequency receiver in RTK Mode utilizing the Florida Department of Transportation (FDOT) Florida Permanent Reference Network (FPRN).
9) The field survey was performed between April 11, 2018 through April 16, 2018 and recorded in Field Book 538, Pages 11-17.
10) Right of way and parcel lines are based on the Escambia County Property Appraiser's maps. They are "For Illustrative Purposes Only".
11) Improvement locations shown hereon may be exaggerated and not to scale for clarity purposes.
12) Documents used in the preparation of this Boundary survey: Escambia County Property Appraiser's Maps; existing field monumentation, and the Following Legal Description recorded in the Public Records of Escambia County, Florida: O.R. Book 4141, Page 1137; Plat Book 7, Page 99 of the public records of Escambia County, Florida.
13) Improvement locations shown hereon may be exaggerated and not to scale for clarity purposes.
14) The description and boundary survey are not full and complete without the other.
15) Boundary lines as shown were determined by a boundary survey performed by Escambia County.
16) The official record of this survey is the original signed and sealed paper version. Any electronic version(s) is not valid unless it is identical in all forms and respects to the original signed and sealed paper version. The onus of comparison is placed on the user of the electronic version.

BOUNDARY SURVEY

Subject: Erress Boulevard Parcels

Clara:

You provided me with contracts for 4253 Erress Boulevard (JoAnna Cope) and 4250 Erress Boulevard (Rodney Jones). We have previously discussed these. The seller of each property would need to undertake significant steps to make the title insurable, and it would not be reasonable to expect that they would be willing or able to take these steps. Is it still your intent to submit these contracts for Board approval?

Checklist for Acquisition of Real Property

This checklist is provided to ensure compliance with the provisions of Section 46-139, Escambia County Code of Ordinances (a copy of which is included on the reverse side of this checklist). This checklist is not intended to supersede each staff member's obligation to be familiar with the requirements of Section 46-139. For each real property acquisition, please complete the information below and include the completed checklist with the BCC recommendation to approve the acquisition. If any of the information requested in this form is not applicable or required, please state the reason in the comments section provided below.

Cc: jjgirls2011@gmail.com; Shawn S. Hunter <sshunter@myescambia.com>
Subject: RE: Joanna Cope / 103 Jardine Road A

Ms. Cope:

The original amount due on these liens was in excess of $57,000, prior to you beginning your payment plans. Orders of the Special Magistrate constitute liens on all real property owned by the violator and, unless lien relief is granted, the liens typically remain attached to the property when the property changes hands.

Each time the county grants lien relief, the County is agreeing to release one property from being covered by the liens, in exchange for payment of some portion of the total amount due (over $57,000). The liens from Jardine attached to Norwood because you were previously the owner of Norwood.

In short, the release of one property from the liens does not automatically release any other associated property. Until the total amount due is paid, the County is merely agreeing to release certain properties in exchange for payment of certain amounts.

Please let me know if you have any additional questions.

Thank you,

Subject: Re: Joanna Cope / 103 Jardine Road A

Thanks for all your hard work on these matters- it sure has been confusing- there is just one more thing I believe should have been different- I am attaching the letter from 3/21 where it shows the liens on Norwood stemmed from Jardine and that to release the liens it would take 1200.00 - Norwood never had liens so when we paid the 1200.00 it should have released Jardine and Norwood as I read it- but by attaching it to both properties it made it appear that we owed those monies twice instead of once- I had already put a payment plan in place and had paid on the 1200.00 to clear Jardine which should ultimately clear Norwood-please clarify and let me know, I will do whatever is necessary- thanks- Joanna

Board of County Commissioners
Escambia County, Florida

Title:	County Commissioners' Technology Policy
Date Adopted:	August 20, 2009
Effective Date:	August 20, 2009
Reference:	
Policy Amended:	New Policy

A. **Purpose:**

The purpose of this policy is to establish rules for how the County Commissioners use technology to communicate to ensure they conduct themselves in a responsible, professional, ethical and efficient manner, with an eye towards the public's perception of their elected officials and how they conduct business. Improvements and evolutions in technology are occurring so rapidly that it is difficult for the laws and rules that govern County business and elected officials to keep pace. The Florida Sunshine Law and Public Records Law pose special challenges to the County Commissioners who should follow not just the letter of those laws, but also their intent. It is vital to the credibility of Escambia County government that the public perceive their Commissioners are respectful of those laws and of the citizens they govern.

B. **Policy:**

1. **Applicability:** This policy is intended as an additional layer of control over the County Commissioners' use of technological resources, regardless of the ownership of those resources. This policy is intended to supplement any existing policy, rule or law that applies to the County Commissioners or to County-owned resources.

