FUTURE LAND USE: MU-S, Mixed-Use
DISTRICT: Suburban
OVERLAY DISTRICT: 5
OVERLAY DISTRICT: N/A

BCC MEETING DATE: 05/02/2013

SUBMISSION DATA:**REQUESTED REZONING:**

FROM: VAG-2, Villages Agriculture Districts, Gross Density (one du/five acres)

TO: V-3, Villages Single Family Residential, Gross Density (five du/acre)

RELEVANT AUTHORITY:

- (1) Escambia County Comprehensive Plan
- (2) Escambia County Land Development Code
- (3) Board of County Commissioners of Brevard County v. Snyder, 627 So. 2d 469 (Fla. 1993)
- (4) Resolution 96-34 (Quasi-judicial Proceedings)
- (5) Resolution 96-13 (Ex-partes Communications)

CRITERION (1)**Consistent with the Comprehensive Plan.**

Whether the proposed amendment is consistent with the Comprehensive Plan.

Comprehensive Plan (CPP)FLU 1.1.1 Development Consistency. New development and redevelopment in unincorporated Escambia County shall be consistent with the Escambia County Comprehensive Plan and the Future Land Use Map (FLUM).

CPP FLU 1.3.1 Future Land Use Categories The Mixed-Use Suburban (MU-S) Future Land Use (FLU) category is intended for a mix of residential and nonresidential uses while promoting compatible infill development and the separation of urban and suburban land uses. Range of allowable uses include: Residential, Retail and Services, Professional Office, Recreational Facilities, Public and Civic. The minimum residential density is two dwelling units per acre and the maximum residential density is ten dwelling units per acre.

CPP FLU 1.5.3 New Development and Redevelopment in Built Areas. To promote the efficient use of existing public roads, utilities and service infrastructure, the County will encourage redevelopment in underutilized properties to maximize development densities and

intensities located in the Mixed Use-Suburban, Mixed Use-Urban, Commercial and Industrial Future Land Use districts categories (with the exception of residential development).

FINDINGS

The proposed amendment to V-3 is consistent with the intent and purpose of Future Land Use category MU-S as stated in CPP FLU 1.3.1. as the parcel is currently compatible with the allowable densities and uses within the FLU category. The parcel is accessing the existing public roads and if development occurs, the applicant may expand the use of utilities and service infrastructures.

CRITERION (2)

Consistent with The Land Development Code.

Whether the proposed amendment is in conflict with any portion of this Code, and is consistent with the stated purpose and intent of this Code.

6.05.22 VAG 2-Gross density (one dwelling unit per five acres).

Minimum lot size = five acres unless clustered.

If clustered, minimum lot size = one acre.

A. Intent and purpose.

2. Intent and purpose of VAG 2 district. This district is characterized by the following types of agricultural lands:

- (a) Small rural land areas of highly productive agricultural soils that may not be economically viable in a mainstream fanning operation due to their size, and changes being undertaken in the surrounding area; or
- (b) Rural land areas with a mix of small farm operations and a typical rural residential density of one unit per four acres. The soils of these areas are least valuable for agricultural production and most suitable for future conversion out of the rural land market; or
- (c) Rural land areas which are not being used to support large farming operations, and that are characterized by a mix of natural resources and soils typically unsuitable for urban residential densities or other urban uses unless sewered.

6.05.24 V-3-Villages Single Family Residential, Gross density (five units per acre).

A. Intent and purpose of V-1 through V-3 districts. Single-family detached residential district characterized by urban land development patterns with residential subdivision densities varying from one unit per acre to five units per acre. Mobile homes are not allowed. No minimum lot size is required for new subdivisions, but development must meet overall maximum density requirements. V-2A may be used in any AIPD overlay area with a compatible future land use designation. Density will be determined by the accident potential zone density allowed for their property, not to exceed three d.u./acre. In AIPD-2, density is limited to three d.u./acre. Refer to article 11 for uses and densities allowed in V, villages single-family residential areas located in the A. Intent and purpose of V-1 through V-3 districts. Single-family detached residential district characterized by urban land development patterns with residential subdivision densities varying from one unit per acre to five units per acre. Mobile homes are not allowed. No minimum lot size is required for new subdivisions, but development must meet overall maximum density requirements. V-2A may be used in any AIPD overlay area with a compatible future land use designation. Density will be determined by the accident potential zone density allowed for their property, not to exceed three d.u./acre. In AIPD-2, density is limited to three d.u./acre. Refer to

article 11 for uses and densities allowed in V, villages single-family residential areas located in the Airport/Airfield Environs. Structures within Airport/Airfield Environs, Zones, and Surfaces remain subject to the height definitions, height restrictions, and methods of height calculation set forth in article 11.