2. **Board Meetings:** Commissioners shall not use cell phones, PDAs, Blackberrys, laptops, netbooks or similar devices, regardless of ownership of the device, during any County Commission meeting, including workshops. Commissioners are encouraged to turn off, silence, turn to vibrate or abandon all such devices during meetings. In the event of a perceived emergency, a Commissioner may use these devices but shall leave the Chambers or room where the meeting is held during use.

3. **Electronic Mail (E-Mail):** In order to ensure compliance with Florida's Public Records' Law, including record retention requirements, Commissioners shall not use private e-mail accounts to conduct County business. Private e-mail accounts include outside business e-mail accounts, personal accounts and any other e-mail account that does not

operate through Escambia County's server. However, should a Commissioner receive e-mail in a private e-mail account, the Commissioner shall forward the e-mail to a County-maintained e-mail account and shall request that the author of the original e-mail use the County-maintained e-mail account for future communications. Such actions shall not be a violation of this policy.

Further, in the event of unavoidable circumstances, including, but not limited to, lack of access and unavailability or malfunction of the County e-mail system, a Commissioner's use of a private e-mail account to conduct County business shall not be a violation of this policy, so long as the Commissioner forwards such communications to a County-maintained e-mail account as soon as practicable. Failure to comply with this provision could result in a violation of Florida's Public Records' Law.

Commissioners are discouraged from using County-maintained e-mail accounts for personal business and may wish to sort any such e-mails that are present in a County-maintained account into a personal file or to a personal e-mail account to ease the task of records management and retention.

4. **Text Messaging and Instant Messaging:** Commissioners shall not use text messaging, instant messaging or similar types of instantaneous communications to conduct County business on any device capable of such methods of communication, regardless of ownership of the device. Where possible, Commissioners are encouraged to request that such functions be disabled on their County-owned devices.

5. **Social Networking Accounts, Twitter, Story Forum Comments, Blogs and Similar Communications:** Commissioners shall not discuss County business on social networking sites, including, but not limited to, Facebook and Twitter, and shall not blog or otherwise communicate on the internet about County business other than via e-mail as provided above and in other applicable laws and regulations.

   However, a commissioner may post a story forum comment or response on a blog on a site maintained by another person or media outlet regarding County business so long as the commissioner posts the comment or response using the commissioner's actual name and the commissioner does not post a comment or response when another commissioner has already posted on that specific article or issue. A copy of any such posting shall be retained by the County.

6. **Other County Policies:** Commissioners are responsible for compliance with all other applicable County policies.

C. **Enforcement:**

A majority of the County Commission may take any available enforcement action against a fellow Commissioner found to be in violation of this policy. Additionally, the County shall not be responsible for any costs resulting from a Commissioner's failure to follow this policy. Such costs are to include, but not be limited to, text messaging charges and attorney's fees, unless specifically allowed by State law. All other applicable laws, rules and policies may have other enforcement mechanisms that could apply. County Commissioners are responsible for compliance with the Sunshine Law and Public Records' Law at all times during their term.

D. **Future Amendments:**

The Board shall revisit this policy on a regular basis in order to consider amendments due to relevant court decisions, Attorney General's Opinions, Legislative actions or desires of the Board.

Board of County Commissioners
Escambia County, Florida

Title:	**County Commissioners' Technology Policy**
Date Adopted:	~~**August 20, 2009**~~ **May 16, 2019**
Effective Date:	~~**August 20, 2009**~~ **May 16,2019**
Reference:	
Policy Amended:	**New Policy**

A. **Purpose:**

The purpose of this policy is to establish rules for how the County Commissioners use technology to communicate to ensure they conduct themselves in a responsible, professional, ethical and efficient manner, with an eye towards the public's perception of their elected officials and how they conduct business. Improvements and evolutions in technology are occurring so rapidly that it is difficult for the laws and rules that govern County business and elected officials to keep pace. The Florida Sunshine Law and Public Records Law pose special challenges to the County Commissioners who should follow not just the letter of those laws, but also their intent. It is vital to the credibility of Escambia County government that the public perceive their Commissioners are respectful of those laws and of the citizens they govern.

B. **Policy:**

1. **Applicability:** This policy is intended as an additional layer of control, over the County Commissioners' use of technological resources, regardless of the ownership of those resources. This policy is intended to supplement any existing policy, rule or law that applies to the County Commissioners or to the County-owned resources.
2. **Board Meetings:** ~~Commissioners shall not use cell phones, PDAs, Blackberrys, laptops, netbooks or similar devices, regardless of ownership of the device, during any County Commission meeting, including workshops.~~ Commissioners are encouraged to turn off, silence, turn to vibrate or abandon all ~~such~~ noise-emitting electronic devices during meetings. In the event of a perceived emergency or exigent circumstances, a Commissioner may use ~~these devices~~ his/her cell phone but shall leave the Chambers or room where the meeting is held during use.
3. **Electronic Mail (E-Mail):** In order to ensure compliance with Florida's Public Records' Law, including record retention requirements, Commissioners shall not use private e-mail accounts to conduct County business. Private e-mail accounts include outside business e-mail accounts, personal accounts and any other e-mail account that does not

operate through Escambia County's server. However, should a Commissioner receive e-mail in a private e-mail account, the Commissioner shall forward the e-mail to a County-maintained e-mail account and shall request that the author of the original e-mail use the County-maintained e-mail account for future communications. Such actions shall not be a violation of this policy.

Further, in the event of unavoidable circumstances, including, but not limited to, lack of access and unavailability or malfunction of the County e-mail system, a Commissioner's use of a private e-mail account to conduct County business shall not be a violation of this policy, so long as the Commissioner forwards such communications to a County-maintained e-mail account as soon as practicable. Failure to comply with this provision could result in a violation of Florida's Public Records' Law.

Commissioners are discouraged from using County-maintained e-mail accounts for personal business and may wish to sort any such e-mails that are present in a County-maintained account into a personal file or to a personal e-mail account to ease the task of records management and retention.

4. ~~**Text Messaging and Instant Messaging:** Commissioners shall not use text messaging, instant messaging or similar types of instantaneous communications to conduct County business on any device capable of such methods of communication, regardless of ownership of the device. Where possible, Commissioners are encouraged to request that such functions be disabled on the County-owned devices.~~
5. **Social Networking Accounts, Twitter, Story Forum Comments, Blogs, and Similar Communications:** ~~Commissioners shall not discuss County business on social networking sites, including, but not limited to, Facebook and Twitter, and shall not blog or otherwise communicate on the internet about County business other than via e-mail as provided above and in other applicable laws and regulations.~~

   ~~However, a~~ A commissioner may post a story forum comment, a post, or response on a blog ~~on~~ or a site maintained by himself/herself or another person or media outlet regarding County business so long as the commissioner ~~posts~~ writes the post, comment or response using the commissioner's actual name and the commissioner does not post a comment or response when another commissioner has already posted on that specific article or issue. A copy of such posting shall be retained by the Commissioner. ~~County.~~
6. ~~**Other County Policies**~~ **Compliance With Law:** Commissioners retain all rights afforded them as citizens under the United States Constitution and the laws of the United States of America and of the State of Florida; Commissioners are individually responsible for compliance with all ~~other~~ applicable laws ~~County policies~~

C. **Enforcement:**

A majority of the County Commission may take any available enforcement action against a fellow Commissioner found to be in violation of this policy. Additionally, the County shall not be responsible for any costs resulting from a Commissioner's failure to follow this policy. Such costs are to include, but not be limited to, texting messaging charges and attorney's fees, unless specifically allowed by State law. All other applicable laws, rules and policies may have other enforcement mechanisms that could apply. County Commissioners are responsible for compliance with the Sunshine Law and Public Records' Law at all times during their term.

D. **Future Amendments:**

The Board shall revisit this policy on a regular basis in order to consider amendments due to relevant court decisions, Attorney General's Opinions, Legislative actions or desires of the Board.

The Board shall revisit this policy on a regular basis in order to consider amendments due to relevant court decisions, Attorney General's Opinions, Legislative actions or desires of the Board.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16126 **County Attorney's Report 10. 1.**
BCC Regular Meeting **Action**
Meeting Date: 05/16/2019
Issue: Approval of Proposed Settlement of Workers' Compensation Claims Brought by Former Employee Donna Balsan
From: CHARLES PEPPLER, Deputy County Attorney
Organization: County Attorney's Office
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Approval of Proposed Settlement of Workers' Compensation Claims Brought by Former Employee Donna Balsan.

That the Board approve a proposed settlement agreement in the sum of $17,500.00. The proposed settlement would constitute a complete resolution of all outstanding Workers' Compensation claims including medical benefits, indemnity benefits, attorney's fees and costs brought by Donna Balsan. The County would be responsible for payment of the settlement in full.

BACKGROUND:

Donna Balsan is a 67-year-old female who was employed by the Board of County Commissioners or the Sheriff for over thirty years as a Food Service Assistant. At the time of her accident, she was employed by the Sheriff in the County Jail. On August 14, 1996, Ms. Balsan was moving a large mixing bowl when she sustained an injury to her low back with symptoms radiating into her left leg and left foot. The accident was determined to be compensable and benefits were provided accordingly.