FINDINGS

The proposed amendment **is consistent** with the intent and purpose of the Land Development Code because the V-3 zoning district allows for single family residential development with more density and allowable uses.

CRITERION (3)

Compatible with surrounding uses.

Whether and the extent to which the proposed amendment is compatible with existing and proposed uses in the area of the subject property(s).

FINDINGS

The proposed amendment **is compatible** with surrounding existing uses in the area. Within the 500' radius impact area, staff observed properties with zoning districts VR-1,V-1,VAG-2. There were 41 single family residential homes, and 8 vacant parcels.

CRITERION (4)

Changed conditions.

Whether and the extent to which there are any changed conditions that impact the amendment or property(s).

FINDINGS

Staff found **no changed conditions** that would impact the amendment or property(s).

CRITERION (5)

Effect on natural environment.

Whether and the extent to which the proposed amendment would result in significant adverse impacts on the natural environment.

FINDINGS

According to the survey provided by the applicant, wetlands **were** indicated on the subject property. When applicable, further review during the site plan review process will be necessary to determine if there would be any significant adverse impact on the natural environment.

CRITERION (6)

Development patterns.

Whether and the extent to which the proposed amendment would result in a logical and orderly development pattern.

FINDINGS

The proposed amendment **would** result in a logical and orderly development pattern. The surrounding area is currently developed residential with village rural and village agriculture

zoning designations.

RE: Cantonment Property

To Whom It May Concern:

We are submitting a re-zoning application for the property located at 2842 Nowak Rd., Cantonment, FL being property reference number 361N31-200-000-000. This property contains road frontage along Nowak Dairy Rd, Sherri Lane and South Highway 97. V-3 villages single family residential property. We are working on preliminary plans to submit a residential master plan for this site. The plan will provide frontage lots, along with an access to both Nowak Dairy Rd. & Sherri Lane for a total of two (2) accesses. There will be no direct access to South Highway 97 involved in this plan. Our client believes this location is ideal for a residential subdivision that will add character to the residentially zoned properties that surround this area. The plan for the residential property is to be complete in 25 lot phases, (with 10 frontage lots and 15 interior lots) until all frontage lots are developed. The current plan being developed will not exceed 100 lots because of wetland areas and lot size restrictions that the developer wants to maintain. The lots in the subdivision will be an average size of 85x130 foot minimum sized lots. We ask that the zoning be allowed to support the residential subdivision on this 44 acre site.

If you should have any question or require additional information, please advise.

Sincerely,

POLYSURVEYING

I/We acknowledge and agree that no future development for which concurrency of required facilities and services must be certified shall be approved for the subject parcel(s) without the issuance of a certificate of concurrency for the development based on the actual densities and intensities proposed in the future development's permit application.

I/We also acknowledge and agree that approval of a zoning district amendment (rezoning) or Future Land Use Map amendment does not certify, vest, or otherwise guarantee that concurrency of required facilities and services is, or will be, available for any future development of the subject parcels.

I/We further acknowledge and agree that no development for which concurrency must be certified shall be approved unless at least one of the following minimum conditions of the Comprehensive Plan will be met for each facility and service of the County's concurrency management system prior to development approval:

- a. The necessary facilities or services are in place at the time a development permit is issued.
- b. A development permit is issued subject to the condition that the necessary facilities and services will be in place and available to serve the new development at the time of the issuance of a certificate of occupancy.
- c. For parks and recreation facilities and roads, the necessary facilities are under construction at the time the development permit is issued.
- d. For parks and recreation facilities, the necessary facilities are the subject of a binding executed contract for the construction of the facilities at the time the development permit is issued and the agreement requires that facility construction must commence within one year of the issuance of the development permit.
- e. The necessary facilities and services are guaranteed in an enforceable development agreement. An enforceable development agreement may include, but is not limited to, development agreements pursuant to Section 163.3220, F.S., or as amended, or an agreement or development order issued pursuant to Chapter 380, F.S., or as amended. For transportation facilities, all in-kind improvements detailed in a proportionate fair share agreement must be completed in compliance with the requirements of Section 5.13.00 of the LDC. For wastewater, solid waste, potable water, and stormwater facilities, any such agreement will guarantee the necessary facilities and services to be in place and available to serve the new development at the time of the issuance of a certificate of occupancy.
- f. For roads, the necessary facilities needed to serve the development are included in the first three years of the applicable Five-Year Florida Department of Transportation (FDOT) Work Program or are in place or under actual construction no more than three years after the issuance of a County development order or permit.