Medical treatment ensued. Ms. Balsan underwent an MRI scan of her lumbar spine which revealed a posterior disc herniation at the L5-S1 level among other findings. A neurosurgeon recommended that a left-sided L5-S1 laminectomy be performed. She underwent this surgery in November 1996. However, Ms. Balsan experienced a worsening of her left foot symptoms. She was referred for evaluation for pain management. After an MRI, a second laminectomy and discectomy procedure was performed in June 1998. She was found to have reached maximum medical improvement (MMI) and was given an 11% permanent

impairment rating.

Ms. Balsan has continued with her pain management treatment in addition to surgical intervention for the left foot and ankle. In August of 2016, her physician, Dr. Erik Nilssen, who had performed the surgery on her foot, determined that she had reached MMI with no permanent impairment or restrictions resulting from the left foot injury.

In June of 2017, Ms. Balsan retired from her employment with the County. She is a recipient of Social Security Retirement benefits and a Medicare beneficiary. She is currently under the care of an orthopedic surgeon and a pain management specialist. Given Ms. Balsan's status as a Medicare beneficiary, a Medicare Set-Aside Report was obtained with projected medical expenditures of $12,949.00 over the course of her life expectancy. The County's exposure for medical expenses slightly exceeds the Medicare set-aside as the Medicare set-aside takes only into account Medicare-covered treatment and supplies. Because of Ms. Balsan's lengthy post-accident work history and recent retirement, medical expenditures would be the most likely cause of significant exposure to the County.

The parties and their respective counsel negotiated a provisional settlement agreement releasing the County as well as PGSC from future liability for Workers' Compensation benefits in exchange for a lump sum payment of $17,500.00. Our retained attorney, Brian T. Hanley, has recommended settlement for this sum. As part of the settlement, Ms. Balsan would assume responsibility for any outstanding liens and would execute a general release in which she waives any other potential claims against the Board.

BUDGETARY IMPACT:

The appropriate reserves from Internal Service, 501 Fund have been set to fund the self-insured retention portion of the settlement.

LEGAL CONSIDERATIONS/SIGN-OFF:

Mr. Hanley will prepare the settlement documents.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16141 **County Attorney's Report 10. 2.**
BCC Regular Meeting **Action**
Meeting Date: 05/16/2019
Issue: Approval of Proposed Settlement in Escambia County, Florida v. Evanston Insurance Co. and Markel Service, Inc., Case No. 3:19-cv-00538-MRC/EMT
From: CHARLES PEPPLER, Deputy County Attorney
Organization: County Attorney's Office
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Approval of Proposed Settlement in Escambia County, Florida v. Evanston Insurance Co. and Markel Service, Inc., Case No. 3:19-cv-00538-MCR/EMT.

That the Board take the following action:

A. Approve acceptance of payment of $75,520.00 from Evanston Insurance Co. and Markel Service, Inc. for closure and post-closure costs as provided by the endorsements to the Environmental Impairment Liability policy obtained by Louisiana Investment Group, LLC regarding closure of Saufley Landfill. In exchange for this payment, the County would execute a general release of all claims in favor of Evanston Insurance Co. and Markel Service, Inc.; and

B. Authorize the Chairman to execute the general release to be drafted by the attorneys for Evanston Insurance Co. and Markel Service, Inc.; and

C. Authorize the County Attorney's Office to execute all documents necessary to effectuate the settlement, including a joint stipulation for dismissal with prejudice.

BACKGROUND:

Evanston Insurance Company, which is a subsidiary of Markel Insurance Company, issued an environmental impairment liability (EIL) policy to Louisiana Investment Group, LLC (LIG). The limits of liability were $1,401,696.00 for each pollution condition. The Florida Department of Environmental Protection required financial assurances from LIG that it would be able to close the Saufley Landfill

once its useful life had expired. Chapter 61-701.730, F.A.C. requires the owner or operator of a CD&D landfill to perform five years of monitoring the landfill after closure.

The policy contained two endorsements which supplemented the EIL coverage. The first endorsement allowed for the recovery by LIG or a third-party beneficiary such as Escambia County of closure costs for the Saufley Landfill. That endorsement provided for $344,817.00 in coverage. A separate endorsement was issued for post-closure costs required by the five-year monitoring plan required under Chapter 62-701.730. The limit of post-closure costs is $56,879.00. The two endorsements totaled $401,696.00 in coverage.

Evanston Insurance Co. and Markel Service, Inc. have offered the sum of $75,520.00 to resolve all claims by the County under the terms of the insurance policy. In exchange, the County would execute a general release and cooperate in the dismissal with prejudice of this lawsuit. Patrick T. Johnson, Director of Waste Services Department, is in agreement with this disposition of the lawsuit. In addition, this office recommends resolution of the lawsuit for this sum of money.

BUDGETARY IMPACT:

N/A

LEGAL CONSIDERATIONS/SIGN-OFF:

Deputy County Attorney, Charles V. Peppler will review all legal documentation to effectuate the settlement and execute the stipulation for dismissal with prejudice.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16145 **County Attorney's Report 10. 3.**
BCC Regular Meeting **Action**
Meeting Date: 05/16/2019
Issue: Engagement of Steven K. Hall as Special Master for Relief by Terramore Development, et. al. from a decision of the Escambia Co. Board of Adjustment
From: MEREDITH CRAWFORD, Assistant County Attorney
Organization: County Attorney's Office
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Engagement of Steven K. Hall as Special Master for Relief by Terramore Development, et. al. from a decision of the Escambia Co. Board of Adjustment.

That the Board take the following action:

A. Approve a proposed settlement with Defendants; and

B. Authorize the Chairman to execute the proposed settlement agreement, if approved by the Board.

[THE PROPOSED SETTLEMENT AGREEMENT TO BE PROVIDED UNDER SEPARATE COVER].

BACKGROUND:

Shu Cheng Shurett, Leo Huang own property with Parcel ID No. 23-3S-31-2001-0000-000 in Escambia County, Florida. Teramore purchased the property. She Cheng Shurett and Leo Huang qualified as an "owner" for purposes of the Florida Land Use and Environmental Dispute Resolution Act.

Teramore would like to construct a retail store located along Gulf Beach Highway on the Property, which is designated as MU-S (Mixed-Use Suburban) on the County's Future Land Use Map and zoned C (Commercial) pursuant to the County's LDC.

On July 24, 2017, it was concluded that Teramore's proposed retail store was not permissible and did not meet certain locational criteria in the County's LDC. On August 7 and August 8, 2017, Shu Cheng Shurett, Leo Huang and Teramore filed administrative appeals of the July 24th decision. On October 18, 2017, the Escambia County Board of Adjustment (BOA) denied the administrative appeal. On November 16, 2017 Shu Cheng Shurett, Leo Huang and Teramore sought relief of the BOA's denial. On August 3, 2018, Judge Scott Duncan ruled in favor of the Petitioners.

On February 20, 2019 the Board of Adjustment conducted another quasi-judicial hearing on the administrative appeals. The BOA allowed County staff to present new evidence and voted to deny the administrative appeals.

BOARD OF COUNTY COMMISSIONERS
Escambia County, Florida

AI-16142 **County Attorney's Report 10. 4.**
BCC Regular Meeting **Action**
Meeting Date: 05/16/2019
Issue: Agreement for Sale and Purchase - Navy Federal Credit Union
From: ALISON ROGERS, County Attorney
Organization: County Attorney's Office
CAO Approval:

RECOMMENDATION:

Recommendation Concerning Agreement for Sale and Purchase - Navy Federal Credit Union.

That the Board take the following action:

A. Authorize the sale of up to 100 acres adjacent to Navy Federal Credit Union's campus on Nine Mile Road in accordance with the terms and conditions of the Agreement for Sale and Purchase; and

B. Waive the retention of the fractional interest in the phosphates, minerals, metals, and petroleum in the property to be conveyed by the County, in accordance with Section 270.11(3), Florida Statutes; and

C. Authorize the Chairman or Vice-Chairman to execute the Agreement for Sale and Purchase and other documents necessary to complete the transaction.

[THE PROPOSED AGREEMENT TO BE PROVIDED UNDER SEPARATE COVER].

BACKGROUND:

On April 4, 2019, the Board adopted Resolution No. R2019-42, authorizing negotiation for sale to Navy Federal Credit Union (NFCU) of up to 100 acres of the County-owned land at the former Navy Outlying Landing Field Eight (NOLF-8) for expansion of its existing campus, pursuant to the Board's economic development powers under Section 125.045, Florida Statutes.

The Agreement for Sale and Purchase contains the terms of the sale proposed by

NFCU. NFCU will require the County to convey all of its interest in the phosphates, minerals, metals, and petroleum in the property to facilitiate any future development. As such the County will not be retaining its fractional interest in these rights, which is otherwise required by Section 270.11(3), Florida Statutes.

BUDGETARY IMPACT:
